Evangelists at Central Christian Church

Tomorrow, Sunday, at 11 a. m. and 7 p. m. Evangelist O. E. Hamlin of Ohio and Mr. Herbert D. Woodruffe associate in Gospel work will appear for the first time before a Charlottetown audience. Both of these men come from fields of gospel conquest and success. Scores of churches testify to the outstanding achievements of these men. Under God, Christian workers of Charlotte will accord these men, not only a hearty welcome but also cooperation that grows out of a desire to see men and women brought into fellowship with common Master Jesus Christ. Charlottetown is big enough to extend the right hand of fellowship

NEWMARKET, England, April 30.—Pillon, owned by A. D. Rothschild, won the classic Four Thousand and Guinness stakes for three year old fillies here today.

Last Night's Services

Continued from page 1.

a move. It is hard to get some people in Charlottetown to make a move. Some seem to want to but don't get to it.

The young man began to speak. A good sign. There was only one thing for him to talk about: Him who healed him and raised him up. We owe it to the work, our friends to speak about Jesus. We need a revival of religious conversation in Charlottetown. We need to learn to witness for Christ.

He delivered him to his mother. His words were not in vain, Jesus still restores sons to their mothers. No one is happier than mother when the boys come home. The speaker then told of a young man whom he had led to Christ while on a railway trip and of the young man's regret that he hadn't become a Christian earlier in life before his mother had passed away.

No message could bring more joy to mother tonight than the news of our return to God. Mothers who have passed on are interested as well as those on earth.

The speaker followed on with his appeal for decision. Decision cards had been given about for use in this service.

The closing hymn "Just As I Am" was sung. There was an interesting testimony and praise following.

BIRTHS

REID—At Middleton, April 30th, to W. J. and Mrs. Reid, a son.

DEATHS

THOMPSON—At Montague, April 29, 1926, the infant daughter of Mr. and Mrs. George P. Thompson.

DUNN—In this city, April 29th, Arthur Dunn, aged 25 years, funeral from his late residence, 125 Dorchester St., today (Saturday) at 2 o'clock for Saint Dunstan's Cathedral thence to R. C. Cemetery.

FULL—At 69 Upper Prince Street on April 30th, George E. Full in his 51st year. Funeral from his late residence at 2 p. m. on Sunday, May 2nd, thence by train to Sherwood Cemetery. Services starting at 1.30. Kindly omit flowers.

MURRAY HARBOR SERVICE.—Rev. C. E. Armstrong will preach at both services in Murray Harbor Christian Church, Sunday, May 2nd.

FUNERAL TUESDAY.—The funeral of the late Rev. T. J. DeLauder will take place at Sherwood Cemetery on Tuesday evening May 4th upon arrival of the early train from Borden.

NOT INSPECTOR NOW.—Mr. A. W. Bruce wishes it stated that he has not accepted the position as Prohibition Inspector nor would money be any inducement to him to accept it again.

ONLY SON DEAD.—The death occurred in the hospital Thursday night of Arthur Dunn, aged 25, of Charlottetown, leaving a sorrowing mother. The funeral notice will appear later.

ZION CHURCH.—Rev. M. Scott Fulton, D. D. graduate of Edinburgh University and formerly of Chalmers Church, Toronto, will preach in Zion Church tomorrow morning and evening.

ENROUTE FOR ENGLAND.—Messrs David Mathieson, Harry Jamieson and Reg. Bell left this morning for Montreal where they will join Mr. Eric McDonald and from where they will embark for Liverpool, Eng. They intend spending the next two months travelling through the British Isles, France and Belgium.

SUCCESSFUL CANDIDATE.—Mr. John A. McDonald of 43 Pownall Street, City, who has been a student at the Navigation School of the Navy League, Charlotte, Capt. M. C. Allenby, R. N., during the past winter, recently went up for examination before Capt. John B. Read, the Officer Examiner and has passed successfully for Master of a Passenger Steamer in the Coast Guard. Congratulations to Mr. McDonald.

Rapid Business Expansion.—"The development of the export

United States firms making the same goods in the United States, who were able much more quickly to respond to increases or decreases in requirements than was possible with any Canadian manufacturer.

"I wonder if people realize the extent to which the Federal Government has levied upon the motor car. As I said above, the duties collected in 1925 on materials for manufacture were \$10,000,000. Excess of cars produced by the manufacturers and sold in Canada was \$4,000. The result of this was that on every car made and sold in Canada the Federal Government alone levied a tax which averaged more than \$207 per car.

"Now, look at some of the inconsistencies of the present tariff. It has been announced that the duty

on a complete body is 20 per cent.; continues, the body maker goes out the duty on stampings, which in of business. This is an important most cases have to be imported, is industry. The duty on tops—20 30 per cent.; on upholstery mat—per cent—is lower than on the material and on hardware, 35 per cent. enters into the top. The car. You have the curious position that duty on the chassis is 20 per cent., the duties on the raw materials run but if you want to build up the chassis in Canada, make certain as high as 75 per cent. higher than chassis in Canada, make certain on the finished article." If this unit and import others, the duty on the axles is 35 per cent.; on the engine and transmission, 27 per cent.; on the electrical equipment 30 per cent., an impossible condition.

Why Industry Cannot Survive.—The question is at once raised, Why cannot an industry survive with 20 per cent. protection, and why has the cost of a car in Canada as they have? There is an impression that the motor industry, up to this date, protected by a duty of 35 per cent. Nothing could have been more misleading than the impression that a 35 per cent. duty on motor cars meant a protection to that industry of 35 per cent.

"The motor car, to an extent perhaps not equalled by any other industry in Canada, uses not only the important raw materials, but the finished products of a wide range of industries. Many of these products are as yet not commercially produced in Canada. In 1925 the domestic production of motor cars amounted to \$67,000,000 in value. If all these motor cars had been imported at 35 per cent. duty, the duty so collected would have amounted to \$17,000,000.

"On the other hand, the motor car manufacturers themselves paid in duties, less the drawbacks they received, over \$7,400,000 in duties. Part makers, from whom we received data, paid \$1,250,000 more, and a conservative estimate establishes that the car manufacturers and those supplying material and parts to them paid to the Government \$10,000,000 duties as compared with a gross duty that would have been collected had the cars been imported, of \$17,000,000.

Ultimate Rate of Duty.—"The protection to the car industry, therefore, was not the \$17,000,000 afforded by a 35 per cent. tariff, but \$7,000,000, which works out at 14 per cent. In other 21 per cent. was actually taken by the Government itself from the manufacturers in the shape of duties they paid on the raw materials they imported. The duty has now been reduced to 20 per cent. on the class of cars which are mainly manufactured in Canada, namely those which retail at \$1,200 and under. No changes have been made in the duties on material and parts other than the provision that a drawback of 25 per cent. of the duties will be allowed if the car is 50 per cent. produced in Canada.

"It is obvious from the foregoing that where the protection amounted to only 14 per cent. for the car manufacturers and the duty has been reduced to 20 per cent., the whole of the protection has been wiped out, and the industry is to lay under the tariff as proposed in the Budget without protection.

Levy of \$207 Per Car.—"I wonder if people realize the extent to which the Federal Government has levied upon the motor car. As I said above, the duties collected in 1925 on materials for manufacture were \$10,000,000. Excess of cars produced by the manufacturers and sold in Canada was \$4,000. The result of this was that on every car made and sold in Canada the Federal Government alone levied a tax which averaged more than \$207 per car.

"Now, look at some of the inconsistencies of the present tariff. It has been announced that the duty

on a complete body is 20 per cent.; continues, the body maker goes out the duty on stampings, which in of business. This is an important most cases have to be imported, is industry. The duty on tops—20 30 per cent.; on upholstery mat—per cent—is lower than on the material and on hardware, 35 per cent. enters into the top. The car. You have the curious position that duty on the chassis is 20 per cent., the duties on the raw materials run but if you want to build up the chassis in Canada, make certain as high as 75 per cent. higher than chassis in Canada, make certain on the finished article." If this unit and import others, the duty on the axles is 35 per cent.; on the engine and transmission, 27 per cent.; on the electrical equipment 30 per cent., an impossible condition.

Why Industry Cannot Survive.—The question is at once raised, Why cannot an industry survive with 20 per cent. protection, and why has the cost of a car in Canada as they have? There is an impression that the motor industry, up to this date, protected by a duty of 35 per cent. Nothing could have been more misleading than the impression that a 35 per cent. duty on motor cars meant a protection to that industry of 35 per cent.

No changes have been made in the duties on material and parts other than the provision that a drawback of 25 per cent. of the duties will be allowed if the car is 50 per cent. produced in Canada.

"It is obvious from the foregoing that where the protection amounted to only 14 per cent. for the car manufacturers and the duty has been reduced to 20 per cent., the whole of the protection has been wiped out, and the industry is to lay under the tariff as proposed in the Budget without protection.

Levy of \$207 Per Car.—"I wonder if people realize the extent to which the Federal Government has levied upon the motor car. As I said above, the duties collected in 1925 on materials for manufacture were \$10,000,000. Excess of cars produced by the manufacturers and sold in Canada was \$4,000. The result of this was that on every car made and sold in Canada the Federal Government alone levied a tax which averaged more than \$207 per car.

"Now, look at some of the inconsistencies of the present tariff. It has been announced that the duty

on a complete body is 20 per cent.; continues, the body maker goes out the duty on stampings, which in of business. This is an important most cases have to be imported, is industry. The duty on tops—20 30 per cent.; on upholstery mat—per cent—is lower than on the material and on hardware, 35 per cent. enters into the top. The car. You have the curious position that duty on the chassis is 20 per cent., the duties on the raw materials run but if you want to build up the chassis in Canada, make certain as high as 75 per cent. higher than chassis in Canada, make certain on the finished article." If this unit and import others, the duty on the axles is 35 per cent.; on the engine and transmission, 27 per cent.; on the electrical equipment 30 per cent., an impossible condition.

Why Industry Cannot Survive.—The question is at once raised, Why cannot an industry survive with 20 per cent. protection, and why has the cost of a car in Canada as they have? There is an impression that the motor industry, up to this date, protected by a duty of 35 per cent. Nothing could have been more misleading than the impression that a 35 per cent. duty on motor cars meant a protection to that industry of 35 per cent.

"The motor car, to an extent perhaps not equalled by any other industry in Canada, uses not only the important raw materials, but the finished products of a wide range of industries. Many of these products are as yet not commercially produced in Canada. In 1925 the domestic production of motor cars amounted to \$67,000,000 in value. If all these motor cars had been imported at 35 per cent. duty, the duty so collected would have amounted to \$17,000,000.

"On the other hand, the motor car manufacturers themselves paid in duties, less the drawbacks they received, over \$7,400,000 in duties. Part makers, from whom we received data, paid \$1,250,000 more, and a conservative estimate establishes that the car manufacturers and those supplying material and parts to them paid to the Government \$10,000,000 duties as compared with a gross duty that would have been collected had the cars been imported, of \$17,000,000.
