Persistence of Alfalfa Stands

(Experimental Farms News) Persistence of alfalfa stands depends upon a number of factors. Before alfalfa could be successfully grown in Canada it was necessary to find strains such as German and Ontario Variegata which were sufficiently hardy to withstand the Canadian winter. The use of seed of these or comparable varieties, however, is out of the question, helping to ensure the endurance of an alfalfa stand, says Dr. J. M. Armstrong, Division of Forage Plants, Central Experimental Farm, Ottawa. Other factors which determine the ability of alfalfa to remain thrifty throughout several seasons are drainage, the amount of lime available in the soil, fertility, freedom from disease and hay and pasture management.

Alfalfa will not do well on poorly drained land or on soils decidedly acid. These limitations can be overcome to certain extent by choosing this better drained field on the farm for alfalfa culture and by reducing the soil acidity with applications of lime.

Alfalfa is usually classed as an excellent soil building crop, being a legume, it gathers nitrogen from the air, later releasing it in the soil as nitrates. It is, however, a heavy feeder of phosphorus, potash and calcium. To maintain the fertility of the soil and the vigour of the alfalfa stand it is advisable to apply 200 to 300 pounds per acre of phosphate-potash fertilizers on seeds two or three years old.

In recent years the persistence of alfalfa stands have been greatly curtailed by such diseases as bacterial wilt and crown rot in some areas. Alfalfa varieties vary in their resistance to the attacks of these disease organisms.

At present the Division of Forage Plants at several Dominion Experimental Farms and in cooperation with pathologists from the Science Service are carrying on an extensive program to create new alfalfa varieties combining winter hardiness and disease resistance.

Latest the persistence of alfalfa stands can be greatly helped by proper management. Research has shown that in the average season, September is a critical period in the life cycle of the plant during which time starch reserves are stored in the roots. These reserves not only give the plant greater cold resistance but enable it to make its spring growth. If alfalfa is cut for hay during this critical period the subsequent two or three weeks growth depletes these root reserves and winter killing may be severe. If grassed closely throughout September the root reserves are never accumulated and the effect on the next year's stand is equally serious. However, if cutting is avoided in September the growth can be utilized in October either as hay or late fall pasture without affecting the root reserves.

FAMOUS HYMNS THE HOME OVER THERE Oh, think of the home over there, By the side of the river of light, Where the saints, all immortal and fair, Are robed in their garments of white. Oh, think of the friends over there, Who before us the journey have trod, Of the songs that they breathe on the air, In their home in the palace of God. My Saviour is now over there, At rest, Then away from my sorrow and care, Let me fly to the land of the blest. I'll soon be at home over there, For the end of my journey I see, Many dear to my heart, over there, Are watching and waiting for me. This hymn of Heaven, written by the Rev. Dr. Wm. Clinton Huntington, was a favorite in the days when all America was ringing with the songs and sermons of mass evangelism.

Its author was a Vermont clergyman and a Tullitt Clinton O'Keefe, who supplied its sweet-flowing tune, was an Ohio musician. Both men were born in 1830; their birthdays were but a few days apart. The hymn had a swinging refrain which, sung by grand audiences in the days of our grandparents, made many a church tremble to its very rafters. "The Home Over There" belongs in the collection with such gems as "The End of the Road," "When They Ring the Golden Bells for You and Me," "Someone Shall Enter the Pearly Gate," and the famous "Good Night and Good Morning" song: "When comes to the weary a blessed release, When upward we pass to His Kingdom of peace, Who be free from the woes that on earth we must bear, We'll say 'good-night' here, but 'good morning' up there."

INTER-ASIAN CONFERENCE

NEW DELHI - (CP) - An Inter-Asian relations conference is to be held here next spring. The Indian Council of World Affairs, which is convening the conference, has sent invitations to 22 Asiatic countries. The conference will discuss such questions as economic co-operation, industrial development, labor welfare and women's rights.

A STATEMENT REGARDING ISLAND HOG PRICES

Due to misleading statements which have appeared in paid advertisements in the local papers and over the radio during the past few days, we feel that the time has come to place before the farmers of this Province the facts regarding Island Hog Prices.

At the present time our paying price for Grade A Hogs is \$21.00 per cwt. F.O.B. shipping point and at this figure due to present ceiling prices on our sales we are unable to break even on our operations.

Table with 2 columns: Location and Price. Toronto \$20.25 F.O.B. Plant; Montreal \$20.25-\$20.50; Winnipeg \$18.70; Calgary \$18.40-\$18.80; Edmonton \$18.25; Prince Albert, Moose Jaw & Regina \$18.45; Saskatoon \$18.35-\$18.45; Vancouver \$19.00-\$19.35; Swifts Moncton Plant (for other than P.E.I. Hogs) \$21.00.

The new management of this Company pursued a policy of paying favorable prices consistent with market conditions and giving good service. As a result of this policy we have steadily increased the number of hogs slaughtered in our plant. This has reduced over a period of the past year the number of hogs available to The Livestock Marketing Board which in the main markets its product through one concern located in Moncton.

From advertisements appearing in recent issues of the local papers it would appear that this concern which is a wholly owned subsidiary of one of the largest American packing houses has recently enabled the Livestock Marketing Board to pay above our price for hogs—but this price is only being paid in Prince Edward Island. This same plant has apparently for some time paid only \$21 per cwt. DELIVERED PLANT for Nova Scotia and New Brunswick hogs. It is a fair inference that the price presently being paid to Prince Edward Island producers is not due to "effective marketing" but rather due to the determination of this other plant to try to gain a controlling position with respect to Island hogs regardless of price. There are numerous instances where such tactics have been used for the purpose of choking a local industry as a preliminary to forcing down the price to the farmer producer.

Previous to the time this Firm came under new ownership the prevailing tendency was for local hogs to be bought on the basis of Moncton prices less freight and Moncton prices in general to be Montreal prices less freight and commission, whereas today we feel safe in taking credit for the prices being considerably above Montreal level.

The purpose of this statement is two-fold— 1. To ask you to review the position of the farmer-producer in the Island before the new Davis & Fraser management and to compare it with the position since. 2. To ask you what the position of the farmer-producer would be if the local plant were forced out of business and they were left to the tender mercies of the internationally owned plant.

WE DO NOT ASK YOU TO SELL US ANY HOGS AT LESS THAN YOU CAN SECURE ELSEWHERE UNLESS YOU FEEL THAT YOUR LONG TERM INTERESTS WILL BE BETTER SERVED WITH US IN THE FIELD THAN IF WE ARE FORCED OUT.

Remember also the processing of your hogs sold to us is done by people of this Province. It might be of interest to the Public to learn that the Livestock Marketing Board (so called) which is so vociferously claiming credit for the present prices has never yet asked us for a price on hogs. The only time we ever received any hogs from this agency was at one time during a peak season when Moncton was unable to handle them.
