**Contractors Prefer Our ROCK CRUSHERS**

Monarch Stone Crushers are extensively used by  
road builders and quarry operators. They are made  
of heavy, all-steel construction and are fitted with  
self-aligning roller bearings, operating in large dust-  
proof chambers.

Their powerful crusher jaw plates are of manganese  
steel and are reversible. The crushing action is a  
long but narrow "roll" of the moving jaw—import-  
ant in the production of fines... Write for literature.
