SEVERE RHEUMATIC PAINS DISAPPEAR

Rheumatism depends on an acid which flows in the blood, affecting the muscles and joints, producing inflammation, stiffness and pain. This acid gets into the blood through some defect in the digestive processes, and remains there because the liver, kidneys and skin are too torpid to carry it off. Hood's Sarsaparilla, the old-time blood tonic, is very successful in the treatment of rheumatism. It acts directly, with purifying effect, on the blood, and through the blood on the liver, kidneys and skin, which it stimulates and at the same time it improves the digestion. Get Hood's Sarsaparilla today. Sold by all druggists.

Baumann, daughter of a German officer, who assisted him in lending succor to the hundred and fifty refugees in her native city of Plauen. Mr. Roth's physician has given him only a few days to live. When hostilities began in Europe in July, 1914, Mr. Roth was Vice Consul at Plauen. Hundreds of refugees of all nations were thrown upon his hands. He has been mentioned many times in press despatches for the untiring effort and aid he extended as the representative of the United States government. But the food situation in Germany became acute. In Saxony, which is a large industrial center, famine waged its battle. Mr. Roth said they began to make bread out of the chopped straw. But he continued his work until through lack of nutritious food he became very ill, and was compelled to leave Germany. The condition of the country in which he worked, he graphically describes in the Herald after his return to America. "Ruth, misery, privation stare one out of countenance everywhere in Saxony," he said. "Even upon the tiring effort and aid he extended as the representative of the United States government.
