Nations Determine On Stand To Be Taken At League Council Meeting

Will Respect All British Rights, Is Claim.

ous, much more serious cases, the League of Nations did not vote, and even less could have applied, sanctions of whatever nature.

Provisions

The Cabinet—in which Mussolini himself holds eight posts, a majority—made these provisions:

These provisions include: "possible conversion of foreign credit held by Italians into Italian Government bonds; limitation of dividends of companies to six per cent; a 10 per cent tax upon dividends, and a transformation of all automobiles and trucks into charcoal gas-burning vehicles so as to save gasoline.

The communiqué said Italy would go to Geneva Sept. 4 with full "documentation" against Ethiopia.

The session, the first held out of Rome in 12 years, was short, lasting only three quarters of an hour. Mussolini himself holds eight Cabinet posts, a majority.

"Blue" Army Victory

It was announced tonight that the "Blue" Army, aided chiefly by new motorized divisions, gained a decisive victory in the extensive war manoeuvres by forcing back the "Reds" along all lines to within striking distance of Bolzano, the "Red" capital.

Duce arrived half an hour later from a conference held with high officers of the army and dashed up the stairs to the Council chamber.

As he entered the Fascist dictator laughingly apologized to government aides for his tardiness. At the conference, held in the office of the prefect of Bolzano, were six cabinet members and 11 under-secretaries, including Fulvio Suvich, Under-secretary for Foreign Affairs.

Congratulates Officers

Before coming to Bolzano Mussolini addressed his officers, who are supervising vast manoeuvres in this section of northern Italy, briefly and congratulated them upon the fine showing their troops have made.

This demonstrates, he said, that the Italian army is ready for any eventualities.

The Cabinet presented the world with the following 10 main points:

1. Italy will go to the League with documentation to prove Ethiopia is "retrograde and slave-holding."

2. "Italy intends to defend her interests of life up to the very last."

3. "Great Britain has nothing to fear from Italy's policy toward Ethiopia."

4. "The Fascist Government thinks the colonial question should not reflect upon the European situation unless some one wants to run that risk."

5. Sanctions may lead to "the most serious complications" but the Fascist government has already taken the necessary measures to face them.

6. The government has taken steps to guarantee economic resistance, including:

7. Obligatory conversion of foreign credits;

8. Limitations upon corporation profits;

9. A 10 per cent tax upon dividends and interest;

10. Transformation of automobiles into charcoal gas-burners in order to save gasoline.

AGATHA WINS YACHT RACE AT BORDEN

Lawrence Gerlevsen Winner of The Allen and Foley Cup.

(Continued from Page 1)

Agatha won handily at Borden yesterday afternoon when her crew shook out the reefed sails early in the race and she drew steadily away from Northwind, and Noreen which sailed the whole course under reefed canvas.

Agatha, owned by Lawrence Gerlevsen, has now captured the Allen and Foley Cup for this competition having won three of the four races sailed. The fifth race to be held in Summerside on Labor Day will be an exhibition contest.

A fresh breeze and choppy seas forced the racers to start with double reefs but the wind dropped considerably while the boats were beating up to the first mark, and Agatha's crew took the opportunity to crowd on full sail. Agatha led Northwind, and Noreen over the starting line, but Northwind drew to windward of Agatha while beating out of the harbor, and the latter was forced to give way when Northwind crossed her bows on the port tack. Northwind however, fell short of the first buoy, and lost out when she took a short tack to get around.

The breeze freshened for the last two laps of the course which were off the wind, and the boats made fast time on these two runs. Agatha leading Northwind by a wide margin and Noreen bringing up the rear.

(By James A. Mills, Associated Press Foreign Staff)

ADDIS ABABA, Aug. 28.—Fear of war, apparently wiping out the cleavage formerly existing between Ethiopian Christians and Mohammedans, had banded them together today in joint intercessory services, an unprecedented event.

Moslem imams (priests), in their Friday prayer services in the mosques, will urge Mohammedans to unite with Christians "in this time of national peril."

The recent appointment of Balata Ayelle Gabre to the consulate at Yemen is another indication of the closer relations between the two sects. Several Moslem missions are arriving from Yemen bearing messages of sympathy and support for the Emperor.

Offer Support

The Ethiopian minister, at Cairo informed Emperor Haile Selassie today that 5,000 Egyptians, Moslems as well as Copts, are ready to form a foreign legion to fight against Italy. Ethiopian consulates both at Cairo and Port Said, the Emperor was told, are being besieged by crowds of applicants for enlistment.

The Ethiopian government is not accepting their offers at present and will wait results of the League of Nations Council meeting at Geneva Sept. 4 before acting.

Former Emperor Lij Yasu, who has been living in Garamouta, 100 miles from Harrar, a report indicated, had offered to fight against Italy provided Emperor Haile Selassie will furnish him with an army of 10,000 to 15,000 troops. Selassie, the report added, declined the offer because of lack of confidence.

Emperor Haile Selassie ordered a gas mask drill today to familiarize natives with their use.

POPE PRAYS FOR PEACE

CASTEL GANDOLFO, Aug. 28.—(C.P.-Havas)—Pope Pius XI prayed today that war between Italy and Ethiopia might be averted and invited 2,000 nurses from 27 nations whom he addressed to join in his supplications.

"The mere thought of war makes us tremble," he said. "They are talking ahead of a war of conquest, an offensive war. That is a disconcerting supposition on which one does not wish to dwell. A war solely for conquest would indeed be an unjust war, surpassing imagination. It would be too sad, too horrible."

"We cannot think of an unjust war and deliberately dismiss the possibility from our minds. On the other hand, Italy informs us that such a conflict would be for just defence, to protect its frontiers from incessant dangers and for the expansion of population, which is, increasing day by day, and that such a war would be justified to assure the material welfare, and security of the country."

"It is true, my dear daughters," the Pope continued, "that we must reflect on this need of expansion and the need to protect frontiers, and we can but hope that these difficult problems will be solved by other means than war."

"But how? The answer is obviously difficult but we do not believe it impossible to find a solution. Let us pray to God to aid and give clear sight to those charged with the task, assuring the happiness of peoples and social justice."

Seek Strong Assistance

Laval's insistence that he be given strong assistance at Geneva indicated the gravity of the situation. He asked for Edouard Herriot, Minister of State, for Paul Bastid and for Henry Berenger, the last-named pair being presidents of the foreign affairs committees of Chamber and Senate respectively. Joseph Paul-Boncour, France's permanent delegate to the League, will also go to the League Council meeting, which begins Sept. 4.

Officials explained, after the cabinet meeting, that the "German menace" is spurring the Premier to utmost efforts to maintain the three-power front in which France, Britain and Italy have been allied. He seeks also, they said, to save the prestige of the League of Nations.

The C.N.R. is an Important Factor in CANADIAN MINING.

Mining is by no means a new industry in Canada, but when its future development is considered in the light of recent discoveries it may quite rightly be said to be only in its infancy. Much of the success which has attended mining in Canada is attributable to the fact that the railroad facilities of the C. N. R. were easily available. In the same way its future is linked with the extent and nature of the transportation services at its disposal.

Coal formed the largest single item in weight carried by the C. N. R. in 1934. In that year the system hauled as revenue bearing freight, over 8,000,000 tons. Were it possible to collect this vast amount in freight cars and make one long train, it would extend almost half way across the continent. The importance of this commodity to the factories and homes of Canada needs no stressing; : : but it is well to bear in mind that the railroad is the only land transportation medium for coal haulage where distance is a factor.

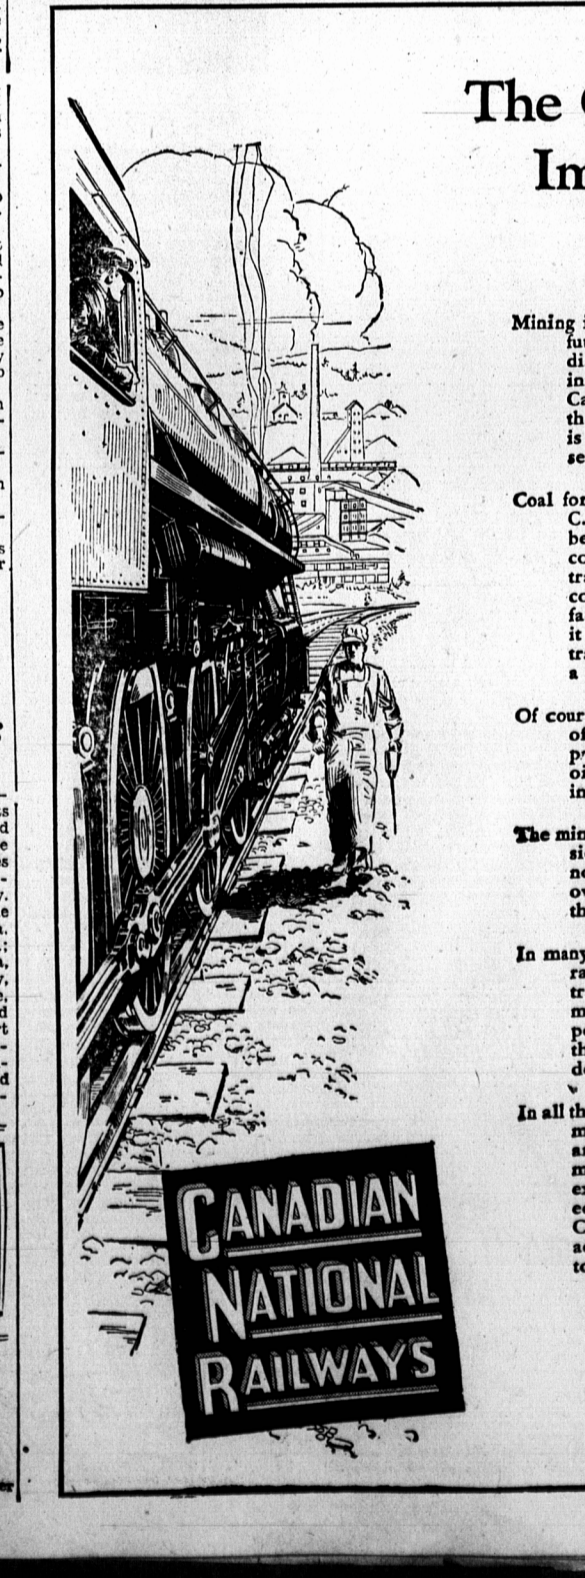

Of course other mine products enter into the freight business of the C. N. R. Altogether, over 12,000,000 tons of mine products, embracing coal, coke, ores, sand, stone, gravel, oil, etc., were carried in 1934, this being a substantial increase—22%—over the preceding year.

The mining of metals has of recent years assumed greater dimensions than before, and it may be of interest to note that of non-ferrous metals in semi-refined state, the C. N. R. carried over two hundred thousand tons in 1934, which was more than twice the quantity carried in 1933.

In many districts of Canada the C. N. R. is providing the sole railroad service available to this great industry, and its tracks enter, or are close to, some of the most promising mining areas in the Dominion. In accordance with its policy of rendering the greatest possible public service the C. N. R. is co-operating to the fullest in furthering the development of these areas.

In all these branches of railroad and allied activities the C. N. R. maintains a high standard of efficiency. Its passenger trains are speedy and comfortable; : : fares are low and there are many special excursions at reduced rates; Its freight, express and telegraph services are quick, reliable and economical and its hotels and camps, situated throughout Canada, offer the traveller, whether on business or pleasure, accommodation of the highest standards. You are invited to make a greater use of these C. N. R. facilities.

During the present Summer season the C. N. R. is providing special fares and excursions between points throughout Canada. These are exceptional travel bargains. The nearest C. N. R. Agent will be glad to give full particulars.
