The Ideal is one of the most simple, durable, efficient and economical farm engines on the market today.

Keep the Boy on the Farm

Since hired help has become so scarce, high priced and hard to get the most disagreeable chores about the place fall on the shoulders of our boys.

Is it any wonder that the job of clerk in the drygoods store, or the machinist at the lathe or almost any kind of a city job looks awfully good to him who has all the mean chores put on him as his share of the work—not merely once in a while but every day in the year

Get the Ideal Hopper-Cooled engine to do all the chores—it will do the heavy work also—and you will keep the boy on the farm.

Write today for our free illustrated catalog or call at our showrooms and see this modern farm hand in operation.

MONEY

Ruling Discount Rates:

Open Market	Govt. Bank
London	4 1/2
Paris	3 1/2
Berlin	4 1/2
Vienna	5 1/2
Brussels	4 1/2
Amsterdam	4 1/2

New York Rates: Call Money—4 1/2—5 1/2 60 days—5 1/2—6 6 months—5 1/2—6

Commercial Paper: Minimum rate 6 per cent.

Money rates are decidedly firm and bid fair to continue strong until the European situation crystallizes. Continental money centres are nervous. Rumors regarding the embarrassment of one or two prominent institutions abroad have injected a feeling of uncertainty into the situation. New York bankers are taking advantage of Europe's urgent needs to secure higher rates than would ordinarily obtain under present conditions in the United States. The fact that the United States Government is in a position to make available for commercial purposes the large volume of money now in the United States Treasury keeps rates within bounds and adds materially to the strength of our banking position.

Continuous European selling of securities has forced recessions, in prices in our market. The demoralization of European Bourses has displaced a greater speculative position than it was suspected existed. In fact, the monthly settlement on the Bourse in Paris is viewed with apprehension. For the time being, our market is under the influence of the foreign situation. Nevertheless, the United States is happily in a strong position financially and is fortunate in being able to readily absorb securities as offered. Further European selling in our market would no doubt drive prices lower. However, private advices regarding the situation are favorable. The settlements in both London and Paris this week, if favorable, will probably be the turning point. Out of the panic which has encompassed Europe, one fact stands out clearly. Prices for America securities are upon a solid basis.

THE STOCK MARKET.

The Steel Corporation.—Net earnings for the quarter ending September 30th, will be made public this week. In advance of the actual figures, Wall Street guesses that the quarterly earnings will be from \$29,000,000 to \$31,000,000. Last year the September quarter's total earnings were \$29,522,000. Cotton.—The best judges of cotton conditions estimate that this year's crop will exceed 14,500,000 bales. The Government's report next month will give the Census Bureau's final estimate of the year's crop.

EUROPEAN NEWS

PARIS, Oct. 29 (Special)—At Quimper has died, at the age of 80, a man who once had his hour of fame, or rather infamy. Half a century ago he was the clerk of a notary of the district, whom he used to accompany to the houses of those who on their death bed had summoned his employes to make their will. His procedure was as follows. He used, in collusion, of course, with the notary, to crawl under the bed of the dying and often unconscious testator, and, being an expert ventriloquist reply to the lawyer in the words the latter had dictated to him. Time and again the ruse succeeded, and by its means wills were falsified to the benefit of the fraudulent notary and the would-be heirs who had bought his services. Finally the trick was discovered and the notary was condemned to twenty and his clerk to ten years' penal servitude.

Twitching of the Nerves

A Distressing Symptom of Nervous Exhaustion Cured by Dr. Chase's Nerve Food.

Mrs. John McKellar.

What sympathy you feel for anyone whose nerves twitch and jerk, and what resolves you make to never allow your nervous system to become exhausted, until paralysis of some form claims you as a victim. The only way is to watch the warning symptoms, such as sleeplessness, headache, indigestion, tired feelings and irritability. By the prompt use of Dr. Chase's Nerve Food you can feed the feeble, wasted nerves back to health and vigor, restore the vitality of the body, and prevent serious disease.

Mrs. John McKellar, 11 Barton street east, Hamilton, Ont., writes: "I was injured some years ago, and that left me with a broken-down nervous system. I could not sleep, and suffered from twitching of the nerves and disagreeable nervous sensations. "I then began using Dr. Chase's Nerve Food, and can say that I never used any medicine that did me so much good; in fact, I am entirely cured of my old trouble. The Nerve Food not only strengthened the nerves, but also built up my system in every way." Under date of Aug. 29, 1912, Mrs. McKellar writes, confirming her cure, and states that she has had inquiries from many people who had heard of the great benefits she obtained from Dr. Chase's Nerve Food. Dr. Chase's Nerve Food, 50 cents a box, 6 for \$2.50. All dealers or Emerson, Bates & Co., Limited, Toronto.

Mortgage Sale

To be sold by Public Auction at the Law Courts Building in Charlottetown on Tuesday the fifth day of November 1912 at 12 O'clock noon, all that tract piece and parcel of land situate lying and being on Lot or Township number 23 in Queen's County P. E. NEW GLASGOW

The City

There have been a number of towns in Eastern Canada that have made remarkable progress during the last decade. But no one of them has had such a steady permanent advancement as New Glasgow. Situate on the East River of Pictou which empties into the harbor of Pictou and distant about eight miles from Pictou, the County town, it sits on both sides of the river and has on the North the town of Trenton and on the South the town of Stellarton which also joins by an almost imaginary line the town of Westville. From 18,000 to 15,000 people are in and around all these towns with New Glasgow as the centre. The Tramway of The Pictou County Electric Company runs from one end to the other of this city while it also furnishes electric light and power for all the town.

Coal Industry

The town is in the centre of the greatest collection of coal and iron industries in Canada. In coal at Stellarton are the Allen Shaft, the best equipped mine in Eastern Canada, the Albion and other mines of the Acadia Coal Company, while at Thorburn five miles away to the East and connected by rail are other mines of the Acadia Company.

Manufactures

In iron and steel there are the works of the Nova Scotia Steel Co., the parent of all iron and steel industries in Canada begun and developed by the brains of New Glasgow men, it has grown to be one of the permanently successful and largest industries of its kind in Canada. There are the Bridge Works of Wm. P. McNeil Co., Ltd. whose structural plant is the largest East of Montreal, I. Matheson & Company's large foundry and boiler shop, The Standard Drain Pipe Co., Brown Machine Co., Ltd., Humphrey's Glass Works, The Bailey Underwood Co., Fraser Machine & Motor Co., Ltd., manufacturers of Motor Engines, The Canada Tool and Specialty Co., The Munro Wire Works four large wood-working factories, The Steel Furnishing Company, Granite Polishing Works, three large brick-yards, Drake's Aerated Water Works and numerous others small and prosperous industries.

Business Centre

The town is also the centre of a splendid farming country and the business place of 15,000 farmers.

Progress

This progress has not been the result of any spasmodic or mushroom growth but of gradual, sure and certain advance upon sound financial basis which gives permanency to conditions and certainty, to investment.

Only Beginnings

But these are only the beginnings of success and a greater future is near at hand.

Transportation

Quietly and unostentatiously for the past three years the deepening of the river to Pictou has been going on and the plans of the Government contemplate a channel of the depth of 35 feet as a minimum to the Gulf of St. Lawrence insuring access to the Town of the largest Steamers for which wharves and piers are to be constructed close to the works of the Nova Scotia Steel and Coal Company.

Eastern Car Co., Ltd.

The Eastern Car Company are now constructing their immense Car Plant, the largest of its kind in Canada, which means an expenditure of a million and a half dollars and the employment of 1,600 men with a proportionate pay-list to provide for the skilled workmen to be employed there.

Increased Demand

To supply the steel required by the Car Company it will be necessary for the Nova Scotia Steel and Coal Company to greatly increase their plant at Trenton with increased number of employees and greater pay-lists.

New Industries

Other new industries are on the way and every steel industry dependent on iron and steel for its raw material will find here its best Canadian location.

Prospects

Hundreds of fine new residences are being built this year and next year the number built will be limited only by the number of contractors and men who will be available to handle them. If any western city had the opportunity for booming afforded by New Glasgow, we would find Eastern people rushing to invest and an opportunity is afforded for their doing so right at hand where permanence and certainty guarantee results in our own province. It does not require a prophet to predict that within five years the population of this industrial locality will be doubled.

Tramway and Values

Tramway extensions will be provided to meet the necessities of population and the increase of value in real estate of the Company will come with the new population and the added wealth. New Glasgow is already a wealthy town and the Scotch thrift of its early settlers has been maintained by their successors. This is not a place of cheap houses or of mushroom growth but of splendid industry, beautiful homes, good municipal services and fine conditions where value exists and is bound to be added to. To take advantage of these opportunities is the object of the Company and no place can be found in the whole Dominion where there will be such phenomenal increases of values or which will grow faster the next few years than the Town of New Glasgow—at the Gateway to Eastern Nova Scotia—the industrial portion of Eastern Canada.
