Rheumatism..

is Uric Acid in the blood. Unhealthy kidneys are the cause of the acid being there. If the kidneys acted as they should they would strain the Uric Acid out of the system and rheumatism wouldn't occur. Rheumatism is a Kidney Disease. Dodd's Kidney Pills have made a great part of their reputation curing Rheumatism. So get at the cause of those fearful shooting pains and stiff, aching joints. There is but one sure way—

Comstock Shares.

I took two orders for 20,000 shares each last week, not to mention a number of smaller orders of from 1250 Shares up. The Treasury Shares are ten cents (10) each and offer a good opportunity for a cheap investment in a thoroughly worthy property.

500 Shares will cost you \$50.00
1,000 " " " " \$100.00

and as the property is a good one and the men at the head of affairs are both responsible and careful, there is a good show for your making considerable money out of these Shares inside of a year. Maps and Prospectuses cheerfully sent on application.
