FIGURES SHOW AN ENORMOUS EXPANSION IN CANADA'S TRADE

Our Exports and Imports Have Doubled in Seven Years—In Every Branch of Trade Tremendous Growth Is Shown.

OTTAWA, July 24.—The unrevised figures of foreign trade for the fiscal year ended June 30th, were today made public by the Department of Customs, and they show an enormous expansion in the trade and commerce of the country. The showing is one which should be a matter of pride and inspiration to the whole community, and it bears eloquent testimony to the wisdom of the fiscal policy of the Government.

The aggregate Foreign trade for the year, which embraces the total imports and total exports of domestic and foreign produce, amounted to no less than \$467,637,049, which is an increase of 43 3/4 millions over the trade of the fiscal year, 1902.

On the basis of imports which actually entered into consumption and Canadian produce only, exports, the trade for the year amounted to \$448,188,990, as compared with \$398,811,368, for the previous year, or an increase of \$49,377,621. On this basis our trade has more than doubled in the last seven years, as appears from the following figures.

Trade of 1903.....\$148,188,990
Trade of 1896.....\$220,502,817

It may be interesting to note at this point, that during the eighteen years of the National Policy, the increase was only 60 millions. To put it in another light, our foreign trade in imports entered for consumption, and domestic produce exported, amounted to about 1 1/2 millions per working day last year, whereas, in 1896, it was about \$730,000 per working day.

EXPORTS OF DOMESTIC PRODUCE.

The exports of domestic produce for the year totalled \$214,401,674. This is an increase of \$18,381,911, over the previous year, and nearly double the domestic exports for the year 1896, when they amounted to \$109,915,337.

The exports of animals and their products, and the produce of the farm figured up to \$114,441,868, compared with \$90,313,897 for the previous year. In 1896 they only amounted to \$50,591,002. In the last seven years, therefore, such exports have increased by about 130 per cent. When we contrast this year with an increase of only \$18,000,000 during the 18 years of Conservative rule it will be seen what marvellous progress has been made in recent years.

The exports of the produce of Canadian

forests show an increase of \$4,000,000 for the year,—the total amount being \$38,386,015. This is an increase over 1896 of 9 millions.

MANUFACTURED ARTICLES.

It is also very gratifying to find that the exports of manufactured articles produced in Canada continue to increase in generous proportion. Last year they totalled \$20,624,967, as against \$18,462,970 for the previous year. Since the inception of the Liberal policy, the exports under this head have more than doubled. In 1896 they only amounted to \$9,365,384.

The Free List, which largely comprises raw material for manufacturers, shows a remarkable expansion in imports,—hereby indicating great activity in manufacturing circles. In 1903, the free goods imported, less coin and bullion, amounted to \$88,023,738,—an increase of 10 millions over the previous year, and of \$50,000,000 over 1896.

As an evidence of the increase in the importations of raw material, the following items might be cited:

Raw cotton, imported in 1903, \$67,652,145 lbs., whereas in 1896, the importations amounted to only 33,479,358 lbs.

The value of raw hides and skins imported for the use of tanneries last year was \$5,661,334, as compared with \$1,945,914 in 1896.

More than one million tons more Bituminous coal was imported into the country last year for manufacturers than in 1896. Crude rubber was imported last year to the amount of \$1,532,938, as against \$852,095 in 1896.

The exports of Canadian produce for last year were \$37 per head. For the year 1902 the exports per capita, in the United States, were only \$18.

Our total trade last year estimating our population at 5 1/2 millions, was \$1 per head; that of the United States in 1902, was \$31 per head. Comparing ourselves further with the United States, it will be gratifying to Canadians to note that in 1896 the United States, with a population of 23,000,000 had a total foreign trade of \$20,000,000, whereas to-day, Canada with a population of less than 6,000,000 has a total foreign trade of about 470,000,000.

The following statement shows the figures of foreign trade for the month of June, as compared with the same month last year:
