A FREDERICTON correspondent writes:—Miss Hattie Sellick is visiting friends in Freetown. The old adage that love is blind was exemplified one evening last week when one of our young men went calling on a certain young lady. On arriving at his destination to his surprise he found that he had lost the collar of his horse and at latest accounts it has not been found.—Excellent debating society is in a flourishing condition. This winter great interest is taken by its members in the different subjects, which are at times very ably handled.

One of those happy events that tend to relieve the monotony of life took place at the Manse, Murray River on Wednesday January 10th, when Mary Jane, daughter of Samuel Livingston, and John J. McLennan were united in the bonds of holy matrimony by Rev. S. D. McPhee. The bride, who is one of Hopedale's most popular young ladies, was supported by Miss Agnes McLennan, Little Sands, sister of the groom. John S. Livingston brother of the bride was best man. After the ceremony had been performed the happy couple drove to the residence of the bride where they gathered a large number of friends and relations. A supper was prepared in the bustness best style and all enjoyed a happy evening which passed too quickly. The presents were numerous and costly attesting to the popularity of the contracting parties. The many friends and relations join in extending their best wishes for an ever flowing measure of happiness and prosperity.

ACCORDING to announcement, the Clyde River Farmers' Institute, met in New Haven Hall on Saturday, 13th, to discuss some propositions made by the Department of Agriculture with reference to the future usefulness of the Provincial Stock Farm. The president H. McMillan occupied the chair and a good number of officers and members being present the propositions submitted were well threshed out. Almost all the members present took a hand, and all were of opinion that the Stock Farm be still maintained as such, with better stock than now, and the building of a model barn in which to house them as an object lesson to the farmers who visit the institution. It was also suggested and widely concurred in, that the present farm is not in the right place. It should be near the city where it would be convenient to farmers when they go to the city on other business, also that the students of P. W. College could be taken out once a week and shown the practical as well as the theoretical side of agriculture; and it was urged that now is the time to make the change before the model barn is built or any more expense put on the old farm. The meeting closed to meet at Clyde River Hall on Saturday Feb. 10th at 7:30 o'clock. Subject, "Care and application of barn yard manure."

WHAT DO YOU CARE? YOU'VE GOT YOUR HEALTH

Great Natures Do Not Despair at Disappointment—They Look for Something Else to Do. The broad-gauged man of to-day does not get blue just because things don't always come his way unless there is something the matter with him. If he "falls down" on one proposition he immediately starts to look up another. He always looks forward and keeps on hustling. A man with his health and faculties has plenty of opportunities and the man who gives up or even feels like it has either a small nature or some physical weakness.

Dyspepsia certainly puts the best of men out of condition for work of any kind. You cannot blame the dyspeptic for getting blue. The very nature of his disease is most depressing and calculated to deprive him of ambition, energy and hope. There is hope for him, however, certain and sure. Stuart's Dyspepsia Tablets are recognized throughout the length and breadth of the land as the one cure that's safe and sure. Their unbounded popularity—resulting from the thousands and thousands of cures they have effected, prove beyond the shadow of a doubt their greatness as a cure. Wherein lies their greatness? In the very fact that they are Nature's own simple remedy. They do the exact work in exactly the same way that the digestive fluids of the stomach do because they are composed of exactly the same elements and possess the same properties. They relieve the weak and worn out stomach of its burden of digestion and permit it without let or hindrance to rest and grow sound and well. The stomach will get well quick enough in its own natural way if it is let alone. That is what Stuart's Dyspepsia Tablets do. They not only let it alone themselves but make the food taken into the stomach do the same.

You can satisfy yourself of the truth of this statement by putting the food you would eat into a glass jar with sufficient water and one of Stuart's Dyspepsia Tablets. The process of digestion will be taken up and carried out just as the gastric juice and other digestive fluids would do it. Their action is natural and they cause no disturbance in the digestive organs. In fact you forget you have a stomach when they begin to do their work, so mild and natural is the operation. Stuart's Dyspepsia Tablets are for sale by all druggists at 50c a box.

WORDS of want wisdom.—When you want work you ask for it, or do you try to hide away from it? Do you go where work is to be had, or where there isn't any. When you advertise for work do you advertise where nobody expects you to, or where the people who want work don't always look for help. The Guardian's Classified columns are the recognised go-between of those who want and those who want to fill wants. Whatever you want, let it be known in the columns of The Guardian, and the want will be filled.

HOW TO GET CONSUMPTION.

Ninety per cent of the "lungers" contract consumption by allowing poor resistance to fall so low that a favorable condition for the development of the bacilli is provided. In a healthy system consumption can't take root. But where there is weakness and debility, there you find tuberculosis. For developing strength and building up the weak, nothing equals Ferruzone. It makes the blood nutritious and the nerves enduring, the appetite it gives is surprising. Just what the man verging on consumption needs,—that's Ferruzone. It tired and weak don't put off. Fifty cents buys a box of fifty tablets—at all dealers.

A prominent insurance man of this town called and ordered a dozen of our now celebrated tomatoes. A few days later he again called and said, "Gay those tomatoes are just delicious, I will want at least 100 cans before the winter is over, the children, wife, and all of us are just wild over them." And so it is, every day we receive such words of encouragement. Our tomatoes are grown by ourselves and packed under our own personal supervision, they are all 1905 put up.
