RECALLS EXPERIENCES

Continued from page 8

along this line also for they advertised that they intended putting on a market milk course, beginning January 1st, and requested operators of milk plants or others interested in safe milk to attend.

"I found the course most interesting. Two pieces of equipment in which I was most interested were a clarifier for the removal of foreign matter from the milk before pasteurizing and a glass lined pasteurizer which was new on the Canadian market. They also had a filter used for the removal of sediment and a coil type pasteurizer. These were in most common use.

"Our bacteriologist, Professor Lund, and dairy chemist, Professor Gibson, were busy every day making tests of milk filtered and clarified and pasteurized in both types of pasteurizers with regard to efficiency.

Final Report

"Their final report was that the clarifier was without doubt the most efficient means of removing sediment. There was no difference in either pasteurizers with regard to efficiency but I was completely sold on the glass lined pasteurizer. In a confidential talk with Professor Dean, head of the College, he agreed with my decision, although he was not supposed to recommend any particular class of equipment.

"I returned home the 5th of April, 1923, and continued on at my old job until the spring of 1925 when I decided to take the plunge and try to establish a better milk supply.

"I had many discouragements. I had to obtain the moral and financial support of some leading citizens. Many I talked to approved of my plan which doubled its success. I expected the support and approval of the medical men but apart from the three doctors who had been most active in the work of the Anti-Tuberculosis Society and Red Cross I got little support. Some even opposed pasteurized milk.

"Hon. Dr. W.J.P. MacMillan was Provincial Health Officer, and he used his influence in boosting pasteurized milk. On one occasion he was giving a health talk before the Women's Club and invited me to attend. At the close he introduced me to the Club and I had an opportunity to present the cause of safe milk.

"Dr. S.P. Jenkins and Dr. H.D. Johnson were both of great assistance in preaching the gospel of safe milk.

"I might say here that I feel closely associated with the Rotary Club because of the assistance given me by some of your members. I refer to Messrs R.E. Mutch, Alfred Pickard, W.M. Rowe, also J.O. Hyndman and the late H.J. Phillips in addition to the three medical men before referred to.

"The men had no particular interest in pasteurized milk but I had been practically sitting on their doorstep so long that they probably thought the best way to get r.d. of me was to get behind and give a push.

"Your President, Edwin Johnstone, and John Buote were my first assistants and, although I had no job for myself up to this time, these boys were so persistent that I agreed to take them on when we got started.

"Edwin, as you know, is now in the insurance business and John Buote is now Rev. John Buote, Parish Priest in the Magdalen Islands. No doubt both attribute their success to the experience they gained in the milk business.

"We finally got under way in 1926 but had a lot of discouragements. We introduced the ticket system which may have kept some of the milk vendors but generally people thought they would rather have cow's milk than pasteurized milk.

"We were the first to give the producer a standard price for milk. He had been getting from \$1.00 to \$1.25 per cwt. The retail price was 10 cents per quart. We established a standard price of \$2.00 per cwt. for 4% milk or 50 cents per pound butter fat.

"I tried to get the co-operation of the milk vendors but they had no faith in pasteurized milk. They said their customers would not use it and if they joined up with us we would all be out of business.

"Our first day on the street we delivered 30 quarts of milk. Two men on a team covered the whole town.

Kept Flooding

"We were losing money pretty fast but kept plodding along. A typhoid epidemic broke out in Montreal which was traced to raw milk. The Montreal Star came out with a very strong editorial in which they condemned the health officials for allowing poisoned milk to be sold. The milk distributors sued the Star for libel and court action was taken. The Star brought Dr. North over from the United States as chief witness for the defence. Dr. North was head of several children's institutions and had investigated the cause of many epidemics. He had made exhaustive experiments with raw and pasteurized milk and is known as the father of our present system of pasteurization. His evidence was so convincing that the Star won their case.

"I had the whole story reproduced in local papers as copied from the Star. That proved to be of considerable influence in changing public opinion in regard to pasteurized milk. Today I believe 75% of all milk used in Charlottetown is pasteurized.

"During all those years we have tried to encourage the producers to produce better grade milk, stressing the importance of practicing the three C's—clean, cold, covered—but there is still room

for improvement. A sanitary engineer has been employed by the Government and will take over the supervision of the sanitary handling of foods in the spring. Production and handling of milk will come under his supervision.

"Years ago we tried to encourage the farmer to grow his own feed and distributed literature on how to build a silo, to grow alfalfa, corn, soy beans, etc. but during war years' help was scarce and it was easier to buy milk feed and we have drifted into expensive product on.

"As a distributor, I am opposed to high milk prices because it cuts down consumption and our only hope of survival is maximum output.

"Our spread is practically the same today as 20 years ago and taken on a percentage basis is less.

"We pay the producers approximately \$12,000 a month for milk and cream and nearly \$600, a week wages and we call ourselves a poor class of safe milk on Prince Edward Island."

FIRES IN TORONTO TORONTO, Jan. 26.—(CP)—Eight persons, including a two-year-old girl, escaped from their three-story home on west-end Shaw Street today, bringing to 31 the number of persons forced out by fire in Toronto in 48 hours. Thir-

Nomination Day For S'ide Civic Election

Today is nomination day in Summerside for the civic election to be held on Tuesday, February 3rd, if there should be more than one nomination in any ward. It looks as if Mayor J.F. Arnett and Councillors Henry Wedge and T.D. Morrison will be returned by acclamation.

In the East Ward Mr. Arthur Johnston has indicated that he will oppose Councillor J. L. Gorrell.

Mr. Leigh Stewart of the Water and Sewerage Commission is also expected to be returned unopposed.

It is hard to say whether this lack of activity is due to the fact that the citizens are satisfied with the manner in which civic affairs are being conducted or whether they don't care. Whatever the reason, there has been practically no discussion of civic affairs by the citizens in general within the past few weeks as one would expect prior to a campaign.

Howlan The many friends and relatives of Mr. Philip Martin are sorry to hear that he has been sick at his home for some time now.

Rev. Fr. Rooney of St. Anthony's has gone to visit his parents in Boston.

The snow plow is being kept quite busy on Western Road and by-roads.

The School Inspector visited the school here on Thursday January 15th.

Miss Joan Arsenault, Howlan was a visitor recently to her aunt in Alberton, namely Mrs. Herb Avery and Mrs. Jim Kinch and their families.

Mr. Henry MacAusland is busy cutting lathes now. His brother-in-law Warner Ramsay of Un'ovale is helping him.

Mrs. Eddie MacAusland and little daughter Alberta Jean left on Jan. 2nd for Halifax to visit her aunt Mrs. Alice Smythe who is ill there.

Mr. Rupert McNeill, Cleary left for Acadia University in Wolfville after spending his vacation at his home. Mr. McNeill is taking his B. A. course.

Mr. and Mrs. Alvin Webb, O'Leary are moved from their home to the new Post Office while Mr. Fields the new manager of the Bank of Nova Scotia will occupy their house. Mr. Fields succeeds Mr. Arnold Wilson who with his wife and family have gone to St. Andrews, N. B., where he is manager of The Bank of Nova Scotia in that town.

Alan Mathews, son of Mr. and Mrs. Jack Mathews has joined the staff of the local bank of Nova Scotia. He succeeds Merrill Hayden who has been transferred to Moncton, N. B.

Mr. Jack Gallant, Howlan was a recent passenger by train to Summerside.

A very enjoyable party was held at the home of Mr. and Mrs. Rod McNeill recently.

Mr. and Mrs. Arthur Martin and daughter Betty have recently moved to Summerside.

Seems that the snow plow had to give up on some of the by-roads in this vicinity after the heavy fall of snow which started on Saturday p. m. all through Sunday until some time Sunday night. The roads were very bad on Monday, no mail man and no school as teacher didn't come.

Seems this year quite a few of the local girls received watches as gifts but no traditional diamonds, but cheer up girls this is Leap Year and you are supposed to do the proposing and woe to the guy who refuses, as he has to give you a silk dress.

There are to be new rules in Howlan School, as there are around forty pupils, the trustees have decided to have the smaller pupils up to Grade IV in the forenoon only, then from Grade V up in afternoon. In that way it is hoped the teacher can devote more time with each pupil. Here's hoping the teacher has it easier now.

With Fr. Rooney gone to U. S. A. and very bad roads and weather, there was no Mass at St. Anthony's on Sunday January 18th.

Miss Margaret and Dor's Gallant of Howlan were passengers by train to Summerside on January 20th.

On Tuesday evening at about 5 o'clock fire which originated from the upper story, completely destroyed the dwelling house of Mr. and Mrs. Frank Richard and all its contents. As soon as the smoke was noticed neighbors rushed to the scene but their efforts were all in vain. As luck had it no one was hurt and no lives lost, as in so many fires nowadays.—How.

Winnipeg WINNIPEG — (CP) — Lilac bloomed in January while thermometers registered sub-zero temperatures. The lilac was in a pot in the basement of Winnipeg householder A. Olafson.

SMALLMATS with SUITS THAT TAKE HONORS IN QUALITY and LOOKS

Suited for the best occasions, Smallman's "famous make" garments give you that ease - - that looks better, feels better and wears longer. That's what Youth wants in clothes more than anything else - - with ease in the supply, exclusively loomed fabrics.
