**Luminoscopy Shadow Test System**

LOOKING INTO THE EYE

The most advanced science of Eyesight Testing known. This system measures and corrects any hidden or latent trouble. It is especially valuable in old chronic hard cases—those who have not received satisfactory results elsewhere. We also use in our Test room the Ophthalmometer, Retinoscope, Phorometer and other delicately adjusted apparatus for determining just in what degree if any, your eyes fall short of perfection. In need of glasses come in and "SEE."

**Preparing for Big Convention**

MONTCTON, May 5.—The annual Convention of Chief Constables of the Dominion will be held in Moncton June 29th, 30th and July 1st next. Already great preparations are being made. Chief Rideout being an energetic worker. Success is assured the Convention. Aside from the business part of the programme Chief Rideout is seeing to it that all constables will be treated socially as he has made and daily is making arrangements to have the visitors royally entertained. Some of the scenic beauties near the city will be visited, cars being placed at the disposal of Chief Rideout. In the evening band concerts will be given, followed by luncheons, drives and addresses. All together the Convention at present promises to be a success and with Chief Rideout at the helm the visitors may be assured if a good time

**Salaries So Low Ministers Quit**

TORONTO, May 4.—Salaries of Methodist ministers throughout the country are so inadequate that many ministers are resigning and leaving the pulpit altogether, according to Rev. R. J. Simpson, of the superannuation department of the church. Mr. Simpson, in a statement issued by him, claims that while the cost of living has increased 100 per cent or more, some of the Methodist ministers are still attempting to live on their old remuneration.

**PARIS SAYS SILK WILL CONTINUE AT HIGH PRICE**

PARIS, May 5.—The directors of one of the largest Paris silk firms prophesies a continued rise in the prices of silk, satin, tafetas, and velvet. Raw silk, which cost 50 francs (nominally \$10) per kilo gram before the war, now costs 500 francs (nominally \$100). Velvet will be very scarce this autumn, when satin will be popular. Printed tafetas, heavy crepe de chine, and velvet broadcases will be the vogue for evening dress.

**MANY SPURIOUS TWENTY-FIVE CENT PICES**

MONTREAL, May 5.—Some scores of spurious twenty-five cent pieces were produced before Judge Leet today when three men charged with counterfeiting, appeared for preliminary hearing. The three accused are George Wilson, colored; R. Flannigan and James Fafford. The coins showed some evidence of good workmanship and the police say that several of them had been put in circulation here. The case was adjourned to tomorrow.

**TELLS DYSPEPTICS WHAT TO EAT**

Avoid Indigestion, Sour Acid Stomach, Heartburn, Gas on Stomach, Etc.

Indigestion and practically all forms of stomach trouble, say medical authorities, are due nine times out of ten to an excess of hydrochloric acid in the stomach. Chronic "acid stomach" is exceedingly dangerous and sufferers should do either one of two things:

Either they can go on a limited and often disagreeable diet, avoiding foods that disorganize with them, that irritate the stomach and lead to excess acid secretion or they can, as they please, use reason and make it a practice to counteract the effect of the harmful acid and prevent the formation of gas, sourness or premature fermentation by the use of a little Bisurated Magnesia at their meals.

There is probably no better, safer, more reliable remedy than Bisurated Magnesia, and it is widely used for this purpose. It has no direct action on the stomach and is not a digestant. But a teaspoonful of the powder, or a couple of five grain tablets taken in a little water with the food will neutralize the excess acidity which may be present and prevent its further formation. This removes the whole cause of the stomach trouble and naturally and healthfully without need of pepsin pills or artificial digestants.

Get a few ounces of Bisurated Magnesia from any reliable drug-gist. Ask for either powder or tablet. It never comes as a liquid, milk or citrate and in the bisurated form is not a laxative. Try this plan and see if this isn't the best advice you ever had on "what to eat."

**Baku Falls To Bolsheviki**

LONDON, May 4.—Word has been received by the British Foreign Office that Baku has fallen to the Bolsheviki and that an independent Soviet Government has been set up with Soviet Russia. The information was called to the attention of the Government in the House of Commons today. Under the protection of Moscow this information came in an official telegram from Tiflis.

**FORM SIGNAL CORPS FOR NEW MILITIA**

WILL COMPRISE 11 SIGNAL BATTALIONS

Authorization has been issued in orders from Ottawa headquarters for the organization of a non-permanent Canadian Signal Corps to be composed of units in each of the military districts throughout Canada. The corps will be composed of 11 Signal Battalions, one for each military district. Each battalion will consist of a battalion headquarters and three signal companies, which will probably be organized at various points throughout each military district.

**WAR VETERANS MAKE A PROTEST**

ST. JOHN, May 5.—At the regular meeting of the G.W.V.A., here a resolution was passed asking the members to refrain from extravagance and to wear old clothes, etc., for the purpose of reducing the high cost of living. The following resolution was proposed and unanimously carried:

"Whereas the cost of living in this country has shown a tendency to decrease but on the contrary to increase, and

"Whereas, the Dominion Government seemingly is powerless to protect the Board of Commerce in its activities against the profiteering of the members of the G.W.V.A., and

"Therefore, be it resolved that this branch of the G.W.V.A., abandon any hope of assistance from the government towards combating the increase in living cost and ask its members to institute a campaign themselves, their families and their friends, which may have as its direct result, this campaign to consist of as economic a mode of life as possible, the wearing of old and patched clothing, boots, and other articles of wearing apparel the refusal positively to purchase any new articles, to wear while the prices still continue high, and while there is the slightest chance of further wear from present possessions the refraining from eating articles of food where prices seem flagrantly unjustifiable and by every possible endeavor consistent with good citizenship to decry any measure of extravagance."

**THE DEATH LIST IS INCREASED TO FIFTY-NINE**

MUSKOGEE, Okla., May 4.—The death list of the storm that swept the little town of Pegka (Okla.) from existence late Sunday night had reached fifty-nine tonight with the finding today of nine bodies underneath the debris of ruined homes. Rescue workers placed the list of injured at 150.

**Kings College Closing**

WINDSOR, N. S., May 4.—The annual proceedings of the University of King's College commenced yesterday. In the afternoon the various student societies met and elected their officers for the coming year. In the evening the annual Halliburton Club dinner was held in the temporary dining room in Convocation Hall. In other years the meetings had been held in the room in which the famous Judge Halliburton resided when at college, but the loss of this room through fire necessitated the change.

**As King George is racing**

As King George is racing Britannia this season, and a new 180-ton yacht, named Terpsichore is on the stocks, it is interesting to note that the yacht which will sail in a handicapped class, is still a fast, powerful yacht. She was designed by the late G. L. Watson, of America Cup fame, and in 1893 defeated the famous American sloop Vigilant in a majority of races. Westward's most formidable rival will be the Margherita, the famous A-class schooner designed by Chas. Nicholson, and at present owned by S. B. Joel, millionaire racehorse owner. Nicholson is the designer of Sir Thomas Lipton's Shamrock IV, this year's challenger for the America Cup.

**RETURNED MEN SEEK STEADY EMPLOYMENT**

MONTREAL, May 5.—That they want steady work rather than cash is the idea of the Canadian Federation of Returned Soldiers and Sailors and plans towards this end are being worked out. For this purpose a meeting is to be held here on Thursday when delegates will be selected to form part of a general deputation to wait on the Dominion government and leader of the opposition on Monday next. The idea is to ask parliament as a whole, both government and opposition to encourage steady employment to veterans now employed in the various shipyards throughout Canada.

**RATHER LOAF THAN TAKE \$10 A DAY**

CHICAGO, May 4.—Shipyard workers of the Northwest who loaf rather than work now for \$10 a day. This is one of the reasons for a pine lumber famine that is imminent in the opinion of J. H. Carlyle, Everett, Wash., who owns several thousand acres of pine tracts in the Northwest.

We are facing a shortage of pine lumber because of three facts," he said. "The principal supply of the South is exhausted, much of the Northern wood has been destroyed by fire and the New England States are running short."

**BEWARE OF DECEPTION**

Statistics show that when egg albumen is used as a constituent of baking powder, the amount so used is too small (usually 15/100 of 1%) to affect the quality or effectiveness of the baking powder containing it, and when so used, is plainly for the purpose of fraud. Intelligent buyers will not permit themselves to be deceived by the water glass test.

**MAGIC BAKING POWDER**  
contains no alum or egg albumen and is guaranteed to be composed of the ingredients printed on the label—and none other.  
Made in Canada By Canadians  
For Canadians

**EXPERT COOK GIVES HINTS ON COST OF LIVING**

MONTREAL, May 4.—Seeking means of combating the High Cost of Living which every day becomes more formidable. The Star went yesterday afternoon to the head of one of Montreal's best known cooking schools for some suggestions.

"That is a matter upon which I am working," said she. "Everything has increased so much in price that the cheap foods of the past are no longer available. For those days of plenty. Nor is it of any value to criticize destructively. We want to take constructive measures to cope with the present situation.

The best suggestion I can offer to every one is that on every inch of vacant land a garden be started. It is wonderful what a supply can be raised on a small plot of ground. Every member of the family can assist in the labor necessary of fresh vegetables and the consequent saving to the pocket book will be more than satisfactory. At the end of the summer it will be found that astonishingly little has been paid to the dealers for vegetables.

For home vegetable garden the most useful vegetables, are beans, cabbages, carrots, cauliflower, corn, lettuce, parsnips, peas, onions, turnips and radishes. If the plot of ground is large enough potatoes should be grown to furnish a winter supply. In European countries the people live on much simpler food than do Canadians. Here it is often customary for meat to be seen on the table three times a day. It is quite as feasible for us to live in the summer months on small quantities of meat as it is for other countries. From the home gardens enough and more than enough can be produced to supply the family's summer needs and frequently to allow of some preserving and canning as a store for the winter months.

In France, soup occupies a prominent place in every menu. In Italy, macaroni is the staple food article. In China, Japan and India rice sustains the majority of the population. If Canadians would make a judicious combination of these foods, the meat bill, which is always a heavy item, could be materially reduced.

If in cooking, also we could educate the people to use kilm, instead of milk, oleomargarine instead of butter and arisco instead of lard, great saving could be effected.

Fish could be substituted frequently for meat without causing any loss in strength to the consumer. Deficiency of protein need not be feared when one good meat dish a day is served, especially if such nitrogenous materials as eggs, milk, cheese and beans are used instead. Small quantities of meat used in stews with a quantity of other materials will be found as satisfying as large cuts of expensive meat.

Rice and macaroni can be used instead of potatoes but if people will raise their own supply of potatoes the general price of that commodity will be bound to fall to something within reach of the purses of those who cannot have gardens.

Milk for its price is one of the cheapest of foods for it gives high food value. Few families nowadays care to see the humble milk and bread pudding appear on the table. Something more piquant and pretentious is wanted.

If we could persuade every man, woman, and child to join a Live Simply Club, to eat more home grown vegetables and cheaper meat cuts, to have fewer courses at a meal and to employ the recognized substitutes in cooking we could save a great deal of money and worry.

**OFFERS RANSOM FOR MISSING DAUGHTER**

NEW YORK, May 4.—An advertisement offering a ransom for his fourteen year old daughter Henrietta, who has been missing for two weeks, was inserted in a New York newspaper today by Louis Bulte, a cigar manufacturer. Mr. Bulte, said the advertisement was inserted in compliance with demands in a letter received by him purporting to have been sent by the kidnappers. The girl disappeared while on her way to a bank to deposit \$265,000 for her father.

**"My Sunday Chew"**

This is what the younger men have named STAG Chewing Tobacco.

It is a flat plug that won't stain the pockets and may be carried in the pocket without the necessity of its being wrapped.

Ask your dealer for a flat plug of "Stag".
