A TIMELY TOPIC.—The Farmers' Institutes throughout Prince Edward Island are being asked to take up for discussion during the months of February and March "The Increased Production of Farm Products" to supply the great want that is likely to be felt by the United Kingdom and the Allies." It is suggested that the first meeting in February should be "Increased Production of Meat Supplies." It would be impossible to increase the number of animals, but, it may be possible to feed them to better advantage and giving them better care, so that better results may be obtained along this line.

TRINIDAD'S WELCOME. — The second meeting in connection with Canadian mission's conference in Trinidad was held at Susamachar Church on Tuesday evening, the Rev. Harvey Morton, presided. Rev. Cowper offered up prayer in Hindu, and Rev. J. A. Scrimgeour delivered the hearty greetings of the flock at Demerara to the Susamachar congregation. Rev. Dr. Clarence Mackinnon, who is so well known in Charlottetown, discorursed on brotherly love treating the subject in a masterly way, and at its conclusion Mrs. Harvey Morton rendered a solo. At the end of the customary exercises the gathering dispersed.—Port of Spain, Gazette, January 7th.

Praise Simple Mixture

Many in Charlottetown praise the simple mixture of buckthorn bark, glycerine, etc., known as Alder-i-ka. This remedy is the most THOROUGH bowel cleanser ever sold being even used successfully in appendicitis. ONE SPOONFUL relieves almost ANY CASE of constipation, sour or gassy stomach. ONE MINUTE after you take it the gasses rumble and pass out. Alder-i-ka cannot gripe and the INSTANT action is surprising. E. A. FOSTER, Druggist.

::"PENSLAR" COLD BREAKERS act quickly and are tasteless. Things are moving faster to-day than ever before; people demand it. Likewise they demand medicine that will act quickly—Laxative Cold Breakers is just such a medicine. No after effects—25c. box.—E. A. Foster, "Penslar" Store, Sunnyside.

FARMER'S BIG MEETING.— On Thursday evening, January 21st, Mr. Richard Creed attended an Agricultural Conference at Brookfield where he placed before the farmers present the importance of raising greater supplies next year to meet the deficit which is bound to occur through so many people being taken from agriculture for the war. He laid particular emphasis on the value of good seed and pointed out that on farms on Prince Edward Island crops had been increased six bushels per acre through the use of seed of the highest quality. He then went on to speak of the use of fertilizers at the present time. He stated that as a general thing he did not advocate the use of fertilizers but the present is a very exceptional time. The price of all grains is high now and there is a reasonable certainty that they will even be higher next year. With that in view there is no doubt but that it will pay farmers to use fertilizers, if it is used with a certain degree of intelligence, and at the same time they will be showing patriotism in a practical manner. He pointed out that the elements in which the crops were liable to be deficient were, Nitrogen, Phosphoric Acid and Lime. Where crops were sold off year after year and where clover has not been grown successfully there is likely to be a greater deficit of Nitrogen than of any of the other elements. Nitrogen can be obtained in mixed fertilizers or as a chemical in Nitrate of Soda. It is however very much better for the ordinary farmr to buy it n the form of nitrate as this is a Standard article and very seldom contains impurities. Further, the price of Nitrate of Soda is not likely to be increased by the war, but on the other hand will likely be cheaper, as immense quantities of this chemical have been used in the past in Europe. Considerable care must be used however in putting on Nitrate of Soda. It is readily soluble and if too much is put on is may wash away and be lost, or again, it may burn up the plants. It should be put on grain when it is about two inches high and on meadow lands, after the grass is well started in the Spring. It should be spread just about as thinly as possible. If a hundred pounds could be distributed fairly evenly over an acre it might be quite sufficient for one application, and if a man planned to put on three hundred pounds of Nitrate of Soda per acre it would be better to put it on in three applications if possible, at any rate it should not be put on all at once. The ideal time to put it on would be immediately before a rain, when the grass is quite dry. If the grass is wet there is a possibility of some burning occuring but when it is put on when the grass is dry and is spread fairly thin there is very little chance of it doing any injury. The Address was followed by a discussion which was taken part in by Capt. McDuff, J. H. McPherson and Charles McDuff and others, after which the meeting was brought to a close. On Tuesday evening Mr. Creed will speak at Springfield, Lot 67, and on Wednesday, January 27th at Stanchel.

AT HOME. — Mrs. Reuben McDonald, will be at home on Wednesday afternoon and evening, Jan. 27, at her residence 173 Euston St. 8341.

PUBLIC EXAMINATION— The half yearly examination of Victoria High School was held on Wednesday, Jan. 20th, in the presence of a fair attendance of visitors. Owing to poor condition of the roads the number of visitors was not as large as it would otherwise have been. The examination was timed so as to have present Mr. R. H. Campbell, Superintendent of Education, and Mr. Wilfred Boutlier, Inspector of Public Schools. Notwithstanding the condition of roads and weather, the attendance of pupils was up to the average, there being forty-six out of an enrollment of fifty. The pupils were examined in most of the subjects taught and the work as a whole was very satisfactory. The interior of both departments were tastefully decorated for the occasion by the pupils and teachers with spruce and flags, and presented a very patriotic appearance. Since the last official visit of the superintendent the outside of the schoolhouse has been painted, which greatly adds to its appearance. The principal, Mr. C. B. Jelly, has been teaching in this school for four years and a half, while the assistant, Miss Ruth Boulter, is now on her third year.

WHY HAIR FALLS OUT

Dandruff causes a feverish irritation of the scalp, the hair roots shrink, loosen and then the hair comes out fast. To stop falling hair at once and rid the scalp of every particle of dandruff, get a 25-cent bottle of Danderine at any drug store, pour a little in your hand and rub well into the scalp. After a few applications all dandruff disappears and the hair stops coming out.
