**RELIGIOUS SERVICES**

**THE BAPTIST CHURCH**  
Large congregations, morning and evening, welcomed the Rev. A. C. Vincent, D.D., on his return to charge of the Baptist Church. At the morning service Dr. Vincent took as his theme "Communion with Christ in daily life." Basing his thought on St. John 15, 14, "Ye are my friends, if ye do whatsoever I command you," the speaker emphasized the idea of communion with Christ as expressed through active life and daily conduct. It was a pleasure to have Miss Lena McLure as the soloist of the morning. Miss McLure was heard to excellent advantage in "Eye hath not seen," from Gaul's "Holy City." The sermon of the evening, "The Undying Fire," was heard with close attention and deep interest. Mr. V. L. Dingwell sang "Just for Today." The Sunday School hour has been changed from 12 o'clock to 1:30 p.m., and an excellent attendance marked this occasion yesterday.

**ST. DUNSTAN'S BASILICA**

At St. Dunstan's Basilica yesterday, the second Sunday of the month was observed as "Holy Name Sunday." The eight o'clock Mass, which is offered on the second Sunday of each month, and which is exclusively for the men of the parish, who are members of the Holy Name Society, was celebrated by Rev. Eugene Murray.

The members of this Society turned out in very large numbers, the main church being crowded and practically all received Holy Communion. During the Mass Congregational singing took place, and during Communion the Male Choir, under the direction of Mr. W. J. Brown rendered very beautifully hymns "O Sacred Heart" and "Sweet Name Which Makes the Dying Live." The sermon was preached by Rev. J. E. P. O'Hanley, Spiritual Director of the Society, who first gave the regular Sunday announcements, and spoke on behalf of the Society, urging all men who are members of the Society to attend eight o'clock Mass, on the second Sunday of the month which is the Mass of the Society and not seven or nine thirty o'clock Masses. He mentioned specially that any man who is not as yet a member and wishes to become one, that he hand in his name to a member of the Executive who will list him as a regular member. The sermon was impressive for the occasion, taking text from the Gospel of St. Matt. VI Chapter, 24-33 verse, "Seek ye first the kingdom of God and his justice; and all these things shall be added unto you." In the evening at 7 o'clock Holy Hour was conducted by Rev. Louis Dragan, who also officiated for Benediction of the Blessed Sacrament. The Corpus Christi Choir was in attendance under the direction of W. J. Brown, with Miss Beale Blanchard as organist.

**Reports Progress In Fish Culture**

Mr. James Catt, of St. John, N. B., District Supervisor of Fish Culture in the Maritime Provinces, is investigating the waters which were stocked with rainbow trout at O'Keefe's, Afton and Glenfinnan lakes. He has not yet completed his work, but in Glenfinnan Lake he found an excellent stock.

These trout are placed in the water as fingerlings when they are about two or three inches long. They are indigenous to the Pacific slope, but some years ago were brought to the eastern part of Canada, and prior to that, to the United States. The trout in the lakes mentioned were obtained from the original stock placed in O'Keefe's some five or six years ago.

Mr. Catt also inspected the trout hatchery at Southport and found that work is being carried on satisfactorily. The trout eggs will be collected in October and will continue until a satisfactory number are taken. The period of incubation will depend upon the temperature of the water. The salmon eggs are collected at the Morell River station about the same time and will be brought to the Southport hatchery.

Quite a number of the Island streams were stocked with speckled trout this year, and it is the purpose of the Department to continue the work as usual. While here Mr. Catt will examine various waters where the fingerlings have been set out. The Southport hatchery pond is now well filled with trout, and it is proposed to catch these, spawn them, and use them for restocking other streams.

through the dense woods which separate their landing place and Lemieux. They had only a dozen oranges as food between them and these were gone when they sighted the welcome railroad tracks. Bearded and unkempt they walked along them until they came to Lemieux where friendly French Canadian villagers gave them food and drink.

After a good night's rest Captain Hynes and Lieut. Brzynski pronounced themselves in fairly good shape again.

They will rest here until they have completed plans for the recovery of their balloon. It will probably have to be portaged through the woods by Indians or trappers who are the only men who know the locality where it descended.

**Search Was Started**

The balloonists were expected to make their way out of the forest in this region. They were sighted flying low during a thunder storm by two anglers, Joseph Douville, Quebec, and J. P. Morin, Montreal, at Lake Bonlac, 15 miles north of here, on Monday last.

The fishermen did not report having seen the Polish balloon until Friday last when they returned here. In the meantime as no word had been received of its landing some alarm was felt for the safety of the aeronauts and the Quebec Forestry Department had issued a request to all its agents to be on the look-out for them. After they

**Bank Commission Hears Strong Advocacy Of Central Bank At Toronto Sitting.**

(Canadian Press)  
TORONTO, Sept. 8—If the construction industry in Canada was operating at the 1929 rate, half a million people would be back in employment today who are at present unemployed. This declaration was made to the Royal Commission on Banking today at its initial Toronto sitting, by J. H. Carswell, chairman of the Survey Committee, National Construction Council of Canada. During periods of normal business, he added, there was a fairly steady relationship between volume of construction and bank loans "but with the contraction of bank credits, construction shrinks at a still more rapid rate."

Mr. Carswell's submission to the commission was one of many received today. Lord Macmillan and his four colleagues heard representations from approximately a dozen organizations and individuals in their first day of sitting. These included protests against the banks being permitted to engage, directly or indirectly in the insurance business, and allegations that they were so doing; suggestions for reduced interest rates on government securities; statements in respect to housing and the mortgage loan situation; and declarations that banks had refused to grant advances to municipalities on good security.

Earlier in the day, W. C. Good, on behalf of the United Farmers of Ontario, had referred to banking in Canada as a gigantic monopoly controlled by two small groups located in Montreal and Toronto. He had suggested abolition of boards of directors of Canadian banks, their place to be taken by independent officials. He had proposed "as a first step in the direction of intelligent social control, that a central bank should be established for Canada, and also that a board of national invest-

ident Roosevelt, Johnson set a public hearing for Monday and then postponed it until Tuesday.

Still seeking an agreement and willing to make concessions to get it, Johnson told newspapermen the weeks of controversy must end and that under the authority of the Recovery Act, Mr. Roosevelt would if necessary make the code effective for the coal industry without an accord.

With the bituminous operators dissenting so vigorously, officials generally were of the opinion that for the first time since code writing was begun by the N.R.A. it might be necessary to use the full powers of the law.

Much of the objection of the operators to the tentative coal code rests upon labor relations to which Senator Wagner pointed in his statement.

**Conversion Loan Agreements**

In the meantime arrangements for the Conversion Loan have been practically concluded so far as the Minister of Finance is concerned, and Hon. E. N. Rhodes has retired to the country for a brief rest before the campaign is launched. Dr. W. C. Clark, Deputy Minister, has the final details in hand and it is anticipated that the issue will be offered to the public during the last week of September or the first week of October.

The loan will probably amount to about \$300,000,000 and yield slightly in excess of four per cent. Of the total, \$160,000,000 will probably be a conversion of the Victory bonds coming due this fall. It is quite possible that many holders of Victory bonds maturing next year will also take advantage of converting them into long term government securities although the interest rate would be substantially lower.

The Royal Commission on Banking and Currency, headed by Lord Macmillan, will be back in Ottawa this week for its concluding sessions but it is not expected that a report will be forthcoming for some time.

**Here's Mamma's Cheque**

It always comes on the first of the month. Now Mamma can pay the bills.

YES, thanks to a husband's love and forethought, here is another home protected by an Imperial Monthly Income Policy.

Here are two children who will have cause to bless their daddy's memory. There is a widow who will breathe a prayer of thankfulness each time the Imperial Life cheque comes, a pledge of safety amid a changing world.

To ensure your wife and children an Income of \$50, \$75, \$100 or more per month, should you pass on, might not seem much in comparison with what you are doing for them now, but it is amazing what a woman can do with even a small income, if it is regular.

A few dollars saved every year from money you now readily spend or invest in other ways would make certain this guaranteed income to your family.

More than that—the income can be planned to come to YOU in your later years when your earning power will decrease and when a regular cheque would be very welcome.
