SUMMER COTTAGE wanted to rent for the Summer near the City, write A. B. C. Box 38, City, Stating whether furnished or not, and rent wanted. 4752-5-23-21.

FOUR IN CUSTODY—Four unemployed men from the mainland were taken into custody Saturday evening on charges of vagrancy. They will appear before the Stipendiary Magistrate tomorrow.

RETURNED HOME—Mrs. Bert Green, of Halifax and Messrs. Edward and Jack Dowling, of Boston, Mass., returned to their homes on Friday morning. They have been on the Island since Tuesday, having accompanied the remains of their mother, Mrs. Edward A. Dowling, for burial at Summerside. They received a cordial welcome from many old friends who were pleased to see them, although they regretted their sad errand.—S.

GIRL GUIDES—On Saturday morning some eighteen girls of the second Charlottetown Company of Girl Guides crossed to Rocky Point to spend the day. Shortly after arrival at Ringwood three troop fires were lighted and a substantial dinner of bacon and fried eggs etc. was prepared. After the inner girl was satisfied it was thought best to rest, after which the afternoon was taken up with baseball, paddling, picking flowers and a visit to the Indian Camp. All returned to the city by the last trip of the ferry tired but better for the day's outing.

Mr. R. P. Fielding of the local Capitol Theatre has resigned. He left for the mainland Saturday afternoon.

THE BAPTIST CHURCH
 Rev. A. C. Vincent preached sermons of interest and power before excellent congregations morning and evening yesterday. The subject of the morning sermon was "Our Companions," and of the evening "The Case of the Gadarene Demoniac." The choir directed by Mrs. G. Elliott Full led the congregation in worshipful music. Handel's "Surely He hath borne our griefs," Matthews' "Fairest Lord Jesus," Frey's "Thee that trust in the Lord," were sung. Dr. Vincent preached at Marshfield at 3 o'clock.

WATERTON'S WONDERFUL COLOURS
 One of the main characteristics of Waterton Lakes National Park in southern Alberta is the colouring of the rocks. Bands and spashes of tawny gold, greens, and wine colours darkening to purple, make some of the peaks look like a futurist painting, and give to the whole region a warm and colourful appearance.

Card Of Thanks
 Mr. and Mrs. Ronald J. MacDonald, of Cable Head East, wish to thank their neighbors and friends for their many kindnesses during the long illness and recent death of their daughter Annie. (Patriot Please copy). 4780-5-25-11

Alert—Airplanes fully serviced and engines warm, with pilots ready to take final orders and take off in fifteen minutes.

Stations—Blocks out from under planes and pilots ready to take off on signal.

Use Many Types
 Many types of airplanes—all designed for specific duties—will take part in the maneuvers. Some of them, with their outstanding characteristics, are:

Pursuit planes—Fast, easily maneuvered planes designed to shoot down and destroy enemy craft. They are each armed with two machine guns forward of the pilot, synchronized to shoot through the propeller. Their high speed is around 192 miles per hour. They have a service ceiling of 29,900 feet and can climb five miles in 20 minutes.

Observation planes—Slower, larger ships, generally two-seaters, armed with three machine guns—one forward, two aft—with cruising speeds of between 100 and 120 miles per hour. They are used as scouts.

Attack planes—Fast, heavily-armed ships used to pounce down on the ground forces. They carry six machine guns and 10 small fragmentation bombs. Their cruising speed is 100 miles per hour, but they can make 139.

Bombardment planes—Giant ships carrying heavy loads of bombs to destroy ground objectives. Their speed varies from 100 to 130 miles per hour. They are usually dual-motored and carry from two to four thousand pounds of bombs. They also carry machine guns to fight off attack by swift pursuit ships.

A Private Income of \$100 a month for Life
 ... from age 55!

\$100 A MONTH if in good health
\$100 A MONTH if in ill health
\$10,000 CASH in case of death

Just picture it—At 55, while still well and vigorous, to come into a private income (over and above other revenues), guaranteed for the rest of your life, of \$100 a month. You simply make yearly or half-yearly deposits of an agreed amount for a specified period, at the end of which you begin to receive a monthly income for life. That's only part of the story—if, meanwhile, through sickness or accident you should become totally disabled, you cease paying premiums and receive \$100 a month during such disability. At age 55, the regular income of \$100 a month, unimpaired, comes into effect. Look how your family is protected—Should you die at any time before reaching 55, your family receives \$10,000. Fill in and forward this form (which involves you in no obligation) and exact figures suited to your individual need will be sent you.

 Address (Street)..... (City).....

RADIO CENSUS
 One of the questions to be asked in the coming census is "Do you own a radio?" It may be suspected that the purpose of this is to locate persons who may not have paid their license, or to assist private radio companies to make sales by letting them know what families do not own radios. This is wholly unfounded. The answers to this question, as to all other census questions, are absolutely confidential—even to Government Departments. The purpose of the question is to explore and analyse just what the radio audience of Canada is—where it is located, where it is densest, and how it is made up according to the different elements in the population. With such information is indispensable to the formulation of satisfactory broadcasting. Radio is a further index of the Canadian standard of living, and some interesting studies may be expected as a result of the Census question.

The lights in a crowded bus had faded. "Can I find you a strap?" inquired a tall strap-hanger of a young lady who had boarded the bus at the last stop. "Thank you," she replied, "but I have one already." "Then would you mind letting go of my tie?" said he, shyly.

CHICAGO, May 23, (U.P.)—Hidden defects in rails now may be located by an electrical detector. The detector car passes an electrical current through the rails as it moves slowly along the track, and any interruption is recorded in the car by the jog of a pen line and by a splash of white paint on the rail.

Spruce Laths & Cedar Shingles

Putnam's CORN EXTRACTOR
 You get sure relief and stop the pain instantly if you use Putnam's Corn Extractor. This marvelous liquid takes the sting out of a corn in a moment or two. The corn shrivels up, drops off, and doesn't even leave a scar. All pain and distress come to an end when you use Putnam's.
 Price 35c at all druggists.

Juvenile Court Justice Blames Home Condition

KANSAS CITY, Mo., May 23 (U.P.)—Judge E. E. Porterfield, of the Juvenile Court of this city, who has become one of the most successful juvenile welfare workers in the United States, declares that home conditions are responsible for a large number of cases of juvenile delinquency.

"The average case that comes into my courtroom," he said, "can be traced directly to the home. People have the idea that home is a place to eat, sleep and quarrel, nothing more. No wonder children learn to spend their leisure on the street.

"People spend too little time at home and too many of their hours in automobiles."

Served Twenty Years
 Judge Porterfield has been on the bench for more than twenty years. In that time he has disposed of approximately 26,000 cases. His methods of treating with young offenders combine kindness, understanding and firmness.

The judge declares that a very large proportion of the young offenders that have faced him during the past twenty-two years to answer criminal charges have developed into useful citizens.

"The children who come into this

Future Tactics To Be Based On Air Maneuvers

(By Joseph H. Baird, United Press Staff Correspondent)
 WASHINGTON, May 23.—(U.P.)—The Army Air Corps is learning, during these late May days, to fight on a mammoth scale without precedent in the history of American military aviation.

In the days of old, generals learned military tactics by fighting battles. Then men wrote books, showing how to outflank the enemy, and spot his weak points. After that they learned from the printed page as well as on the battlefield. But there are no textbooks about aerial military operations, and that, so army officers say, is the salient reason for the great aerial maneuvers which started at Dayton this month, and which, according to program, will proceed eastward, continuing until the end of May, with problems of attack and defense over New York and other large eastern cities.

Are Army Air Corps expects to learn many lessons from the rush of 672 military planes from the middle west to the east coast and from their warlike "attacks" on Chicago, New York, Washington, Baltimore and Philadelphia.

Seek Definite Knowledge
 Brig. Gen. Benjamin D. Foulois, commander, and his staff are seeking answers to some very definite questions which would be raised if the Air Corps were called on to protect this country from attack.

They want to know, for instance, whether present tables of organization and equipment needs are adequate. They want to know whether an aid division—the largest unit of aerial strength—can be handled by the army's present staff. Other questions are:

1. How many and what spare parts must be laid down at various air-dromes to insure proper maintenance of aircraft?

2. Are present methods of communication adequate and what are the most effective methods of communication?

3. Can an air division, or parts of it, be controlled by radio so that changes in operations or routes may be made after it is in the air?

4. How many airplanes can be successfully operated from one air-drome? How many air-dromes would be needed in time of war?

5. What length of time does it take for a large organization to take off from, or land in, an air-drome? How long does it take to service a large air organization?

These—to the mind of an officer—are not theoretical questions, but concrete queries which will demand an answer in the event of war. If and when the needed facts are apparent, they will be put into military textbooks for future officers to study.

Cuticura Healed Large, Hard Pimples Scattered Over Face.
 "I had pimples and blackheads scattered all over my face. The pimples were large, hard and red, would hurt for a few days and then go away. My face usually was very itchy before a pimple formed. This went on for about one and a half years.
 "I saw Cuticura Soap and Ointment advertised so sent for a free sample of each. I used them and then purchased a box of the Ointment and a cake of the Soap and in about two or three weeks I was completely healed." (Signed) Miss Kathryn T. Dobka, Otho, Sask., Sept. 11, 1930.
 Soap 25c, Ointment 25 and 50c. Talcum 25c. Sold everywhere. Sample each free. Address Canadian Depot: J. T. Watt Company Limited, Montreal.

Lower Your Farm Costs
 Manual labour cannot compete against modern machinery. Lower your farm costs by mechanizing your farm and you can make money at prices that mean poverty for ill equipped farms.

We have everything you need for the purpose, such as:

- Gasoline Engines
- Saw Machinery
- Lighting Systems
- Power Plants
- Water Systems
- Potato Diggers
- Dusters
- Fertilizer Spreaders
- Steel Feed Cookers
