## More profit from POTATOES, better LAWNS, FLOWERS and VEGETABLES.

No matter where you use Soilgro—on your potatoes, corn, grain—on your lawn, flowers or in your garden, you'll be amazed at the growth it promotes.

Soilgro feeds any plant that has roots. It is the new scientific method of hastening and increasing growth. It is cheap—for six dollars you get a package that will do for a good sized lawn and garden, or an acre and a half of roots or grain—for all summer. It is easy to apply and eliminates for the man in town, the difficulty of procuring and the objection to applying barnyard manure or other fertilizer. On farms it can be used with manure with splendid results.

Here's what one man says about Soilgro  
Temiskaming, Que., Sept. 4, 1924.  
"I take much pleasure in saying that I got very good results from Soilgro as we had a very bad summer for flowers. I am pleased to say that my flower garden took first prize at the Exhibition and as there is but one other here that has used Soilgro we both had the best gardens."
