**THE POLICE**

St. John, N. B., is, according to exchanges from that city, to have shortly, a Royal Commission "to investigate a charge the City Council has preferred against the Chief of Police that he is incompetent."

We have no knowledge of the charge referred to or of the causes which led to it, nor do we purpose discussing a case that is sub-judice. Yet we are well aware of the fact that human nature in St. John is pretty much the same as in other cities and that, with possibly few exceptions, the police and chief of police everywhere are pretty much what the authorities, official and private, make them. The term "private authorities" the reader may interpret for himself.

Even in the model, well governed and well policed city of Charlottetown the police often get blamed for the misdeeds of citizens. If a burglar burgles, or an autoist autos too joyously, or a hilarious citizen hilariously, too conspicuously, the blame falls on the devoted heads of the police. This, let it be understood, has no special reference to Charlottetown where we have no burglars, where there are no hilarious citizens and where our autoists travel at exactly eight miles an hour as prescribed by law.

But suppose, as happens in many a city on the continent, a respectable burglar, in a moment of weakness and under stress of circumstances, does a little burgling on the side; suppose a respectable citizen is "cut with the boys" and, as he returns home under the full moon, joyously rehearses, solo, some choruses that had captivated his fancy, and that in his exuberance he finds the sidewalk too narrow and the adjacent buildings chasing him out into the gutter; suppose a respectable autoist, in his haste homeward should speed up to a maximum of eight and a half miles an hour.

And then suppose that a justice loving policeman, seeing the laws of his country and the regulations of his city violated, should arrest the respectable burglar, should put the bracelets on the wrists of the soloist, should run after the speeding autoist, climb into his auto and place the lonely but respectable occupant under arrest, what then?

In every well regulated city there is an unwritten law which overrides and nullifies the printed codes. Under this unwritten law the man with a "pull" is permitted to take liberties with His Majesty's statutes which would land him who is without it in jail, and the policeman often finds it difficult to determine where one law merges into the other. Being human he sometimes makes a mistake and, forgetting where the "pull" is undertaken to pull the wrong man in. Then there is a howl, perhaps a Royal Commission, and the policeman gets the blame, perhaps the sack.

We note by our Montreal exchanges also that there has been trouble with the police in that city. Certain well meaning but over sensitive, reformers stated publicly that white slavery was practiced to an alarming extent in certain Canadian

**AGRICULTURAL GRANT**

The Department of Agriculture is in receipt of a communication from the Seed Commissioner at Ottawa in which he states that he is prepared to authorize an increased expenditure this year for "fields of standing grain" competitions and for seed fairs. Whereas formerly \$1,000 was appropriated for this province on this account, this year the sum of \$1,500 has been granted, but in view of the fact that the population is under 100,000 only \$1,405 of the amount can be drawn. Last year the Department drew \$960 of \$1,000 set aside for these competitions. This year the competitions are expected to be keener than ever before, and every farmer should endeavour to enter one field at least.

**NOTES**

Paris has had a snowfall in June and in London the weather is reported to be like in November. The United States on the other hand it is very warm in some places and there is more or less suffering because of the conditions. In each of the countries, the people are complaining of the particular brand of weather coming their way. Even Prince Edward Island which usually boasts of its fine climate, the year round, is not saying much—openly about the weather which has been, to put it mildly, remarkably cool up to the present.

It becomes more and more difficult to understand the Liberal press and the Liberal party. In the House of Commons the bill to reimburse depositors in the Farmers' Bank was strongly opposed by the Opposition. The party voted almost solidly against sending the measure to the Senate. Now, however, that the proposal has been rejected by the Senate the Government is held responsible. It is declared that millions can be got for Mackenzie and Mann and nothing for the farmers. Is it fair in the course of twenty-four hours absolutely to reverse the position? How can slow thinking people in such weather as this keep step with a party that moves so swiftly and so uncertainly. One would expect the Opposition to bless the Senate for its action since it simply registered the will of the political minority in the House of Commons.

**Beware of Ointments for a arr that contain Mercury**

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, contains no mercury and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists. Price 75c per bottle. Take Hall's Family Pills for constipation.

"Get in today early as you can and see those wonderful wash silk waists, worth to 5.75 that we are selling for \$2.98. Why are we doing it? We bought them away under the regular and we are sharing up our saving with you. Buy one and we'll both profit. MOORE & McLEOD. 2973

**INTERESTING LETTER FROM CONSUL FROST OF CORK, IRELAND**

The following letter from Mr. Wesley Frost, American Consulate, Cork (Queenstown), Ireland dated June 1, addressed to Major Bartlett will be read with interest by his many friends here.

My dear Major Bartlett:—As usual I am remiss as to my epistolary obligations; but the fact is I have been very much occupied in settling into harness here, as well as in adjusting household and social arrangements. I have sent a few postals to Charlottetown, however, and have often thought of the Island.

We had a charming ocean voyage, although the outset was stormy. For the first two days the waves were frequently as high as the promenade deck, and a great majority of the passengers were the worse for the weather. Mrs. Frost and I both enjoyed the subtle pleasure of superiority in not succumbing to sea-sickness although I believe she did absent herself from the table at one meal. The remaining seven days were bright and relatively calm, and shuffle-board, bill-board, and lounging in deck chairs were the order of the day; while I also found time to do some long desired reading. If you have not read the five-page soliloquy of Empedocles in the first act of Matthew Arnold's poem of that name I venture to recommend it to you, although recommending reading is a hazardous always. There were few notable on board; but we made the acquaintance very pleasantly of Captain Headnell, F. W. Grinnell of Boston, Miss Venes of Madam Nastimova's Company, and a number of other people well worth knowing. We were shown every courtesy, as is the policy of the White Star Lines with my profession. I spent a good deal of time familiarizing myself with Ireland by reading Black's Handbook, loaned to me by Dr. Fullerton in Charlottetown, and which I found excellent, as far as I can judge. We landed from a tender at Queenstown at four o'clock in the morning of May 14th, with the moon setting behind us and the ruddy pink of sunrise in front over the town.

The town is strikingly picturesque, rising terrace above terrace, clothed in deepest and most vivid green, and with fine cathedral and other beautiful buildings to set it off. The harbor is spacious and blue with the astonishingly rich verdure running right down to the edge everywhere except where there are wharves. In my opinion the red banks of Prince Edward Island would be a real addition to the scenery, but if I had not them to compare with I should call this bay ideal as to its water-scapes. The Islands of Spike and Haubowline, the seat of the British Admiralty station for Ireland lend variety to the expanse of blue water; and at the harbor's mouth are two imposing fortresses, Fort Carlisle and Fort Camden, on bluff opposing headlands, three hundred feet high of almost solid rock clothed with gorse and rhododendron. I had the pleasure of spending an afternoon in Port Carlisle last Thursday, as the guest of Captains Langton and Field, the former of whom had been at Charlottetown as instructor at the encampment, detailed from Halifax, and remembered with fondness, and we spent the afternoon after lunch with a squad of sappers trying to break through a wall which had long closed up short a rather elaborate passage which had the air of leading somewhere.

There are from four to ten battle-ship stationed here constantly, and the harbor is alive with tenders, torpedo boats, yachts, and coast-guard steamers. The streets swarm with soldiers and marines. Indeed the

**OUR LONDON LETTER**

(From Our Own Correspondent)  
LONDON, May 29.—Empire Day, which was celebrated on Monday, 25th May, was marked by several functions of an imperial character, the chief of which was the dinner of the Royal Colonial Institute over which H. R. H. Prince Arthur of Connaught presided. It was a large and widely representative company which gathered in the Savoy Hotel, and Canadians were gratified to have present in addition to the son of their present Governor General, his successor of a few months hence, H. R. H. Prince Alexander of Teck. Prince Arthur of Connaught in proposing the toast of "Prosperity to the Royal Colonial Institute," referred to the memories he had of his world tour of some years ago, as an allusion which at once in a sympathetic touch with those present, many of whom hailed from the Dominions mentioned. In touching upon Imperial Unity, His Royal Highness expressed the hope that some scheme might yet be evolved which would be of equal benefit to the Home Country and all the dependencies under the British Crown. A statement which drew great applause was that suggesting that the universities might be encouraged to give a degree in Imperialism, "for," added Prince Arthur, amid much cheering, "I know that the general ignorance of even the geographical situation, not to mention the resources, of our colonies, is something appalling." Prince Alexander of Teck made some general, though guarded, comments upon conditions in the Dominion to which he will proceed in the Fall of this year.

Dr. George Parkin, Director of the Rhodes Scholarship Trust and Sir George Reid, High Commissioner for Australia, both made interesting speeches, the former encoaching on dangerous ground when he suggested that England needed to get back to political sanity, while the High Commissioner of Australia had another tilt at Canada for its failure to face the question of Imperial Defence.

Another institution which has for its object the strengthening of the links of Empire, selected Empire Day for inaugurating its new premises. The Overseas Club which in the four years of its existence has enrolled over 120,000 members in all parts of the world, has opened magnificent club-rooms on Aldwych, just opposite the much-talked-of Dominions House site. A large number of guests gathered there and were received by the Lord Mayor and by Lord Northcliffe, and after the Lord Mayor had declared the new club opened, an adjournment was made to the Waldorf Hotel, where luncheon was served. In the speech-making which followed, Earl Selborne, formerly Governor of South Africa, made some interesting observations concerning the way in which Boers exiled temporarily after the war to various lands, had returned to their native country greatly impressed with the solidarity

**KNITTING MILL PROPOSITION**

Sir,—I was asked a question the other day regarding the knitting mill, which when looked at from my point of view came with somewhat of a surprise. The question was do you honestly believe it would pay to start a knitting mill in Charlottetown? My answer is, that wherever wool grows it will pay. Other things being equal. To my knowledge there is no wool more suitable for the manufacture of washable underwear than that grown on Prince Edward Island. But if we load a business of any kind with water, and over-capitalization, excessive salaries it will not pay. Some of us have seen enough of this kind of work and the disastrous effect it has had on business, to give it a wide berth and to wash our hands of anything of that nature. Our motto is for every share holder to come in on the same footing. It is not a speculation or a get rich quick investment, but one which promises good substantial returns for honest money.

Well Charlottetown has lost another profitable industry and one of a few that appeals to us as being natural to our climate and having the raw material at our doors. To my mind it does seem so unreasonable and unbusiness like to say the least, to be obliged to send our wool away to other provinces to be manufactured for us and then buy it back, paying freight two ways, telling to the world at large that we do not know how to do things on Prince Edward Island, except to be that of farming and raising foxes. It looks now, however, as though Tryon may have the business. They are making a strong bid for it, seeing the benefit the Island as well as the community will derive from it by giving our own people employment and keeping money home that otherwise is sent away year after year to pay for work that we are capable of doing ourselves. Surely there is enough loyalty and patriotism in the hearts and minds of those who have money to invest in Prince Edward Island to make a business of this kind move with some spirit that will assure its success.

There will always be a demand for the product until it is superseded by some other more suitable material which we know nothing of in this present age.

I am, etc.  
C. A. GIARE.
