

# How PEPS Banish BRONCHITIS

### The MEDICINE You BREATHE Into Your LUNGS!

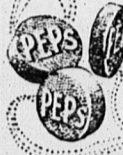

THE safe, modern method of treating winter coughs, chest colds, bronchitis, asthma, and other bronchial troubles is to take Peps, the medicine which is immediately effective because you breathe it in, straight to the weak spot.

When you strip off its silver-jacket and dissolve a Peps tablet in the mouth, it gives off soothing and healing vapours which mingle with the breath and are instantly carried through the throat, air passages and bronchial tubes right into the chest and lungs. These Peps medicines are speedily effective. They soothe and strengthen the tender lining membrane, they stop soreness or inflammation, clear the air-tubes, make breathing easy, and at the same time get rid of dangerous germ-trouble.

How different this direct Peps breatheable treatment—to the discarded and out-of-date practice of swallowing druggery syrups and mixtures into the stomach.

Strong-lunged, clear-voiced and hearty are the children whose mothers give them Peps. There's nothing so comforting and strengthening to old folks, suffering from that distressing night cough or chronic bronchial troubles.

Peps are free from all harmful drugs, and workers in a hundred industries find them indispensable for counteracting atmospheric conditions. Peps protect your throat, chest and lungs, and keep disease away.

TRY PEPS FREE! In a Peps bottle is the best sign of a good or cheap medicine. It is a sign of a high quality and a sign of a good medicine. Peps Co. Toronto, Ont. Write for a request if it is enclosed.
