YOUR CHILD

Not Stupid—Handicapped

The seeming stupidity of many school children, is directly chargeable to faulty vision.

Correctly fitted glasses often work wonders.

Have your child's eyes examined NOW

G. F. HUTCHESON

F. Gordon Hutcheson Optometrists—At your service.

HAVE THESE NOW!

Everything will run smoother in the kitchen when you have our modern Cooking Utensils at hand. They were designed to make cooking easier, surer. And to add to kitchen appearances as well. You will not want to hide THESE in the pot closet. You'll be proud to have them seen! Come, see them yourself.

The Rogers Hardware Co., Limited

Is Escorted From Town After Talk

EDMONTON, Alta., Feb. 21.—Forced to stand to attention and sing—or go through the motions of singing—"God Save the King" was the experience of Carl Alexson, Alberta's fiery left wing farm leader, when he ventured among the French Canadian inhabitants of the St. Paul district east of here.

Alexson, himself a farmer in Southern Alberta, has long been known as a strong sympathizer of Soviet rule and since the secession movement in Saskatchewan arose, has found himself more or less in the limelight.

He has found little support in this province, however.

In the Willingdon and Vegreville districts, settled in the past few years mostly by Ukrainians, he and his followers attempted to hold a meeting advocating secession somewhere on the lines of the Saskatchewan plan.

Prince's M. D. Truro Boy

TRURO, N. S., Feb. 21.—Many residents of this town have experienced a daily "professional visit" from Dr. L. H. Fraser, newly-appointed Surgeon to H. R. H. The Prince of Wales.

Born in Truro, Dr. Fraser commenced his business career as a lad by maintaining a newspaper route, which he kept while acquiring a grammar and high school education. And according to a recent account published in the newspaper, "he had a route on which he gave excellent satisfaction."

Dr. Fraser, who is the son of R. D. and Mrs. Fraser, now resident in Halifax, left "The Hub" about twenty years ago. He was graduated from Queen's University, and distinguished himself overseas when the war broke out with the Queen's University unit. He returned, at the close of the war, to South America where he has since remained.

DEPRESSION SAID TO HAVE GOOD EFFECT ON PEOPLE

DETROIT, Feb. 21.—The business depression has had a good effect on the character of the American people, says Mrs. Christine Frederick, sales expert.

Addressing a recent meeting of the Aderaft Club of Detroit, Mrs. Frederick said, "The depression has increased the importance of the home and stopped the giddy night life. It has caused the study of economy in home operation, and has brought people to the realization that they cannot live beyond their incomes."

The depression has been decidedly beneficial to our character and has made us more conservative." Mrs. Frederick defined prosperity as mass consumption rather than mass production, and urged the development of what she called the neglected market for household appliances.

WRITING VANISHES FROM CHECK ISSUED BY COUPLE

UPPER DARBY, Pa., Feb. 21.—If Mrs. J. W. Neilson, Eywood, ever accepts another check from strangers, she will insist that she supply the ink with which it is written.

A well-dressed couple called at her home in response to an advertisement offering a fur coat for sale. A price of \$65 was soon agreed on and the couple departed, leaving her a check.

A few hours later, she discovered every vestige of writing had vanished from the check, except the number, 420. She can't even recall the name given by the strangers.

CITY GOLF TOURNEY AT MEMPHIS

MEMPHIS, Feb. 21.—After having been abandoned for two years, a city golf tournament to name the city champion will be resumed this year. Play will begin June 9.

Ends Piles Quick

No Salves—No Cutting Your itching, bleeding, protruding piles will go when you actually remove the cause—bad blood circulation in the weak, flabby parts—and not one minute before. Salves or cutting can't do this—an internal remedy must be used. HEM-ROID, prescription of Dr. J. S. Leonard, succeeds because it stimulates the circulation, drives out congested blood, heals and restores the almost dead parts. HEM-ROID has such a wonderful record right in this City, that Geo. F. Hughes says one bottle of HEM-ROID Tablets must end your pile agony or money back.

Gold Rush Is Petering Out

(Canadian Press)

LETHBRIDGE, Alta., Feb. 21.—Though there are still a couple of hundred people in the hills of Nanton and Stavely, the gold rush into the Livingstone range is practically over. A large number who have stalked claims have intimated their intention to go in the spring to do further prospecting. However, assays and the opinion of geologists indicate there is very little chance of there being gold in the basin, and Senator Daniel Riley of High River, issued a statement Thursday to the effect that, in his opinion there was no warrant for the excitement which had been created.

FAMOUS PAINTER PRAISES BEAUTY OF CHILEAN WOMEN

NEW YORK, Feb. 21.—(U. P.)—Dario Rappaport, Austrian portrait painter, is back in the United States with the declaration that the most beautiful women in the world are to be found in Chile.

Rappaport has just spent a year in Chile where he did portraits of President Carlos Ibanez and his family. He also made portraits of 48 other Chileans.

"Chile has a marvelous climate and magnificent scenery, but to me they were dimmed by the beauty of the women in the republic. I think that there are more beautiful women there in proportion to the population, than any other country in the world," Rappaport said.

STUFFED ANIMALS SOLD CHEAPLY

HARTFORD, Conn., Feb. 21.—(U. P.)—A bull moose sold for \$9, a mountain goat for \$2 and a full sized reindeer for \$22 at an auction here recently. The beasts and birds—all stuffed—were in the estate of Harry von Stein Grover, sportsman, who shot and killed himself recently. The entire collection valued at \$20,000 only brought \$2,781.

DEATH REPLACED DIVORCE

HARTFORD, Conn., Feb. 20. (U. P.)—Death divorced Robert E. Bateson and his wife just after he had withdrawn a divorce suit. Learning his wife was in a hospital with double pneumonia, Bateson ordered the suit withdrawn and hurried to her bedside. He arrived just before she succumbed.

COPS CARRY RED FLARES

WESTPORT, Conn., Feb. 21.—(U. P.)—Red flares now are a regular part of the equipment of Westport state police, due to recent accidents which occurred at the scene of confusion surrounding a previous traffic accident. The first officer arriving on the scene now posts a flare on two sides of the scene of a crash.

KANSAS AWARD TITLE OF STATE WHEAT KING

MANHATTAN, Kan., Feb. 21.—(U. P.)—Kansas, champion wheat state of the nation has conferred the title of "Wheat King" on Arthur J. White, Coldwater, Kan. White received \$300 in cash and a silver trophy.

Guy D. Josseland, Copeland, Kan., was awarded second place and third prize was given to E. H. Hodgson, Little River, Kan.

White won over champions from 42 state counties. Although his average wheat yield, 19.53 bushels per acre was not the highest, it was extraordinary considering the type of land.

95 MEN AT WORK

Work in connection with the construction of the fertilizer plant of the International Fertilizers Ltd., at East Saint John near the plant of the Saint John Dry Dock and Ship Building Company, is progressing well said G. M. Stonner, of International Fertilizers Ltd., when seen last night.

Mr. Stonner said that the contractors, John Flood and Sons, Ltd., had 95 men at work on the job, and that he felt by the progress already shown the plant would be completed in time for his company to start operations early in March.

U. S. Legation Building Will Cost \$400,000

(Special to the Guardian)

OTTAWA, Ont., Feb. 21.—Ottawans hope that President Hoover will be able to come this year to lay the cornerstone of the projected American Legation building to be erected opposite the Parliament Buildings at a total cost of about \$400,000. One of the most imposing in the Canadian Capital and with a frontage of 132 feet, the American Legation building will be of a most elaborate design. It will be three storeys in height and will contain offices for Minister Col. Hanford MacVider, the members of the Consular service and the commercial attache. It is expected to be completed this year.

Lapointe Better

(Canadian Press)

BALTIMORE, Md., Feb. 21.—Ernest Lapointe, former Canadian Minister of Justice, is expected to leave John Hopkins Hospital on Monday. It was said at the hospital last night that Mr. Lapointe underwent an operation at the hospital on December 14, and his condition has steadily improved. Madame Lapointe, who came here to be with her husband, also is at the hospital for a rest. She will return to Canada with her husband.

Changes Likely in J. F. A. Leadership

(Canadian Press)

WINNIPEG, Man., Feb. 21.—Three new leaders are to pilot the prairie trio of farm organizations through the troubled months of 1931. Already Manitoba and Alberta agrarians have named their chieftains and outlined demands admittedly more extensive and urgent than in years. Late this month the Saskatchewan farm president will be known.

Departure of Henry Wise Wood, 71 year old Missourian, from the list of farmer leaders after 15 years at the helm of the United Farmers of Alberta, marked the most important change. Still president of the Alberta Wheat Pool, first of the West's great co-operatives, Mr. Wood decided to retire and to place the leadership in the hands of a younger man.

His place is taken by Robert Gardiner, 51 year old Scot who is leader to the west in 1897. As Progressive, group in the House of Commons. Four times Mr. Gardiner has been elected Dominion member for Acadia, and it is understood his duties at the capital will not be neglected by reason of his office. Much of the executive burden will be borne by N. F. Priestly, of Coaldele, named to succeed the venerable H. E. G. H. Schofield, vice president for nine years.

Experience in Dominion politics is brought to the leadership of United Farmers of Manitoba by W. J. Ward new president. Born at Owen Sound Ont., 48 years ago, Mr. Ward came to the west in 1897. As Progressive, he was elected federal member for Dauphin in 1921, 1925, 1926, but last year he was defeated in the constituency as a Liberal-Labor Progressive.

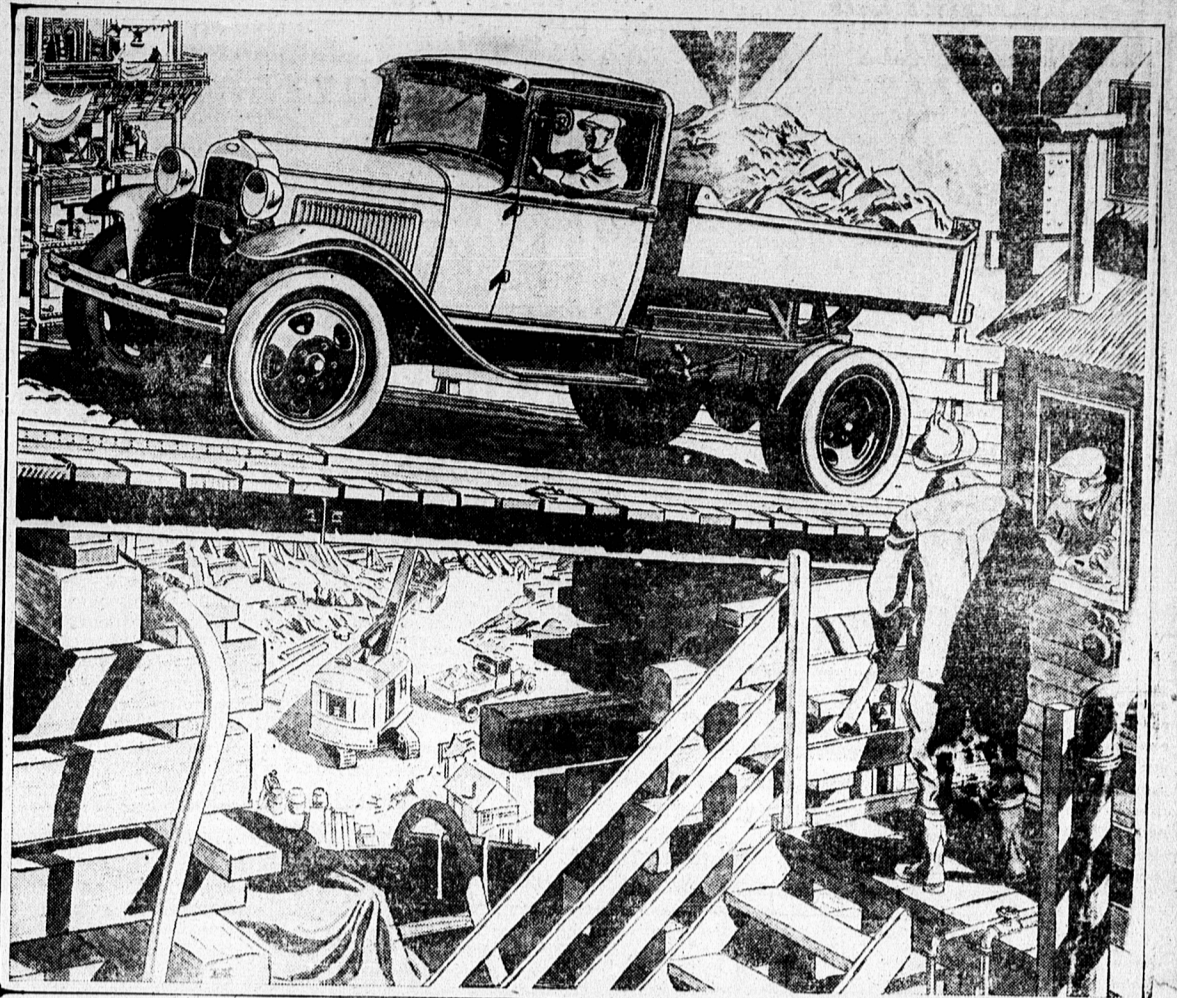

It was the stand of Mr. Ward against "pegged" wheat prices which broke the West's solid front in favor of dollar wheat, favored last fall by executives of Saskatchewan and Alberta bodies. While he labelled fixed prices as a "mere palliative" for existing conditions, the U. F. M. in convention backed the efforts of prairie premiers in their Ottawa pilgrimage to ask 70 cent "pegging." Mr. Ward succeeded Thomas Wood, of Elm Creek, for the preceding two years president.

That United Farmers of Canada, (Saskatchewan section) will have a new president before the end of their convention at Saskatoon this month is stipulated in the organization's constitution. George H. Williams, young farmer of Semans, for two years has led the unit, which claims some 30,000 members—and two terms in office is the limit allowed.

Only one slender possibility exists that Mr. Williams may lead the Saskatchewan farmers during a year he considers the most important in their organization's records. If the convention refuses to elect a president, Mr. Williams must perforce remain in office.

THE HATCHABILITY OF EGGS

There are a number of factors affecting the hatchability of eggs which are controllable by the person in charge of the flock. The profit is directly affected by the percentage of hatch obtained. If feeding the hatch is low, there is little sale in the future for eggs for hatching purposes.

The Ford 1 1/2-ton truck equipped with heavy duty dump body. One of the many installations available.

The Ford Truck has rugged strength

FORD TRUCKS are designed to give long and reliable service under a wide variety of conditions. Strength is built into every part of the engine and chassis. The frame, for example, is made of heavy gauge channel sections. It is reinforced with five strong cross-members.

4-cylinder engines

The 4-cylinder engine develops 49 horse-power at 2200 r. p. m., which is but a moderate engine-speed. Its reliability is increased by the simplicity of the electrical, ignition, cooling, lubrication and fuel systems.

4-speed transmission

The transmission, also, is built to give long service. Its four speeds forward provide a wide range of speed and power. The rear axle is of the three-quarter floating type and is designed for heavy duty. It has a spiral bevel gear of special design, with a ground-mount pinion. Sturdy steel-disc wheels add to strength, and at the same time permit free air-circulation around brake-drums for cooling.

Throughout the Ford chassis, many other features contribute to rugged

strength. Among them is the use of forty different kinds of steel. Special steels were developed for specific purposes, and incorporated into the Ford truck to give greater reliability, strength, and length of service. Another feature is the more than twenty ball and roller bearings at important points in the chassis. These lessen friction, reduce wear, and add to smooth, quiet operation.

Bodies for every purpose

A wide range of body-types is available on the 1 1/2-ton truck chassis, and for the light commercial car. With the truck, there is a choice of 131 1/2-inch or 157-inch wheelbase, of 6.6 or 5.14 rear-axle gear-ratios, and of single or dual rear wheels. A factory-built closed cab is also available.

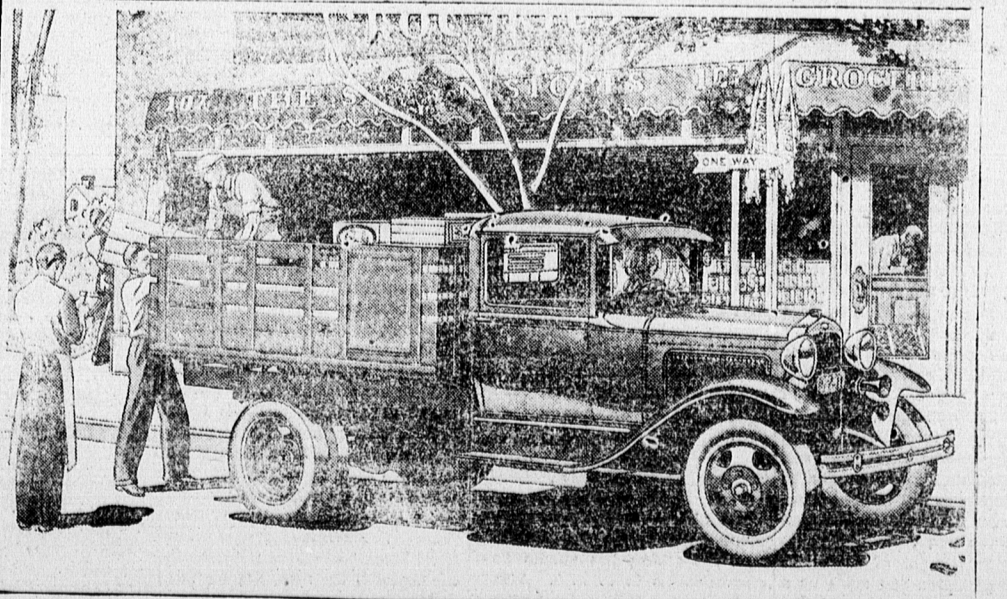

These various bodies and equipment adapt Ford units for use in any business. To every operator, they offer long and reliable hauling service at low cost. First cost is small, in accordance with Ford policy. Costs of operation and maintenance are also low. Thus, for every hauling purpose, the Ford offers a value far above the price.

Your Ford dealer will gladly give you a demonstration with the type of Ford truck that meets your needs.

"The Canadian Truck"

Showing the stake body on the 1 1/2-ton chassis with 131 1/2-inch wheelbase. One of the many body and chassis combinations that are readily available.

They are gathered. The fresher the eggs when placed in the incubator the better. Some consider that eggs should not be held over ten days if a good hatch is expected. However, there are many cases where they have been held twice this length without any apparent serious lowering of the hatchability. Eggs must be held at a temperature that is neither too hot nor too cold. The embryo will start to develop at between 68 and 70 degrees and below 40 degrees there is danger of chilling. Extremes in temperature must be avoided. Along with the correct temperature humidity must be considered. At a fairly high temperature and low humidity there should be considerable evaporation. Clean eggs with sound shells should be the aim. Every one can cite instances of dirty eggs hatching, but no one wants to put a dirty egg into an incubator, nor is it advisable to wash eggs for hatching. Disease germs may be carried on the shell of the egg and endanger the hatch. The tendency is for farmers to have the eggs hatched at a central hatchery or to buy day-old chicks. However, a large number of small incubators are in use and for best success, instructions for the particular make should be closely followed. Thoroughly cleaning and disinfecting the incubator between each hatch is of vital importance.
