children in some sort of an institution. At present I get \$22.50 a week from the children's father and also an \$80 pension from a society, which, of course, I will have to give up if I marry this man.

What do you advise me to do? L. K. ANSWER: A mother's duty is to the children she has brought into the world. Any woman with seven children to rear should be through with love-making and philandering. It will take all of her time and effort to bring the youngsters up to be decent men and women.

## about this Swans Down Spice Cake

Feather-light, down-soft and melting, here's the kind of cake you dream of making. And it's so easy to enjoy cakes like this — always — if you use Swans Down Cake Flour.

Swans Down is made by cake-flour specialists, expressly to make better cakes. Milled by a "Controlled Milling" process from wheat selected for its soft, tender gluten, Swans Down is sifted again and again until superbly even, and 27 times as fine as ordinary flour. Swans Down cakes taste better — stay fresh longer.

## CAKE TALK

Frances Berton

Today I'd like to give you two little hints that will help you quite a lot in making better cakes, every time you bake.

The first I learned a long time ago, from a professional baker — and I've found that women like very much the results they get when they follow this suggestion. It's one of those simple little things that makes a difference — just the matter of having all ingredients at the same temperature before you start combining your cake.

If you are making a butter-type cake, take the butter or shortening... the eggs... and the milk... from the refrigerator, an hour before you start to make your cake. For angel or sponge cakes, it's only the eggs that you must remember to bring from your refrigerator an hour or so ahead of mixing.

Try that next time you make a cake. Your ingredients will blend better, to give even, finer texture in both crust and crumb... the eggs will beat up lighter, to give better volume. And the improved texture will help your cake to taste good longer.

Now for my second cake-making suggestion. When your recipe calls for eggs by number, it's best to use eggs of average size. But if the eggs you have on hand happen to be very small or unusually large, allow about 3 1/2 tablespoons of slightly mixed whole egg for each egg called for. Seems like a little thing, but it can make a difference in the moistness and deliciousness of your cake.

Why not make the Spice Cake at the left, and follow those little baking tips? You'll really love my Spice Cake.

## GRANDMA'S SPICE CAKE

- 2 cups sifted Swans Down Cake Flour
- 2 teaspoons Columel Baking Powder
- 1/4 teaspoon (each) salt, allspice, ginger, mace
- 1 1/2 teaspoon nutmeg
- 1/4 teaspoon (each) cloves and cinnamon
- 1/2 cup butter or other shortening
- 1 cup sugar
- 2 eggs
- 2 tablespoons molasses
- 1/4 cup milk

Sift flour once, measure, add baking powder, salt and spices; sift 3 times. Cream butter, add sugar gradually; cream until light. Add eggs, one at a time; beat well after each. Add molasses; mix thoroughly. Add flour, alternately with milk, a small amount at a time; beat smooth after each addition. Bake in 2 greased 9-inch layer pans in moderate oven (375° F.) about 25 minutes. Wonderful with a lemon frosting between layers and on top and sides of cake.
