

FURS

Authentic 1940 Styles

Demonstrated here on Saturday and Monday October 14th. and 16th. by HOLT RENFREW & CO. LTD. Of Quebec

Next Winter's most exciting fur fashions—as approved by Paris and New York will be shown you by Mr. Theberge, representing Holt, Renfrew & Co. We highlight 1940's smartest furs, you can be assured of authentic Paris styles, quality skins, expert workmanship — lowest prices. The name Holt Renfrew means quality and reliability.

Orders for Repairs, alterations, remaking

will be promptly, courteously and efficiently attended to by Mr. Theberge. Be sure to take advantage of this demonstration and see for yourself the new styles for 1940.

MOORE & McLEOD Limited

LOST CHILD IS SAFE

LOUISBURG, N. S., Oct. 10—(CP)—Lost in the woods for a night, seven-year-old Allan Kehoe turned up safely today while searchers were combing through the

Shelbets on the Town's outskirts

for him. The youngster was to have gone hunting with an older companion, who didn't turn up yesterday. So young Allan went into the woods alone.

SPANISH ART RETURNS

GENEVA—(CP)—Art treasures of the Spanish Republic, on display here during the last days of the civil war, have been returned to Madrid. Six wagonloads left here for the Spanish capital.

This picture, passed by French and British censors and transmitted from London by radio, is the first one of activity on the Western Front to be released. Three pillars behind a sandbag barricade on the bank of the Moselle river, watch for signs of military activity on the German bank opposite. A major battle is expected to develop along the whole front in the near future

"Everlasting" Steel Reported Discovered

(By Howard W. Blakeslee, Associated Press Science Editor) NEW YORK, Oct. 11—Steel that will last forever in all kinds of outdoors, a major goal of science, became a possibility today with the announcement by the Chemical Foundation discovery of five new processes for making stainless steel impervious to all known natural corrosion.

These discoveries change not only the surface but the depths of the metal. One of them renders the steel as lustrous as precious metals so that it can be made into jewelry. All discoveries were made at the Massachusetts Institute of Technology by four men—Herbert Henry Uhlig, John C. Wulff, Albert L. Kays, and Robert S. Williams. They assigned their patents to the Chemical Foundation, a non-profit corporation organized by the late Francis Patrick Garvan to take over German World War patents.

Former Steel Vulnerable Stainless steel has been vulnerable to two kinds of corrosion. In one, pit corrosion, rust forms in scattered spots and digs little isolated wells. It can honeycomb and ruin the metal. It occurs mainly in contact with salt water. The other, intercrystalline corrosion, has not been studied.

The technology metallurgists discovered the source of the pits in microscopic points, cracks and other imperfections on the surface of a seemingly smooth steel. These rough places were particularly apparent after stainless steel was cold-worked. They discovered two heating methods, a chemical bath and a rolling treatment which would smooth this surface to almost mathematical perfection and stop pit corrosion. They also discovered that alloying stainless steel with molybdenum or silver would stop corrosion. The "silver steel" discovery was announced several months ago.

Most of these methods can be used on steel at any stage of its fabrication, and in some cases on steel already in use. They recommended a combination of two methods, heating and a chemical bath, as the best treatment for both pit and intercrystalline corrosion. The chemical bath dissolves the surface irregularities of an inch of steel surface and closes up all imperfections. The heating rearranges the steel crystals so that rust resistance is far more than skin deep.

By adding to the chemical bath a little titanium tetrachloride, the metallic material that makes smoke bombs and smoke screens, the surface of the steel becomes lustrous like gold, silver or platinum. It also scintillates.

For cold-rolling, a thin film of silver is electroplated on the steel. The silver becomes not only a lubricant preventing huge rollers from marring the surface, but also alloys with the steel in a silver film that in tests to date makes perfect corrosion resistance.

This cold-rolling requires less of the precious metal than when the latter is used as an ordinary alloy in the steel melt.

Lieutenant Saves Two Sinking Ships

LONDON, Oct. 11—(CP)—A Naval Lieutenant serving in Great Britain's contraband inspection patrol at a "western port" rescued two sinking merchant vessels last Friday and Saturday by towing them to shore, the Admiralty disclosed tonight. One of the ships was deserted and slowly going down when the Lieutenant, on an examination steamskin, climbed aboard with a party of volunteers. The other vessel, rescued the following day, had been shattered by a mine. Its survivors were picked up and the ship then towed in and beached. The Lieutenant was once a member of Britain's Mercantile Marine, a business man before the war "but now is back again to sea."

C. N. R. Week's Earnings Up

MONTREAL, Que., Oct. 11—The gross revenues of the all inclusive Canadian National Railways system for the week ending October 7, 1939, were \$4,807,948 as compared with \$4,662,271 for the corresponding period of 1938, an increase of \$371,277.

Sought By R. C. M. P. Takes Own Life.

ESTERHAZY, Sask., Oct. 11—Ernest Flook, sought by Royal Canadian Mounted Police for the murder of Constable Norman Gleadow today, shot himself in a bluff three miles northwest of Langenburg this afternoon. He was surrounded by a Mounted Police posse and when told to surrender fired a bullet into his head. Flook was brought to Langenburg and attended by Dr. McKenzie. Little hope was held out

Says U. S. Reds Are Under Stalin

WASHINGTON, Oct. 11—(AP)—General Walter G. Krivitsky, self-identified former member of the Russian military intelligence, told the congressional committee investigating un-American activities today that the Russian secret police "undoubtedly" have agents in the United States army and navy and, that there is an exchange of military information between Germany and Russia.

Krivitsky, who said he formerly was chief of the Soviet military espionage forces in western Europe, testified that his statement was not based on first hand knowledge but rather on his experience with such things in other countries. "It must be assumed," he declared through an interpreter, "that one of the objectives of the OGPU (secret police) is to obtain military information and they undoubtedly have agents to get it."

Testifying through an interpreter, Krivitsky declared that 35,000 members of the Russian Red army officers' corps were "destroyed" by Stalin in 1937, that 500,000 or 400,000 other persons were exiled or imprisoned and "millions" interned in concentration camps. He also testified that:

- (1) Communist party leaders in Germany, Poland and Hungary were recalled to Moscow and shot, despite the fact that they were not citizens of Russia.
- (2) Stalin is the "absolute" head of the Communist party in the United States rather than Earl Browder, the American general secretary, although both hold the same title in their respective countries.
- (3) Stalin could not have accomplished the "great purge" of 1936-37 without "moral support" from other countries because so many elements were against him in his own country.
- (4) The OGPU (Russian secret police) spies not only on foreign governments and on Soviet diplomats—"from ambassadors to the lowest embassy officials"—but on citizens of other lands who express displeasure with Moscow.
- (5) The OGPU kidnap and murders persons some of them non-Russians, on foreign soil—in drives against persons "considered" anti-Stalinites.

for his recovery He is believed to have used the revolver of Constable Gleadow to shoot himself. The 30-year-old constable died from head wounds received in a shack this morning in Esterhazy, 150 miles east of Regina.

Greendal's Week-End News!

If you are interested in an electric seal coat, do not miss this opportunity of securing a good quality seal—fitted or straight lines. Regular 79.50

Special for the week-end.

\$69.50

A wide range of cloth coats, plain or fur trimmed in the season's authentic styles and colors—everyone a real value.

16.95 to 65.00

Special attraction in new autumn dresses, exciting youthful styles—a variety to choose from. Regular value 2.98 to 3.98. Friday and Saturday — 2.49

LOOK WHO I AM! WIFE TAKES JOB BIRMINGHAM, England—(CP)—Identification discs in metal, gilt or colored crystal are being worn as latest accessories on sweaters, jackets or suits and clipped on bracelets. SALTCOATS, Sask.—(CP)—Mrs. T. R. MacNutt has been appointed acting secretary-treasurer of the Municipality of Saltcoats to take the place of her husband who has been given indefinite leave of absence for military service.

China Predicts Victory In War With Japs

SHANGHAI, Oct. 12—(AP)—China, fighting desperately to preserve the republic founded 28 years ago, today celebrated its "Double Ten" national holiday with confident predictions of ultimate victory in the 27-month-old war with Japan.

The holiday is called "Double Ten" because it falls on the tenth day of the tenth month. Killing of a Chinese civilian by a Japanese sentry in the Japanese-occupied territory adjacent to the French concession was the only untoward incident of the celebration here. Cause of the shooting was not determined immediately.

Foreign quarters confirmed reports of a severe Japanese set-back in Hunan Province. The Chinese reported that the Japanese, thrown back last week, still were retreating.

Tie-up In Chrysler Plant

DETROIT, Oct. 11 (AP) More than 50,000 auto factory workers were idle tonight because of the Chrysler Corporation production dispute and complete paralysis of operations in all its plants was threatened. With the likelihood that the tie-up will affect 60,000 workers by tomorrow, the United Auto Workers (Congress of Industrial Organizations) announced its intention to call a general Chrysler strike. Five days notice with the State Labor Mediation Board is required.

Plants which had virtually suspended operations tonight were Chrysler-Kercheval, Chrysler-Jefferson, Dodge, Plymouth, De Soto, and Dodge truck, all in or near Detroit. By Thursday it was indicated that all Chrysler divisions, including the plant at Evansville, Ind., would be down except for miscellaneous workers in a few departments.

LOUVAIN, Belgium—(CP)—An Englishwoman injured in a motor car crash in France was brought across the border from Maubeuge by motorcycle because there were no ambulances available.
