CAR FERRY.—The Car Ferry left Tormentine at 4 p.m. yesterday and had a comparatively easy crossing, docking at Borden at 9 p.m. The mail and passenger train reached Charlottetown at 12.05.

COMPLIMENTARY BANQUET.

A complimentary banquet was tendered Hon. John E. Sinclair, M. P., by the Liberal Association of Queens County at the Cafe Paul last night. Speeches were made by Senator Prowse, Hon. Mr. Sinclair, Mr. F. J. Nash, Mr. G. S. Inman, Dr. Ross, Mr. Reuben McDonald and Mr. D. Edgar Shaw, the toast list closing with the National Anthem.

WELL MERITED APPRECIATION.

Appreciation of the splendid work of the choir master and the organist of St. Dunstan's Cathedral, Mr. W. J. Brown and Miss Besse Blanchard, was expressed in a practical way by the members of the choir last night in the Cathedral Assembly Hall when addresses and presentations to Mr. Brown and Miss Blanchard were made by Mr. Chas. Moran on behalf of the choir. Mr. Onasme Richard presided. The presentations took the form of well filled purses. Complimentary remarks were added by Rev. Father Jas. Rooney, Messrs C. W. P. Seale, J. H. Blanchard, Patrick McTague, Wm. Brennan and W. P. Bradley, Mr. Brown and Miss Blanchard, who were quite taken by surprise, expressed their pleasure at receiving such evidence of the cordial good-will of the choir.

ENJOYABLE TEA AND BAZAAR.

There was a large attendance at the St. James Church tea and bazaar last evening, in St. James Hall. The tea tables were thronged. There was an abundance of good things and the ladies in attendance saw to it that everyone was promptly served. Two fancywork tables, a refreshment table and a candy table, each invitingly stocked, contributed to the enjoyment of those in attendance as well as to the profit of the Ladies Aid Society under whose auspices the function was held. The proceeds amounted to over \$50. The annual Sunday School treat and entertainment will be held this afternoon. The Ladies Aid, one of the most active organizations in connection with the church is to be congratulated on the success which crowned its efforts this season, and particularly upon the success of last evening's tea and bazaar, which was declared to be the best of a long series of affairs of this kind.

S. O. E. NATAL DAY.

The Sons of England of this city observed the Natal Day of their Patron Saint by a social and dance in their hall in the evening at which over a hundred couples were present. The program furnished for the occasion consisted of cards, music and refreshments all of which were greatly enjoyed. The District Deputy, H. E. Ward, called upon Past District Deputy, L. B. Miller, who welcomed the visitors in behalf of the Brotherhood and gave an interesting address bearing on the subject of the day. Cards were exchanged in a unit about 11 o'clock in the evening and solos by Mr. Bruce, with Mr. Blanchard at the piano and Monologues by Mr. Theodore Bird. In cards, the ladies prize was won by Mrs. A. Ford and the gentlemen's prize by Mr. Thomas White, Elm Avenue. At 11 p. m. under the direction of Mr. Dixon and his orchestra, a dance program consisting of twelve numbers was carried out to perfection and to the enjoyment of all participants. During the programme an enjoyable luncheon was served by the S. O. E. ladies.

"The Girl in Red"

All roads will lead to The Strand Theatre next Monday and Tuesday when the beautiful three act comedy entitled "The Girl in Red" will be produced by the I. O. F. under the able direction of Theodore H. Bird with Charlottetown's most popular talent in the production. The following is a clipping from a Sault Ste. Marie paper where Mr. Bird has recently played. The stage settings were fine and the actors and actresses played their parts to perfection to an appreciative audience. Considerable talent was shown by the singers. Home talent plays properly conducted, have a tendency to develop the possibilities in young people which might otherwise remain dormant. Appearing upon the stage in public gives them confidence and in acting a part brings them in touch with the ways of life impossible to demonstrate in any other manner. After all, the world is a stage and life one big drama. Proper preparation of a good clean play under the direction of an able director, is not only amusing for the public, but is uplifting and educational as well as elevating. Parents need have no fear of entrusting their children to the care of such an able director as Mr. Bird has proven himself to be.—Tradesman. 2697-4-25-11

BIRTHS

VEALE.—At the Prince County Hospital on April 21st to Mr. and Mrs. Joseph E. Veale, Port Hill a son.

CONWAY.—Born at Green Road on April 10th, 1924 to Mr. and Mrs. Wilfred Conway, a son.

DEATHS

MONAGHAN.—Suddenly at her home in South Preetown, Nary Josephine, little daughter of Mr. and Mrs. J. A. Monaghan, aged eleven months.

Annual Meeting of the Rotary Club

(Continued From Page One)

erment pond and recommendation made that it be transferred to the East end of the city this year, and to the \$100 voted to the Dispensary fund.

The Charlottetown Club established seven years ago, made steady and satisfactory progress; with an increase of membership, its sphere of influence considerably widened and the belief in service frequently accomplished. The percentage of attendance was well maintained and the club won the District Attendance Trophy for October.

The Secretary, W. M. Rowe, reported 52 meetings with an average attendance of 83 per cent. The membership is 60 with a net gain of one for the year.

The Treasurer, Ed Nicholson, reported a surplus of \$9.37 for the year.

The Chairmen of the following committees reported:

Fellowship—R. H. Jenkins.
Public Affairs—A. A. Pomeroy.
Educational—H. H. Shaw.
Music—Roy Quigley.
Attendance—C. H. Black.
Fines—H. L. Pfamer.

The following officers were elected:

President—W. M. Rowe.
Directors—Gordon C. Hughes, J. S. Bayer, H. H. Shaw, P. W. Turner and G. D. DeLis.
The question of securing the steamer "Hochelega" for the Charlottetown-Pictou route was brought up and a resolution moved by Col. McKinnon, seconded by Mr. H. V. Buntain was passed "that the Rotary Club endorse the movement in securing a better steamship service on this route." A copy of this resolution will be given to Federal representatives from the Island.

The programme included an excellent reading by Mr. Theodore Bird.

Fine Pageant

(Continued From Page One)

Cook, Sally Allen; Stenographer, Mildred Blake; Musician, Thelma Teed; Physical Director, Eleanor Henry; Pupils, Dorothy Holman, Dorothy Teed, Marie Mutch; Librarian, Doris Craig; Teacher, Lilla Norris; Pupil, Lillian Helen Morris; Nurse, Ruth Ayers; Patient, Ruth Hooper; Missionary, Mildred Cox; Mission Class, Betty Large; Mary Bentley; Dorothy Harper; Muriel Hoper; Mildred McInnis; Mother, Jean Clow.

Cantata—"The Easter King"

Director—Professor Fletcher
Reader—Mrs Thompson
Soloists—Thelma Burns, Della Walsh, Jennie Sutherland, Linda Whitlock.

Much credit for the training of the girls taking part is due Mrs. Rowe, Mrs. Henry, Mrs. Teed, Miss Marion Ryan Miss Carroll.

The committee feel grateful to Mrs. J. McNeil, Mrs. Ira Brown, Miss Berna Huestis and Miss Della Walsh for assisting in the cantata.

Housing Big Problem

(Continued From Page One)

short all the dwellings that would have been built from 1914 to 1919 if there had been no war—plus the shortage resulting from slowed-down construction during the few years after the war, and, again, the shortage caused by houses that became useless or undesirable as dwellings for want of repairing during the war and post-war years. Estimates of this total shortage vary from 200,000 to almost 1,000,000.

The housing shortage is no worse according to officials here, in London, Liverpool, Manchester and other large cities than it is in the smaller manufacturing, mining and industrial centers.

Immense Diamond Found Near Canadian Camp

TORONTO, April 24.—To have found a rough diamond on his 20th birthday which later sold for \$4,850 after the hope of finding any stones had almost disappeared, has been the experience of Daniel Clarke, a young native prospecting on his own farm up Mazurini River, British Guiana and but an hour's journey from "Canada Hill," now the well established camp of the Canadian diamond hunting expedition.

What is claimed to be the fourth largest diamond ever discovered has been found in the district weighing six ounces. The find was made about 15 miles from the Canadian camp.

What Germany is Doing

(Continued From Page One)

also to pay big sums for illness, health, and age insurance. In addition there are special taxes designed particularly for social purposes, as, for instance, the so-called broad tax. The proceeds of the "enjoyment tax" and the alcohol tax are also for the most part used for social purposes.

The Community Relief Organizations, founded in all large cities in Germany, are working to make life bearable for the needy in their own districts. In Frankfurt this winter there was collected \$170,000, from which 140,000 persons were continuously supported, with 45,000 lunches alone served daily. In Bremen for the year 1924 an estimate of one milliard goldmarks has been made for the "Bremer Nothilfe". The Stuttgart "Notgemeinschaft" feeds daily 10,000 grown-ups.

Parallel with these community relief organizations and partially coincident with them are the relief measures of the industry.

Individual factories grant continuously large sums for the charity institutions of their own firms or for general charity purposes. These firms also give large sums to industrial organizations, besides which the proprietors give aid as private persons.

This private charity can, in many cases, still be increased and it is the effort of the charity organizations to work in this direction.

Industry Contributes

Industry has shown a great interest for maintenance of scientific institutions, also students have been greatly helped. For instance, the chemical industry pays one mark per thousand of its payable to the students' economic relief. The textile industry gave students, 40,000 sets of underwear, 4,000 suits and 10,000 pairs of stockings. The porcelain industry has given the student kitchens chinaware for about 20,000 students. Through the so-called Duisburg-Foundation, amounting to \$50,000, a number of contributions are made. The banks are also well represented. Besides the 700,000 goldmarks, contributed at the beginning of this year, the banks are conducting a special relief work of feeding daily 2,000 children from the North-End of Berlin.

Agriculturalists have also undertaken to make great contributions for relieving the need in Germany. They have taken care of 350,000 fresh-air children, the value of which can be estimated without exaggeration at 42,000,000 goldmarks.

In East-Prussia it was decided to collect 90,000 centers of rye for relief of East-Prussian children. The farmers of the agricultural lands amount to 200 tons per month, which is sufficient to feed 1,250,000 children.

A fact little known, but proving that Germany is assisting the foreign charity is the auxiliary contribution made by Germany for the American child-feeding. Since October, 1921, about half of the costs were met by Germany. In January, 1922, all administration costs have been borne by Germany. During the last months of the past year the foreign aid was temporarily closed and the feeding was alone continued by Germany.

Closing Meeting

(Continued From Page One)

A resolution was passed that the Government be asked to provide a more suitable text book in Grammar and a committee consisting of Inspector Shaw, Messrs. Jelly, Steele to make recommendations to the government was appointed.

A resolution was passed that a set of uniform text books for the schools of all the provinces be adopted.

A resolution was passed that the Canadian Federation be requested to safeguard by which a Dominion teachers' license good for any province be issued.

Principal Seaman read a letter relative to the teachers' trip to Vancouver and announced that next year it is proposed to increase the membership fee on a graded scale from \$2.00 to \$5.00.

A resolution favouring retiring teachers' allowance was passed. There was an interesting discussion regarding teachers' pensions, a number of motions and amendments being voted down. It was finally decided to appoint a committee consisting of Messrs. Seaman, Morrissey, Prof. Doyle, Miss McDonald, Miss Scott and Miss Yeo, to endeavor to frame a suitable scheme and present it to the government.

The question of refund also came in for much discussion and a vote being taken a majority decided in favor of a refund provision in the scheme.

A number of resolutions submitted by teachers who were not present were lost. One was that schools having attendance of less than fifteen be classed as minor schools and only a third class teacher's salary be paid.

The following officers were elected: President—J. D. Seaman. Vice-President—Lewis Loder. Secretary—Miss Mary Gullis. Vice-Treas—Miss Jessie Fuller. Assistant—Miss L. A. Acorn. Recording Secretary—Cuthbert McLean.

After votes of thanks to the Red Cross Society and the doctors for their gratuitous work, to the government for their grant for medical inspection, and to various persons for assistance given, one of the best conventions ever held came to a close.

Parlee, Moncton, N. B. 2634-4-24-21.

Future of Hungary Depends on Plans Devised By League

(United Press)
GENEVA, April 24.—Because of the complicated political problems involved, the completion of the League of Nations plan for the reconstruction of Hungary has given the greatest satisfaction in league circles. It is regarded as the hardest task the league has tackled.

As definitely launched the plan is very similar to that applied in Austria. This, according to all reports, is working satisfactorily toward the financial rehabilitation of that country.

The Hungarian protocols are two in number. The first is of a political nature. It is signed by seven powers, Great Britain, France, Italy, Rumania, the Serb-Croat State, Czechoslovakia, and Hungary. The governments of the first six states declare that they will respect the political independence, territorial integrity and sovereignty of Hungary, and that they will not seek any special economic or financial advantages that might compromise that independence.

The Hungarian government, on the other hand, undertakes to fulfill the obligations contained in the Treaty of Trianon, in particular the military clauses, as well as its other international engagements. It is to be understood that Hungary maintains her freedom in the matter of customs tariffs and commercial or financial agreements provided she shall not grant to any state a special regime calculated to threaten this independence.

All the powers declare that they will abstain from all acts which might be contrary to the economic and financial reconstruction of Hungary or might prejudice the interests of the creditors.

In the second protocol, which is signed only by the Hungarian government, the latter undertakes to draw up in collaboration with the delegation of the council, a program of reform and reconstruction which will assure budget equilibrium on a sound and durable basis by June 30, 1926. The government will ask parliament to give it the full powers necessary to carry out that program. The Hungarian government will issue a loan of 250,000,000 gold crowns to cover its deficits during the reconstruction period until the budget is balanced.

As security for the loan a first charge will be made upon the gross revenues from the customs, the sugar tax, the tobacco monopoly, and the net revenue from the said monopoly.

Hungary accepts the appointment of a commissioner-general to be appointed by the council of the league, who will reside at Budapest. It will be his duty to supervise the execution of the reform program. The yield of the loan and of the mortgaged revenues will be paid into special accounts controlled by the commissioner-general, and his functions will come to an end when the council shall have ascertained that the financial stability of Hungary is assured.

A central bank of issue will be created in collaboration with the delegation of the council. The statutes of the bank will ensure its complete autonomy towards the Hungarian government. The commissioner-general will nominate an adviser to the bank, to be appointed by the Hungarian government.

QUEEN HOTEL
Water Street, Charlottetown

This popular Hotel has been completely renovated and furnished throughout and offers very comfortable accommodation to the travelling public.

The table is especially good and the public are courteously cared for.

Rates \$3.00 a day.

Burglar Beats Secret Locks

(United Press)
PARIS, April 24.—Burglary is made easy, in the opinion of the police, by a scientifically constructed appliance for measuring locks so that false keys can be made, which has been discovered by chance as the result of a rapid flight of a surprised thief. Placed over a lock, with a lever penetrating the keyhole, the appliance registers on the sliding scale the position and size of every one of the wards which it would be necessary to cut on a blank key to enable it to open the lock.

The police say the instrument beats secret locks.

Pilots Expect New Record to Be Made in Big Balloon Race

(United Press)

SAN ANTONIO, Texas, April 24.—The seven pilots and their aides in the National Balloon Race to be held at Kelly Field April 23, will be provided with letters from United States diplomatic officials to officials of the Canadian and Mexican governments that will assure them every courtesy and assistance from those countries should a landing be made outside of the United States.

Every official and balloonist is expecting a new record to be established and in order to provide for any eventualities arrangements have been made with adjoining governments to return to their home countries to cooperate in assisting the country.

Each balloonist will keep a detailed log of his journey, including also the flight and the landing. He will be furnished with blank telegraph forms which will be dropped aboard with a request that the finder send them to race headquarters.

The messages are attached to a red streamer two yards long on back of which appear these instructions:

"To Finder: The message on the other side is from one of the balloons in the National Balloon Race which started from San Antonio, Texas, April 23. Please send immediately so that friends of the crew may get news of their whereabouts. If the blanks have not been filled out by the pilots, please fill them out yourself, putting merely 'high' or 'low' for altitude."

Another feature of the race is that the gas with which the bags are to be inflated is to be a combination of hydrogen and natural gas in definite proportions, rather than coal gas or the product of a gas plant.

The strength of the rigging of the balloon is designed to carry a maximum weight. The lift of the natural gas used to carry this maximum weight must be approximately 145 pounds per 1,000 cubic feet. As the natural gas of the San Antonio fields has a lift of only about 31 pounds per 1,000 cubic feet, it is necessary to increase this lift approximately 14 pounds in order to utilize the maximum carrying capacity of the balloon. This will be done by mixing pure hydrogen which has a lift of 71 pounds per 1,000 cubic feet.

The press can teach a great deal to the pulpit the Rev. E. L. Macassar, vicar of St. Peter's, Hammersmith, declared.

Clarity of thought, direct narrative and simplicity of style, to say nothing of human kindness, were some of the things in which he thought the pulpit might learn a thing or two from the press.

He declared that "One will meet in Fleet Street (London's great newspaper row) a purer brand of the milk of human kindness than that obtainable in "The High" at Oxford"—where many youths are trained for the clergy.

The vicar predicted that a fortune awaits the man who starts a church newspaper, wherein religious topics are handled by newspaper men "instead of by experts in church embroidery or internationalism."

Says Church Can Learn From the Press

LONDON, April 24.—The press can teach a great deal to the pulpit the Rev. E. L. Macassar, vicar of St. Peter's, Hammersmith, declared.

Clarity of thought, direct narrative and simplicity of style, to say nothing of human kindness, were some of the things in which he thought the pulpit might learn a thing or two from the press.

He declared that "One will meet in Fleet Street (London's great newspaper row) a purer brand of the milk of human kindness than that obtainable in "The High" at Oxford"—where many youths are trained for the clergy.

Soviets Excited Over Rumania and Airplanes

(Canadian Press)

MOSCOW, April 24.—Rumania's reported action purchasing four hundred airplanes and other equipment from France has prompted an appeal by the Assistant War Commissioner to the Russian workers, directing that they prepare themselves for any possible attack on the Soviet Republic.

Addressing a conference of non-party workmen of the Moscow district he said that the Red army must be strong not only in spirit but in technical equipment so as to repel invasion from any source.

French Fliers Fear German Wireless Rays

(United Press)

PARIS, Suspecting engine working rays from Germany, the airplane service from France to Roumania has adopted a route by way of Strasbourg, Basle, Innsbruck, Prague and Vienna, thus avoiding flying over German territory. Last year many French airplanes developed engine trouble over Germany, and were forced to land, with the result that the planes were confiscated. Most of them landed near Furth, outside Nuremberg. Experts concluded that the Germans had discovered a system of wireless engines which could put airplane engines out of action.

Another feature of the race is that the gas with which the bags are to be inflated is to be a combination of hydrogen and natural gas in definite proportions, rather than coal gas or the product of a gas plant.

The strength of the rigging of the balloon is designed to carry a maximum weight. The lift of the natural gas used to carry this maximum weight must be approximately 145 pounds per 1,000 cubic feet. As the natural gas of the San Antonio fields has a lift of only about 31 pounds per 1,000 cubic feet, it is necessary to increase this lift approximately 14 pounds in order to utilize the maximum carrying capacity of the balloon. This will be done by mixing pure hydrogen which has a lift of 71 pounds per 1,000 cubic feet.

Designated as "The Three Evil Spirits of Germany"

(Canadian Press)

BERLIN, April 24.—Rudolf Hasenstein, late President of the Reichsbank, Hugo Stinnes industrial leader, and Dr. Karl Helfferich, ex-Minister of the Treasury, all of whom have died within the past five months are designated as "the three evil spirits of Germany" by Kurt Geyer Communist member of the Reichstag, in a scathing volume which made its appearance on the very day Dr. Helfferich lost his life in a Swiss train wreck.

The municipal authorities had many complaints of slow train and bus service. Traffic experts, after careful investigation, reported that there was too much farewelling kissing in Bournemouth. Trams and buses were delayed and traffic tied up in knots while prospective passengers indulged in prolonged oculatory farewells.

The council issued an appeal to the public to quit kissing; that is, while traffic waits.

Too Much Kissing Holds up Traffic

(United Press)
LONDON, April 24.—The good-bye kiss habit must be abandoned to prevent traffic congestion, the Town Council of Bournemouth decided.

Overproduction of Coal Will Close Many Mines

(United Press)

INDIANAPOLIS, April 24.—Numerous coal mines will be closed permanently and many miners will resort to other work during the next three years, in the opinion of The United Mine Workers Journal, official publication of the United Mine Workers of America.

These two actions will have a stabilizing effect on the coal business, for it will relieve the existing condition of too many miners and too many mines according to the Journal. With the wage question settled for three years, each coal company knows just what its labor will be. Those which can operate and make money will continue in business, while the others will close the Journal says.

"It has been apparent for a long time that there are too many bituminous mines," the article continues. "There is a normal demand for approximately 500,000,000 tons of bituminous coal annually, while the mines now in operation or in existence and ready for operation, could easily produce nearly 1,000,000,000 tons of coal each year. Thus, there is a capacity to produce twice as much coal as the market could absorb. This means, also, that there are more people engaged in mining than are required to produce a sufficient quantity of coal to meet the demand."

"There is a demand for labor in other industries and men who are unable to retain permanent employment in the mines can secure work in other lines. The Journal adds that Secretary of Labor Davis has informed it the entire resources of that department will help place the men. Secretary Davis said the director of the Federal Employment Bureau of the Department of Labor has arranged to receive applications for employment and to assist applicants throughout the country."

Club Social in Zion Church

Last night about forty little wolf cubs representing the three cub packs in the city gathered in Zion Church basement for a little social and if a good appetite is a sign of health these little cubs are a healthy lot.

Starting games about six o'clock they enjoyed themselves till the supper gong was sounded when all formed up in a hollow square and had cocoa, sandwiches and cake passed around.

After they had eaten their fill some perhaps a little extra, they all gathered around the piano and enjoyed a singsong until 7.30 when all broke off to their homes after closing with The King.

Thanks are due to Miss Hazard and Miss Loft of St. Pauls for the excellent way they managed the whole thing.

Geo. Kemp, Geo. Raymond, Mr. Jenkins, Carl Cameron, Ed White, Mr. McMillan and Geo. Walker all helped out. Miss Jean Fraser very kindly accompanied the boys in their singsong.
