League Leadership Necessary

More serious for the world today than Germany's violation of the Locarno treaty is the fact that the spirit of Locarno has long since been submerged under national animosities and ambitions.

If League prestige is to be regained, however, it is necessary that its aims and problems should be far more widely understood than they are today.

Why The Secrecy?

Premier CAMPBELL announces that at the recent Dominion-Provincial conference at Ottawa which he attended, a tentative agreement on a method of amending the British North America Act was reached.

This information is not very enlightening. What the people of this Province are concerned with is the stand which Mr. CAMPBELL took with regard to scrapping the B.N.A. Act as an Imperial statute.

Would Make For Shorter Speeches

'ABBE DIMNET' in his 'Art of Thinking' said that if people, including legislators, were compelled to speak while sitting down they would speak better and more briefly.

The Commons Chamber of the British Parliament, it is pointed out, has no desks. Because it hasn't it can accommodate over 600 members.

Editorial Notes

The "early worms" yesterday morning thought they were "in the swim" for once.

By the time the legislature meets all that can be said on the Prohibition question will be said—except by the Government.

Prime Minister BALDWIN lays it down that if Britain is to play the part of peace-maker she must be fully armoured and accoutred.

About the only thing that can be said about the KIROO Reciprocity Treaty is, that it is neither Canadian nor reciprocal.

There is one thing about the next peace Conference shortly to be called—it will stall off indefinitely any change in Uncle Sam's neutrality declaration.

There will be so much to talk about in Europe for the next few months, that U. S. A. electioneers will find it unprofitable attempting the twisting of the Lion's tail.

The City Council has got off to a good start. Ambitions having been laid to one side for two years, we are at a loss to know who is setting his cap at the mayoralty.

Evidently Premier CAMPBELL has nothing to tell the electors about the success or otherwise of his appeals for fairplay and concessions from the "Friendly Government" at Ottawa.

There is one place where ladies are at a premium—in Dawson City, Yukon. Efforts are being made to induce more women to proceed to that far north capital as at present the male population outnumbers the females to one.

What special attraction has road-making for doctors of philosophy, chemistry and dentistry? It surely cannot be the money there is in it, for a capital of \$5,000 in \$1 shares would not make half a mile of hard surfaced road.

The City Council and Labour Union having endorsed the Board of Trades appeal to the Provincial Government for new Brighton and West River Bridges that makes the city's attitude unanimous.

We know the cause of brown heart in turnips and the preventative; now we are advised as to the cause of potatoes turning black or blue when boiled. It is due to the formation of pigment products which appear when the potatoes are grown in soil lacking potash.

GEORGE BERNARD SHAW has been telling the Americans that the successful man is one who has people doing what he wants them to do. "But they're always doing what I don't want them to do," therefore he confesses that he is not a success.

Mr. W. R. HOWSON, Liberal leader in Alberta, is being appointed a judge of the Supreme Court and his seat in the Provincial House automatically becomes vacant.

The Fish and Game Association have been discussing the replenishing of rivers and ponds with trout. Away in the Malay States they have been up against a similar problem.

The Mennonites of Kansas are the best off farmers in the State, due to their stern economies and "doing without."

Unless war breaks out in the meantime, more than 100,000 war veterans of seven nations will assemble at Verdun on July 14 in one of the greatest peace manifestations to be held since the World War.

Recent successful flights of the China Clipper to and from Manila constitute a spectacular illustration of a general tendency to cover the vast distances of Asia with the speediest existing means of transportation.

Unless war breaks out in the meantime, more than 100,000 war veterans of seven nations will assemble at Verdun on July 14 in one of the greatest peace manifestations to be held since the World War.

Notes by the Way

Of the persecution of the Jews in Germany so much has been said and written that nothing can now increase the indignation and disgust of civilized people the whole world over.

Any individual who has a pain in the region of the heart is alarmed. He thinks immediately of some acquaintance or relative who has died suddenly following a similar complaint.

So with the other proposal to place the British Empire under international authority. The self-governing Dominions may be ruled out at once since they control their own destinies and would reject any such idea with a summary contempt.

As the cause of the original pain in the majority of cases is due to a partial closing of the small blood vessels carrying blood to the heart muscle, there is not much that can be done about correcting this condition.

A complete examination including the electrocardiogram, X ray and fluoroscope findings enables the physician to learn the extent of the damage done. When this is known the physician immediately outlines to the patient that while damage has been done, by living within certain limits his life will be prolonged.

The physician tries to learn all about the patient's work, his daily habits, his temperament, his food, exercise and sleep.

By showing the danger of violent exercise and the help light exercise can give, by advising plenty of sleep or rest at night with some "extra" rests during the day, and by outlining a "safe" diet, the patient has, humanly speaking, his own life in his hands.

Senator BORAH, with his eye on the presidency of the United States, is making an appeal to the anti-British element in that country.

By means of a little mirror over his windshield, Driver Buntaro Igarashi recognized the passenger in his taxicab as the man who shortly before had tried to rob a woman operator of a gasoline station in Tokyo, Japan.

Let the mercury scamp as far down the thermometer as it can go. Mrs. Lena Franz of Ozone Park still believes in her onions.

We are not concerned with the merits or demerits of the jury system, although there are many civil cases in which obviously a judge could decide the issues of fact at least as well as twelve men taken at random can decide them.

Dean Vincent MacDonald, C. C. of the Dalhousie Law School, presided, and the judges were Judge R. H. Murray, Brother Cornelius, President of St. Mary's College, Halifax, and B. E. Marshall, Vice-principal of the Halifax County Academy.

There is one good thing the Japanese emphasize the fundamental difference between the Japanese mentality and our own. This affair is so exclusively Japan's own business that we can look on it quite dispassionately and, it is hoped, realize that the Japanese view is operating from ours.

Exports of Canadian wheat to the United Kingdom during January, 1936, amounted to 5,845,893 bushels, compared with 3,089,772 bushels in January, 1935.

That Body of Pours

THE TREATMENT OF TRUE ANGINA PECTORIS—BREAST PANG

"Any individual who has a pain in the region of the heart is alarmed. He thinks immediately of some acquaintance or relative who has died suddenly following a similar complaint and his first question is apt to be: "Have I angina pectoris?"

I am quoting Dr. R. L. Levy in the New England Journal of Medicine.

As the cause of the original pain in the majority of cases is due to a partial closing of the small blood vessels carrying blood to the heart muscle, there is not much that can be done about correcting this condition.

A complete examination including the electrocardiogram, X ray and fluoroscope findings enables the physician to learn the extent of the damage done.

By showing the danger of violent exercise and the help light exercise can give, by advising plenty of sleep or rest at night with some "extra" rests during the day, and by outlining a "safe" diet, the patient has, humanly speaking, his own life in his hands.

Diet is very important. Foods that cause gas—cabbage, brussels sprouts, cauliflower, corn, cucumbers and some raw fruits must be strictly avoided.

The demand for the lowest possible rates for light and power is almost universal. Even in Ontario where there is the greatest hydro system in the world and where low rates have always prevailed, a demand was voiced in the Legislature the other day for cheaper power for villages and Hon. Mr. Roebuck, for the power commission has promised that lower rates will be given in 1937.

Reference has been made to the report of the Joint Legislative Committee of New York State which has been investigating public utilities for the past three years and the manner of my space today will be taken up with further quotations from that report.

"For many years no effort was made to standardize the forms of rates. Each company sought to set up a different standard. At one time there was a counting of the outlets, at another the number of rooms were counted, at still another the square feet of surface of the dwelling. By these and similar methods a demand charge or a current charge generally in block rates. We feel that the so-called demand charges in the shape of counted rooms, square feet areas, etc., conceal the true rates and keep the customer in the dark and keep him from knowing what he is actually paying.

"The improper inflation of a utility company's operating expenses by a holding company, its subsidiaries or affiliates become the medium through which the interest controlling a utility may seek for their own advantage to continue an excessive and improper level rates which should be reduced.

"In order to ascertain the excessiveness of the charges by the so-called service corporations owned or controlled by the system, our accountant examined the accounts of the earnings and said service corporations and by his testimony given herein, demonstrated the excessive charges and the viciousness of this system and practice."

"Our review of the affairs of the gigantic Electric Gas and Electric System, consisting of holding and operating companies, 'service' companies, security selling affiliates, employees investment company and other affiliations with accounting and his family causes us to state, unqualifiedly, that its fundamental weakness is the absence of understanding by the management of their responsibility as trustees for security-holders and consumers.

Actions such as above and which are understood to have been prescribed here are inimical to the public welfare and call for remedial action. We do not propose to be 'hewers of wood and drawers of water' for the frenzied financiers of New York any longer than is necessary to relieve us of their yoke.

I am, Sir, etc., JOHN F. WHEAR.

PUBLIC FORUM

This column is open for the discussion by correspondents of questions of interest to the Charlottetown Guardian does not necessarily endorse the opinions of correspondents.

ELECTRIC LIGHT PROBLEM

"Sir—The Public Utilities Act, 1934, passed by the local Legislature expressly states in section 23, "All charges made by a public utility shall be reasonable and just."

Shortly after the complaint was filed a representative of those who control the plant came to the City and offered to supply the City with 50 additional street lights without additional cost. The City for years have been paying \$10,000 for its street lighting—an excessive charge as it figures out at between 7 and 8 cents per kilowatt hour.

Although the first Utility Act was passed in 1929 there has never been a public hearing on the question of rates. The schedules filed by the Company were accepted by the statute and passed by the Council, the Government and the incorporated villages of Montague and Georgetown were unavailable.

When the pressure became too strong, the utility would come forward with an "inducement rate" or some other device to get the public since our absentees and foreign owners took charge.

The demand for the lowest possible rates for light and power is almost universal. Even in Ontario where there is the greatest hydro system in the world and where low rates have always prevailed, a demand was voiced in the Legislature the other day for cheaper power for villages and Hon. Mr. Roebuck, for the power commission has promised that lower rates will be given in 1937.

Reference has been made to the report of the Joint Legislative Committee of New York State which has been investigating public utilities for the past three years and the manner of my space today will be taken up with further quotations from that report.

"For many years no effort was made to standardize the forms of rates. Each company sought to set up a different standard. At one time there was a counting of the outlets, at another the number of rooms were counted, at still another the square feet of surface of the dwelling. By these and similar methods a demand charge or a current charge generally in block rates. We feel that the so-called demand charges in the shape of counted rooms, square feet areas, etc., conceal the true rates and keep the customer in the dark and keep him from knowing what he is actually paying.

"The improper inflation of a utility company's operating expenses by a holding company, its subsidiaries or affiliates become the medium through which the interest controlling a utility may seek for their own advantage to continue an excessive and improper level rates which should be reduced.

I am, Sir, etc., JOHN F. WHEAR.

"Form a commission," he urged, "I'll guarantee that in six months there won't be an available man walking the street. Surely there are enough brains in this government to create a plan where we can get the people back to work. We can't go on like this year in and year out."

Speaking in the Throne speech debate, Mr. Duckworth followed W. L. Miller (Lib., Algoma-Manitoulin) who discussed Northern Ontario, and George H. Challies (Cons., Grenville-Dundas). Mr. Challies concluded at the address he started Tuesday and dealt with hydro and agriculture. Dr. G. E. Tanner (Lib., Simcoe East) spoke after Mr. Duckworth and congratulated the government on its economy program.

their fruits ye shall know them." However, under modern breaking down of religious sanctions, in Islam as well as in Christianity, the effect of the law is growing now in Turkey, either in spite of or because of Prohibition enacted by Mustafa Kemal's government in his program of "modernization," abolishing and altering much of Koranic law.

But our question is, what is to be done in P. E. I.? We have reached the stage of the United States under Prohibition, rather than that of Ontario. It is now too late to change to government control, which would only transfer the "legitimate" from the pocket of the power increase in consumption. There is no way out now, but drastic enforcement, and how is it possible to secure that in a democratic community where the majority of people do not uphold the law? For it is plain that no other conclusion than that. If the majority favoured prohibition, instead of merely the name of prohibition, the authorities would not dare to refuse to enforce the law. Under the present conditions, the church people rarely before, if the church people really believe what they profess to believe, and probably honestly think that they believe, we could not have such a condition as we have. If we seriously wanted the law to be enforced, it would be necessary to pressure on the authorities to enforce the law, and by diminishing demand for liquor. No one would be connected in any way with the enforcement of the law who was not a total abstainer. Under the present conditions, an appeal to the Dominion Minister of Justice to use such pressure on the courts as will compel them to have some respect for laws they are sworn to enforce and enforce on the Island of Prince Edward Island, or any other official who violates the law or shows any leniency in its enforcement.

I am, Sir, etc., C. N. MURRAY.

Wants Commission On Unemployed

(C. F. By Guardian's Special Wire) TORONTO, March 10.—A two-fold plan to solve unemployment which, he claimed, would result in no man being idle within six months, was urged in the Ontario Legislature today by William Duckworth, Conservative member for Toronto Davenport.

Mr. Duckworth suggested the government appoint a commission to interview heads of companies throughout the province, asking them to put extra men on the payroll while the government instituted a works program.

"Form a commission," he urged, "I'll guarantee that in six months there won't be an available man walking the street. Surely there are enough brains in this government to create a plan where we can get the people back to work. We can't go on like this year in and year out."

Speaking in the Throne speech debate, Mr. Duckworth followed W. L. Miller (Lib., Algoma-Manitoulin) who discussed Northern Ontario, and George H. Challies (Cons., Grenville-Dundas). Mr. Challies concluded at the address he started Tuesday and dealt with hydro and agriculture. Dr. G. E. Tanner (Lib., Simcoe East) spoke after Mr. Duckworth and congratulated the government on its economy program.

their fruits ye shall know them."
