AN AWFUL WARNING

Sir,—A terrible warning was given a few days ago, to those boys who steal and eat green apples. A small boy ate a big green apple and died. He had not stolen it. He only found it and ate it and died—with in four hours. Boys who think it fun to rob orchards and break into gardens when the owners are asleep or away, and eat the green apples they steal, ought to learn a lesson from this fact. But will they? It is to be hoped that they will.

GROWTH OF CANADA

Sir,—Compared with that of the United States, the growth of Canada has been slow. But slow growth is good growth. That was good advice of the Chief Justice of England who said at St. John, a few evenings ago,—according to The Guardian's telegraphic news—that it is "more important that the population which Canada has should be of the right stamp, rather than numerically great,—and above all British and white." Canada is cold in winter, and therefore its people should be sturdy and strong. There are in Canada many rough places to be made smooth and much natural wealth to be developed; and therefore its people need to be skillful and industrious. Whatever their race or color, the interests of Canada demand that the people of Canada shall be British in sentiment and be content to live under, and be obedient to British and Canadian law. It has been well said that "the period of development of resources and growth of population which lies ahead of Canada will eventually be considered of outstanding significance in the building of the nation." To that end read the quality of its people's most important.

POTATO PROSPECTS

Sir,—The prospects of the potato crop, and the prices that will be paid our farmers for them, are just now the subject of much speculation. We all hope that the reports of "blight" are exaggerated. Yet if there is much blight, the supply will be lessened, while the demand will certainly be maintained; and prices will, therefore, be high on that account.

All the "cobblers" that were planted early are now ripe; and it is possible that the decayed tops of these potatoes may be the cause of the reported "blight" in Maine and New Brunswick as well as here, and that the tubers may be quite sound in that case farmers will have more potatoes to sell,—but the prices are not likely to be so high. In either case the potato situation is an interesting one.

It's a great thing for us that there is in the United States a very large industrial population which must be fed, and that the farmers of the Western States and Western Canada continue to grow large fields of wheat and but small ones of potatoes and other roots. Still your warning to our farmers against planting large areas of potatoes and small areas of other crops holds good. The interests of the people of Prince Edward Island lie in mixed farming. With good barns, plenty of feed, and careful attention, our farmers can produce first-class animals of all kinds. That fact has been demonstrated and is becoming known to the leading stock-raisers of Canada and the States, so that prices for well-bred animals produced here are likely to rule high—higher as the years pass—and with many cattle the fertility of our soil will be maintained without the expense of large amounts of money every year for chemical fertilizers.

In the long run, it will therefore pay our farmers better to raise animals of all good breeds that are popular than to devote large parts of their farms to the growth of potatoes.

ENJOYED HOLIDAY—The Lawrence, Mass., leader says:—"News comes that Alderman John A. Flanagan had a nice old time reception at his home on Prince Edward Island. He deserved it too! It was the first time in almost twenty years that he had visited his birthplace. Leaving there as a carpenter for the states and Lawrence, he early demonstrated his worth here, and with the people of Lawrence showing the esteem in which they hold him with repeated elections to about the highest gift in public office they could bestow. Many more years of usefulness to Lawrence and many more trips in birthday time is the general wish of the thousands of friends that Alderman Flanagan has in town."

CANADA'S DAIRY PRODUCTION
 Q. What is Canada's Dairy Production?

A. Canada's Dairy Production continues to increase in volume, all of the provinces increased creamery butter yield. Dairy factories totalled in 1926, 3,074, also an increase, with an output value of \$131,576,142 of butter and cheese factories. Miscellaneous products, such as ice cream, whey, etc., reached a value of \$31,276,795. Canada's dairying industry continues to be therefore one of great and growing importance.

SCIENCE EXPLORES
 (Continued from page 4)

that in dreams we approach the more primitive emotional states of childhood. The ordinary sense impressions of touch, sight, hearing, etc., become visualized in dreams, and memory plays a great part in their reconstruction. While some of Freud's theories on dreams are rejected by many modern psychologists, his statement that dreams and their accompanying emotions are the expressions of some hidden fear or desire is recognized as being fundamentally true. In dreams certain impressions, compressed or gathered together during waking hours are liberated in the form of emotional incoherent and illogical experiences in which criticism and judgment are entirely in abeyance, since the mind, no longer the controlling agent, is itself directed by the fantasies of the brain.

Business cares had played havoc with Boston's health, and he called to see the family doctor.

The doctor informed him that he was in a bad way, but, providing he took a holiday and special treatment, all would come right. "What'll that run me in for?" asked Benson. "I'm not a rich man, you understand."

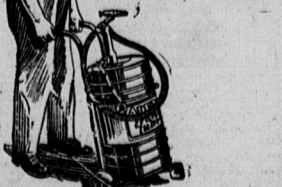

"Well," replied the doctor, "it's a rather unusual question, but I think thirty-five pounds would see you safe enough."

"H'm," Benson looked thoughtful. "I'm afraid you'll have to make me a better offer, doctor, I had a much lower bid from the undertaker."

Turpentine, if fabric is not too delicate. Use chloroform for the more delicate things.

IN MEMORIAM

MRS. SUSANNA MCWADE

The death occurred, very suddenly, at the home of her daughter, Mrs. Thomas Koughan, 52 Weymouth St. City on Friday, August 26, of Mrs. Susanna McWade, widow of the late James J. McWade, of St. Teresas, P. E. Island.

The deceased lady, who was in her seventy-first, (71st) year, was in her usual health and able to be around as was her custom, up till the time of her death. After having assisted with the household duties on Friday afternoon she retired to her room, where she was found a few minutes later in a dying condition. Rev. Mgr. Maurice McDonald was hastily summoned, and administered the last Sacraments of the Roman Catholic Church. Medical aid was also called in, but God had claimed her soul for His own.

The late Mrs. McWade, who was a daughter of the late James and Ann Mullin of Hermitage, Lot 49, is survived by her family of three daughters and seven sons: Nellie, of Lynn, Mass.; Mrs. Thomas Koughan and Annie of Charlottetown; John, Michael, Frank, Andrew and Joachim, Dorchester; Mass.; George, Bangor, Maine; and Thomas, Nevada. One daughter and five sons having hastened from their homes in the United States to be present at the funeral. There are also left to mourn three sisters and three brothers. Mrs. Mary Connolly, Peakes Station; Mrs. Isabella Doyle, Earnscliffe; Sarah J., Bellingham, Wash.; Patrick, Hermitage; John, Bellingham, Wash.; and James in western U. S. A.

The funeral, which was largely attended, took place on Tuesday morning, Aug. 30, from St. Teresas church, where the funeral mass and the services at the grave were conducted by her former pastor, Rev. I. R. A. MacDonald. The pallbearers were the five sons; John Michael, George, Andrew and Joachim, and Mr. Owen McQuaid. The following Spiritual and Floral offerings were received:

MASS OFFERINGS

- Mr. and Mrs. Thomas Koughan, City (High Mass)
- Mrs. Riley and family, City, (2)
- Mrs. F. Koughan, and Margaret, City.
- Mr. and Mrs. James Connolly, Peake's.
- Mrs. Thos. Doyle and family, Earnscliffe.
- The O'Brien family, city.
- Mrs. Mary Herrell and Boys, city.
- Margaret and Gus Murphy, city.
- Emma Connolly, Dorchester, Mass.
- Edward Martin, Dorchester, Mass.
- Mrs. Bennett Maher, Dorchester, Mass.
- John A. Mooney, Dorchester, Mass.
- Lillian Happeny, Dorchester, Mass.
- Harry Happeny, Dorchester, Mass.
- Wm. W. Hutchinson, Lynn, Mass. (High Mass)
- Katie McKenna, City.
- Peter McGonnell, City.
- Mrs. McCloskey, City (2).
- The Griffith family, city.
- Mrs. Patrick Clarkin and family, City, (High Mass)

SPIRITUAL OFFERINGS

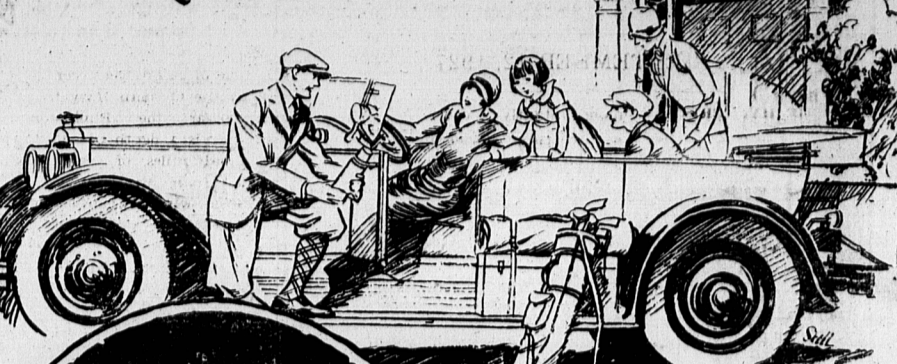

- Mr. and Mrs. Peter Whitty and Nora, city.
 - Mr. and Mrs. Frank Murphy, city.
 - Mr. and Mrs. Geo. Chappell, city.
- FLORAL TRIBUTES**
- Pillow—The family.
 - Cross—Maurice, Wade, and Mary Koughan.
 - Shams—Mr. and Mrs. Joseph Shams, City.
 - May her soul rest in peace.

PRODUCING HIGH GRADE CREAM

Although the buttermaker is continually at war with bacteria, nevertheless he is absolutely dependent on them for his living. Not all bacteria produce malodorous and undesirable products when growing in cream. Indeed, some of them produce the very things that give butter its highly desirable flavors. Chemically pure butterfat is practically tasteless, and the taste that good butter has is almost entirely due to the absorption of desirable products of bacteria fermentation. Fortunately, these desirable bacteria grow at comparatively low temperatures, so that the keeping of cream cold not only checks the growth of many of the undesirable bacteria, but encourages the growth of desirable ones. Good clean cream carefully produced and kept in a cold place will usually have a desirable fermentation. On the other hand, cream carelessly handled and not cooled will nearly always have a very undesirable fermentation, since the undesirable microbes are associated with fat, and their growth is encouraged by relatively high temperatures. For these reasons, the creameryman is continually insisting, first for clean cream, and second for frequent delivery. If he can get cream from clean farms, and particularly if he can get it delivered often, he can control the type of bacteria that grows in the product, and these in turn control the flavor score of his product. In other words, the creameryman would rather control this important factor himself than to leave it in the hands of someone else. Intelligent handling of cream to the best interest of everybody concerned is dependent on the following points:

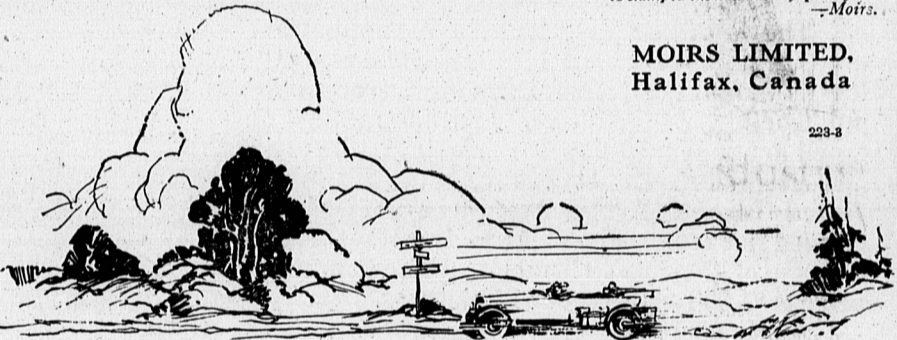

1. Keep only healthy cows, and allow only healthy people to handle the cream.
2. Insist on clean cows and clean utensils.
3. Cool the cream immediately after separating.
4. Add the new cream to that al-

For your family—QUALITY

CHOCOLATES
 by **Moirs**
 EVERY PIECE NAMED

CANADA'S CANDY

Dad: Everybody comfortable? We have to make 120 miles before lunch.
 Mother: Yes—these bags crowd me a bit—but oh John, I forgot to get some chocolates.
 Bill, Jr. Yes, Daddy, we'd like some candy.
 Dad: All right. I'll treat you all to the very best. I'll buy a box of Moirs on the way out of town.

On the bottom of every chocolate there is stamped the hallmark of quality.

MOIRS LIMITED,
 Halifax, Canada

the larger volume.

5. Keep the cream as cold as possible within reason.
6. Avoid exposure of cream at any time to odoriferous substances.
7. Deliver the cream as frequently as possible during hot weather.
8. Deliver only high test cream, as it is less affected by bacteria development.
9. During transit keep the cans covered with wet blankets in order that the evaporation from the blankets will absorb the heat from the cream and keep it cold.
10. Do not allow the cans to stand exposed to the sun or in other warm places while waiting transportation.

MISS RENA MAE WELDON BECAME THE BRIDE OF MR. ROBERT JOHN BELL, OF MONCTON
 (Sackville Tribune).

A wedding of much local interest was solemnized quietly at the home of Mrs. W. L. T. Weldon, Squire Street, Sackville, shortly after noon Wednesday when her daughter, Rena Mae, was united in marriage to Mr. Robert John Bell, of Moncton, son of Mrs. W. J. Bell of Bridgewater, N. S., Rev. Dr. H. Philip, pastor of the United Church officiated at the ceremony, which took place in the presence of close friends and immediate relatives. The bride, who was given away by her brother, Mr. Lorne Weldon, looked very charming in a gown of white georgette with embroidered flowers in white chemise over shell pink crepe du chene. Her veil of silk net with coronet of pink and mauve flowers. In the dining room, the table was centred with the bride's cake, over which was suspended a large white crepe bell, with bow of tulle at top, attached to hoop drapings, from which flowed white streamers knotted with sweetpeas. The wedding march from Mendelssohn was played by Mrs. G. M. Muttart, sister of the bride. During the signing of the register, Mrs. W. S. Godfrey, of Westville, N. S. sang beautifully, "For you alone."

Following the ceremony, a dainty luncheon was served, the bride and groom receiving the congratulations of their friends.

Later Mr. and Mrs. Bell left by auto for Nova Scotia, where they will spend their honeymoon. On their return they will reside at 157 St. George St., Moncton.

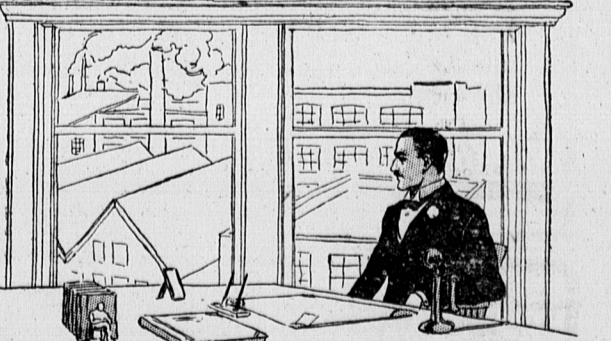

The bride's going away costume was a charming model of powder

silver over grey crepe du chene, with hat, gloves, shoes and stockings to match. With this she wore a coat heavily trimmed with mole skin.

The happy couple were the recipients of numerous beautiful wedding gifts, the bride having recently been given several showers. She is well known and popular among a large circle of friends.

Among the visitors from out-of-town at the wedding were: Mrs. W. J. Bell, of Bridgewater, N. S., mother of the groom, Mr. and Mrs. Laurence Bell, Dartmouth, N. S., Mr. Walter Bell, Halifax, Miss Marjorie Messerian, Fredericton, Miss Gwendolyn Hallett, Moncton, Miss Iva Thomas, Moncton, Miss Mamie Cameron, Rexton, Mr. and Mrs. Dwight Mitton, Moncton.

If shade is not available for the calves or hogs in the pasture or paddock, a simple board shelter should be constructed.

Why a Captain of Industry?

BECAUSE he can lead other men; because with his forceful intellect, his hard-working brain and body he can "get things done."

How important health factors in the career of such a man! How closely he must observe the laws of living—particularly right eating!

Such men who are careful of their health appreciate the wonderful nourishment which Grape-Nuts supplies. It gives them five essential food elements. It's remarkably easy to digest. It's crisp—properly exercising teeth and gums through chewing. And there's no food more appetizing. Grape-Nuts costs less than one cent a serving—four teaspoonfuls is sufficient. Ready to eat with milk or cream. At all grocers in wax-wrapped packages. Made in Canada.
