THE SITUATION IN IRELAND

Government and Opposition Playing a Waiting Game. Balfour's Resolution Condemning Military Coercion Inopportune.

(Special Cable) LONDON, May 3.—Although front benches in the Opposition are disinclined to push charges in regard to the Ulster plot further, in view of the more pacific attitude of the Government, attempts will be made by certain irreconcilables to further harry the Premier with questions.

downed promised earnest consideration. In the meantime in accordance with the threat to punish the ring-leaders in the gun-running affair, a few days ago, two members of Parliament and twenty others will be proceeded against. The Government's efforts in this direction will be as futile as with the Suffragettes and Ministerialists. The leaders recognized this though the rank and file are greatly disappointed. None of the Carsonites have been arrested.

"GYPSY" SMITH'S CLOSING ADDRESS

The closing services yesterday of the evangelistic week conducted by "Gypsy" Simon Smith in the First Methodist Church were very largely attended. At the night service, the Evangelist preached on "Conversion," based on the well-known Bible stories of Lydia, the south-saying girl and the Philippian jailer. Some people, he said, do not believe in conversion, but conversion was only another name for the spiritual curing of the wayward and the sinful, which was as surely effected as the curing of physical ailments. Every conversion of a sinner was a miracle, as it was only by the power of God that it was brought about, all human means failing to achieve it.

son came to different people in different ways, as was evidenced by the three Bible stories he had read that night. As in the case of the Philippian jailer, it would take nothing short of some catastrophe to bring some people to their senses. The breaking of a dam, the rushing of the released water down upon the town and the destruction of lives and property, and some people would never be done so before. At the time of the San Francisco earthquake, more people began to pray than had prayed for centuries. The Titanic disaster and we all began to sin. "Nearer My God to Thee." On that vessel was a young man, a friend of his, who with three companions was on a Sunday night playing cards. When the catastrophe occurred, where was that young man to be found? In the card room? No. But on the deck on his knees crying, "My God, have mercy on me!" It took nothing less than that terrible disaster to bring that young man to his senses. God heard his prayer, for after struggling for four hours and a half in the water he was picked up by one of the rescue boats from the Carpathia. What was the result? That young man no longer played cards but wherever he went to-day he told of the long-suffering God who heard his prayer and lifted him from a watery grave. Were they going to wait until God threatened them? Because He would it for some of them. He would have to do it. He would do it for their good. Were they going to wait until He did it? Didn't they think it was mean to wait until the time of trouble before they called on God? He thought the Church wanted to-day a spiritual earthquake. Didn't they think that the Church had been suffering from sleeping sickness in the Church, and they had got so comfortable that they did not want to be awakened. Didn't they think it was time they roused themselves, some of them, and went up to God in earnest prayer and asked Him to give them that revival? Conviction was not enough. There must be conversion; there must be in their hearts true love of Jesus. Didn't they think that was true conversion. He wanted them to do it that night—turn their backs on all that was wrong—make a full surrender, take up their cross and follow Jesus.

CONDENSED ADS TOO LATE FOR CLASSIFICATION

- One cent per word each insertion in this column. Cash must accompany order. Minimum charge twenty-five cents. TENDERS ARE CALLED FOR THE purchase of the Beales Corner property. See advertisement in another column. 2244-5-1M31. LEAVE YOUR FILMS AT TWO Macs. 1901-4-14M30n. WANTED, MAID FOR GENERAL housework. Apply 231, Richmond St. 1658-3-28Mt. Apply to Callie Vin Howatt, Victoria Fox Exchange. 2286-5-4M3i. Minard's Liniment Cures Diphtheria.

MONCTON LAD FOUND DROWNED

MONCTON, May 1.—Missing from his home since 4 o'clock Wednesday afternoon, the body of George Main, the eight-year-old son of Nelson Main, was found about 5.30 yesterday afternoon in a creek near the child's home. The child's mit and discovery of signs where the lad had evidently fallen into the creek gave the police a clue as to the fate of the boy. The child had been playing along the creek and evidently fell in and no one being near at the time he was quickly swept to his death by the freshet in the stream.

THE SITUATION IN MEXICO

(Canadian Press) VERA CRUZ, May 3.—After yesterday's acute alarm when it was reported that a force of Mexicans attacked an American outpost at the water plant, nine miles out, all is quiet here to-day. Soldiers attended service in the morning and afternoon and great crowds went to a bull fight.

The food supply still occupies general attention. Although it has not yet reached a stage where it can be called acute, many products run short. Strict orders were issued today from headquarters for American forces to remain in the saw-pit and not advance or do any other action which will bring on a conflict with Mexican troops. During the alarm over the flurry at the water-works at El Tojar yesterday, detachments of marines and bluejackets prepared for immediate landing. Field guns were put into readiness for conveyance ashore but at the last moment when headquarters established the fact that there was no need of assistance, all orders were cancelled. Official reports declare that not a shot was fired, while other sources are persistent in the opinion that shots were exchanged by the outposts.

Lieut. Selbie, of the Fourth Infantry, with his men proceeded to the break in the railroad where it was torn up by Mexican troops. They were astonished to find a squad of the Eighteenth Mexican Infantry on duty, the Mexicans carrying hundreds of rounds of ammunition. They were very friendly and informed the United States troops that a troop train had gone out along the other line and that in that direction the battle, if any, was progressing. The Americans retraced their steps to El Tojar. The only communication between Vera Cruz and Tampico is by means of wireless instruments. Through this Admiral Meseher is keeping in touch with the situation here. All is reported quiet.

(Canadian Press) EL PASO, May 2.—Sattillo the principal city in the state of Coahuila, where the remnants of various federal forces rallied after their defeat at Torreon, Monterey and lesser strongholds is reported today to have been evacuated on April 27. The troops returned to San Luis Potosi, 300 miles south. A letter from Miguel Avila says the Federals acting under orders of Huerta, set fire to the town on April 27th, and then abandoned it. As the Constitutionalists were making preparations for an elaborate campaign against Sattillo, the news caused a sensation. It developed today that Carranza has not likely received the request from the South American envoys of peace that he agree to an armistice with Huerta. He was sounded on it and refused, so the probability now is that no effort will be made to interfere with the internal affairs of Mexico but efforts for a pacific settlement will be confined to the difficulty between Huerta and the United States.

WASHINGTON, May 2.—Envoy's who are working for peace are trying

THE DEATH OF DUKE OF ARGYLE

Former Governor General of Canada, Son-in-Law of Late Queen Victoria.

(Canadian Press) COWES, Isle of Wight, May 3.—The Duke of Argyle, son-in-law of the late Queen Victoria and a former governor-general of Canada, died tonight, aged 69, after a short illness. His term of office, from 1878 to 1883 spent in Canada, saw the dawn of a new era of prosperity for the Dominion.

(Canadian Press) MONTREAL, May 2.—The new licensing laws of the province went into effect yesterday. These laws are of a far-reaching character. They provide for a substantial strengthening of the personnel and powers of the license commissioners, a progressive reduction in the number of licenses in Montreal, a gradual abolition of bars, and the separation of the sale of drink from the sale of groceries. It is now unlawful to sell, give or even deliver intoxicating liquors to any persons under eighteen years of age; no saloons are allowed open before 7.30 a. m.; license holders may, at the request of relatives of habitual drunkards, be ordered not to sell liquor to such drunkards; and no order for liquor may be taken, or C. O. D. orders delivered, in prohibition areas such as Westmount, Verdun and St. Lambert.

LIPTON'S NEW CHALLENGER IS A WONDERFUL BOAT.

LONDON, May 2.—Shamrock IV, Sir Thomas Lipton's new challenger for the America cup, described by those who have seen her, as the most wonderful boat of her kind ever built, is to be launched May 25th. Her trial races will begin the first week in June, and continue until the middle of July. The new challenger is said to be entirely original in design and to combine many new and novel features.

A SERIOUS CHARGE.

DENVER, May 2.—Sensational evidence at the inquest into the Colorado strike deaths was given yesterday that the State Militia set fire to the tents where the women and children sought refuge from the machine guns. Several women and children were burned to death.

MAN KILLED BY DYNAMITE CHARGE

MONTREAL, May 2.—An unknown laborer employed by the Canada Cement Company was blown to death yesterday morning while at work repairing a charge of dynamite. While he was stooping over it a spark from a furnace alighted on the back of his neck. He brushed it off and it fell on the dynamite which instantly exploded, blowing his right arm and part of his body into the air.

STEAMER SIBERIA SAFE

MANILA, May 2.—The Pacific Mail steamer Siberia arrived here at 11 o'clock today. Her captain reports that the vessel has an uneventful voyage from Nagasaki to Manila. Captain Zeeder of the Siberia expressed the belief that the reports in circulation yesterday and last night that his vessel was in distress off the coast of Formosa and had sent out calls for assistance arose over confusion in the call letters of the steamer Persia, "M.B.S." being mistaken for "S. O. S." the wireless request for aid.

The wireless operator on board the Siberia said the atmospheric conditions yesterday had been bad, making the sending of wireless messages difficult. The first report that the Siberia was in distress was a wireless message received at the Osezaki Station in Japan. It was said to come direct from the Siberia early Friday morning and said that the steamer had met with an accident and was in distress. The message was mutilated and no further information could be gleaned from it.

This message was communicated to the great Northern steamer Minnesota and the British cruiser Minatour and the Japanese Government ordered the steamer Kanto Maru from a Formosan port and several warships to the scene of the reported wreck.

CONFERENCE ON OYSTER INDUSTRY

Between Government and Fishermen. Further Protection of Oyster Beds to be Established.

An important and interesting conference was held in Charlottetown at the end of last week in reference to the fisheries. Mr. W. A. Found, Superintendent of Fisheries, Ottawa, paid a special visit to the Province, and conferred with the Executive Council, on the question of oyster and other fisheries. At the conference there were present, besides the Inspector of Fisheries in this Province (Mr. J. A. Matheson) and the Government Engineer, (Prof. H. H. Shaw), representatives from the Grand River and Malpeque Fisheries Association was represented by its president Mr. Emanuel McLellan, while the Malpeque Association's representatives were Messrs. James Burne, Russel Champion and George Champion.

Mr. Found addressed the conference in regard to the Dominion Government's plans for the fostering and protection of the oyster fishery. The Government at Ottawa, he said, was going to put on three boats this season to clean up the public beds of star fish; and there would also be two patrol boats with search-light equipment placed on the Bay for the protection of the public grounds, and if these were not sufficient more adequate protection would be given. Mr. Found also pointed out it was the intention of the Government to engage a Biologist, thoroughly expert and of considerable experience acquired in the eastern states of the American Union, to be placed at the service of the fisherman during the coming summer; this expert would give instruction and public lectures on the subject of oyster cultivation and the preservation of the public beds.

As to the representations made with regard to the extension of the season for lobster fishing, Mr. Found said that he was unable to say at present whether the Government would find it advisable to make such extension, but he indulged the hope that even though lobster fishing would be late in beginning this season, the fishermen would have such successful results that they would not suffer in comparison with normal seasons; that the shortening of the season would not affect the least bit the extent of the catch. The conference, it may be stated, began on Friday night and lasted until a late hour, and was continued on Saturday.

The fishermen also made some representations with regard to the lobster fishery. The presence still of ice in the waters, they urged, will shorten the lobster fishing season and they considered that if it is possible an extension of time should be given them this season for the fishing of lobster. A good many of the misunderstandings that existed among fishermen

representations with regard to the lobster fishery. The presence still of ice in the waters, they urged, will shorten the lobster fishing season and they considered that if it is possible an extension of time should be given them this season for the fishing of lobster.

PENSION SYSTEM FOR CLERGYMEN.

BOSTON, May 2.—Consideration of a pension plan was one of the subjects before the 129th annual convention of the Episcopal diocese of Massachusetts today. Bishop William Lawrence, who presided, favored a system proposed by Monell Sayre of New York, whereby every clergyman in the diocese would receive a sum approximating \$600 a year upon reaching the age of 60 years.

ATTEND GREAT FETE BENEATH THE EARTH

LONDON, May 1.—The great social event of the week did not occur in London, which has been and is plunged in all the gloom which always accompanies a bank holiday week. Society flocked to Wobbeck Abbey, where the Duke and Duchess of Portland entertained 1,000 guests to celebrate the coming of age of their eldest son and heir, the Marquis of Titchfield. Wobbeck Abbey with its vast underground apartments is one of the wonders of England. The fifth Duke had a passion for privacy and from the time of his death he spent £7,000,000 (\$35,000,000 on the abbey. The vast subterranean galleries and chambers on the night of the ball are like fairyland, notably the subterranean picture gallery, 100 feet by 64 feet, lighted by twelve huge glass chandeliers which cover the walls.

From the entrance to the park there is a broad underground drive of a mile and a half to the abbey, whence tunnels run in all directions for a total length of eleven miles. The high underground chambers include a riding school, where Joseph Chamberlain once addressed an audience of 5,000 persons. There is also a "tan gallop" of a quarter of a mile, which is said to be the finest indoor exercise ground for horses in the world. Underground also, a rose corridor 150 yards long is arranged as a "sitting out" room. All the corridors are hung with tapestries. The underground apartments, which are usually used as storerooms, are richly decorated and well heated and can be used as smoking rooms. There are three underground rooms adjoining the picture gallery where dancing is usually held but they can be converted into supper rooms and 400 guests can sit down at once. The cloak rooms and other places are all fitted with telephones. Illuminated signals regulate the motor traffic outside the abbey. There is also a room with an ornithological collection. The kitchens are connected with the dining room by a miniature railway. The gardens are about twenty-five acres in extent and contain wonderful displays of flowers and fruit, an arbor walk and pear trees and apple trees and immense greenhouses. The park, which is a fragment of old Sherwood Forest, is about ten miles in circuit and contains herds of white and other deer.

NATIVE UPRISING IN ANGOLA

BOMA CONGO, FREE STATE, May 2.—Natives have gone upon the war path killing scores of whites in the Portuguese colony of Angola and driving out the missionaries, some of whom are believed to have been murdered. News of the uprising was received here yesterday, the despatches stating that the Portuguese garrison had been put to flight. The victims of the natives included men, women and children. Soldiers have been asked to defend the settlers in the district. Angola lies near the mouth of the Congo River in West Africa and adjoins Congo Free State. Its chief port is Sao Paola De Loanda.

TO FIGHT CHURCH UNION.

TORONTO, May 1.—At a meeting of the executive of the organization for preservation and continuance of the Presbyterian Church in Canada held here yesterday has reported that the general committee numbers over 400 representative ministers and laymen from all parts of Canada. The gathering was called to plan for a fight against church union.

COMING EVENTS, ANNOUNCEMENTS, MEETINGS ETC.
