

### Maritime Telegraph and Telephone Earnings

In 1912, after paying bond interest, the Maritime Telegraph & Telephone Company earned nearly 14 per cent on the preferred stock issued. This is equal to considerably more than twice the amount required for dividends on this stock. In other words, if the net revenue of the Company fell off one half the dividends would still be assured. Such a state of affairs is not at all reasonable to expect in a public utility of so great an importance to the public and private life of our people.

Thus, regularity of the payment of dividends is a strong point in favor of Maritime Telegraph and Telephone preferred stock, of which we offer a block in lots to suit purchasers. Price and particulars will be given upon request.
