

AN EASILY REGULATED FURNACE

It's a real pleasure to own a Sunshine. It's so easily regulated. Drafts work perfectly—do just what you expect them to.

The fire is always under control. You can have as hot a fire as you like on zero days. And one just warm enough to keep the chilly feeling absent when a thaw comes.

Fortunate is the man who owns a Sunshine.

PULL UP THIS CHAIN

from the floor above, if you feel a trifle chilly, and a strong draft through the asphalt door is opened. Fire immediately burns up briskly. In a few minutes you will be warm and comfortable. Then drop the chain again.

You see, it's not necessary to go down to the basement and turn on the drafts when you want a warmer fire in the Sunshine.

Sunshine is a labor-saver as well as a comfort-producer.

If your local dealer does not handle the Sunshine, write direct to us for FREE BOOKLET.

Peary Says He Will Succeed

In Reaching the Pole This Time—Starting North Next February With Strong Party.

New York, Aug. 7.—"Unless old mother Nature plays a new trick on me," said Commander Robert E. Peary, in his quarters at the Grand Union hotel today, "I will certainly reach the pole this time assuming I regain my strength and health. My equipment will be the same as on the last trip, my plan, essentially the same, but I will profit by the lessons of that last trip.

"Last time we should have reached the pole but for the easterly ice drift. This time we shall take advantage of the drift just as a boatman rowing up stream takes advantage of the current to help him along, pointing his boat not at the place he wishes to make, but higher up, his energy and force of the current swinging him in where he wishes to land.

"Last year I left Grand Land and Cape Morse. This time we shall go further west by land, leaving it at Cape Columbia and instead of heading directly north, will head northwest, thus getting the benefit of the easterly drift of the ice, of which nothing was known until our last expedition.

"Another change is that I will have a stronger advance party than on the last trip, so that when we get ready for the final dash there will be sledges and supplies enough. Last time there was not enough to load five sledges. The party will also be more compact, and therefore safer when storm comes up.

"It would be improper, however, to say that I intend to use the drift method, as has been stated. What is intended is that as we progress north we shall drift toward our destination and off it. That is the sole reason why a new course has been mapped out. The Roosevelt will winter in about the same place as she did on the last trip and the personnel of the party will be the same as on the last trip, with the exception that we will have a new sub-plot. The crew will be New L. and a sub-plot, as was the last. Captain Bartlett, has the selection of the men and officers.

ADVERTISING IS BROAD.

Advertising in itself means publicity and publicity is a very broad and comprehensive term. It does not mean simply a word whispered to a favored few. It is, rather, synonymous with general, broadcast, declaration, and the broader the scope of the announcement the better the advertising. No occupation and desired lines can be reasonably regarded as excepted nor can any funds expended to this end be adjudged extravagant. —American Magazine
