

Have You Furs To Sell? Where Will You Sell Them? How Will You Sell Them?

If you are not getting the last dollar that your fox skins are worth, you are not employing the best selling medium. The Charlottetown Fur Sales have proven their ability, during the past years, to procure record prices for furs handled.

The following is taken from a letter written on the 18th January by one of the largest fur houses in the world:

"We would like to take this opportunity to congratulate you on the splendid way your skins have been put up. The assortment could not possibly be improved upon and buyers much appreciate the grading in general."

This would indicate the confidence of the great fur houses and hundreds of satisfied customers in Prince Edward Island indicate the confidence of the primary producer.

Large numbers of delighted shippers will testify to the fact that the Charlottetown Fur Sales have the finest and most up-to-date pelting plant in Canada and this plant is operated at cost for the benefit of their shippers.

Liberal advances will be made and information fresh from the world's fur centres will be cheerfully given you when shipping your skins.

The best service, the highest returns and a friendly and courteous staff to wait on you are yours for the taking.

STOCK QUOTATIONS

Morning Stock Letter

(Received over Pitfield and Co's Private Wire) NEW YORK, Dec. 21—The London market is quiet and holding well, international issues are quiet. There is no improvement in the labor news this morning except that news from the maritime strike in the Pacific coast appears to be little better. According to Washington reports from the war department it will purchase 50 planes before next June. The Wall Street Journal carries the story this morning that it is estimated that a minimum of ten per cent increase in freight will be necessary to hold the 1937 carrier earnings at the 1936 level. Although Saturday's market is not conclusive from a technical standpoint it did carry unfavorable implications with it. Nevertheless, in view of the fact

that Saturday was the third successive day of the reaction from the trading standpoint we would prefer to buy stocks today than to sell them. TORONTO, Dec. 21—Thompson Cadillac—High grade ore continues in the drift No. 2 vein at Thompson Cadillac according to word received from A. Wall, consulting engineer late Saturday. Up to Saturday, total length of high grade shoot was shown as slightly over 50 feet, with the face still in ore. Mr. Walse after correlating present development with proven ore shoots on the 150 foot level, estimated a further 50 feet of high grade ore will be found before the drift enters the lean section known to exist between the downward extension of the spectacular 169 shoot and the present position.

Produce Prices

MONTREAL, Dec. 21 — (CP) — Wheat, Nor. No. 1 \$1.35, No. 2 \$1.24 No. 3 \$1.31, No. 4 \$1.28 1-8, No. 5 \$1.25, barley, C.W. No. 3 \$3, No. 5 \$1.1-2, oats, feed No. 1, 56 1-2, No. 2, 55 1-2, oat, C.W. No. 3, 57 1-2. Flour, spring wheat patents, firsts \$7.50, seconds \$7.10, bakers \$7.00, winter wheat patents, choice \$5.20 to \$5.30, white corn \$6.50. Bran, ton \$32.25; shorts, ton \$34.25; middlings, ton \$37.25; rolled oats, bag 90 lbs. \$3.55; hay No. 2, per ton, carlots \$9. Cheese, Que., unquoted; Ont. unquoted. Butter, 25 3-4 to 25 7-8. Eggs in cartons: A-1 large 42; A-medium 33; A-1 pullets 31; A-large 40; A-medium 32; A-pullets 30; B-large 29; B-medium 28; C 25. Potatoes: P.E.I. No. 1 Mts. 90's \$1.60 to \$1.65; N.B. No. 1 Mts. 80's \$1.22 to \$1.25; Que. No. 1 Mts. 80's \$1.18 to \$1.20. MONTREAL, Dec. 21 — (CP) — Egg prices improved slightly on Montreal open produce markets today while butter and cheese held quiet and steady. Potatoes advanced narrowly. Graded egg shipments in cartons or less were quoted at 34 to 35 cts a dozen for A-large, 27 for A-medium, 25 for A-pullets, 23 to 25 for grade B and 21-2 to 22 for C. Butter was quoted at 25 3-4 to 26 cents per pound for cartons or less of No. 1 while lots to retailers were 26 1-2 to 27 for solids and 27 to 27 1-2 for prints. Cheese was quoted nominally at 13 for Ontario while Quebecs were unquoted. Potatoes: P.E.I. Mts. 90's \$1.60 to \$1.65; N.B. Mts. 80's \$1.22 to \$1.25; Que. Mts. 80's \$1.18 to \$1.20.

LIVESTOCK

MONTREAL, Dec. 21 — (CP) — Demand for cattle was light but prices firmed a bit on livestock markets today. Hogs also moved higher while cattle and sheep were steady. Receipts: Cattle, 545; calves, 815; sheep, 127; hogs, 1822. Good steers made \$5.25 to \$6.25, medium \$4.25 to \$5.25, common \$3.25 to \$4.25. Medium heifers sold at \$4, good up to \$4.50. Good cows were \$3.50, medium \$2.75 to \$3.00, butchers \$2.25 to \$2.50. Canners and cutes sold at \$1.50 to \$2, common bulls \$2.50 to \$3, fairly fleshy bulls \$3.50. Good quality veals made \$9, medium good kinds \$8.50, fair to medium \$7 to \$8. Drinkers ranged from \$4.50 to \$7, grassers \$3 to \$3.75. Good ewes and wethers brought \$6, lambs weighing more than 100 pounds \$7, culis and bucks \$6 to \$6.50. Most lambs were sold in mixed lots at \$6.75 to \$7. Sheep were \$2 to \$4. Bacon hogs, fed and watered, went to \$8.50 with selecta drawing 1 premium. Butchers, heavies and lights were \$8 and extra heavies \$7.50. Sows were \$6 to \$6.75.

of turnip: are notable examples of disease controlled very materially by sanitation. Celery trimmings provide winter quarters for late blight, and the bacteria causing fire blight of fruit trees survive for some considerable time on prunings. Therefore, all such material should be destroyed, preferably by burning. Brown rot of stone fruits, a troublesome and destructive disease, survives the winter in the "mummied" fruits now hanging on the trees. The simple expedient of gathering and burning these culprits, from the trees and off the ground, will minimize the ravages of the disease next summer. Late blight is the worst disease of potatoes with which the farmer has to contend. While its control is largely a matter of spraying, nevertheless, when present its destructiveness may be greatly minimized by the proper care of the crop immediately before and during the storage period. This disease does not commonly spread from tuber storage but the injury which it causes predisposes tubers thus affected to contract other serious rots which do spread in storage, thereby inflicting losses which would be greatly reduced by grading the crop and removing all tubers showing the slightest sign of rot. Apples, likewise, suffer storage losses, much of which would be avoided by observing a few precautionary measures as follows: (1) Keep the air in the cellar fairly dry to prevent germination of the rot producing spores so abundant under normal conditions. (2) Keep the temperature as low as possible without freezing because rots develop most rapidly if it is warm. (3) Pick over the apples at regular intervals to remove all evidence of rot. R. R. Hurst, Dom. Plant Pathological Laboratory, Experimental Farm, Charlottetown, P. E. I.

Late Season Practices To Reduce Losses From Plant Disease

(Experimental Farm: Note) The Division of Botany Plant Disease Survey Report for Canada impresses one with the enormous yearly destruction of farm crops by plant diseases. While it is too much to expect that such losses may be completely eliminated, nevertheless, scientific effort and experience have provided the means of controlling many diseases of Canadian wide interest. In the general sense plant disease control practices are forgotten as harvest time approaches, not to new high prices for recent years with trading in substantial volume. Feature traders in the gold group were Macassa and O'Brien. Macassa sold at the record high price of \$8 and closed at 7.00 for a gain of 45 cents and O'Brien was up 1 1-8 at 14 at the close. Central Patricia and Pickle Crow were down 10 and Pioneer 15. Pioneer closed at 4.95, its low mark for the year or longer. Pend Oreille was again the stand out in the base metals group. It advanced 70 to 3.95 and closed at the top. Minard's Liniment removes stains.
