**Lobster Fishermen & Packers**

It has been brought to our attention by several of our members that due to carelessness and neglect in handling of live lobsters that thousands of dollars are being lost annually by fishermen and packers. This Federation advises fishermen to use more care because a slight bruise means a dead lobster before shipping or canning, and a considerable portion of the loss eventually is borne by the fishermen.

Prince Edward Island Fisheries Federation

**WHAT IS HOME WITHOUT A GARDEN?**

**MANY PERENNIALS AS EASY AS VEGETABLES TO GROW**

Victory gardeners who aspire to one of the advanced degrees in horticulture, should sow a row or two of perennial flower seeds in their vegetable plots this spring. Perennials live for years, but usually do not begin to blossom until their second year. To many gardeners the idea of growing plants a year before they bloom seems prohibitive, and they buy perennial plants a few at a time when for a trifling of a dollar they could grow abundant quantities from seed.

There is a long list which are as easy to grow as radishes, if they are sown in the cool spring soil, rather than some in midsummer as many gardeners believe. Mid-summer sowing for most perennials is a British practice, which is not suited to our climate. Hot, dry weather makes it difficult to germinate seed, and the plants do not have time and favorable weather to develop into sturdy clumps before winter sets in.

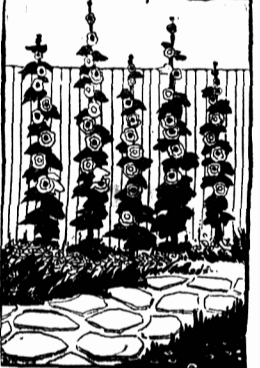

Spring sown perennials, on the other hand, make deep roots before hot weather and by early fall are ready to move to their permanent places in the border, with assurance of a full crop of flowers the following year.

The same methods of applying fertilizer and sowing the seeds that are used on vegetables, should be applied to perennial flowers. They must have room to develop, and will usually need thinning out. Professionals sow them in a seed bed and transplant to a garden row when they are large enough to handle.

With them, as with annual flowers, the time required to germinate seed is long in some cases, and the gardener must wait patiently until the sprouts appear, without disturbing the seeds. Outdoor flats may be used for starting slow growing varieties. Some of those easy to grow from seed, with the approximate time the seed requires to germinate, follow:

Adonis, the African forget-me-not, some varieties or which grow five feet tall, germinate in 10 days; anemone, the marguerite, 5 days; campanula, bell flowers, in 5 days; columbine, in 30 days; coreopsis, 5 days; daisy, 5 days; delphinium, 20 days; hardy pink, 5 days; hibiscus, 15 days; galliardus, 20 days; hollyhock, 5 days; heuchera, 30 days; lily, 8 days; lupinus, 8 days; primula, 15 days; pyrethrum, 20 days; veronica, 20 days.

If several varieties are sown in one flat, they should be chosen to germinate at about the same time. All those mentioned are good border flowers, and good subjects for beginners to undertake.

Hollyhock Seeds Germinate in Five Days From Sowing

**Georgetown and Vicinity**

Miss Genevieve Solomon, visited Charlottetown on Monday and Tuesday.

Dr. A.A. Kennedy and Mrs. Kennedy, motored to the City on Tuesday.

Mr. Cyrene MacDonald was a visitor to Charlottetown on Tuesday.

Mr. Joseph Goteff Jr., recently discharged from the R.C.A.F., was a visitor to the City on Monday.

Miss Bessie Walker and Miss Georgina McLeod, were visitors to the City on Tue.

J. Waldron Lavers, was in Charlottetown, on Tuesday.

Mr. Albert Skinner, local carpenter is remodeling the property owned by Mr. Howard Llewellyn.

Herman MacDonald, De Gros March, was in Charlottetown on business on Tuesday.

Mrs. Muriel MacDonald, Charlottetown, arrived in Georgetown on Tuesday and will spend a few days here.

The Bergman Construction Company, Montague, plan on assembling a cargo of pit props in Georgetown, for shipment by steamer at or about July 15th.

Mr. and Mrs. Philip Boudreau, and two children, returned to Maple Hills on Tuesday, after spending a few days with relatives here.

Mr. Wally MacDonald, son of Mr. and Mrs. John J. MacDonald, who took a sheet metal course, following his discharge from the army, is now employed by Eastern Sheet Metal, New Glasgow, Mr. MacDonald spent the past weekend with his parents here.

Ralph Hemphill, son of Mr. and Mrs. William Hemphill, now residing in Pictou, N.S., was a visitor to Georgetown recently. Ralph has received his discharge from the Canadian Navy and is now attending Navigation School in Halifax.

Workmen are busily engaged on the exterior and interior of the J.J. Hughes Co. building here. This is the building formerly used as a general store by the late J.J. Hughes. It is hoped by local citizens that soon they will see some firm once again operating in this fine stand.

**Bristol and Vicinity**

Mr. James Kennelak has arrived home from overseas to receive his discharge.

The road grader went over all the roads here except the McVay-List road, which is in a bad condition.

The large break in the paved highway near McNeil, is being filled in with scores of loads of clay and sand.

Mr. Melvina Byrne, of the Metropolitan Stores, City, spent the week-end visiting his old home and friends here.

Early swimmers who took their first plunge in the north shore brine on the holiday May 24th, report the water quite chilly.

His friends regret that Mr. P.L. Robb, one of the outstanding farmers in this vicinity, is forced to retire owing to poor health.

Friends of Mr. John Devo, will learn with regret that he was removed to the Charlottetown Hospital last week for treatment.

Mr. Arsten Laperre, head cook for Mr. Cox at the packing plant reports more than sixty fishers and factory hands sat at his tables every day but Sunday.

Old friends here of James Devey, son of the late Cephus Devey, will be glad to learn he has returned to the Charlottetown, after six years in the Army.

Fire almost claimed the large home of Mr. and Mrs. Wm. Beard last week but for willing hands just the main roof was burned and considerable damage done inside. The fire is believed to have started from sparks on the dry roof.

A large government tractor and heavy road machine with a crew of men are busy on the Bangor Road, which is being made several feet wider at the entrance to the paved highway, the road to be made many feet wider on each side, making a wonderful turn.

It is rumored a new Co-Operative Butcher factory will be erected in Morin this summer, near Morin River, to replace the old plant.

Lobster fishing has dropped off considerably since the start of the cod fish have struck heavy. Packing plants will begin packing the cod this week it is understood.

Some time ago your correspondent checked out a man who was planning to operate a new mill here. Today that long forecast is being realized. For the present the mill will operate with gasoline engines until the electric current is put in this fall, as the poles and wire are about all in readiness.

Mrs. W.A. O'Brien, and daughter Theresa City, are spending a few days in Bristol, with Mrs. O'Brien's mother and Mrs. Wm. MacDonald, Theresa gave a birthday party this week for a number of her friends and children at the home of her grandparents.

Aee Reginald O'Brien, R.O.A.F., has received his discharge and returned home here after several months in the service. The frozen waste land of the northern country.

Sadness and sorrow struck hard at the happy home of Mr. and Mrs. Frank Dunn, when death claimed the young son of the family, a course of a few days. One little girl who had entered the Charlottetown Hospital, was reported as recovering, passed away suddenly. She was only two years old. The sympathy goes out to the family.

Mr. Gerald Barry, foreman at the steam driven sealing machine, was working at the wharf and one finger was torn severely. He was rushed to Morrell Village by Dr. J. Boyd Page, and taken to Mount Stewart who was on a sick call dressed the hand and he is back on the job again in one day.

Mr. Claude McEwen, popular master of the dredge that has been working at Red Head Wharf for two years deepening the harbor, has been transferred to the mill and with a position of Inspector of Dredges. He will be sorely missed in the harbor.

The investment of \$17,874,000 in newspaper advertising over a period of 60 years has resulted in a yearly volume of close to \$20 million for one store on Chizego's State Street.

**THE LANGUAGE OF REPOSE**

A listening Silence lingers in her halls  
And steals on tiptoe down the shabby stair—  
Almost a shadow darkening the  
Almost a presence standing by her chair:

A Silence sweet with laughter that is still,  
And clamorous with feet that run no more,  
That leans and whispers to her heart  
Young voices call old greetings from the door:

A brooding Silence folding like warm wings  
About her weary heart, shutting  
The tumult of unnecessary things—  
The discords of an alien, empty day:

Beyond her door a city roars and  
The traffic presses on her garden clove,  
But Silence dwells with her and  
Silence speaks  
The lost and lovely language of repose.

**STATLEY**

HUNTLEY, Scotland — Leith Hall, Aberdeenshire, seat of the chief of Clan Leith for nearly three centuries, has been presented to the National Trust for Scotland by Hon. Mrs. Leith-Hay because the male line of her family became extinct with the death of her son in the war.

The house will continue to be used as a residence but the public will have access to some rooms and will be able to see fanlight portraits and heirlooms from Stuart times.

The investment of \$17,874,000 in newspaper advertising over a period of 60 years has resulted in a yearly volume of close to \$20 million for one store on Chizego's State Street.

**WHERE DID YOU GET THIS DELICIOUS SALAD DRESSING?**

**MADE IT YOURSELF? TRY MY FRENCH'S SPECIAL-TASTE.**

**EAT ANY OTHER KIND?**

... and no wonder ...

Because Salad Dressing made with French's Mustard has a special zip and tang—and the flavour it gives to Summer salads is so enticing you'll have a "more, more" encore at every serving!

**Quick - Easy - Try It!**

Smooth, creamy salad dressing made in a minute! Best 4 cups: French's, 2 tbsps, light cream, 2 tbsps, sugar, 2 tbsps, vinegar and 1/4 tsp. salt all together until light and fluffy. Makes 1/4 cup.

**SHADE FOR POULTRY IN HOT WEATHER**

According to the Dominion Experimental Farms Service, the problem of lack of shade for poultry during the hot weather period is met by planting either corn or sunflowers early in the season. A few rows planted near the colony house answer the purpose well. If the chicks are running out, the young plants should be protected for a few weeks by a temporary fence. By the time the hot weather comes along the corn or sunflowers will be high enough and strong enough not to be bothered by the chickens.

A more permanent form of shade may be provided by making a structure which is mostly roof and open on all four sides. Some poultrymen even make the roof of old bags which give protection on dry hot days.

Modern poultry practice demands that chicks be raised on clean fresh land each season to escape disease and worm infestations and the colony houses to fresh land in one of their fields and so there is the need for the temporary shade so easily provided by either corn

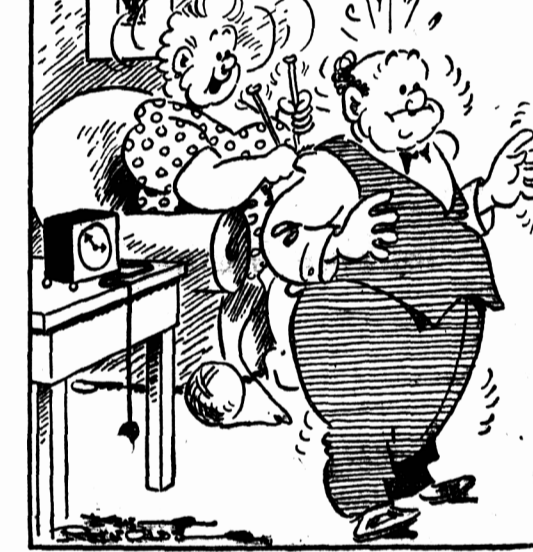

**WOMEN SEEK JOBS AS AIR HOSTESSES**

CAPE TOWN, May 22 — (CP) — While the scarcity of nurses in South Africa grows daily more acute, hundreds of young women are flocking to become South African air hostesses. More than 200 applications have been made by unmarried girls to fill 12 posts on the South African Airways.

Personality, poise, intelligence and appearance, complete bilingualism and a knowledge of first-aid are among the main qualifications required. Although their work will be primarily on passenger aircraft in South Africa, service may be required on special trains on ceremonial occasions, and those chosen will be known officially as "travel hostesses."

Uniforms are being designed for the travel hostesses who will undergo a fortnight's training course before the final selection is made.

**Plants Grow Best As Soil Dries Out After Soaking**

Canvas Hose Which Leaks Through Mesh Spreads Water Evenly Over Garden

Dr. Page's explanation makes it clear why an alternating cycle of thorough watering, and a period of drying out should be followed.

But watering should be thorough enough to wet the soil as deep as the roots go, at least. This cannot be done by sprinkling a brief period every day; that is bad watering practice because it moistens only the top few inches of soil, and encourages root growth near the surface where the soil dries out quickly. The soil must be soaked deeply whenever rainfall is insufficient to provide abundant water. That means, when less than one inch each week falls on the garden in summer time.

Let the hose run without a sprinkler, so that the water falls upon a board which scatters it and prevents washing out a gully; or use a canvas hose which leaks all along its length, and serves as a portable irrigation ditch.

In growing melons and tomatoes, many amateurs find that by sinking the hose into the ground near each hill, before the seed is sown, they can simplify the task of watering. Water poured into the tile is carried immediately down to the deepest roots, and this often results in a better crop.

Veteran gardeners have long practiced the maxim: Give a plant (or a garden) a drink when it's dry, in other words do not get thirsty between drinks.

In a lecture to florists, Dr. J. Boyd Page of Ohio State university gave a scientific view of the problem of watering which endorsed this old gardener's maxim.

A good soil holds both water and air at the same time, he said. These are held in spaces between the soil particles, called pores. When there is an excess of water, air is driven out, and the plants suffer for lack of it. This occurs in gardens when water stands on the surface; and is the reason why quick drainage of excess water is so important.

Lack of water, on the other hand, is also harmful to the plants. A balance between air and water must be maintained. A plant will make the best root growth, said Dr. Page, when it is drying the soil down. When the soil is soaked, and the excess drains away quickly, fresh air enters the soil to take the place of the water. The roots reach out for water as the supply diminishes, and vigorous growth results.

**ATTENTION FARMERS**

The Department of Reconstruction at Charlottetown has been successful in having twenty five army trucks made available for the use of bona fide farmers in Prince Edward Island, under the same conditions as the sale held here last fall.

Applications should be mailed immediately to the P. E. I. Federation of Agriculture at Charlottetown for certification.

The price for these trucks F.O.B. Debert, N. S., is as follows:

1940 Model	1941 Model	1942 Model	1943 Model
\$342.95	\$381.05	\$419.16	\$495.37

If more than twenty applications are received prior to June 3rd, 1946, allocation will be based on drawing under the auspices of the Federation of Agriculture.

Closing date for applications June 3rd.

DEPARTMENT OF RECONSTRUCTION  
CHARLOTTETOWN, P. E. I.
