"SHOP EARLY"
While the above stock of Christmas goods is complete you should not get an idea that purchases may be conveniently postponed until the eleventh hour. You resolved last Christmas to do your shopping early this Christmas season. Live up to this good intention and induce your friends and neighbours to shop early, too. Shop now and you'll have the advantage of a greater assortment, more attention from clerks and avoid the worry which you naturally experience when shopping is delayed. Make a list of items in which you are interested from the above assortment and bring it to our store. With such a list and the suggestions which our stock affords you'll be able to complete your Christmas shopping in a very satisfactory fashion and in the briefest possible time. Bring the children too and see the beautiful things we have on display—it is just what they want.

Holiday Fire Warning For the Home

Every Year in America Many Children Are Burned to Death by Fire From Christmas Candles

DO NOT decorate your Christmas tree with paper, cotton or any other inflammable material. Use metallic tinsel and other non inflammable decorations only, and set the tree securely so that the children in reaching for things cannot tip it over. DO NOT use cotton to represent snow. If you must have snow use powdered mica or asbestos fibre. DO NOT permit children to light or relight the candles while parents are not present. They frequently set fire to their clothing instead. Electrical illumination is safer. DO NOT LEAVE MATCHES within reach of children at Holiday time. Candles are meant to be lighted, and if the children can get matches they will experiment with them. They imitate their elders. DO NOT allow trees to remain inside buildings after the holidays. The tree itself ignites readily when needles have become dry. A large number of fires usually occur in JANUARY from this cause.

Why the Brunswick Method of Reproduction Insures a Superior Phonograph

Reason No. 1 The Brunswick Method of Reproduction includes the Ultona, a new conception in playing. The Ultona consists of an arrangement of the several necessary reproducing diaphragms upon one tone arm—an all-in-one arrangement, with no attachments—nothing to take off or put on. At a turn of the hand, the Ultona presents to any type of record the proper diaphragm and needle, the exact weight. Thus the requirements of each type of record are met. The Ultona demands no sacrifice in tone, as attachments often do.

Reason No. 2 Equal in importance to reproduction is tone amplification. The Brunswick Method of Reproduction also includes a new idea in acoustics—The Brunswick Amplifier. Old-time ideas were at variance. Some makers still cling to metal construction. Others use a combination of wood and metal—a wooden horn and a metal casting as the "throat." But the Brunswick Amplifier is oval in shape, and built entirely of wood, like a fine violin. It is molded of rare holly-wood. The sound waves receive uniform amplification to reach their fullness, hence The Brunswick tone is richer and more natural. Strident, metallic notes are absent.

We Invite Comparison
Make comparisons. Let your ear decide. Try to find an equal to Brunswick tone.

You're bound to end such a search at a Brunswick shop, where every opportunity will be given you to decide for yourself.

Hear this remarkable instrument before you decide.
