\$3.50 Recipe Free For Weak Men.

Send Name and Address To-day—You Can Have it Free and Be Strong and Vigorous.

I have in my possession a prescription for nervous debility, lack of vigor, weakened memory, falling memory and lame back, brought on by excessive, unnatural drains on the follicles of youth, that has cured so many worn and nervous men right in their own homes—without any additional help or medicine—that I think every man who wishes to regain his manly power and vitality, quickly and quietly, should have a copy. So I have determined to send a copy of the prescription free of charge, in a plain, ordinary sized envelope, to any man who will write me for it.

This prescription comes from a physician who has made a special study of men and I am convinced it is the surest-acting combination for the cure of deficient manhood and vigor ever put together.

I think I owe it to my fellow man to send them a copy of this weak and discouraged with repeated failures, may stop dragging himself with harmful pills and medicines, secure what I believe is the quickest and most restorative, upbuilding, STOP-TOUCHING remedy ever devised, and so cure himself at home quietly and quickly. Just drop me a line, like this: Dr. A. E. Robinson, 867, Luke Building, Toronto. I will send you a copy of this splendid recipe in a plain ordinary envelope free of charge. A great many doctors would charge you \$5.00 for merely writing out a prescription like this—but send it entirely free.

FERTILIZER

What's in This Bag?

FERTILIZER—Yes, but what kind of fertilizer? This is the all important question.

The average mixed fertilizer does not contain enough Potash to produce the biggest crops.

Agricultural authorities will tell you that most crops remove from the soil two to three times more Potash than Phosphoric Acid. Yet the average mixed fertilizer contains about 8 p. c. Phosphoric Acid and only 2 p. c. Potash.

Fertilizer for grain crops should contain at least as much Potash as Phosphoric Acid. For fruit crops, and truck insist upon a 10 p. c. fertilizer.

If you use factory mixed fertilizer, insist that your dealer furnish you with goods of the above analysis. High grade fertilizers are always cheaper per pound of plant food—and plant food is what you pay for when you buy fertilizer.

If he cannot supply you, and you are compelled to buy low grade fertilizer, add enough Potash to this to increase the Potash content to the required amount.

If you will write us our experts will tell you how. We will also send you proof that

"Potash Pays"

Details how to get the right crop from your soil by using high grade Potash fertilizers. Your harvest will be larger than ever before—and of improved quality.

If you want to, you can mix your own fertilizer at home—our Scientific Bureau will tell you how. We are at your service at all times with regard to proper fertilization of your crops.

If your dealer cannot supply you with Potash, write us, sending his name, and we will see that you are supplied immediately. We can sell direct you if you wish. We have large stocks of Potash stored at Toronto, Montreal and St. John, N. B., and can ship promptly.
