IN THE STUD
 The Superlatively Bred Stallion
CATALON, 57741

Own brothers of Owaisa 2.06%

Enrollment No. 20, Pure Bred

Catalon is a handsome 15.3 hands, 1075 pounds mahogany bay Stallion of perfect conformation and absolutely sound. He has trotted a mile in 2:14, last quarter in 32 seconds. He is sired by Bingen 2.06%, sire of 175 in the 2:30 list, including Ulian 1.58, Admiral Dewey 2.04%, King Cole 2.04 Owaisa 2.06%, full sister of Catalon. Catalon's dam was the great rare mare, Improbence 2.12, by Prodigal 2.18, and dam of Owaisa 2.06%, also Prodigal Bingen 2.16%, second dam Queen Wilkes, dam of Improbence 2.12, Queris 2.12%, and Improbable (2) 2.20. This Stallion offers to the breeders of this Province one of the greatest opportunities ever placed before them, as he is the only son of the great Bingen 2.06%, standing in this Province.

Will make season of 1915 as follows:-

At Park Stables, CHARLOTTETOWN	At Catalon Farm, SHERBROOKE
April 20th to 23rd.	April 24th to May 3rd.
May 3rd to 7th.	May 10th to 17th.
May 17th to 21st.	May 24th to 31st.
May 31st to June 4th.	June 7th to June 14th.
June 14th to 18th.	June 21st to 28th.
June 28th to July 2nd.	July 5th to 12th.
July 12th to 16th.	

Service fee \$15.00, payable by note at time of first service or a discount of 10 p. c., for cash. Mares at owners' risk.

Mr. Lobster Packer—
Your Supplies?

We have them here. They're better—stronger and more satisfactory than the ordinary kinds. Our expert workmen make these lobster packers equipments, they use the best materials of their kind that money will buy, and each separate piece of work is carefully examined and tested when finished. If it's not perfect, money will not buy it—the fault will be corrected or the work destroyed. That's why all users recommend our lobster packers supplies—they're decidedly superior to others.

Call, write or phone for particulars.

d H. Trainor
 80 Grafton St.
 Charlottetown.

THE MINDSWEEPERS.

Over 300 of Grimsby's great fleet of trawlers are engaged in the hazardous task of sweeping the seas for mines sown by the Germans, and this fact suggests these fine lines by H. Ingamells in the Spectator:

Little they care, come wind or wave,
 The men of Grimsby Town;
 There are mines to destroy and
 lives to save,
 And they take the risk, these sailor-
 men brave,
 With a laugh or a -oke or rollicking
 stave.
 As the gear goes plunging down.

Honor the trawler's crew,
 For fear they never knew!
 Now on their quest they go
 With a laugh or a joke or rollicking
 Seeking the hidden fate
 Strewn with a devilish hate.

Death may come in a terrible form,
 Death in a calm or death in a
 storm,
 Death without a warning, stark and
 grim.

Death with a tearing of limb from
 limb,
 Death in a horrible hideous guise—
 Such is the minesweepers' sacrifice!
 Careless of terrors and scornful of
 ease,
 Stolid and steadfast, they sweep the
 seas.

Cheerfully, simply, fearlessly,
 The men of Grimsby Town
 Do their bit on the rolling sea—
 The storm-swept, treacherous grey
 North Sea—
 Doing their duty unflinchingly,
 Keeping the death rate down.

GLASS-BOTTOMED BOATS.

A fifty-foot motor-boat, provided with two glass-bottomed wells, has been constructed for the purpose of scientific research of the sea bottom in Bermuda waters. The boat has a width of 15 feet, this unusual breadth being for the purpose of giving steadiness while on the ocean engaged in the work of studying the sea bottom.

The glass bottomed wells, each of which is 19 feet long, are located on either side of and parallel with the keel. They are so arranged that a large party can study the sea-formations beneath the boat at the same time. Light is thrown upon objects in the water by means of 12 fixed reflectors, and an adjustable searchlight can be let down with a cord. A Mixed Metaphor.

Sir Robert Ball, the famous astronomer, was rather fond of telling the story of a correspondent who wrote to him saying that, although he was a grocer's assistant, his great ambition was to become an astronomer. But he got his ideas somewhat mixed, for this was one of his sentences: "My mind finds no rest for the sole of her foot, save for one of the heavenly bodies."

THE PURE BRED CLYDESDALE STALLION

Lord Winsloe

Enrollment No. 3 Pure Bred
12629
 SIRE

CROWN RIGHTS 10182, Imp.
 CANADIAN HORSE SOCIETY 2862.
 DAM

ROSA CONNAUGHT 21036, Imp.

Brown face and legs white. Foaled 1906.
 Bred by McIntyre Bros., Park View, Griffen by Beith.
 Sire Cataclysm 11649, by Hiawatha 10067, Prince Robert, by Prince of Wales.

2nd Dam Maid of Griffen 21035, by Pride of Blacon 10837, by Baron's Pride 9122.

3rd Dam Rosenthal 13532, by Prince of Albion 6178.

4th Dam Rose Lawrence 13522, by Prince Lawrence.

5th Dam Bute Rose 9949, by Springhill Darnley 2429.

In this stallion is found as good a blending of the Clydesdale champions of Great Britain as in any draft horse in Canada, and that he will prove a great sire I feel confident. He is five years old, brown with white trimmings—face and legs.

Will make a season in the stud at S. Rustico.
 Albert Craswell, manager in charge. Service fee \$10. Mare at owner's risk.
 A. A. LECKIE, Veterinary Surgeon,
 Owner.

DROP COOKIES.

One cup sugar, one-half cup butter creamed, two eggs unbeaten, pinch of salt, two-thirds cup milk, one teaspoon vanilla, two and one-half cups bread flour, three level teaspoons baking powder (or two teaspoons cream of tartar and one teaspoon soda.) Beat well till light and smooth. This should hold shape. Add a tablespoon more flour if it will not. Drop with teaspoon three inches apart on greased pan and bake in a quick oven, biscuit heat.

ENGLISH MUFFINS.

Two cups of flour, one cup of sugar (scant), four level teaspoons of baking powder, one-half teaspoon of salt. Sift together. Add milk enough to make a soft batter. Two tablespoons of melted butter, one egg. Cook in a hot oven ten or fifteen minutes. This recipe will make about one dozen.

APPLE TAPIOCA.

Half a cup pearl tapioca, cold water, one and one-half cups boiling water, one-half teaspoon salt, seven small apples, one-half cup sugar, few gratings nutmeg. Soak tapioca one hour in cold water to cover, drain, add boiling water and salt; cook in double boiler until transparent. Core and pare apples, arrange in buttered pudding dish, fill cavities with sugar mixed with nutmeg; pour over tapioca and bake in moderate oven until warm with sugar and cream.

OATMEAL COOKIES.

Cream scant one-half cup of butter, one cup of sugar, yolk of an egg, one teaspoonful of milk, one tablespoonful vanilla extract, pinch of salt. Add beaten white of egg, then two cups rolled oats, with two tablespoonfuls of baking powder, one half cup flour. Drop on lightly floured tin sheets a good teaspoonful, according to size preferred. Bake eight of ten minutes in a moderate oven, lift from tin sheet with a knife. They will be soft when they come from oven, but soon harden.

TIP FOR THE TRENCHES

British soldiers in the trenches have a receipt for making boots waterproof. This is it:

Dissolve two ounces of yellow wax and one ounce of Burgundy pitch (both shredded) in one pint boiled linseed oil. This can be done in a jar in a slow oven. Then remove from the fire and add two ounces of spirit of turpentine.

As soon as it is cold it can be applied. Rub all over the boots, especially soles and where the upper is attached to soles not thickly. Allow this to dry in, repeat, and repeat again. These three applications make the boots quite impervious to rain or snow.

CARDINAL FACTS.

This is Canada's war. What will the harvest be? Increase of knowledge means increase of production.

The first essential for the highest yield is good seed.

Not only grain growers, but breeders and all producers are making history at this juncture.

Value of the crop is increased if treated for smut prevention.

Failure to secure suitable varieties is a frequent cause of poor ensilage.

All grain intended for seed should be cleaned and graded, in order to retain only the strong kernels.

Farmers who have separate houses for their laborers have no difficulty in securing help.

Good labor is worthy employment in winter as well as in Spring Summer and Autumn.

If labor is scarce now, it will not be more plentiful in another year, so it is wise to encourage present help.

A bureau of employment could find useful work in every town of size.

Austria has decreed that every acre must be utilized for production.

Wasting land is the worst form of extravagance.

Live stock is the foundation of permanently successful farming today, as it has always been.

The farmer who conserves his best stock for breeding will profit greatly in the future.

When manure is piled, and allowed to heat, the vitality of most of the seeds is destroyed; but when drawn to the field from the stable, or not left long enough in the pile to become well rotted, manure is one of the most important means of seed dispersal.

Canada is many times larger in area than Belgium, but in population there is not a great deal of difference, that is, considering Belgium before the war.

Britain is the protector of small states. The greater the area and variety of area, the more protection is needed when emergency arises.

DIDN'T KNOW GASTON

A New York clubman tells of a quaint character he met while on a hunting trip in Canada last summer. This man was of French extraction and proud of a friend of his in New York, one Gaston Lespinasse, of whom he talked constantly.

"You live in New York?" he at once asked when the Gothamite appeared.

"I do."

"You know Gaston Lespinasse?"

"No. I don't think I ever heard of him."

The Canadian seemed disappointed as well as nonplussed. Then he began again:

"You live in New York?"

"Yes."

"You do not know Gaston Lespinasse?"

"Never heard of him."

The Canuck grinned incredulously. Then with an air of one convincing another out of his own mouth, he said:

"Gaston is the cook at the hotel."—Chicago News.

BELGIAN BARES ARE BROUGHT TO MOTHERS.

Mrs. Lewis Chase, an author of note, wife of a famous professor of literature at Columbia University, who has been acting as a war chaplain, escorting girls and babies from Belgium and other places on the war-devastated continent to England, has arrived in New York City and is telling interesting things about the recent work, although she relates no thrilling tales. To a reporter who expected some lurid stor-

(the 7 point gum)

Your six lucky teeth and why they seldom decay

DENTISTS' records show that the front six teeth on your lower jaw rarely decay. And physiology points out this reason for it:

These six teeth are more constantly in contact with saliva than any other teeth you own. For they are the lowest in your mouth. And behind them are the two principal salivary ducts.

Your own saliva is the best preserver of your teeth.

For healthy saliva is alkaline, neutralizing the decay-promoting acid of food particles and rendering it harmless.

When you chew clean gum like Sterling you bring all of your teeth for the time in contact with saliva. You make them share in the "luck" which Nature has given to the front six.

Sterling Gum you'll want—for its delicious flavor goes through and through and stays and stays.

And all the time you're enjoying the delicious Sterling flavor—the gum itself is doing your teeth a good turn.

Sterling Gum
 Made in Canada REFRESHING PEPPERMINT 5c

The Sterling Gum Co. of Canada, Limited

ies from Mrs. Chase, she said: "I haven't had any thrilling experiences and I suspect those who tell of them. So few see the fighting line." When asked to describe her work, she threw some sidelights on the Belgians. "In the relief work for Belgium a committee of English women attended to all the real, boring drudgery, but of course only neutrals could travel for the Government, and this is where American women came in." She described bringing deserted Belgian babies to their mothers in England—deserted after the war broke out by the parents, who fled to England. "I shall never be able to understand it, but that's what they did. After they got to safety they wanted the children; and that is why this committee was formed. Those wishing the children brought to England could apply to the committee, then we American women would go after them. One woman left a two weeks' old baby; and the most beautiful boy I ever saw, a child of four years, was left in a hospital. He would have been taken to a foundlings' hospital if I had not arrived just when I did." According to Mrs. Chase the Belgians have a more complex character than Americans from Belgium and other places on
