

Summer School of Science.

The fourteenth annual session of the Summer School of Science will be held at Bear River, N. S., "The Land of Cherries" on July 20th, to August 10th.

In addition to the regular class work which embraces botany, chemistry, physics, meteorology, physiology, geology, hygiene, English literature, elocution, education, kindergarten and music.

Whole day excursions have been arranged for, to Point Prim and the old historic town of Annapolis Royal, the scene of so many conflicts between the English and the French.

Up to the present upwards of 50 students have registered, representing all of the Maritime Provinces and the United States of America.

Intending members should write to the local secretary, W. G. Read, Bear River, N. S. for information about board.

He Walked The Floor

In Agony With Pains in the Back—Sleep impossible—Medicine of no Avail Until He Got Dr. Chase's Kidney-Liver Pills.

Mr. Patrick J. McLaughlin, Beauharnois, Que., states:—"I was troubled with Kidney Disease and Dyspepsia for 20 years and have been so bad that I could not sleep at nights on account of pains in the back, but would walk the floor all night and suffered terrible agony.

"I tried all sorts of medicines but got no relief until I began using Dr. Chase's Kidney-Liver Pills. They made a new man of me, and the old troubles seem to be driven out of my system."

Dr. Chase's Kidney-Liver Pills have an enormous sale and owe their popularity to the fact that they can be absolutely relied upon to cure all ailments of the kidneys, liver, and stomach.

MERCIFUL MAUSER BULLET.

Just Like Going to Sleep to Be Killed By One.

George Lynch, the correspondent who sallied out of Ladysmith during the siege riding a white horse, which had been dyed khaki color: all over one side, and taking under one arm a bottle of whiskey and some copies of the siege paper, the Lady-smith Lyre, hoping to trade them for some Transvaal newspapers, has returned to England, and writes some rather real descriptions of things seen in action.

"Death from a Mauser bullet," he writes, "is less painful than the drawing of a tooth. Such at least appears to be the case, speaking generally from apparent evidence, without having the opportunity of collecting the opinions of those who have actually died. In books we have read of shrieks, of expiring agony, but ask those who have been on many battlefields, and they will not tell you they have heard them; as a rule a sudden exclamation, 'I'm hit!' My God!"

They look as if staggering from the blow of a fist, rather than that from a tiny pencil of lead—then a sudden paleness, perhaps a grasping of hands occasionally, as if to hold on to something when the bottom seems to be falling out of all things stable, but generally no sign of aught else than the dulling of death—dulling to sleep—a drunken sleep—drunken death it often seems—very commonplace as a rule. A smile as often or oftener than any sign of pain, but generally no sign of either.

A SPOT ON THE SUN.

PARIS, June 17.—Abbe Mareux, the astronomer, has discovered and sketched through the big telescope in the optic palace of the exposition a remarkable spot on the sun forming a part of an extensive group and having a diameter of nearly forty kilometers. He says the spot will remain for 7 days and become visible to the naked eye.

Coal Scarce in Switzerland.

As there is an absence of coal in Switzerland, it is not possible for the people of that country to produce the iron used in many of their manufactures, and it must be imported from Germany. Instead of being dependent on coal for smelting the iron ores which are to be found within the boundaries of Switzerland, it has recently been determined to make use of the electric furnace for this purpose, and such a proposition is now being developed by Herr Muller Landsmann in the Bernese Oberland, near Meiringen.

TO CURE A COLD IN A DAY.

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature on each box.

Canadian tweeds, tweed effects, plain cloths, felts, well tailored, lined, separate coat and skirt. Price, \$3.75, \$5.00, \$6.50, \$7.50, \$10.00, \$12.50, up to \$25.00. All sizes and any alteration made in fitting room.

Palms! Palms! It has been often said that the Palm is the rich man's plant but at the price we are selling them, most any one can indulge their fancy for a Palm. We have just received a splendid consignment. See them and be convinced they are for you.—J. J. Gay & Son, Market House and Nursery Gardens Head of Prince Street.—19 Tues Wed & Fri.

attle of Rietfontein. How heartily the Boers hated these Lancers. They would have liked so much to have had lances barred as against the rules of war; and it would certainly have made an immense difference if our side had succeeded in getting a few more chances, especially at the commencement of the war, of using the lance. "Wounds or death by Mauser bullets or even by the thrust of a lance are not to be compared from the point of view of their pain-inflicting possibilities with what may be done in that way with the fragment of a shell. That's the thing that hurts. Shell fire, speaking generally, is the 'boggy of battle to those not accustomed to it. The main purpose it accomplishes is to establish a funk.' When the actual damage done by shell fire after a battle is counted up and the number of shells fired, the results are most surprising. Thus, on one occasion shells were fired by the Boers to kill or wound one man, while in the siege of Ladysmith the number was immensely greater. A poet in the Ladysmith Lyre wrote: "One thing is certain in this town of lies: If Long Tom hits you on the head, you die. You do—unquestionably; but perhaps it is worse still to get a piece of shell somewhere else. What frightful wounds they make sometimes! What mangled butchery in their track!"

"A boy, who could not have been more than 17 or 18 was lying on the side of the hill with his head on a flat stone. He had been hit by a piece of shell, and both his legs were broken and mangled above the knee. He was done for, and his life was only a matter of lasting some minutes. Another man, wounded somewhere internally, was lying beside him. There was no sign of pain on the boy's face; his eyes were closed. He just seemed very tired. Opening his eyes, he looked downward intently at his legs, which were lying at an oblique angle with his body from where they had been hit. It looked as if his trousers were the only attachment. As he gazed intently a troubled look came over his face, and his wounded comrade beside him was watching him and saw it. The tired eyes closed again wearily, and then the wounded man alongside him, cursing with variegated and rich vocabulary, bent or half rolled over, and caught first one foot and then the other, and lifted each leg straight down swearing under his breath the while. Then he lay back, swearing at the blankety blank young blunderer and still watching him. Soon the tired eyes opened again, and instinctively looked down at his legs. They seemed to open wider as he looked; then he smiled faintly, thinking he had been mistaken about them before, and lay back; and the eyes did not open any more. The fellow beside him chuckled, and said to himself: "Well, I'm lost but possibly the Recording Angel has put down a mark that may help to prevent it."

There is to-day a crying need of a reformation in the treatment of the body. The basis of this reformation is to be found in the thesis of Dr. R. V. Pierce: "Diseases which originate in the stomach must be cured through the stomach."

In the thirty odd years of Dr. Pierce's experience as chief consulting physician to the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., he has treated more than half a million people, with a record of ninety-eight cures in every hundred. The theory held by Dr. Pierce is that the stomach is the chief breeding place of disease, is abundantly borne out by the success of his treatment, which is addressed primarily to the stomach and other organs of digestion and nutrition.

No other medicine acts so powerfully on the stomach, and as perfectly on the stomach and other organs of digestion and nutrition, as Dr. Pierce's Golden Medical Discovery. Men and women afflicted with shortness of breath, heart disease, suffocation, dizziness, spots before the eyes, "liver pains," and similar ailments have been promptly and perfectly cured by the use of "Golden Medical Discovery."

Thomas A. Swarts, of Sub-Station C, Columbus, Ohio, Box 103, writes: "I was taken very sick with severe headache, then cramps in the stomach, and my food would not digest, then kidney and liver trouble, and my back got so weak I could scarcely get around. At last I saw one of my neighbors, who said, 'Take my advice, and use Dr. Pierce's Golden Medical Discovery and make a new man out of yourself.' The first bottle helped me and after I had taken eight I was weighed and found I had gained 27 pounds. I have done more hard work in the past eleven months than I did in two years before, and I am healthy to-day and do not feel anything like dying. I cannot give Dr. Pierce's Golden Medical Discovery too much praise."

Novelties

In Carbonated Beverages are continually cropping up, but are generally short lived. It is the old standard, drinks such as

Ginger Ale, Cream Soda, Lemon Sour, etc

which are always in demand. When properly made they cannot be equal as Summer beverages. You will get them made just right if you ask for Simmonds'. Refuse substitutes; see that the bottles bear our label.

G. H. SIMMONS.

MILLINERY IN TWO CASES

By express we have just received one case

Ladies' White Sailors

Very pretty, very cheap, very much nicer than the early Spring styles.

45c, 55c, 65c, 75c and 85c.

Also, this morning we received by express one case

Ladies' White Dress Hats.

We would advise all ladies who have not yet purchased their summer Hat to see those. They are a little later and more natty than the early Spring styles. Please let us trim one for you. We please with ease and a pretty hat. Untrimmed 55c, 65c, 85c. 95c, \$1.25, \$1.45. Trimmed \$1.50, \$2.00, \$2.50, \$3.00, and \$4.50.

PROWSE BROS.,

What Trade We Have We'll Hold and What We Haven't We're After

Petroleum Outfit.

The United States and Russia are between them producing, in round numbers, 130,000,000 barrels of petroleum per year, and the production of outside countries has of late increased so much that they are liable to bring the world's aggregate annual production to about 150,000,000 barrels.

2 CURES IN ONE TEN CENT PACK AGE.

J. Fred Edwards, the well known Clerk of the Learmont, says: "I recently had a Headache. Tried Kumfort Headache Powders—cured me in short order. One of our guests, a commercial traveller, was complaining so gave him balance of package—another cure. It seems they never fail."

Advance Under British Rule.

British rule has added 600,000 acres to the wheat-bearing area of Egypt. At present British contractors are engaged in building two great dams together and retain the waters of the Nile.

THE BOUNDARY LINE.

Between comfort and discomfort is often very slight. Have you rheumatism or neuralgia or are you a sufferer from obscure nervous pains? Why suffer longer? You can purchase for ten cents a bottle of that king of pain—Poison's Netville—or you can get a large bottle for 25 cents. It cures promptly. It is sure, pleasant to take, and never fails to cure all kinds of pain. Don't wait an hour, but send to any drug store and get a trial bottle. Netville, the sure pain cure.

TO ACCOMMODATE THE PUBLIC

We have opened a Nurses' Register. Persons wishing to engage a nurse can do so by app'ing at

McDonald's Drug Store, Nurses can register free of charge.

DOMINION ATLANTIC RAILWAY

And Steamship Lines to Boston via Yarmouth.

The Popular Fast Line between Eastern Nova Scotia and Boston via Windsor Junction and Halifax.

EXPRESS TRAINS leave Halifax daily [except Sunday] at 6:35 p. m., for Digby and Yarmouth, making connection Wednesdays and Saturdays at Yarmouth for Boston.

THE ROYAL MAIL STEAMSHIP "PRINCE ARTHUR"

2400 Gross Tonnage, 7000 Horse Power, the fastest and finest steamer plying between the Maritime Provinces and Boston.

Leave Yarmouth Wednesdays and Saturdays for Boston

on arrival of Express Train from Halifax.

Returning leaves Boston Tuesday and Friday at 4 p. m.

Passengers arriving in Halifax next day, 5:30 p. m., by Express Train.

For all information, guide book, folders, etc., which will be sent free, write to F. H. Armstrong, General Passenger Agent, Kentville, N. S.

P. GIFFKINS, Gen'l Manager. Kentville N. S. June 15 d. m.

MARVELLOUS MARKSMEN

Shooting of the Indian Soldiers is Simply a Wonder.

Forty-six bulls eyes and four "inners" is the marvelous record made out of fifty shots by a private of the 26th Middlesex, Light Infantry, an Indian regiment in the firing with Morri' tubes at the London camp. That means that at four hundred yards this Indian marksman could put 46 bullets into the heart of a man and put the other four so close to it there would be no fun in it for the target. The shooting of this Indian soldier is simply marvelous, but he comes honestly by it. The Indian regiments can outshoot their white brethren, and the reason is simple. Centuries separate the white man from the days when a clear eye and a steady aim were all that stood between him and starvation or a violent death from the beasts on whom he lived or who lived on him, but the Indian is different. Not centuries, but years separate him from life in the trackless forests of this continent. The fathers and grandfathers of the red men at the London camp, kept the wolf from the door by means of straight shooting with bow and arrow and later with the white man's rifle. Time and civilization's enervating influences will eventually reduce the red man's accuracy of aim to the white man's level, but in the meantime, he is in a class by himself. His skill is worth emulating by his white brethren and is worth keeping by himself for war clouds gather quickly in these days and recent events demonstrate that the soldier who can shoot to kill is worth ten who can't.

LONDON'S PAPER HOSPITAL

To Provide Shelter for Returning Wounded Soldiers—City of Papier Machie.

The return home of the many wounded soldiers from South Africa has filled the local hospitals, so that all sorts of emergency homes for the sick must be provided. The oldest of all is "a paper hospital" in the suburbs.

To be housed in a paper dwelling sounds an uncomfortable and inadequate condition in the rigors of an English spring.

Not far from London—at Netley—you can find a whole paper city with a population of 500 men, living, moving, having their being all in a paper wrapping.

The city is the convalescent branch of Netley hospital, and the material chosen for its fabric papier-mache. It is a new idea for a hospital hut.

There are forty-five of these paper tents behind the red brick buildings of the hospital, and in each of them there are ten men cursing the bad luck that sent them home from the front.

IN THE PAPER CITY. In the hospital till the wound heals, in the convalescent papier-mache city

until he is fit to travel, and then a couple of months' furlough to set him on his feet again—that is the history of the man who comes home with the mark of a bullet wound on him. As a rule he spends a fortnight in the paper city.

The houses of the city are glistening white, long, lean and business-like. At the end, so that there may be a curtain side the doorway and no draught, is a bulging porch. Fluttering from each of the open windows is a scarlet curtain to give a touch of color to the white landscape. And in and among the buildings of the paper city is the never-ending legion of wounded in butcher blue.

Inside the papier-mache building it is all quietude and comfort. Each building is thirty-six feet long. Ranged along the length are beds with easy spring mattresses that can allow for the tossing of a man still in pain, even if he is a convalescent. Beside each bed is room for the necessary kit, and at one side of the hut is the white wooden mass table.

Meteorological.

Monthly means of Temperature, Precipitation, etc., for May, 1896 and 1900 observed at Charlottetown.

Table with 4 columns: Year, Mean Max. Temperature, Mean Min. Temperature, Mean Range. Rows for 1896 and 1900.
