British Troop Oil Liniment is without exception the most effective remedy for Cuts, Wounds, Ulcers, Open Sores, Itch, Bruises, Bites, Stings of Insects, etc.

A 100% health...

"I wish you a happy and prosperous new year," said the countess.

"Thank you," replied the contortionist. "I am reasonably sure of making both ends meet."

For Farmers.

Mr. A. W. Gundley, Government agent at Liverpool, reports, under date of Oct. 28, that the grading of Canadian apples this year is much better than any American apples arriving at Liverpool, many of the latter being "faced" in a shameful way. He draws attention to the fact that in the Liverpool market the grade marks are not seriously considered, as all fruit is exposed by sample in an open basket. Mr. Gundley quotes a typical case of an exaggerated American grade, and observes that the chances are that this particular barrel will not realize half the price of the "Canadian XX."

The great drought in Australia is producing strange feeds for dairy cattle. Farmers are cutting the strange bottle tree, the trunk of which is chiefly a watery pith, and feeding it to their cows. The water hyacinth, which is such a nuisance in blocking up water-courses, is found to be valuable. One acre of this plant is equal to five acres of grass, and it is stated that the weeping willow, as a fodder plant, is the most valuable tree grown in some places. A ration of weeping willow balanced with the bottle tree and water hyacinth would be a strange milk producer.

Man and the Lower Animals.

Department of Agriculture, Ottawa, November 6.

In reply to the question "Is Anthrax a Danger to Humanity?" put recently by a daily newspaper, anthrax is a blood disease, which affects all domestic animals. Carnivora or flesh eaters, dogs for example, enjoy a high degree of protection against it, but at times they too succumb. Man himself is quite susceptible, and sheep, goats, horned cattle, and horses are especially liable to contract it. The result depends upon the portion of the body that is affected. If the poison passes the stomach and develops in the intestines, death follows. If in the case of a man a wound on the hand or the leg gives the poison entrance into the body, then malignant pustules form. Oftentimes such patients recover; possibly one in five may die. The same may be said of horned stock, but sheep and goats, with one or two curious exceptions, have little or no resisting powers, and anthrax, once in a flock, often claims one-half its number as victims.

The cause of this disease is a plant too small by far to be seen by the eye unaided. Under the microscope it looks like a rod about five times as long as it is thick. Five thousand of these rods or bacilli put end to end might measure an inch in length. This rodlike plant goes to seed under certain circumstances, a point to be remembered, because it is this peculiarity which gives to it almost unlimited power for causing losses. These seeds (spores) can stand both heat and cold, and can lie for years in a dry place without loss of vitality. A combination of heat, moisture and food, such as the animal body offers, may cause the seed to germinate and develop an epidemic anew. Once within the animal body, anthrax plants multiply without seed formation, and if they cause the death of the animal, and it is buried without a dissection or mutilation, which would allow air to come into contact with the blood, then, in a short time, the plant dies, and nothing remains to generate future trouble. Almost invariably, immediately after death, however, blood exudes from all the natural openings of the carcass of an anthrax victim; therefore it is the duty of the farmer to take care that the carcass is cremated immediately life is extinct. In no case should the carcass be skinned, or the plague may extend not only among the adjacent flocks and herds, but to the tanners and their helpers, who take part in removing the hide from the animal.

Last year a bulletin was issued by the Dominion Department of Agriculture dealing with anthrax, and demonstrating the efficacy of the use of Pasteur's vaccines to produce immunity. The anthrax bacilli themselves are easily killed, but their spores resist ordinary germicides, and even such degrees of heat as kill other spores of bacteria. If the disease be left unchecked and preventive measures be neglected, not only may present serious losses be experienced, but the land itself may be rendered infective for centuries. The spores of the bacillus in some way get into the ground and remain there in a dormant state for many years. The skin, hair, wool, hoofs and horns of infected animals, if soiled with blood, are contaminated by the bacillus. It is an infection the very reverse of that of contagious pleuro-pneumonia, which requires the contact of living diseased animals with living healthy animals, whereas anthrax infection rarely takes place from living animals, unless the blood containing bacilli be allowed to contaminate the food, or inoculate a wounded surface. The carcass and excreta are to be dreaded as the sources of infection.

If after death the blood be confined within the body, and discharges from the natural openings be prevented by plugging them with tow saturated with a 20 per cent. solution of carbolic acid, and the carcass be carried, not dragged, to the place prepared for burning it, no infection is likely to take place from it. As a precautionary measure, however, the stall and surroundings where the death occurred should be thoroughly disinfected, as well as the cart or wagon in which it has been carried.

After burning the carcass bury the ashes deeply with lime. The risks that are run by any carelessness in dealing with a carcass from which millions of millions of infective spores may be given off, which may years after infect and destroy cattle, sheep, swine and horses and enormously reduce the value of the farm, must be obvious.

Vaccination or protective inoculation should not be undertaken by any inexperienced person, and on no account should old or doubtful lymph be used. Protective lymph may be obtained through the Dominion Department of Agriculture at a discount of one-third...

Ask The Painters

What They use for Backache, Pains and Stomach Trouble Common to Their Trade Many Say

Dr. Chase's

Kidney-Liver Pills.

On account of the continual strain of reaching, stooping and twisting the body, the painter frequently suffers from backache and kidney pains. Then along with this the breathing of poison from the paints tends to upset the digestive organs and derange the kidneys, liver and bowels.

You scarcely meet a painter who does not suffer more or less from those ailments, and very many of them have earned that no treatment, is so prompt and effective in removing their troubles as Dr. Chase's Kidney Liver Pills.

Mr. B. H. Barnaby, painter in the D. A. R. shops Kentville, N. S. states:—"I have used Dr. Chase's Kidney-Liver Pills for a number of years, whenever I would get constipated and suffer from kidney pains and derangements of the digestive system and know of many others who have also used them for similar troubles. I can join with others in pronouncing them an excellent medicine. When constipated I find one pill sufficient to set me right, and am never without a box of these pills in the house. I consider them the best medicine I ever used."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, at all dealers, or Edmarson, Bates & Co., Toronto.

"What do you most desire for Christmas Miss Mabell?"

"Oh George, this is so sudden!"

"Wh—what do you mean?"

"Why, of course, I want you!"

Used internally Hayward's Yellow Oil cures Sore Throat, Hoarseness, Quinsy, Pain in the Chest, Croup, col. Used externally cures Rheumatism, Stiff Joints, Contracted Cords, Sprains, Strains, Burns, Scalds, Cuts, and Bites of Insects.

Minard's Liniment the Best Hair Restorer.

"What kind of a Christmas did you pass?" asked the friend.

"The same as usual," answered Mr. Bliggins sourly. "Twenty minutes of turkey and mince pie, and six weeks of pepsin."

GOOD HEALTH IS IMPOSSIBLE.

Without regular action of the bowels, Laxative Pills regulate the bowels, cure constipation, dyspepsia, biliousness, sick headache, and all affections of the organs of digestion. Price 25 cents. All druggists.

Hewitt—I pay big money for my clothes Jewett—Perhaps you wouldn't have to pay so much for them if you paid for them.

Minard's Liniment Cures LaGrippe.

The future is submerged with grief, And hope aigh forsook it, For if you pay the price for beef You can't buy coal to cook it.

The breath of the pines is the breath of life to the consumptive. Norway Pine Syrup contains the pine virtues and cures coughs, colds, bronchitis, hoarseness, and all throat and lung troubles, which, if not attended to, lead to consumption.

Dr. Seidlitz—I think you're suffering from lung trouble.

Patient—You're right. My daughter sings night and day.

Worms affect a child's health too seriously to neglect. Sometimes they cause convulsions and death. If you suspect them to be present, give Dr. Low's Pleasant Worm Syrup, which destroys the worms without injuring the child. Price 25c.

"Johnnie, what do you want me to buy you for Christmas?"

"How much money have you got?"
