Western Guardian

CENTRAL BEDEQUE ITEMS
—Hay making and potato spraying are the order of the day around here. Mr. Howatt, Potato Inspector, recently visiting here inspecting the different fields of potatoes. Mr. and Mrs. A. J. Grant of Mount Stewart, accompanied by Mr. and Mrs. John McDonald, Scotchfort were recent visitors here and were the guests of Mr. and Mrs. Hubert Muttart. The crops in this vicinity look very promising and farmers look forward to a fair price for potatoes this fall. We are glad to have Miss Maude McDonald back with us again. Miss McDonald spent the past three months in Middleton. Mr. Patrick McFarish who is visiting his sisters here was a visitor to Bedeque Sunday night. Quite a number of the residents around here and vicinity motored to Lennox Island Sunday. Mr. Wedge of North Carleton was a recent visitor here.

The dance which was held in Seven Mile Bay Hall was a great success and was very largely attended. Miss Ella Hennessey of Dorchester, Mass., is visiting here the guests of her Uncle and Aunt, Mr. and Mrs. Wm. Muttart.

Central Guardian

Regular Meeting
Of City Council

The regular monthly meeting of the City Council was held last night in the Council Chamber, with Councillor Foster in the chair, owing to the absence of Mayor Miller who is at present away from the Island.

After the usual preliminary business was disposed of, the City Clerk read a communication from the City Recorder to the effect that the City was under no legal responsibility in regard to remuneration to the late Housing Committee.

The Health Officer reported that all small-pox cases have been cleared up.

The Meat and Milk Inspector reported that ten portions of carcasses and two and a half carcasses of lamb were condemned as unfit for food and destroyed.

58 samples of milk were analysed and six were below 3.5 and two had sediment.

Councillor Yeo in moving a resolution for permanent work on Upper Prince St., spoke of the necessity of such from Euston St. to Gerald St. The resolution was carried.

A resolution was presented by Councillor Blanchard, seconded by Councillor Dougan, asking for \$100 for the firemen to help them in the tournament. The motion was carried.

A letter was read from the Maritime Electric Co., asking the City to make necessary repairs to the wiring system in the Market Building so that connected service to this building may be maintained. A resolution was passed giving authority to the Lighting Committee to make the necessary repairs at a sum not exceeding \$100.

The City Assessment Bye-Laws were passed after adjourning.

A special meeting is to be held this morning at nine o'clock.

The following is the police report for the month of July:

Crushed By Ten-Ton Tree Trunk

(By British Press)
LONDON, Aug. 8.—A young woodman, Lawrence Downer, Isle of Wight, is in hospital with several broken ribs and head injuries as the result of an extraordinary accident. He and four other men were falling trees on the hillside. They had cut down an oak, and had just finished sawing off the branches, when the trunk weighing about ten tons, began to roll down the hillside.

The other men sprang clear, but Downer, tripped and fell, and the rolling tree went over him. Fortunately, he fell in a depression between two stumps of hazel, which took part of the weight of the tree and saved him from being killed.

Opening Of Summer School In Zion Church Hall

The opening exercises of the Presbyterian Summer School were held in Zion Church Hall last evening. Rev. R. H. Stavert, Convener of the committee on Sunday Schools and Young People's work, presided.

Upwards of fifty in all made up of pastors, Sunday School Superintendents, teachers and pupils and workers among young people were present.

Rev. W. M. Kannawin, Secretary of Sunday Schools and Young Peoples Work for the Presbyterian Church in Canada, Miss Edith Sinclair, Girls' Worker for the Presbyterian Church in Canada and Miss M. L. Winchester Primary Worker arrived for the evening train to take charge of the work of the School. They were accompanied by Mrs. Kannawin and little daughter "Billy."

After the devotional exercises were over short addresses were given by Rev. R. H. Stavert, Rev. W. Bruce Muir, Rev. Andrew Brown, Rev. Fred Williamson, Rev. Quincy A. McDowell and Messrs. G. L. Fullford, M. F. Ramage and Delmont Yeo, Student orators.

All of the addresses dealt largely with the importance of work among the young and the great need of training leaders to carry on the work of the church in the years which lie before us. These summer schools have been instituted to help in this work of training and Education.

In his address Mr. Stavert as clerk of the Presbyterian extended to Dr. Kannawin and his associate workers a hearty welcome to the Presbytery of P. E. Island. Knowing that they were all people of true worth he believed that for the time being he could safely hand over to them the keys of Presbytery. He felt sure that their stay with us would do us good and he trusted that their association with us would not do them any harm.

Mr. Muir followed with an address of welcome to Dr. Kannawin and his associates and all others who came to attend the summer school a hearty welcome to the City of Charlottetown.

Mr. A. A. McDonald, Superintendent of Zion Church Sunday School extended a hearty welcome from the Sunday School and all the people of Zion Church.

Rev. A. Brown and other speakers from the surrounding districts speaking in behalf of themselves and all who were attending the summer school thanked these gentlemen for their words of welcome.

In replying to the address of welcome Rev. Dr. Kannawin spoke at some length regarding the rapid growth of the Presbyterian Church in Canada during the past two years.

While in quite a number of places the number of Sunday Schools had been lessened because of the disruption yet the number received into full communion from these Sunday Schools was larger by a great deal than those received in the year 1924. The growth of the work among the young was especially striking. Miss Sinclair and Miss Winchester each in a few well chosen words emphasized the importance of the departments of the work represented by them.

Mrs. Kannawin gave a short, but splendid address on the mission of the church.

Following these addresses came a social half hour during which everybody present was to get acquainted with everybody else. This was thoroughly enjoyed by all. The singing of "O God of Bethel" brought a very pleasant evening to a close.

The classes begin each day at 9 a. m. and extend until 12.30 a. m. with an address at 8 p. m. The following programme will be carried out:

9 to 9.50 a. m.—Bible Study, Rev. W. M. Kannawin, D. D.
10.00 to 10.50 a. m.—Sabbath School Methods.
(1) Primary and Junior Workers, Miss M. L. Winchester.
(2) Girls Workers, Miss Edith Sinclair.
(3) Young People, Rev. W. M. Kannawin, D. D.
11 to 11.55 a. m.—Mission, Rev. L. L. Young.
12 to 12.30 a. m.—W. M. S. Work.
Mrs. L. A. Moore.
2.00 to 6.00 p. m.—Rest, Recreation, Tennis, Golf, Motor Trips, Sight Seeing.
8.00 p. m.—Special Addresses.
All who can possibly do so should hear Dr. Kannawin and all of his associate leaders.

A hearty welcome extended to all who wish to attend.

Grand Celebration and Picnic

AT
RUSTICO
ON
Thursday, Aug. 11th.

Henri Bourassa with a party of 225 French Canadians will be present.

A well organized Picnic will accommodate the public. There will be speeches in English and French by Mr. Bourassa and other gifted orators.

Do not miss visiting one of the most charming spots on the North Shore, and at the same time you will hear one of the most gifted public men in Canada discuss national problems.

BY ORDER OF COMMITTEE.

Subterranean Lake Marvell

(By British United Press)
PARIS, Aug. 8.—An underground river a mile long leading to a subterranean lake in an immense cavern, the roof of which glistens with stalactites like huge diamonds, has been discovered near the village of Leant-de-l'Hotel, in the Haute Garonne Department in the South of France.

The village derives its water supply from a copious spring issuing from a cleft in the mountain at an altitude of 2,500 feet, near which are a number of natural wells, one of which has been used from time immemorial for disposing of the carcasses of dead cattle.

In order to determine whether the well into which the dead cattle are thrown is contaminated the village water supply, a local official, M. Norbert Castet, entered the cleft in the rock in a portable canoe, with an electric lamp worked by a pocket battery fixed to his forehead.

He found himself travelling up an underground river, at a depth of considerable depth, the waters of which were icy cold. From time to time the river narrowed and then widened out again into great underground halls, culminating a mile from the outlet in a large subterranean lake which has not yet been fully explored.

Love Laughs At Age

(By British United Press)
LONDON, Aug. 8.—After two years of courtship, a grey-haired widow of 88 has succumbed to the blandishments of her suitor, eight years her junior, at the third time of asking.

Mrs. Frances Emerson has just been married to John Fozard at the local registry office.

The bride lived in a little cottage at Armlay and Fozard lived near her.

The aged man's suit had been twice rejected, but at the third time of asking he was accepted.

"Some folks may laugh" said Mrs. Emerson, "but they may laugh because we are both old-age pensioners, but I think I can still make him a better wife than some of your modern girls."

For all pain—Minard's Liniment.

Do Scientists Live Longer?

(By British United Press)
LONDON, Aug. 8.—Do scientists live to a greater age than members of other professions?

The question is raised by the remarkable ages attained by ten well-known scientists whose deaths have been recently reported in one week.

Their ages are as follows:

B. Lewis Rice, archaeologist 89
John MacLeod, Mathematician 86
J. H. Reynolds, technologist 85
Charles Ford, botanist 83
W. S. Vallant, geologist 81
Prof. Mittag-Leffler, mathematician 75
Prof. C. W. Hargitt, zoologist 75
Hudson Maxim, inventor 74
C. B. Sudworth, dendrologist 73

The probable reason for their great ages, suggests Sir Richard Gregory, the distinguished scientist, is that as scientists they have known how to conserve their energies.

"I should suggest," that a group of scientific workers would live longer than a group of workers taken from any other profession for the reason that scientists know how to take proper care of their physical system.

"Then they lead a less hectic life than actors, musicians and writers, so it is to be expected that they would live longer."

It may also be remembered that scientists do not come to distinction until far later in life than workers in other professions, so that may make their ages appear greater.

That there is a relationship between science and longevity is shown to a marked degree in the case of astronomers. Sir Isaac Newton lived 85 years, and the average age of the Astronomers Royal from 1646 to 1910 is 75 1/2 years.

They are as follows:

Flamsteed 73
Maskelyne 78
Halley 85
Pond 69
Bradley 69
Airy 90
Bliss 65
Christie 77

The City Assessment Bye-Laws were passed after adjourning.

A special meeting is to be held this morning at nine o'clock.

The following is the police report for the month of July:

Electricity For Colds

(By British United Press)
LONDON, Aug. 8.—A method of treating the common cold by electricity is described in the great medical journal, "The Lancet." The apparatus was devised by a French doctor, and consists of two small metal plates which are fitted to the sides of the nose.

An electric current is made to pass from one plate to the other, travelling through the nose.

It is held to treat the cold in this way soon after it has begun. The patient sits in an armchair and the doctor regulates the supply of current.

When an uncomfortable sensation of heat is felt in the nose the amount of current is reduced, and later, when the heat becomes difficult to bear, the current is turned off altogether.

Then, it is claimed, the patient reaps his reward, he can breathe freely, he ceases to sneeze, the nose no longer discharges, and there is no sign that he has ever had a cold except a nasal intonation of the voice which persists for a few hours, and is due to swelling which has not subsided.

In most cases a single sitting of 25 minutes is said to be enough to complete the cure.

Though the Frenchman who recommends the treatment does not say just how painful it is, he is enthusiastic about its success. English authorities, however, are somewhat sceptical, as the heat produced by the current cannot penetrate far into the passages at the back of the nose, where the infection chiefly lies.

Crushed By Ten-Ton Tree Trunk

(By British Press)
LONDON, Aug. 8.—A young woodman, Lawrence Downer, Isle of Wight, is in hospital with several broken ribs and head injuries as the result of an extraordinary accident. He and four other men were falling trees on the hillside. They had cut down an oak, and had just finished sawing off the branches, when the trunk weighing about ten tons, began to roll down the hillside.

The other men sprang clear, but Downer, tripped and fell, and the rolling tree went over him. Fortunately, he fell in a depression between two stumps of hazel, which took part of the weight of the tree and saved him from being killed.

Mt. Stewart Notes

The weather man surely favored the farmers this year with their hay making and the hay-makers hereabouts are wise enough to know it.

Mrs. M. Egan and daughters Edna and Bessie left for Ottawa Friday morning where they intend to reside in future.

Mr. Alexander McEachern has received the position of accountant in the Royal Bank here and his friends wish him success in his new undertaking.

Mr. Ira Douglas purchased a Ford car Thursday last from Mr. Roy Jay, agent. This makes the sixteenth Mr. Jay has sold this summer.

Mr. Douglas Duff, W. Somerville, Mass., (formerly of Mt. Stewart,) and Mr. Jas. Corrigan came by motorcycle to spend a vacation at Bedford, Mr. Corrigan's home.

Rev. B. H. Penwarden, Horcourt, N. B., (a former pastor here) spent some time in Savage Harbor.

The Misses Cora and Jennie Douglas, Charlottetown are spending a two weeks vacation at their home here.

The Presbyterian regular service was held Sunday afternoon at three o'clock conducted by M. Ramage, student pastor.

The regular services were held in the United Church at the usual hours at 11 a. m. and 7 p. m. and were conducted by Rev. A. A. McLeod, Charlottetown.—F.

QUEEN HOTEL

Since taking over this Hotel we have spent many thousands of dollars in repairs and improvements. It is now the finest Hotel of its class in the Maritime Provinces. It appeals to those who want a comfortable Hotel and splendid table and excellent service at a moderate price.

Rates from \$3.00 to \$4.50 per day.

Charlottetown Hotel Co., Ltd.
Proprietors
MISS L. McQUAID, Manager

Utica Shaken By Two Explosions

(Canadian Press)
UTICA, Aug. 8.—Damage estimated at \$300,000 was caused here today when two explosions shot several city blocks and endangered scores of lives. Three dwellings were destroyed and a score of other buildings in the Italian quarter were damaged. Police authorities believed that the explosion had no connection with Sacco-Vanzetti demonstrations.

The Markets

(Canadian Press)
MONTREAL, Aug. 8.—A moderate amount of business was worked with foreign buyers in Canadian grain here today. The feature of the domestic trade was the strength of corn and oats and prices were advanced two cents per bushel. Car lots of Argentine corn were quoted at \$1.04 No. 2 Canadian western oats, and No. 1 feed at 71 cents per bushel. In sympathy with the advance in wheat prices at Winnipeg, the local market for spring wheat grades of flour was stronger and values were marked up twenty cents per barrel. The market was quiet. First patents were quoted at \$8.90, second patents at \$8.40 and at \$8.90, second patents at \$8.40 per barrel. The winter wheat situation was strong and higher prices are possible in the near future. Prices for all lines of millfeed were well maintained under a good demand from all sources. The trade in standard grades of rolled oats was quiet, but values were firm. A fair amount of business was done in eggs and the undertone continued strong. The receipts were 1,994 cases. Under an increased demand from local buyers and the stronger cable advices, local butter prices advanced another 1-2 cents per pound today. No. 1 pasteurized was quoted at 35-14 cents to 35-12 cents per pound. The receipts were 438 packages. Extreme dullness marked the trade in cheese but prices were well maintained. The receipts were 4,276 boxes.

Valuable Mill Property For Sale

Sutherland's Mill property, Montague, is to be sold at auction in front of the Court House in Charlottetown on 18th August inst. at 12 o'clock noon. For further particulars apply to Mr. Alex. McLeod on the premises or to George S. Inman, Solicitor, Charlottetown or to the undersigned.

Unnecessary Rumors

An officer of the Customs Preventive service made a raid upon Governors Island Sunday, the result of which was the discovery of thirteen gallons of mash in a house adjoining a factory there. This seizure has given rise to a number of groundless and unnecessary rumors in which the employees of the oil boring company have been unnecessarily connected. The management of the oil borers in Governors Island disclaim all knowledge of the seizure. In fact, the find was not discovered on the land of the oil company.

Rumors of such a nature, where there are no basis to cause such, are injurious to progress and the management of the oil company are justly incensed on account of some things which have been spread.

Research has disclosed that white women's hair grows about twice as rapidly as white men's hair, and that this difference is not found among other races.

Regular Meeting
Of City Council

The regular monthly meeting of the City Council was held last night in the Council Chamber, with Councillor Foster in the chair, owing to the absence of Mayor Miller who is at present away from the Island.

After the usual preliminary business was disposed of, the City Clerk read a communication from the City Recorder to the effect that the City was under no legal responsibility in regard to remuneration to the late Housing Committee.

The Health Officer reported that all small-pox cases have been cleared up.

The Meat and Milk Inspector reported that ten portions of carcasses and two and a half carcasses of lamb were condemned as unfit for food and destroyed.

58 samples of milk were analysed and six were below 3.5 and two had sediment.

Councillor Yeo in moving a resolution for permanent work on Upper Prince St., spoke of the necessity of such from Euston St. to Gerald St. The resolution was carried.

A resolution was presented by Councillor Blanchard, seconded by Councillor Dougan, asking for \$100 for the firemen to help them in the tournament. The motion was carried.

A letter was read from the Maritime Electric Co., asking the City to make necessary repairs to the wiring system in the Market Building so that connected service to this building may be maintained. A resolution was passed giving authority to the Lighting Committee to make the necessary repairs at a sum not exceeding \$100.

The City Assessment Bye-Laws were passed after adjourning.

A special meeting is to be held this morning at nine o'clock.

The following is the police report for the month of July:

Unnecessary Rumors

An officer of the Customs Preventive service made a raid upon Governors Island Sunday, the result of which was the discovery of thirteen gallons of mash in a house adjoining a factory there. This seizure has given rise to a number of groundless and unnecessary rumors in which the employees of the oil boring company have been unnecessarily connected. The management of the oil borers in Governors Island disclaim all knowledge of the seizure. In fact, the find was not discovered on the land of the oil company.

Rumors of such a nature, where there are no basis to cause such, are injurious to progress and the management of the oil company are justly incensed on account of some things which have been spread.

Research has disclosed that white women's hair grows about twice as rapidly as white men's hair, and that this difference is not found among other races.
