ORCHARD PESTS.

Aphids (Plant Lice)—Several species of aphids attack stone fruits. The black aphid, on cherries, is often serious.

Black Knot—This common disease of stone fruits, especially of plums and sour cherries, appears as a black swelling upon the limbs.

Brown Rot—This fungous disease is one of the most common and destructive pests of all stone fruits.

Curculio—The adult insect, a smoky-brownish snout-beetle, "stings" young fruit, making a noticeable crescent-shaped mark below the egg.

Shothole Fungus, which riddles the foliage with small, roundish holes and other leaf diseases of the stone fruits, are controlled by spraying with Bordeaux mixture of self-boiled lime-sulphur at frequent intervals during the growing season.

Recent experiments have shown the great superiority of lime-sulphur spray over Bordeaux in controlling brown rot. If a standard commercial brand of lime-sulphur is used, testing 32 degrees to 33 degrees, Beaume, use one part of the solution to 100 parts of water.

Thinking the fruit so that they do not touch is one of the best means of preventing the spread of the brown rot. The selection of resistant varieties is one of the most important measures of evading this trouble.

Curculio—The adult insect, a smoky-brownish snout-beetle, "stings" young fruit, making a noticeable crescent-shaped mark below the egg. The egg soon hatched and the young worm eats its way into the fruit, causing it to drop. When full grown the larva goes into the ground, and changes into a beetle in late summer.

Shothole Fungus, which riddles the foliage with small, roundish holes and other leaf diseases of the stone fruits, are controlled by spraying with Bordeaux mixture of self-boiled lime-sulphur at frequent intervals during the growing season.

Three Crown, White Silk Mohawk White Eagle. Prices low for cash.

Notice

Dories of all sizes and types

We have a large stock of the ordinary, single, medium and double dories and we are at present building a number of

23 ft. double end power dories

which we will sell with a 2 1-2

H. P. Imperial installed for

\$125, F. O. B. Car Souris

L. and N. PAQUET, Souris.

STRANGE REGIMENTAL CUSTOMS

Each year on St. David's Day at the regimental dinner of the Royal Welsh Fusiliers, a dish of pungent leeks is laid upon the officers' mess table.

It is also a condition of this curious proceeding that a certain position must be assumed by the eater at the time. He is required to place one of his feet upon the table, a circumstance that indicates that the custom originated at a period when "table manners" were little cultivated by the military.

The arrangement of the sashes worn by officers and non-commissioned men in the British service is simple and distinctive.

The sashes of officers go over the left shoulder and bunch at the right hip, while in the case of the non-commissioned men the reverse is correct.

The reason assigned for this is that at the battle of Culloden all the officers of the regiment were killed or severely wounded, and the sergeants' command of the men, winning a signal victory after a long, stubborn fight. So it happens that, in consequence, the sergeants of the Somersetshire Light Infantry have ever since been allowed to wear their sashes as if they were officers.

This famous body of fighters also has the distinction of wearing uniforms worked into the lace on the uniforms, and this commemorates also the loss of officers suffered by the regiment at Culloden.

Lancers wear black lace on their decorations, in memory of Wolfe's death. But three regiments in the British army possess the right to march through the city of London with flags unfurled and their bands playing. These are the Royal Marines, the Royal Fusiliers, and the East of Kent. The custom commemorates the fact that they were originally recruited in the city.

The men of the Gloucestershire regiment wear shields to the back as well as to the front of their helmets, while other helmets have shields only in front. The custom commemorates a famous event in the regiment's history. At Alexandria the Gloucesters were putting up a pretty fight, when suddenly they were attacked in the rear. There was a critical situation, but it was smartly saved when the left flank suddenly swung around, and, back to back, they repelled their enemies in the front and rear.

New Slumber Wear in soft flannel materials for early fall. Getting a little chilly, they just the thing for Dreamland Patons. 8-14dtf

AGREED.

Teacher—Willie, did your father come you for what you did in school yesterday?

Pupil—No, ma'am; he said the licking would hurt him more than it would me.

Teacher—What rot! Your father is too sympathetic.

Pupil—No, ma'am he's got the rheumatism in both arms.

Teacher—Willie, did your father come you for what you did in school yesterday?

Pupil—No, ma'am; he said the licking would hurt him more than it would me.
