P. W. C. DEBATE—Resolved that the Maritime Provinces should have entered Confederation as one Province' was the subject discussed by the P. W. C. Debating Society yesterday. By a general vote, the Pro side was declared winner by a vote of Pro, 49; Con, 28. Supporting the Affirmative were: Norma McQuarrie, Willard O'Brien, Beth Waugh, Frank McInnis and the negative, Marjorie Fraser, Roy Webster, Lolita MacVittie, Angus Bernard. Isabel Brown was critic.

PHILOSOPHER'S BANQUET—On March 7, the Philosophy students of St. Dunstan's University celebrated the feast of their patron, St. Thomas Aquinas. A banquet was held in the University refectory. After all had partaken of the plentifulty of good things, the following toast was proposed by the Toastmaster, Mr. Arthur Hughes, and responded to as follows: The Pope and the King, The Church, Rev. John A. Sullivan; The Day We Celebrate, Alfred Murray; Our Country, Justin MacLellan; Our University, George MacCar-mack; The Ladies, Joseph MacCarthy. The banquet was also favored by solos from Messrs. Alfred Doucette and Mark Greenan. The Rev. Father Rector, the guest of honor, delivered an inspiring address, after which a vote of thanks was tendered the Bursar, Rev. F. McQuaid, and the good sisters, who gave much time and effort in making the banquet the success it was. The banquet was fittingly concluded by singing *Auld Lang Syne* and *God Save the King*.

PERSONALS

Friends of Mr. Roy McGee, Elm Avenue, will be sorry to learn of his illness in the Prince Edward Island Hospital.

Mrs. Kenneth MacNeill and little son, of Clyde River, have been visiting Mrs. MacNeill's sister, Mr. Ed-ward Road, for the past few weeks.

The many friends of Mr. Alfred Smith, 50 Sydney St. who has been operated on in the City Hospital are pleased to hear he is doing well.

WEDDING BELLS—The marriage of Miss Elizabeth M. Ross, only daughter of Mr. and Mrs. Magnus Ross, Flat River, to Mr. Wm. McRae, son of Mr. and Mrs. Ronald McRae, Point Prim, was solemnized at the home of the bride's parents on Jan. 28th at 6 p. m. The ceremony was performed by Rev. T. Rodgerson, in the presence of a large number of relatives and friends. The bride entered the parlor to the strains of Lohengrin's Wedding March, most capably played by Mrs. N. Bell, cousin of the bride. The bride was most winsomely gowned in white silk flat crepe. She wore a bridal veil, caught with a coronet of orange blossoms and in conventional style. After the ceremony, all present sat down to a sumptuous wedding feast. The evening was spent in dancing and singing. The numerous wedding gifts received including silver, china, cut glass, linens, cheques, etc., testify to the popularity of the young couple. Prior to her marriage, Miss Ross was tendered a miscellaneous shower at the home of Mr. and Mrs. P. Ross, on Jan. 23rd. A basket heavily laden with many useful gifts was carried into the parlor by Mrs. D. Ross and Miss M. Ross. An address was read by Mrs. Ken Nicholson. The gifts were opened by Miss M. Ross and the accompanying humorous verses were read by Mrs. D. Ross. Although taken by surprise, Miss Ross expressed her sincere gratitude. Lunch was served by the ladies present, dancing was indulged in till the "wee sma' hours." After singing "For She's a Jolly Good Fellow", all departed to their homes. Following is the address:—Dear Elizabeth,—As we have heard you are going to be one of the principals in a coming event, we take this means of expressing our esteem and extending to you and your fiancé, our heartiest congratulations. We are sorry to lose you in the community, but we feel that our loss will be another's gain. Though we regret your departure, we are pleased that you are not going far away and we will hope to see you often in the future. As a slight token of our esteem, we ask you to accept these small gifts in remembrance of your friends in Flat River.

LIVESTOCK MARKET

(Canadian Press)

MONTREAL, Que March 10.—There were 72 cattle, 552 calves, 253 hogs, and 49 lambs for sale on the two Montreal livestock markets today. Cattle were only common to just fair quality, cows and bulls were sold at steady prices. Calves were 25 cents or more lower. The bulk of the veal calves were common to just fair quality and sold between \$7 and \$7.50 and common drinkers were selling as low as \$5. One spring lamb was sold for \$8 and the bulk of the lambs were mostly bucks selling for \$6.50 to \$7.

Praised for Benefaction

Bishop William E. Anderson praised her as a world citizen whose benefactions extend around the earth. Dean Lucy Jenkins Franklin of Boston University, said she was great because she rose above the small hindering things of life.

Dean Leo S. McColester, of Tufts College served as toastmaster. Other speakers included Lieutenant Governor Youngman, Dean Lucy Jenkins Franklin, of Boston University, Miss Frances G. Curtis, President of the Women's City Club, Mrs. Robert E. Spear, President of the National Y. W. C. A., Judge Emma, Fal Schofield, President Ada L. Comstock of Radcliffe, President Ellen F. Pendleton, of Wellesley, Miss Alice Stone Blackwell, Dr. A. Z. Conrad, pastor of the Park Street Church, Dr. J. Emmons Briggs, trustee of Boston University, Dr. Fisk and others.

Princess Edward Island, on March 1, 1861, the daughter of James and Martha West Holman. She is a sister of Mr. Isaac Holman, of Euston Street, Charlottetown, of the Misses Charlotte T. Holman and Sarah C. Holman, missionaries in India for over 30 years, and of the late Mrs. Isaac Essery, of Union Road; also an aunt of Councillor B. Roy Holman and F. J. Holman, Charlottetown, and of Miss Louise Essery. Miss Essery had made her home with Mrs. Fisk since she left Prince Edward Island sixteen years ago.

Had Brilliant Career

Mrs. Fisk received her B. A. from Boston University in 1883, her M. A. in 1885, her degree of Doctor of Philosophy from the same university in 1891. She also received a scholarship from Newham College, Cambridge, England, 1890-91, she being the first American woman to receive a European fellowship.

Mrs. Fisk had the privilege of being a pupil of Helen Gladstone, a daughter of the late Rt. Hon. W. E. Gladstone, great statesman of England, and wrote her first thesis for her doctor's degree in Latin.

After her graduation, Mrs. Fisk embarked on a brilliant educational career, teaching in the following centres: Greek and Latin at LaVelle Seminary, Auburndale, Mass., 1883-85; Latin and History of Art, Carleton College, Northfield, Minnesota, where she remained 16 years; Dean of Women, Ohio Wesleyan University for 2 years; Executive Secretary, British and American Y. W. C. A., Paris, France, for 10 years; Dean of Women, Olivet College, Olivet, Michigan, 1 year. She married Dr. Everett O. Fisk, of Boston, on June 16, 1915. Since then she has been president of the North Atlantic Section of the American Association of University Women.

Mrs. Fisk has also been president of The College Club, Boston, and is now president of the W. F. M. S. of New England, vice-president of the Women's City Club, of Boston; vice-president of the Japan Society of Boston; director of the Y. W. C. A., member of the 20th Century Club of Boston, of the Women's Republican Club, Boston University Graduate Club, and also a trustee of Boston University and a past president of the Florence Cytentton Society as well as many other smaller organizations which total about twenty-three in all.

ISLAND LADY IS HONORED IN HUB CITY

Birthday Dinner And Presentation to Mrs. Everett O. Fisk, Distinguished Educationist, a native of Winsloe, P. E. I.

The following appears in the Boston Post of March 3rd:—

A rare and singular tribute was paid to a rare and singular woman, when more than 400 friends of Mrs. Everett O. Fisk, educational, civic, social and religious worker, tendered her a magnificent reception and banquet on the occasion of her 70th birthday in the Hotel Somerset, last night.

Few women in the history of Boston have ever been feted so splendidly and received such praise as Mrs. Fisk did as she sat in the center of the head table, benign and blushing, while college presidents, civic leaders, leading lights of the religious world and distinguished personages in the social activities of the Hub—15 speakers in all—congratulated and wished her many more years of useful service.

Present at the affair were groups representing 23 organizations of which Mrs. Fisk is a member or an officer. Present, too, were former high school and college classmates, and students of LaSalle Seminary and Carleton College, where she had taught. Present, too, was a friend, the Rev. George B. Fairhead, 86 years old, who travelled alone from Utica, N. Y., and another friend, Bishop John N. Hamilton, 86, of Washington, who offered the invocation.

On behalf of Boston University, President Daniel L. Marsh presented the guest of honor with a silver loving cup, which he bestowed as he recited an original poem which he wrote for the occasion.

Dr. Fannie Fern Andrews, author and lecturer, and chairman of the banquet committee, presented Mrs. Fisk, on behalf of the guests, with a moonstone necklace and a bound volume containing the names of all guests, as well as letters, telegrams and cables from notables all over the world.

Save The Birds

As a boy living in the open 365 days in the year—and please let me go back still further—as a child down in Ohio, hanging on to mother's hand strolling through a little jungle near our humble buckeye home, visiting as high as nine Brown Thrashers' occupied nests, in practically that many minutes, and then both Spring and Fall back in the Seventies, watching the passenger pigeons, not by the thousands, but by the clouds; then in the first year of my teens we moved here to the sunny side of Canada where the woods and the few cleared fields were simply all aglow with birds. I am absolutely sure I have seen as high as twenty five Scarlet Tanagers. I called them red birds, in sight at once and when the red bird storm came, as we called it, along about the 20th of May, I wish every naturalist of today could have followed me a few hours in the woods and he would have seen more warblers in an hour than I can find in a week right now, and the long poverty hours of no boy's life could be made shorter or richer than in these God-given creatures did mine. In fact, I forgot all about my appearance—long red hair and freckles—and every Sunday in the summer would find me in my little hiding places allowing these creatures to come closer to me than I could get to them, but with of course I did not know the scientific and Latin name for them. For illustration, I called the Goshawk and Cooper's Hawks "Bullet Hawks." The Sharp Shinned Hawk my brothers and I called the "Quail Hawk" and the Nut-Hatch I called the "Tree Creeper," and the Wood Thrush I called the "Brown Linnet." Yes, I know them and their habits but not their college-given names, and I am persuaded that today there are many with their university degrees, who know their names but not their habits.

S.N. Kay's Grocery

On Corner Pownall And Richmond St.

The general grocery store of Mr. S. N. Kays, conveniently located on the corner of Pownall and Richmond streets, carries a full line of groceries, fancy goods, confectionery, fruit, and soft drinks. Almost every article required for domestic use may be purchased at Kays' store.

This week the store carries a number of interesting specialties. As bargains one may buy three pounds of bulk tea, two packages of macaroni, canned peas, Clark's beans.

New Cuban Duty Is Discouraging Says Official

The Potato Growers' Association has been notified of a change in duty regulation on potatoes to Cuba, the duty now being \$5 per 100 kilos, or \$1.38 4-11 per bushel all the year around.

"We cannot hope to ship potatoes," states Mr. J. W. Boulter, "to a market with such excessive tariffs. Last October 250,000 bushels were shipped from Prince Edward Island to Cuba, netting the farmers of this Province from \$125,000 to \$130,000. It was a market which gave us an excellent opportunity to make early shipments without danger of frost from storage in outside buildings. In view of this and the heavy anticipated plantings by the United States, the outlook for potatoes in 1921 is discouraging."

There have been no shipments from Prince Edward Island to Cuba, except seed since November 1st last.

Latest Methods Of Cleaning Are Used

"New Method Cleaning" is an apt phrase to describe the means used by the New Method Cleaners, whose plant is located on Longworth Avenue. In the cleaning room, the garment is placed in one of the three washers and is cleaned by means of a special quality of clarified naphtha (Stoddard Solvent). After passing through the dryer and deodorizer, the article is taken to the spotting room, where all remaining stains are removed.

Mrs. Fisk was born in Winsloe, removed. The final stage is the

the hundreds; in fact I am absolutely certain that taking all classes of song, insectivorous and game birds into consideration, there were ninety five percent more than there are today. Of course, this includes the Passenger Pigeons that were here in the early Seventies, but as far as the hawks and owls are concerned, according to my observations, they are as plentiful now as they ever were, and before any of you contradict this statement, let me ask you what has decreased them? Have the hunters gone out to kill them? No, but we have gone out by the millions, and combined our force with them and hot the game birds right and left. I don't know when the Passenger pigeons started dying but in 1878 I do know they were dying by the hundreds and in 1885 they were practically extinct.

The great complaint about killing the hawk is, you are "interfering with nature," or "upsetting nature's balance," as they killed the weak and the delicate one, which I firmly believed they did, and the great Provider put them here for that purpose. And now with the ninety five percent of their food birds gone, which includes the Passenger pigeons, the hawks are left here hungry, and the only way to restore nature, or bring nature back to her own, is to reduce them to the same extent that other bird life has been reduced; for remember, while a hawk will take a weak, delicate bird first, he can and does catch any he wants to all except the larger variety of hawks, which include the Red-Tail, Red-Shoulder and Broad-Winged Hawks. Personally, I do not shoot these big clumsy varieties, for while they will take rabbits and a few domestic fowl and so on, that does not bother me so much, but to find the feathers of our cheerful Cardinals and dozens of places where Mourning Doves have been killed and eaten by such varieties as Cooper's, Sharp Shinned and Marsh Hawks, just says to me: Jack Miner you are not humane and do not love and know the value of our songs and insectivorous birds if you will stand for it. Readers, one Cardinal brings good cheer near my home brings me more enjoyment than to see a hundred hawks and hear the terrorized cries of other valuable birds getting away from them.

As far as interfering with nature is concerned the same may be said of the sheep dogs. Are you going to allow him to continue unchecked in your community or are you going to control him?

The same can be said of the Wolves in Ontario, that have been allowed to multiply and have decreased our deer alarmingly the last twenty years and will continue to do so until they are controlled by man. The same could apply to our field mice or rabbits in our young orchards. If man goes and kills them you according to some men's arguments would be interfering with nature. I say this is nonsense, go and kill them and save your orchard that it may bear fruit for the rising generations.

The same argument, re interfering with nature, applies when you kill the typhoid fly. God created it, but he created man to control it.

So I say, as far as this argument is concerned, it is up to man to control the hawks. Why bless your life He has even given us power to control Nagara Falls.

It is true the Sparrow Hawk chief living in the fall of the year in crickets and grasshoppers, and I might say he is a good little mouse catcher, but years ago when I raised pheasants and quail in captivity, the first two or three weeks of these baby game birds' life, the Sparrow Hawk was one of my worst enemies. In fact one Sparrow Hawk carried away ten little baby pheasants in three hours.

Yes, a great deal is said about the mouse destroying ability of the hawk and owls and, in reply to this, the little weasel is the biggest mouse destroyer we have in America, yet I knew one weasel to kill and carry away thirty three baby pheasant

The great complaint about killing the hawk is, you are "interfering with nature," or "upsetting nature's balance," as they killed the weak and the delicate one, which I firmly believed they did, and the great Provider put them here for that purpose. And now with the ninety five percent of their food birds gone, which includes the Passenger pigeons, the hawks are left here hungry, and the only way to restore nature, or bring nature back to her own, is to reduce them to the same extent that other bird life has been reduced; for remember, while a hawk will take a weak, delicate bird first, he can and does catch any he wants to all except the larger variety of hawks, which include the Red-Tail, Red-Shoulder and Broad-Winged Hawks. Personally, I do not shoot these big clumsy varieties, for while they will take rabbits and a few domestic fowl and so on, that does not bother me so much, but to find the feathers of our cheerful Cardinals and dozens of places where Mourning Doves have been killed and eaten by such varieties as Cooper's, Sharp Shinned and Marsh Hawks, just says to me: Jack Miner you are not humane and do not love and know the value of our songs and insectivorous birds if you will stand for it. Readers, one Cardinal brings good cheer near my home brings me more enjoyment than to see a hundred hawks and hear the terrorized cries of other valuable birds getting away from them.

As far as interfering with nature is concerned the same may be said of the sheep dogs. Are you going to allow him to continue unchecked in your community or are you going to control him?

The same can be said of the Wolves in Ontario, that have been allowed to multiply and have decreased our deer alarmingly the last twenty years and will continue to do so until they are controlled by man. The same could apply to our field mice or rabbits in our young orchards. If man goes and kills them you according to some men's arguments would be interfering with nature. I say this is nonsense, go and kill them and save your orchard that it may bear fruit for the rising generations.

The same argument, re interfering with nature, applies when you kill the typhoid fly. God created it, but he created man to control it.

So I say, as far as this argument is concerned, it is up to man to control the hawks. Why bless your life He has even given us power to control Nagara Falls.

It is true the Sparrow Hawk chief living in the fall of the year in crickets and grasshoppers, and I might say he is a good little mouse catcher, but years ago when I raised pheasants and quail in captivity, the first two or three weeks of these baby game birds' life, the Sparrow Hawk was one of my worst enemies. In fact one Sparrow Hawk carried away ten little baby pheasants in three hours.

Yes, a great deal is said about the mouse destroying ability of the hawk and owls and, in reply to this, the little weasel is the biggest mouse destroyer we have in America, yet I knew one weasel to kill and carry away thirty three baby pheasant

the hundreds; in fact I am absolutely certain that taking all classes of song, insectivorous and game birds into consideration, there were ninety five percent more than there are today. Of course, this includes the Passenger Pigeons that were here in the early Seventies, but as far as the hawks and owls are concerned, according to my observations, they are as plentiful now as they ever were, and before any of you contradict this statement, let me ask you what has decreased them? Have the hunters gone out to kill them? No, but we have gone out by the millions, and combined our force with them and hot the game birds right and left. I don't know when the Passenger pigeons started dying but in 1878 I do know they were dying by the hundreds and in 1885 they were practically extinct.

The great complaint about killing the hawk is, you are "interfering with nature," or "upsetting nature's balance," as they killed the weak and the delicate one, which I firmly believed they did, and the great Provider put them here for that purpose. And now with the ninety five percent of their food birds gone, which includes the Passenger pigeons, the hawks are left here hungry, and the only way to restore nature, or bring nature back to her own, is to reduce them to the same extent that other bird life has been reduced; for remember, while a hawk will take a weak, delicate bird first, he can and does catch any he wants to all except the larger variety of hawks, which include the Red-Tail, Red-Shoulder and Broad-Winged Hawks. Personally, I do not shoot these big clumsy varieties, for while they will take rabbits and a few domestic fowl and so on, that does not bother me so much, but to find the feathers of our cheerful Cardinals and dozens of places where Mourning Doves have been killed and eaten by such varieties as Cooper's, Sharp Shinned and Marsh Hawks, just says to me: Jack Miner you are not humane and do not love and know the value of our songs and insectivorous birds if you will stand for it.
