THURSDAY, JANUARY 16, 1930

The Militia Camp

The letter of Lieut. Colonel Dawson, officer commanding the Prince Edward Island Highlanders...

Colonel Dawson is to be highly commended for his active interest in this matter. It will be recalled that last year, when the Island troops were removed for training to Aldershot...

It is understood that the troops, who will go under canvas for a period of about three weeks, will number over 3,000. In addition it may be possible to have British cruisers in port at the time...

Now that the assurance has been received of the favorable attitude of the Militia authorities, it remains to secure a suitable training ground. This should not be difficult in the vicinity of Charlottetown.

A Historic Diary

The January number of the Dalhousie Review contains a most interesting article on the early days in Prince Edward Island by Ada MacLeod, wife of Mr. Nell MacLeod...

Editorial Notes

A new Departmental publication has appeared at Ottawa with the issuing of the Fisheries News Bulletin of the Fisheries Branch of the Department of Marine and Fisheries.

A tribute to Prince Edward Island potato growers was paid recently by Dr. Coady, fisheries organizer for the Maritimes...

Mr. Benjamin Chappell emigrated from England and first settled in New London, where he founded the village of Elizabethtown...

Notes By The Way

That the finger prints of no two are alike has been alleged by scientists and no evidence to the contrary has yet been found.

It is only in recent years that the system of fingerprinting has been widely developed and extended in all civilized countries as a means of identifying criminals.

The suggestion has been made that as fingerprints are easily and cheaply produced every one should be prepared for identification by this means.

Mr. Houde, Mayor of Montreal and Conservative leader in Quebec has adopted the principle of public ownership of waterworks in his province.

Less than a week hence the elections of Halifax County will go to the polls to decide a more than usually important by-election in that constituency.

Hon. Robert Forke, now that he has become a senator is freed from some of the trammels that encumbered him when he was a Minister of Immigration.

There is therefore a very close connection between immigration and the employment of labor in Canada, especially in the winter season.

These people do not assimilate with Canadians. What is needed in the way of immigrants is men and women who will help to build up a strong Canadian race.

And still the Cabinet shuffle at Ottawa is not over. It proves to be a painfully slow operation.

There is a suggestion of contrast between the white gloves presented to his Lordship the Chief Justice at the opening of the Court and the 36 prisoners in the County Jail.

THE LAND WE LOVE

By FRANK YEIGER

THE BATTLE OF GIVENCHY?

Q. What was the Battle of Givenchy about? A. After Festubert during the great war the Canadians were sent to reserve billets at Bethune.

By James W. Barton, M.D.

That Body of Yours

KNOWING YOUR SELF

I have spoken before about three types of physique (a) Where body was short and narrow and legs long.

The idea was to try and point out what was likely or rather more likely to happen to each class as far as ailments were concerned.

Now, naturally, there's trouble. One in the wide open space, where men are brave, and women simply have to be, there's developing a regular salaried form of a row.

With the long wide body and the short legs, the tendency would be to eat too much, hence kidney, liver and heart conditions would be more likely to ensue.

A group of New York physicians studying the matter, have gone much farther and are trying to work out the classification according to the all round constitution of the individual.

One idea was from the race standpoint. They felt that this would be rather difficult, because in the hospital where they were studying this matter, were three cases, lying side by side, of perforated ulcer of the stomach.

Now, these research men are working out a system whereby the individual is studied from four standpoints.

1st. His anatomy or body shape—size of heart, lungs, condition and position of abdominal organs, blood, teeth, and so forth.

2nd. From the physiologic standpoint, that is the workings of his digestion, his intestine, lungs and kidneys, and so forth.

3rd. His mental characteristics—his talents, interests and fears, intelligence.

4th. How he meets illnesses—sore throat, boils, tooth or gum infections.

His reaction to vaccine tests for diphtheria, tuberculosis and so forth. I believe that you will agree that we do not all withstand illnesses alike. In fact you may vary from one time to another in your general physical condition.

My thought is that when we learn to know ourselves, from these standpoints, we can maintain our strong points, and strengthen those that are weak.

Dunstan's-in-the-East, a leading church at Billingsgate, England, has just opened a public parking place for automobiles in the churchyard.

confined to General Mercer's brigade, and the actual fighting mainly to the 1st Battalion. Two field guns had been brought up to the front line trenches, and before they were put out of action, had managed to sweep away the German entanglements.

There is a suggestion of contrast between the white gloves presented to his Lordship the Chief Justice at the opening of the Court and the 36 prisoners in the County Jail.

DODD'S KIDNEY PILLS. THE BATTLE OF GIVENCHY? Q. What was the Battle of Givenchy about? A. After Festubert during the great war the Canadians were sent to reserve billets at Bethune.

On Mr King's Door-Step

When the handsome and gallant bachelor, Lord Sankey, overruled the grave and married Justices of the Supreme Court and decided that women were "persons", or at least enough of persons to be eligible for Senate, says the Ottawa Journal...

Now, naturally, there's trouble. One in the wide open space, where men are brave, and women simply have to be, there's developing a regular salaried form of a row.

COLDS! Prompt and effective relief is obtained in Coughs, Colds, Chills, Sore Throat, Whooping Cough and Bronchial Troubles, in infant and adult, by MACH SKRUP OF TAR AND COD LIVER OIL COMPOUND.

OF QUEBEC HAVE BEEN FORGOTTEN DESPITE ELIGIBILITY AND FITNESS FOR OFFICE

An article which follows, written by Idola Saint-Jean, who declares with commendable candor that she is a candidate for the Senate herself, has real honest-to-goodness claws in it.

Now, conscious that the women of Quebec are very easily forgotten, when there are favors to be granted, eloquent evidence of which is contained in the fact that, having enjoyed the right of eligibility since 1915, and representing half of the voting population, they have never been offered a candidature for the House of Commons.

For Mr. King! Although he's the architect of his own troubles, we can't but feel sympathy for him. We can just see him pacing up and down his study and murmuring how happy he'd be with any one of them were the other sweet charmers away; wondering the while what sort of an ass it was that said that there was safety in numbers.

Christmas Tree at Cornwall. On Dec. 19th the regular Christmas entertainment and tree was held in Cornwall United Church.

PROGRAMME Chorus, Loud the Christmas Bells are Ringing. Recitation, by Dorothy and Roy Good. Song, Joy to the World, by eight girls.

Recitation by Mildred Hyde. Quartette, Christmas is Coming. Recitation, The Shepherd, by Reggie Fritzell. Dialogue, A Practical Joke. Exercises, A Christmas Party.

Lullaby Song by Mildred Hyde. Monologue by Arthur Howard. Song, The Message of the Bells. Drill, Christmas Dolls by six girls. Dialogue, Mother and Dad Have Their Innings.

Pantomime, Oh Little Town of Bethlehem. Chorus, Sing a Song for Santa Claus. Santa Claus then made his appearance and amidst the glee of the children distributed candy to all juniors present.

Before taking his departure he made the following presentations: A presentation to Miss Emily Platts by the pupils of Cornwall School, gift to Mrs. Donald MacPhail and a purse to Rev. E. M. and Mrs. Atken.

Instead, they deck themselves in joy, Because after the mulch and the mold and the earth They will become new leaves again. This must be the meaning of their reds and their golds. They are happy as they die.

God, let me die As the leaves die, Gladly. —Bernard C. Clausen, in the Christian Century.

They will become soft mulch, brown mold, And indistinguishable earth, And their new leaves again.

So they die, Refusing to remember with anguish Other days long ago. When they were fresh little tendrils Breaking from the buds in the lush warmth of Spring.

Or the Summer days when they were green luxuriant foliage Swept by the threat of sudden storm.

They will become soft mulch, brown mold, And indistinguishable earth, And their new leaves again.

So they die, Refusing to remember with anguish Other days long ago. When they were fresh little tendrils Breaking from the buds in the lush warmth of Spring.

Or the Summer days when they were green luxuriant foliage Swept by the threat of sudden storm.

Instead, they deck themselves in joy, Because after the mulch and the mold and the earth They will become new leaves again. This must be the meaning of their reds and their golds. They are happy as they die.

God, let me die As the leaves die, Gladly.
