THE GUARDIAN COVERS THE FIELD

The Guardian covers the City and Province within which it is published more fully and completely than any other newspaper printed in Canada.

With a daily circulation of its morning and rural edition now about 8,000 and growing from day to day, it has broken all records for a daily publication in a small community.

Charlottetown has a population of 12,000 and Prince Edward Island has 103,000. The Guardian's daily circulation is therefore 1 to 1½ of population in the city in which it is published, or 1 to 13 of the population of the Province. This is, the management believe [unequalled by any daily newspaper published in Canada.

Take one or two comparisons with other leading newspapers in other cities and Provinces.

St. John has a population of 40,000 and the Province of New Brunswick 330,000 St. John has five newspapers and among these The Telegraph and The Sun are perhaps the foremost. Each claims a circulation of about 8,000 or say as 1 to 5 of the population of that city and 1 to 40 of the population of the Province.

Or again: Toronto has a population o some 250,000 and the Province of Ontario bout 2,225,000. The Toronto Globe is a great Canadian newspaper, known all over the world as one of the foremost journals. The Globe's published daily circulation is slightly under 50,000. That is as 1 to 5 of the population of Toronto and 1 to 44 of the population of Ontario.

The point is this that The Guardia covers the field of its circulation three and a half times as well, if compared with population of the city, and over three times as well, taking the population of its Province, as the best New Brunswick and Ontario daily newspapers, and these are admittedly among the best in Canada.

These facts are printed in no spirit of boasting, but for the satisfaction of Guardian readers and advertising patrons alike. They have a right to know how completely their favorite Journal's endorsed by the reading public among whom it circulates and how completely it covers the field as an advertising medium in this City and Provin

The cause of numerous diseases and disagreeable habits, heretofore ascribed as constitutional, have been traced directly to the teeth. Blindness, drolling, frothing, loss of flesh, weak eyes, driving on one rein and pulling are very often due to diseased and irregular teeth. Rough edges and sharp corners of the teeth lacerate the mouth, and produce nervousness and irritability; uneven and elongated molars and incisors prevent the proper mastication of the food, producing indigestion and general debility. Decayed molars cause necrosis of the bone, abscesses nasal gleet, etc. These causes should be removed. Decayed teeth should be removed by extracting or trephaning, sharp corners and rough edges should be smoothed down and elongated and uneven molars and incisors cut off. The common float, or file heretofore deemed sufficient to accomplish this, will not suffice but special instruments devised for the purpose are necessary.
