**ed by the pastor Rev. T. Gallant.** The bride was attended by her niece Miss Mary McGulgan and the groom was supported by Mr. Terrence Lannigan. Both the bride and bridesmaid were tastefully and becomingly attired for the occasion by the bridal party motored to Montague where they had dinner, returning in the evening to the home of the bride's sister Mrs. Barney McGulgan where supper was served. Among the guests was the Rev. Theodore Gallant. After supper all the young people of the vicinity assembled to offer congratulations and partook of a sumptuous repast prepared for the occasion by the friends of the bride. Messrs. William Farrell, Gus and Louis Jamieson and O. Kemp, the very popular musicians tuned up their violins, and nothing further was necessary to entice both young and old to a good old time which was heartily enjoyed by all until the wee small hours warned all to take their departure wishing Mr. and Mrs. McGulgan many years of bliss and happiness. The beautiful display of an endless variety of presents displayed on the occasion spoke eloquently of the high esteem in which the bride and groom are held in the community. (Congratulations.)

Here, surrounded by the beauty of nature, hundreds of people joined in an impressive service of worship. The speaker of the occasion was Rev. Scott

## The Public Forum

This column is open for the discussion by correspondents of questions of interest. The Charlottetown Guardian does not necessarily endorse the opinions of correspondents.

**TRANSPORTATION**

**Sir.**—Neighboring farmers are the better friends when they have good line fences. Canadians should be very careful not to allow the United States equal privileges upon Canadian territory. The proposal, now under consideration, that the United States shall be permitted to unite with Canada in the deepening of the Canadian river St. Lawrence, should not be adopted unless absolute guarantees are given that all the national rights of Canada shall be maintained for all time to come.

**At the present time** Canada has two great railways. These railways, for one of which Canada is still deeply in debt, are capable of carrying all of Canada's products to the sea board, and of conveying goods and passengers throughout the whole country. Consequently there is no present need to deepen the St. Lawrence, in conjunction with the government of the United States. The need is to give all the employment to the railways. The interests of Canada and its people will, for years to come, lie in developing the national property and paying the public debt—not in entering upon questionable enterprises, involving the expenditure of hundreds of millions of dollars.

**UNITY AND PROTECTION**

**Sir.**—"National Unity" is a grand idea. It is what Canada needs—what Canada must have and live up to, if it is to be the great nation that it has the capacity to be. "United we stand; divided we fall," was a motto of the United States in the early days of that (now) great country.

**Mr. Bourassa and those who** accompany him to the Maritime Provinces have done well to impress the idea of National Unity upon all those whom they meet, and the Guardian does well to give expression to their views. But there is another and larger idea to be impressed upon the minds of Canadians: the idea of Imperial Unity. The interests of Canada will be promoted by the closest unity that is practicable with Great Britain and the British Dominions through out the world. Unity of action as to trade and defence is large as essential as the world at large is essential to the well-being of the little fellow in the fight always fought with the greater assurance of victory, when there was a big brother nearby; and if the old man were suddenly to appear upon the scene there would be such a scattering of the opposing forces that peace would at once be restored. So in Canada's fight for fair-play in trade and a place in the sun, if the co-operation of the other British Dominions—the brothers in the family—should be active and assured she will the sooner be successful. And if her independence should be threatened by a powerful neighbor or any other danger should supervene she would be the more likely to be allowed to go on in peace, if it were known and felt that Great Britain would interfere in her behalf.

**As to the hostile tariffs** with which the people of Canada have to contend, it is but reasonable to conclude that if Great Britain and the other British nations were to agree to prefer one another and impose duties upon foreign products equal to those which the foreign nations impose, there would soon be a betterment of the trade side of the account for all the other British nations. Shut out the world-wide British markets, or be subjected to British import duties such as are imposed by them, the Foreign nations would quickly see that their interests lie in a lowering of their duties, and would be ready to meet the British in a movement towards free trade.

**If all the world were governed** by the Free Trade principles, Great Britain and the other British nations would then be given scope to trade and prosper; at present they are all more or less handicapped in the race for trade and wealth. A change is required, first of all in the direction of Inter Imperial trade.
