

THE WESTERN GUARDIAN

AND PRINCE COUNTY CHRONICLE

AGENT: Mrs. John Pond, 31 Church Street—Phone 289
SUMMERSIDE AND PRINCE COUNTY

Subscriptions Advertising, should be left with Mrs. Pond.

The Guardian may be bought daily at any of the following stores in Summerside:

Bookstore, Water Street.
Baker's, Water Street.
The Guardian will be delivered to any home in Summerside by a boy at 2¢ per day. Phone 289 for this service. Pay your order to the boy responsible for deliveries on your route.

—WORK PADS and Breecings, sold right at Brace's. L-310-31-21.

—CARNIVAL, Bedeque Rink, Tuesday, March 11. Eleven prizes for best costumes. L-338-2-3-4.

—LEFT FOR MONTREAL — Dr. Hillard E. Clark, one of Summerside's leading dentists, has joined the Canadian Army Dental Corps and left last week to take a five weeks course in Montreal in connection with his new duties. —S.

—FUNERAL OF MR. CALIXTE POIRIER — The funeral services for Mr. Calixte Poirier were held on Saturday morning from his late residence at Muddy Creek to St. John the Baptist Church, Miscouche. Rev. Dr. Monaghan parish priest officiated at the Requiem mass. The pallbearers were Messrs. Ezra Allen, A. J. Gaudet, Arthur Gaudet, Celestine, Emile and Edmund Poirier. Interment was in the cemetery adjoining the Church. —S.

—Rev. A. S. Murray of Wellington was a visitor to Summerside last week. —S.

—Mrs. J. S. Wright is spending the weekend in Halifax with her husband Captain J. S. Wright. —S.

—Mrs. Annie Weeks, who has been in the vicinity during the past few days purchasing cattle has been quite successful and loaded a carload at Bloomfield on the 26th.

—Mr. Sam Levine who has been in the vicinity during the past few days purchasing cattle has been quite successful and loaded a carload at Bloomfield on the 26th.

—A concert sponsored by the Mill River Club in aid of the Red Cross was held in St. Anthony's Hall on the 25th. The sum of \$28.00 was realized. Mr. G. P. Arsenault, N. R. operator was a recent visitor at his home. —D.

—The many friends of Mrs. Annie Weeks regret to learn of her illness and hope for her early recovery.

—Mr. and Mrs. James Murphy, Sea View, spent the week-end here the guests of the latter's sister, Mrs. Hazel Campbell, Mr. Arthur returned home on Monday, while Mrs. Murphy will remain some time with her mother, Mrs. Annie Weeks.

—Mr. Edward O'Halloran, Campbellton, was the guest of his sister, Mrs. Austin O'Brien, over the week-end. Mr. O'Halloran has entered in His Majesty's service, and is awaiting his call.

—Miss Marjorie Kelly, teacher at Campbellton, spent the week-end in Elmsdale, the guest of J. W. and Mrs. O'Brien.

—Mrs. Basil MacNeill is spending a brief holiday in Summerside, with her daughters, Mrs. Wallace Bradshaw and Mrs. Hazel MacNeill.

—Mr. and Mrs. Henry Williams spent a few days in Tyne Valley and Northam last week. While there they attended the funeral of Mrs. William's brother, Mr. Daniel MacLean, a highly respected citizen and prominent farmer of Tyne Valley. Sincere sympathy is extended to the bereaved relatives.

—The funeral of the late Mrs. Parmenas McArthur, was held on Friday from the home of her step-daughter, Mrs. Arthur to the United Church at Miminegash. A large number of neighbors and friends attended the funeral. Mrs. McArthur was a highly respected citizen and was seventy-three years of age. She enjoyed a wide circle of friends, who mourn her loss. She is survived by the following daughters: Mrs. Lydia Rix and Mrs. Roy Burns, Centre Line, R. 8; Mrs. Peter McDonald, Tyne Valley; Mrs. Percy Freeman, Oregon, and Miss Martha Rix, Boston, Mass. Rev. W. A. Paterson officiated at the funeral service, and the following acted as pallbearers: Messrs. George Hardy, Ray Rix, Ray Brennan, Harry Platts, Parmenas, Brennan and Walter Brennan.

—Sincere sympathy is extended to Mr. and Mrs. George Coughlin on the death of their infant son, on February 22nd at the Turner Nursing Home, O'Leary.

—Upwards of two hundred guests were present at a miscellaneous shower held at the home of Mr. J. W. O'Brien on February 21st, in honor Mr. and Mrs. Ralph Rennie newly-weds. The house was nicely decorated in pink and white for the occasion. To the strains of "Here Comes the Bride," beautifully re-decorated by Mrs. Ronald McKenna, the bride and groom were escorted to the seat of honor by Miss Florence Williams and Mr. Claude MacNeill. The gifts were opened by Mrs. David Williams and Mrs. Merrill Wallace, while the accompanying verses were read and the gifts presented by Mrs. James O'Brien.

—Lack of Fats in Diet — There is before the writer a recapitulation from authoritative sources of the German food situation as of today so far as it is known. There are many missing or incalculable factors, but it seems clear that the general mass of Nazi citizenry is now suffering from lack of the same fats for diet purposes that drove the German people of 1918 to revolt against the Kaiser.

Probably relatively few of them realize it. There is no lack of bulk in the German diet today. There is a definite lack of energy-building fats, however. German scientific publications filtering out of Germany tend to show that German workers not in preferred war-making classifications show distinct signs of "over-exertion."

That is another way of saying underfeeding in such essentials as fats, the prime energy-building element of a balanced diet. Presumably it does not apply to the army to munition workers or to national groups granted special food preferences because of their war-making assignments. They are being fed well and nourishingly, however, at the expense of the masses of Germans and those too young and too old for war work.

Perhaps the wisest thinking on this side of the Atlantic is in London. There can be no dispute on the thesis of the economists, however, that whatever may be the pinch of the British blockade of Germany today, it will be worse, Germany worse, next winter unless Hitler can break his grip.

—Foes of Lease-Lend Bill still Occupy time — WASHINGTON, Feb. 2 (AP)—Foes of the lease-lend bill insisted in the Senate Saturday that despite restrictive provisions President Roosevelt could "give" any portion of the navy to Britain and, moreover, could constitute the United States and British fleets.

A administration leaders, concerned over the continued lengthy speech-making, talked of longer sessions this week in an effort to speed a final vote, unexpected support came today from Senator George Norris (Ind.-Neb.), an administration supporter, for an amendment to the bill which would state that the measure would not give the President any power beyond what he now has to employ the army or navy beyond the boundaries of the western hemisphere or American possessions lying on side of it.

Norris said he was inclined to support an amendment which would state that the measure would not give the President any power beyond what he now has to employ the army or navy beyond the boundaries of the western hemisphere or American possessions lying on side of it.

—Soviets claim U. S. goods for Domestic use — WASHINGTON, March 2 (AP)—Concern that United States goods sold to Russia might find their way to the Soviet government prompted the Soviet government officials Saturday that all purchases made here are "designed exclusively for domestic use."

The Soviet declaration was made by Constantine Oumansky, the Russian ambassador, during discussions with Sumner Welles, under-secretary of state, concerning Soviet-American relations in particular.

The state department also disclosed that Oumansky had protested against seizure of mail from Russia, alleged to contain propaganda, and that an investigation is in progress to determine whether any mail matter—other than printing propaganda—has been confiscated.

The post office department recently confiscated 15,000 pieces of mail from Russia, on the ground that the sender were not registered with the state department as agents of a foreign government.

—Dairy Board Issues Orders Re Exports — The Dairy Products Board in Canada was established under the Dairy Products Regulations by Order in Council dated May 23, 1940 with wide powers over the marketing, shipment, storage, and other important phases in connection with the export of all dairy products from Canada.

By amendment to the Regulations containing Order in Council dated 13th January, 1941 and February 7, 1941 the powers of the Board have been enlarged to enable it to require persons holding excess quantities of any dairy products to dispose of such excess in order that it may be exported, and to require manufacturers of cheese to manufacture white or coloured cheese waxed or unwaxed, and of such minimum sizes as the Board may direct. The excess of dairy products referred to in the amendments means in excess of whatever quantity the Board may determine, and the disposal of such excess quantity will be made through a licensed exporter as the Board may direct.

In accordance with these regulations, an order has been issued in the Canada Gazette dated 7th February, 1941 to the following effect: "That any person holding a quantity of any dairy product in excess of that which the Board may determine shall arrange for export of such excess quantity through an exporter licensed by the Board, as the Board may direct."

—Intestinal Gas Pains — Adierika quickly relieved me of gas pains in the intestines. Gas pains due to delayed bowel action relieved by QUICK RESULTS from ADLERIKA. Get it TODAY.

At Your Druggists.

—TIPPIE and "CAP" STUBBS — "MRS. SUTTON, NEVER FEAR, SAMMY WILL GET HIS WATCH BACK! NO! CAP DIDN'T BREAK IT!"

"SHE HUNG UP! I NEVER DID LIKE HER!"

"YOUR FATHER IS KEEPING THAT WATCH ON PURPOSE! HE THINKS HE'S FUNNY!"

"GRANMA—WILL YOU PLEASE ME ANOTHER PLAID SHIRT?"

"SO YOU CAN TRADE IT AGAIN FOR ANOTHER TURNIP THAT LOOKS LIKE A WATCH—NO!"

—TILLIE THE TOILER — AN IDENTIFICATION! — "OH, THE COPS ARE TAKING THAT MAN AWAY IN THEIR CAR—WHAT A RELIEF!"

"LISTEN PAUL, THAT MAN SAID YOUR NAME WAS FULLER"

"AH! MY AUNT ELLIE'S FIRST HUSBAND'S NAME WAS FULLER. YOU'RE SON, PAUL."

"THAT'S RIGHT MAC, ONLY FOR HEAVENS SAKE, DON'T EITHER OF YOU TELL A SOUL I PROMISE ME."

"HE'S A NICE ONE—NEVER TELLING ME HE WAS MAC'S COUSIN."

"AND WHAT'S HE DOING SPYING ON ME OR SOMETHING?"

"YEAH, IT'S A GOOD THING I LOOK FOR PAUL OR THEY WOULDN'T BE."

—Bodies of crash Victims flown To Canada — (By Bob Daldorph, Canadian Press Staff Writer) — HALIFAX, March 2 (CP)—Ten days after they had plunged to death in the Newfoundland bush, the bodies of two men who died in a plane crash with Sir Frederick Banting were flown here today from Newfoundland airport in a Royal Canadian Air Force machine.

I travelled in the flying "bodies" of the Royal Air Force, navigator of the plane, and William Snailham of Bedford, N. S., wireless operator. Shortly before we headed for Canada, another plane left Newfoundland airport with William Mackey, pilot and only survivor of the crash.

On the sombre 500-mile journey the bodies of the two victims lay on cots running along each side of the heavy machine. They had been sewn into shrouds of white canvas. Climbing immediately after the takeoff over the clouds and into brilliant sunshine the pilot brought the plane to a gentle landing on the Nova Scotia air-drome—four hours after we left Newfoundland behind.

C. A. F. officers, and men, a private hearse and newspapermen surrounded the plane as it braked to a stop.

Immediately after the bodies were placed in Union Jack-draped caskets and, as airmen stood at attention, were moved once more. Tomlinson's crew were before completed for burial of the two victims in this city.

Flying Officer Bird will be given air air force funeral at St. Paul's Anglican Church here tomorrow afternoon. The funeral will be conducted by Ft.-Lt. W. S. Dunlop, chaplain.

TORONTO, March 2 (CP)—The airplane bearing the body of Sir Frederick Banting, noted Canadian scientist, died 11 days ago in an air crash in Newfoundland, arrived here tonight.

The plane left Newfoundland airport today.

Sir Frederick was one of three killed when a plane being ferried to Great Britain crashed in an isolated section of the Newfoundland coast after developing engine trouble.

Col. Duncan Graham, a medical associate of Sir Frederick and also associated with him in military duties, announced that the funeral service will be held in Convocation Hall at the University of Toronto at 2.30 p. m. Tuesday.

Previously Sir Frederick's body will lie in state from 10 a. m. to 12.30 p. m.

Col. Graham said Dr. H. J. Cody, president of the university, will officiate at the service but other arrangements have not been completed.

—Believe Berlin Driven to try Big sea attack — (By Kirke L. Simpson, Associated Press Staff Writer) — The month of March, reputed in respect to weather to be like a lamb when it comes to weather, does not seem destined to live up to that reputation so far as war events are concerned.

It has come to a lion with tension high in the Balkans and Germany claiming sea-war success all but out the French and British forces apart on the western front in that spring drive. They risked everything on that final drive but the hope of avoiding another war winter for Germany.

There is good reason to believe now that Berlin is prepared to risk a great sea attack on Britain for precisely the same reason. Another war winter in the strangling grip of the British blockade and internal disintegration if British and neutral economists gauge German food and oil resources aright.

—Doubt Nazi Claims — Nazi leaders from Hitler down have claimed repeatedly that they are prepared for a war of any duration. Months ago, however, United States observers backed home from Berlin told this writer of their doubts on that score.

They saw possibilities of an upsurge in Germany only distantly, if depended, they believed, on either of two factors.

Even iron-fisted Nazi suppression at home could not avert serious rumblings of discontent, they believed. If the German army suffered a disastrous defeat, they felt certain that it was fear of just such a defeat that withheld a German attempt to invade Britain last summer or early fall when other conditions seemed right for the attempt.

The other factor which could undermine Hitler at home, they believed, was a grave food shortage, but they saw no prospect that it could develop before the winter of 1941-2. Economists who give close attention to the present or predictable food situation in Germany or on the continent seem to share that opinion.

—Lack of Fats in Diet — There is before the writer a recapitulation from authoritative sources of the German food situation as of today so far as it is known. There are many missing or incalculable factors, but it seems clear that the general mass of Nazi citizenry is now suffering from lack of the same fats for diet purposes that drove the German people of 1918 to revolt against the Kaiser.

Probably relatively few of them realize it. There is no lack of bulk in the German diet today. There is a definite lack of energy-building fats, however. German scientific publications filtering out of Germany tend to show that German workers not in preferred war-making classifications show distinct signs of "over-exertion."

That is another way of saying underfeeding in such essentials as fats, the prime energy-building element of a balanced diet. Presumably it does not apply to the army to munition workers or to national groups granted special food preferences because of their war-making assignments. They are being fed well and nourishingly, however, at the expense of the masses of Germans and those too young and too old for war work.

Perhaps the wisest thinking on this side of the Atlantic is in London. There can be no dispute on the thesis of the economists, however, that whatever may be the pinch of the British blockade of Germany today, it will be worse, Germany worse, next winter unless Hitler can break his grip.

—Officers, Men Arrive from British Isles — AN EAST COAST CANADIAN PORT, March 1 (CP)—All three fighting services were represented in a group of officers and men passing through this port today en route from the British Isles to various parts of Canada.

Among the army officers were Brig-Gen. G. P. Loggie, Deputy Quartermaster General at Canadian Military Headquarters in England; Brig. Maurice Pope, Canadian Headquarters, England; Col. H. G. Hoare, British army officer and General D. C. Draper.

Rear Admiral F. R. Barrie arrived on a mission for the British admiralty.

Also aboard were a group of Royal Canadian Air Force wireless men, returning to Canada after several months spent in installing radio equipment on British military planes.

Brig-Gen. Loggie, a native of Fredericton, N. B., returning to Canada after three and a half years in England will be attached to national defence headquarters in Ottawa.

—Soviets claim U. S. goods for Domestic use — WASHINGTON, March 2 (AP)—Concern that United States goods sold to Russia might find their way to the Soviet government prompted the Soviet government officials Saturday that all purchases made here are "designed exclusively for domestic use."

The Soviet declaration was made by Constantine Oumansky, the Russian ambassador, during discussions with Sumner Welles, under-secretary of state, concerning Soviet-American relations in particular.

The state department also disclosed that Oumansky had protested against seizure of mail from Russia, alleged to contain propaganda, and that an investigation is in progress to determine whether any mail matter—other than printing propaganda—has been confiscated.

The post office department recently confiscated 15,000 pieces of mail from Russia, on the ground that the sender were not registered with the state department as agents of a foreign government.

—Dairy Board Issues Orders Re Exports — The Dairy Products Board in Canada was established under the Dairy Products Regulations by Order in Council dated May 23, 1940 with wide powers over the marketing, shipment, storage, and other important phases in connection with the export of all dairy products from Canada.

By amendment to the Regulations containing Order in Council dated 13th January, 1941 and February 7, 1941 the powers of the Board have been enlarged to enable it to require persons holding excess quantities of any dairy products to dispose of such excess in order that it may be exported, and to require manufacturers of cheese to manufacture white or coloured cheese waxed or unwaxed, and of such minimum sizes as the Board may direct. The excess of dairy products referred to in the amendments means in excess of whatever quantity the Board may determine, and the disposal of such excess quantity will be made through a licensed exporter as the Board may direct.

In accordance with these regulations, an order has been issued in the Canada Gazette dated 7th February, 1941 to the following effect: "That any person holding a quantity of any dairy product in excess of that which the Board may determine shall arrange for export of such excess quantity through an exporter licensed by the Board, as the Board may direct."

No Rubbing—JUST PAT IT ON!

THE LINIMENT THAT HELPS NATURE HEAL FASTER

—Microelectron, and its ally exterminator, are the parasites which led Dr. Baird to say "That our fondest hopes have been greatly exceeded in the control exercised in sawfly infestations in Canada."

In the 20 rooms of the Belleville laboratory, the work of locating and exterminating parasites to serve mankind covers many species. Parasites have been found to fight the green-tinted, white, oyster shell scale, woolly aphis, apple mealy bug, codling moth, grasshoppers, European corn borer, wheat stem sawfly, pea moth and various other pests. Some are already in the field laboring for men as they pursue their natural duty. Others are still in the process of selection being examined day by day and under varying conditions to see that they will do their job efficiently.

In the basement of the laboratory plain cardboard boxes in a chilly room hold thousands upon thousands of insects in a dormant state, ready to be taken into warmer rooms when they are wanted and there allowed to propagate until the thousands have become millions.

—Water Cows in Barn — Dairy cows will produce more milk and butterfat if they are watered indoors during the winter. In an experiment at a college dairy farm, dairy cows watered by means of water bowls drank approximately 18 per cent more water and yielded 3.5 per cent more milk and 10.7 per cent more butterfat than cows that were watered twice per day at an outside tank.

"Cows watered with water bowls drank an average of about 10 times as much water during the winter as those frequently drank but once per day."

The specialist said that it takes 3-4 pounds of water to produce 1 pound of milk and that the water when cows aren't getting grass they must drink more water.

"If a farmer don't have watering facilities inside, the next best thing is to sink a heater in the outside tank."

If a heater isn't used, a farmer can cover over his tank and bank it around the sides, with straw, leaving a small opening in the top toward the south. This is much better than just breaking a hole in the ice and expecting the cattle to drink enough of the water.

While the relative water consumption of the cattle increased as temperature rose in nature, it demonstrates the water temperature apparently did not influence consumption as greatly as did atmospheric temperature.

He suggested having plenty of salt available to dairy cattle during the winter to stimulate drinking.

—Plant Certified Seed Potatoes To Get Best Results — There is far too much disease and poor quality in the table potato crop in Canada to please either the consumer or the producer states John Tucker, Plant Production Division, Dominion Department of Agriculture.

One big mistake the table potato grower sometimes makes is to think that any potatoes of good appearance will make good seed tubers. That is not the case for apparent soundness of the tubers constitutes no guaranty of freedom from virus diseases which cannot be recognized in the tuber but which nevertheless affect the yield and quality of the crop. The only way to be sure of seed that is practically free of these troubles is to buy certified seed.

Certified seed are potatoes that have been grown expressly for seed purposes. They are of good type, from vigorous plants and are true to variety. They have been inspected during the growing season for diseases, and must conform to definite seed standards both in the field and after harvest. Official tags are issued for such seed stock exclusively and no other type of label carries official recognition of seed potatoes. If the official tag is not on every container the potatoes should not be accepted as certified seed. When buying seed it is the buyer's privilege, if he pays more than regular table stock prices, to get only certified seed; otherwise he may get only table potatoes with no reliable assurance whatever that they are free of virus diseases.

The principal object of the Dominion Department of Agriculture in providing the service of seed potato certification is to make available the whole potato industry a sufficient quantity of practically disease-free seed annually, to meet all prospective demands and at reasonable prices. This is considered the most practical and economical method of dealing with many of the types of diseases that are carried in the tuber. Potato growers in several other countries have quickly caught on to the value of planting Canadian certified seed. For the exports of certified seed from the 1939 crop totalled over two and a quarter million bushels compared with about a half a million bushels sold in Canada. In other words, five bushels of this good seed left the country to every bushel that was planted in Canada.

The first step forward towards producing better table potatoes is to plant certified seed. They are available locally by the best seed dealers and established seed houses, or may be purchased from the seed growers direct. Lists of growers are obtainable free, from the Plant Production Division, Dominion Department of Agriculture, Ottawa, or from the local District Seed Potato Inspectors located at Charlottetown, P. E. I., Kenivick, N. S., Fredericton, N. B., St. John's, Nfld., Pictou, N. S., and Vancouver, B. C.

—Job of Shipment — These parasites may be shipped in the cocoon stage. They are removed from incubation on the 12th day and held in cold storage until sampled lots have produced adults and given proof of fertility. They are then placed in cages which will produce 10,000 adults each and sent out with instructions for release. Shipment lots are important in the case of microelectron which flies very little in the adult stage, and prefers to hunt sawfly cocoons by walking on the ground. Liberations of 10,000 at intervals of a quarter mile or less in heavily infested forest areas are recommended.
