MERCHANT INSTANTLY KILLED.

ADMINISTRATION OF HOMESTEAD LAW

OTTAWA, Aug. 27—A curious point in the administration of the homestead law has come before the government here. A Galician homesteader is lying in jail in Prince Albert on a charge of murder, for which he is due to be tried. It appears that this involuntary engagement has made inroads upon his time, and has interfered with the punctual discharge of homestead duties. He had it seems, nearly completed these and had been abstained from incurring the suspensions which have caused his present detention and prospective trial, he would have been in a position to apply for his patent.
With the purpose of enabling him to possess an estate which, if the worst should ensue, he could leave to his mother, a request is laid before the government of a double nature.
First, it is petitioned that he be allowed to make formal application for the patent. To do this he must appear in person at the land office and to do that he would of course be obliged temporarily to absent himself from the prison. Secondly, the government is urged in consideration of the pressing nature of his engagement in Prince Albert to overlook his enforced neglect of the homestead duties and grant him his patent. The government is still debating the question.

SITUATION IN ENGLAND SERIOUS.

LONDON, August 27—The food situation in England is becoming increasingly serious. Six inches of rain fell yesterday, and it is still raining today. The City of Norwich, 43 miles south-east of London, is almost isolated. The whole train service between London and Norwich and Cromer has been suspended, and many local services are affected. The entire county of Norfolk is a swamp, and Lincolnshire, Suffolk and the other eastern counties are in an alarming condition. Everywhere crops rot and there is no sign of a cease being destroyed by the swollen sation of the rains. The condition of the military camps at Aldershot, Salisbury Plain and Swaffham is so serious that many regiments had to be moved. There is a probability of all the summer manoeuvres being abandoned.
The records show this to be the wettest August since 1881. This is the crucial time for crops. Unless at least a fortnight of good sunny weather gives crops a change to only fair in quantity, while in quality harvest will be a total failure. Under the best conditions the crop will be ripe and be gathered, the English it will certainly be far below the average.
It is estimated that the continuance of rains and the untoward weather of the last week has cost British farmers close to \$100,000,000 in the destruction of crops, and another fortnight of the same kind of weather will mean a total loss of a quarter of a billion dollars.
The English wheat market is now depending on America's prospects. The crop reports from Canada and the United States are watched anxiously. It is certain that large imports from these countries this year will be needed. The total sales of wheat in the London market last week was only 18,500 quarters, at an average price of 35 shillings and sixpence as compared with 105,600 quarters at an average price of 31 shillings and eightpence during the same week last year. The prospects of good crops in Canada and the United States with a large surplus for export, have held the price down so far and America is looked to save the situation in England.

WAR INEVITABLE.

EDMONTON, Aug. 27—War between Great Britain and Germany is inevitable unless arrangement can be made for curtailment of armaments, stated Lord Conleton in an interview here. He declared even war would be better than a continuance of the present ruinous competition in naval preparations and he expressed gratification that the Canadian Government should have come forward at this time to let the world and Germany know that the Dominion was eager to go to the aid of the Motherland.
Discussing Ulster's attitude towards Home Rule his Lordship, who is a fervent Unionist, said that within the near future action of a kind that would surprise the Liberal party would be taken. What the plans were he said would be kept secret until they take form. He forecast the defeat of the Aquith Ministry before the end of the normal term or the passage of Home Rule and he expressed the belief that Unionists would repeal the Parliament Act.
Lord Conleton is about to start on a hunting expedition into British Columbia. Lord Conleton predicts that Lord Lansdowne will be the next Premier of Great Britain.

POLICE SEARCH FOR GIRL.

BOSTON, Aug. 26—The police of Boston, Cambridge, Philadelphia and New York have been asked to search for Eva May Dillon, the 18-year-old bride of William H. Dillon, quartermaster of the United Fruit Company's ship Admiral Dewey, who disappeared from her residence at 111 Spruce street, Philadelphia, on Aug. 6, less than two weeks after her marriage.

The missing woman is the daughter of Charles S. Meyers of 584 Putnam avenue, Cambridge, and was married to Dillon at Englewood, N. J., on July 24, while in New Jersey to attend the funeral of her grandfather. The young couple had been friends two years, and it was only by accident that they met in New Jersey. The courtship lasted less than a week and they went to Philadelphia, and after being married began house-keeping on Spruce Street.

The only message that was received by any member of her family after she left New Jersey was when her brother, Elmer F. Meyers, received a letter from her two days after her marriage, in which she told him where she had located.

Letters sent by members of her family to the residence in Philadelphia and which were returned was the first information that they had that anything had happened, and the investigation that followed showed that she had disappeared.

Through information supplied by Mr. Meyers' attorney, the district attorney's office in New York is making an investigation and looking for a well known actor, who was known to be friendly with the missing woman before her marriage.

ANNA HELD AND HER DIVORCE.

NEW YORK, Aug. 27—Anna Held the actress, who "just can't make her eyes behave—those big brown eyes that Nature gave," is having trouble with her application for a divorce from her husband, Florenz Ziegfeld, the producer.
Supreme Court Justice Amend has denied the motions of her attorneys for the confirmation of the report of the referee, Edward G. Whitaker, favoring an interlocutory decree. Justice Amend ruled that witness had not signed the evidence as required by the code of court procedure.

Now Miss Held must appeal to the court to have the referee's report resubmitted. As there is no provision in Justice Amend's decision for a rehearing, it is possible that the creator of the role of "Miss Innocence" must begin her suit all over again.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remediation of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound and imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is mucous surface.
We will give One Hundred Dollars for anyone who can cure by our method deafness that cannot be cured by Hall's Catarrh Cure. Send for circulars free.
