Georgetown Gets Latest Thing In Seismographs

(United Press) WASHINGTON, Aug. 13.—The Georgetown University seismological observatory, which in the last 13 years has given to the world first news of many earthquakes, now assures the public that its reports in the future will be even more dependable.

The university today has among its instruments a new seismograph, known as the Gallitzin vertical seismograph, the only one of its kind on this side of the Atlantic. The special features of this delicate piece of apparatus are magnetic registration and photographic recording, whereby the element of friction in the other types of machines is entirely eliminated. Accordingly, the machine will permit the recording of many more of the world's quakes, and permit of a more accurate interpretation of the writings of a shaking earth. Dr. Sieberg, of the Jena seismological station places the number of quakes felt sensibly or instrumentally the world over from 9,000 to 10,000 yearly. Of these in the past only from 90 to 110 have been actually recorded at Georgetown. Father Francis A. Tondorf, director of the observatory, hopes that this number may now reach from three to four hundred.

When it first was founded in 1911, the Georgetown Observatory had only one seismograph—the Welch type. It carried a stationary mass of 80 kilos. The rocking during whistlers of the south tower of the Healy Building, in whose base the instruments were at first placed, necessitated their removal to a cave beneath the quadrangle.

Father Tondorf inaugurated the work at Georgetown, when, in 1910, the International Seismological Society requested the Jesuit order, with many colleges in the United States, to establish a chain of stations in this country.

AGED MAN MET TERRIBLE DEATH

SACKVILLE Aug. 13.—According to a phone message from Port Elgin, an aged man named Guston Gould, of Lowther's Lake, near Shogogue, met a terrible death last week, when his eye and part of his head were torn out by the horn of a strange heifer.

It appears that the man went to drive the animal from the yard, when it turned upon him. He was alone at the time, the family being at church. The unfortunate victim died soon after their return.

CLARKIN—CAHILL—A very pretty wedding took place at St. Anne's Church, Lot 65, on the morning of July 15th, when Miss Adella Cahill daughter of Mr. and Mrs. Richard Cahill of Kingston was united in the holy bonds of matrimony to Mr. Patrick Clarkin of New Wiltshire. The ceremony was performed in the presence of friends and relatives of the happy couple by Rev. Father Curran, P.P. The bride was attended by Miss Clara Clarkin sister of the groom, while the groom was ably supported by Mr. Victor Cahill, brother of the bride. The bride looked charming in a travelling suit of blue tulle with hat to match. After the ceremony a sumptuous breakfast and dinner was served at the home of the bride's parents. The wedding presents included many useful and costly gifts. The groom's gift to the bride was a handsome pendant with amethyst stone and a similar one with emerald stone to the bridesmaid. Mr. and Mrs. Clarkin motored from Kingston to Borden that same evening. They spent their honeymoon visiting various parts of the Maritime Provinces and other Canadian Cities. The bride couple will make their home in New Wiltshire.

PERSONALS

Mr. Wallace Mohbs, has returned to Boston, after a visit to the Island.

Mr. James S. Hardy, Pleasant Grove left Saturday last on a visit to Boston.

Mr. and Mrs. Frank Watts and daughter Laura, Pleasant Grove, were the guests, recently of Mr. and Mrs. Benj. McMillan, W. Cove Head.

Mrs. John N. Evans, and Master John of Irishtown are visiting friends in the city and Cove Head.

Miss Fannie B. Manse, Furlington, is spending the week at Cove Head the guest of her cousin, Miss B. Jeanne MacEachern.

The Misses Doris and Laura Wright and their little sister Roma 70 Prince St., Charlottetown, are spending part of their vacation at Brackley Beach.

Black Gold Held In High Esteem By Fond Racing Public

LOUISVILLE, Ky., Aug. 13.—Too much popularity may affect the turf career of Black Gold, as it finally ruined famous Old Rosebud ten years ago, in the opinion of Kentucky turf experts who see in the public clamor for the Hooie gold many of the possibilities which brought destiny to Old Rosebud.

Not since 1914, when Old Rosebud won the Kentucky Derby and set the record for the race at 2:02 1/2, has there been a racer held so high in public esteem. Lovers of horseflesh are showering their affections on this black son of Black Tony and the little Indian pony, Uccit.

Old Rosebud, after winning the Derby in 1914, was sent East and broke down during a race at Belmont. His owners sent him to Texas and three years later he came back and beat Roamer and other leaders. He was so popular he was "raced to death" and was destroyed two years ago.

For several years no horse received the admiration that was Old Rosebud's. Black Gold made a bid for it last winter when he won the Louisiana Derby at New Orleans. He was the favorite in the Kentucky Derby and came from behind to win the fiftieth renewal of that classic.

He went on to Cleveland and annexed his third derby, the Ohio event. His first reversal came in the Latonia Derby a short time later, when Chilhowee and Gibbon romped home ahead of him. Like the only race Man O' War ever lost, turf enthusiasts still are trying to explain how it happened. Black Gold obtained revenge by beating Gibbon by six lengths in the Chicago Derby. He thus equaled the record made in 1913 by Claude, the only other horse that ever won four derbies in a year.

A chance to win five derbies in a single season slipped by at Ashland, Ky., when Bob Tail and Alwood beat Black Gold, the favorite, by nose. Turf experts began to wonder if Black Gold was not being raced too often to satisfy the demands of the public. Unlike famous thoroughbreds of old, Black Gold was not bred in the purple. There is some doubt as to his mother's blue blood, Uccit, belonged to an Indian, Al Hoots. When Hoots died his wife carried out her husband's wish and mated Uccit with Black Tony, E. R. Bradley's colt. Black Gold has won for Mrs. R. M. Hoots in two seasons more than \$100,000. There is a little brother of Black

CANADIANS IN LONDON

THE OFFICE OF THE HIGH COMMISSIONER FOR CANADA IN LONDON WEEK BY WEEK

31st. July, 1924.

During the week ended July 30th, 403 visitors called at the office out of which 224 obtained interviews and 139 registered.

Through the instrumentality of the High Commissioner's Office invitations to the last Royal Garden Party were obtained for nearly 300 visiting Canadians. Invitations for the Royal Naval Review off Spithead were also obtained for a number of Canadian visitors all of whom greatly appreciated the opportunity of seeing the wonderful

The High Commissioner for Canada has submitted to Her Majesty the desire of the Canadian National Exhibition authorities to have the Queen's Doll's House on Exhibition at Toronto next year but the appeal, like many others of a similar character which have been received, cannot be complied with as the structure is too delicate to be moved about from place to place.

Sir W. A. Churchman (a Director of the Imperial Tobacco Company) has expressed a gratifying opinion in favour of the exhibits of Canadian grown tobacco at the British Empire Exhibition. He has remarked upon the improvement in quality in some tobacco grown in Canada and says that if this improvement is maintained there is no reason why it should not find a steadily increasing market in Great Britain. It has been suggested at the High Commissioner's Office that an Empire Academy should be founded with a special section for each of the Dominion and Colonies to exhibit works of British artists at several exhibitions each year. The Scheme would have the backing of the Faculty of Arts and its objects would not be in conflict with the work of any existing association.

The Sandy Lodge Golf Club, whose links are situated near Northwood, Middlesex, about fifteen miles from London, has written the High Commissioner for Canada saying that members of recognized Golf Clubs in the Dominion may, on presentation of card, be permitted the privileges of the Club for two days on payment of Green Fee. This rule, dispensing with the usual formality of introduction of visitors by a Club member, offers the courtesies of the Club House and Green to travelling golfers.

The High Commissioner for Canada has been informed that one of the £100 prizes in Class B, in the Empire's Bonniest Baby Competition has been awarded to a James E. Rowe of Whitby, Ontario, and another boy, Kenneth Farrwell, from Mount Forest, Ontario has won a £20 prize in Class A. These prizes are to be presented at the Grand Presentation Ceremony at the British Empire Exhibition, Wembley, on July 31st, at 3 p. m.

An invitation has been extended through the High Commissioner for Canada to members of the medical profession and dentists in Canada to attend the 14th. London Medical Exhibition which will be held from October 6th to 10th, next at the Central Hall, Westminister. The general public are not admitted to the Exhibition as it is of a purely professional nature.

The High Commissioner's Office has been advised of the arrival in London this evening of a party of nine boys of the City of Quebec, members of the Boy Scouts Association of Canada, accompanied by Colonel Wood of Quebec and Mr. C. W. Thompson. The party have visited the battlefields of France and Belgium and after camping at Wembley for a week will return home.

The Young Ladies Basketball Team from Edmonton, Alberta, with Mr. Perry Page in charge of them, who came over to attend the Olympic Games and who recently succeeded in scoring a victory over their French competitors will reach London this evening. This Team is perhaps the most remarkable group of girl athletes in the world. They are the world champions in Basketball, having defeated every team in the United States and Canada. They hope to be able to arrange an exhibition game in London during their stay here.

The High Commissioner's Office has received a report from the Canadian Fruit Trade Commissioner stating that interest in the forthcoming Imperial Fruit Show, at Birmingham has been greatly stimulated by the presentation by the Agents General for Ontario, British Columbia, Quebec and Nova Scotia, of a £50 Silver Challenge Cup for the best entry in the dessert class of the British Empire Section. This is open for competition to Canada and the United Kingdom and has to be won three times.

The Bristol Trade Commissioner reports that a Canadian manufacturer of hand shoe tacks has secured an order from a West of England importer in competition with Belgium, Germany and United Kingdom manufacturers.

The Canadian Official Mining News letter circulated to the Press this week was based on an article by Dr. G. A. Young of the Geological Survey, in regard to the coal resources available in Canada. The News Letter now in preparation for circulation next week takes the form of an article by an Officer of the Dominion Fuel Board on British Anthracite in the Canadian Coal market. There is now in preparation for circulation during the next few days a Bulletin in regard to the 1924 Crop Prospects; and two Canadian Official Mining

Publicist Urges Japan To Reject Americanism

(United Press)

TOKIO, Aug. 13.—An article in the newspaper Kokumin, written by Kanzo Uchimura, one of the most outspoken leaders of the movement to separate the native Christian churches of Japan from the American missionary bodies, urges the Japanese to "get away from the Americanization which has been infecting our national life for the last five years."

Uchimura, himself a Christian, has for several years worked as an independent missionary without American help. He has been one of the leaders of the popular protest against the American immigration act excluding Japanese.

Referring to the agitation for the boycott of American goods, Uchimura writes: "The American way of living, the American civilization, is more poisonous than anything else manufactured in the United States. Few Japanese are aware of the extent to which our country has become Americanized. Our news papers advertisements are in the American style. The sensational tone of our journals with their head lines is nothing but an Americanism. In these matters the British way is far superior to the American. Our papers should follow the example of such moderate respectable journals as the London Times and the Manchester Guardian."

"The so-called cultural movement which has been going on in Japan for the past four or five years has been nothing but a process of Americanization. When Japan dispenses with the American way of living she will easily and without inconvenience be able to dispense with American goods."

ONE RIOT, ONE RANGER.

Not so long ago a bunch of gunmen started a reign of terror in a certain Texas town, and the terror-stricken mayor wired frantically to the governor for Texas Rangers to restore peace. A special train came down from the capital and one lone Ranger stepped out. "Where's the rest of the outfit?" demanded the mayor and sheriff. "Rest, hell," replied the Ranger mildly, "You ain't got but one riot, have you?"

"Tramp: 'I have seen better days, sir.' Business Man: 'Yes, I suppose so; but I haven't time to discuss the weather with you now.'"

ties on the production in Canada last year of Nickel and Asbestos. The High Commissioner's Office is also circulating to the Electrical, Engineering, Mining and General Trade Press a Bulletin from the Dominion Water Power Branch, Department of the Interior, dealing

Teferi of Abyssinia Works For Good Will of League Little Willie Of War Times

(United Press) (By Dominion News Service)

GENEVA, Aug. 13.—Impetus to an expert inquiry into world slavery at Geneva, was given by an official report received from Abyssinia, which declares that slave trading has now been practically suppressed throughout the realm. In writing to the League of Nations the throne, expresses his regret, however, that domestic slavery's immediate abolition does not seem possible, but that the government has issued regulations which, it is hoped, will produce the best results.

By the application of these regulations, says the prince, a large number of persons who are now slaves will obtain their liberty and others will be assured of receiving humane treatment. Moreover, the making of new slaves will be impossible. Prince Teferi, who is an ardent supporter of the League and wishes to do everything to gain international support and approval through the League, concludes by expressing his conviction that the measures adopted constitute a stage towards the total and final suppression of slavery.

The prince declares he is adopting "energetic and ruthless methods" against the slave dealers, for there still remain some who dare to violate the law. The pursuit of these bandits is exceedingly difficult because immense Abyssinia has still far from perfect communications. Police patrols have been organized at the frontiers, and it is hoped to reach an agreement with the states which administer the neighboring countries for taking effective combined action.

THE ONE TO TAKE HIM Dub—"I'm going to marry a girl who can take a joke."

U. S. Home Builders Study Methods Of Dutch

(United Press) AMSTERDAM, Aug. 13.—American town planning experts have been comparing notes with European City Builders at an international congress held here recently.

The lure of urban life is as strong in Holland as elsewhere, and housing difficulties are acute. With characteristic foresight, however, the Dutch are grappling with the problem in a practical way with the result, as the vice-president of the Congress, Senator Vinck of Belgium, put it in his closing address, that "Holland within the next 25 years is destined to become the promised land of popular housing."

The American delegates viewed the recent improvements and extensions of Amsterdam, The Hague and Rotterdam, and even inspected them from the air. All agreed that the old-fashioned Dutch gables looked far more attractive from aloft than a collection of modern flat-roofed dwellings.

Questions of decentralization, the fostering of civic pride, the disposal of open spaces around cities and the building of smaller "steel" towns around big centers, were discussed by the experts, including the health ministers of Britain and Germany, and leading city specialists from all over Europe.

Thomas Adams of New York, who confessed to a distinct preference for the stately 18th century York

A "WIFE'S" LONG SECRET

(By Dominion News Service.)
YARMOUTH, Aug. 13.—A woman's 33 years' secret was revealed in the police court during the hearing of a summons against a man for assault.

His "wife" explained that 33 years ago she was actually at the church door ready to be married when the man got out of the carriage and would not enter the church.

She had lived with him ever since, and had had 13 children. No one had known before this that she was unmarried.

The man was placed on probation, and the chairman advised him to go home and live happily and comfortably with his "wife."

houses of Amsterdam, spoke of the assignment of definite sections of cities to industrial purposes. Flav el Shurhoff and E. F. Goodrich also presented ideas in city planning, while Prof. H. J. Hubbard of Harvard university, who favors the star-shaped laying out of a city, referred to the necessity of timely reservation of open spaces for public recreation grounds.

Herbert Hoover and George B. Ford of New York were elected to the governing board of the International Town Building and Garden Cities Society. It was decided to hold the next congress in New York for the stately 18th century York.

Bobby (who has been given a new microscope for his birthday): "Grandma, can you lend me a flea?"
