SWOLLEN GLANDS

Wens, Cysts, Soft Bunches Reduced by "ABSORBINE JR."

"ABSORBINE JR." is a vegetable germicide and antiseptic liniment. It is opposed to unhealthy, unnatural growths. Enlarged glands, wens, cysts, soft bunches are unnatural conditions that "ABSORBINE JR." will materially benefit.

A prominent physician writes: "I have used ABSORBINE JR. on still joints and found it all right. Do the work nicely and I cheerfully recommend it."

"ABSORBINE JR." should be in every home in case of accidents—heals cuts, burns, lacerations—ease sprains, strains and bruises—relieve pain and reduces inflammation.

\$1.25 a bottle—at most druggists sent postpaid by W. F. YOUNG, Inc., Lyman Building, Montreal.

OLDEST AND YOUNGEST SUFFRAGE WORKERS AT THE REPUBLICAN NATIONAL CONVENTION

Suffragists, young and old, aided Portland, Ore., is shown with Miss Olympia Brown. Miss Brown, who is eighty-five years old, went from Racine, Wis., to see what she could do to help force the Republican politicians to commit themselves definitely to national suffrage for women. Miss Betty Graham, of

The Halifax Conservatory of Music

(Affiliated with Dalhousie University.)
Founded in 1887 in connection with THE HALIFAX LADIES' COLLEGE.

THE COURSES

In all Theoretical and Practical subjects lead from the Fletcher Music Method to the degree of Bachelor of Music (B. Mus.) granted by Dalhousie University.

INSTRUCTION

is provided in Pianoforte, Voice, Violin, Organ, Harp, Cello, and all instruments in general use, for which Junior and Senior Teachers' Certificates and Diplomas of Graduation are awarded. In the rudiments of Music Counterpoint, Form, Harmony and Orchestration.

TWO FREE SCHOLARSHIPS are awarded each year open to students in the two highest grades.

APPLICATIONS FOR CONSERVATORY GRADUATES

eligible to fill positions are frequently received by the director. To-day graduates are acceptably filling important positions as Organists, Teachers, Vocalists, Pianists in the chief cities and towns of Eastern Canada.

EQUIPMENT AND ADVANTAGES

The Halifax Conservatory of Music has Twenty Expert Teachers with European, American and Canadian Experience.

Eighteen Teaching Studios, Forty Studio and Practice Pianos

Commodious Recital Hall (capacity about 400)

Pipe Organ, for recitals and practice

Junior and Senior Orchestras giving the pupils actual orchestral experience, training them in ensemble playing under able leaders.

Regular Recitals (Public) for both Junior and Senior Students.

Oratorios, Chamber Music, Opera. As Halifax is a Music-loving city, opportunities to hear good music are frequent in the season.

Residence for Women Students can be arranged at the Ladies College under College Rules, Oversight, etc.

Present number of Students attending the Conservatory, residence and otherwise, 650.

For further information, address—Mr. Harry Dean, Musical Director, Halifax Conservatory of Music, Halifax, N. S., or apply at the office.

WHAT MEN ARE WEARING

NEW YORK, June 19.—Economy in dress is not so much saving on the initial outlay as it is the use of good judgment in selecting clothes and care of them once they are bought. The best tailors say that the majority of their customers now order two pairs of trousers with every suit. That is real economy, because usually one coat will outwear two or even three pairs of trousers. Another advantage if a man is limited in the number of business suits he owns is that he may keep the suit in splendid condition and himself well groomed by having the trousers pressed more frequently than the coat will require.

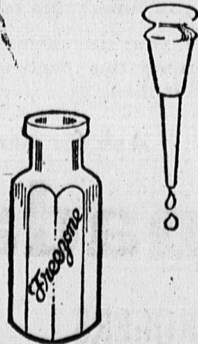

Too frequent pressing of wool fabric suits is bad, at it wears the nap and causes the fabric to break where creased. Therefore, if a man has several suits, while the initial outlay may be large, economy is served in the final showing. A suit does not require pressing every time it is a trifle wrinkled. Merely properly hanging it in the wardrobe for a day or two will restore its freshness to a large extent.

Should Study Styles Closely

By far the majority of men—American men at least—buy their clothes ready made. For this reason it is very important that a man make some conscientious study of the question of styles and of what

LIFT OFF CORNS!

Apply few drops then lift sore, touchy corns off with fingers—No pain!

Doesn't hurt a bit! Drop a little Freezone on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic!

A tiny bottle of Freezone costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Freezone is the sensational discovery of a Cincinnati. It is wonderful.

PILES

Do not suffer another day with itching, bleeding or protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. One a box; all dealers, or Ed. Manser, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose a stamp for postage.

is becoming and suited to his own needs. Not all salespeople, unfortunately, have impeccable taste and certainly not all are sufficient conscientious for a customer to be sure that their advice is given in good part. Far too often a salesman thinks only of making a sale and does not concern himself with whether he will ever again see the customer he is serving.

A great deal of money is actually wasted every year by people who buy clothes in response to an advertising appeal, not because they need the clothes, or because these particular clothes are suited to the style of the individual. Striking novelties in ties, fads in hosiery, handkerchiefs, etc., usually hold the fancy for a very brief time only.

While on the subject of hosiery many men seem inclined to continue the wearing of woolen socks throughout the summer. The shops are showing these dress mixtures. Some plain, some with clocks, some in fancy ribbed weaves that almost match the mixtures approved in suits.

About Seasonable Footwear

The favorite shoe for general wear with the average man during the summer is the low-cut tan leather. Many shades of tan and brown are popular. For sports wear with either white flannel trousers or with the light mixture suits, tan and white or black and white combinations are good looking and smart.

Cool and good looking bath and lounging robes for summer are shown in linen, natural color pongee, silks of various colors, and Oxford mat.

NEW YORK WORKMAN WHO MAKES \$1,800 A WEEK.

NEW YORK, June 20.—One of the highest paid workmen in New York is a little withered, foreign born, foreign speaking man, who works from daylight until nearly midnight week after week in his cheerless, dirty little dwelling, which serves as both home and workshop. He makes between \$1,500 and \$1,800 a week.

When he retires as he expects

and attaching it to its metal back.

He came to America a few years ago, and began business for himself, although he experienced a few months of bitter poverty before a prominent physician recognized the value of the instruments the Prussian was producing, when the war cut off supplies of this kind from Europe. Then he received more orders than he could supply.

"I cannot get the boys of my nationality or any nationality in this country to learn my trade," says the thermometer maker. "It takes too many years to become expert they say, and more money is to be made at once in so many other

lines that they will not look far enough ahead to see the rich future this work would hold for them.

"I have set the limit to the amount I want to make and I expect to reach it this spring or summer. Then I shall stop making thermometers. The rush of work during the war and following it, has been too much for me. I am getting nervous and my eyes are not so strong. But business is increasing all the time and if I had been able to get a helper when I first began I could turn a good trade over to him. But every one in this country is in a hurry to make money right away, and they are too im-

patient to learn any thing that takes time."

Although the Prussian thermometer maker a man of middle age, his wife and one child, live in the care-less, unsanitary manner of the poor peasant classes in Europe, they are extremely hospitable and entertain their guests always with Prussian cakes, sour wine and other foods of foreign name and taste.

When the thermometer maker retires from business, he expects to purchase a beautiful home, to employ servants, ride about in an automobile, and even take a trip abroad. The Prussian does not intend to enter any other trade and will make

no more thermometers, no matter how urgent may be the demand, he declares.

MINARD'S LINIMENT is the only Liniment asked for at my store and the only one we keep for sale.

All the people use it.

to do within the next few months physicians, aviators and other users of high priced thermometers may have more difficulty than ever in obtaining these instruments for he asserts he is one of the few men in the United States who knows how to construct them.

Of Prussian birth, this thermometer maker, who lives at the end of the Coney Island elevated line, learned his trade as a glass blower in "the old country" years ago when he was only a boy. He learned also to make delicate thermometers, from the blowing of the glass, painting on the lettering to filling it with the right amount of mercury

and attaching it to its metal back.

He came to America a few years ago, and began business for himself, although he experienced a few months of bitter poverty before a prominent physician recognized the value of the instruments the Prussian was producing, when the war cut off supplies of this kind from Europe. Then he received more orders than he could supply.
