..ENTERTAINMENT AT KINKORA—On Monday, evening, May 6th, the Kensington Dramatic Club presented their excellent play, "An Old Fashioned Mother" in Kinkora Hall, to a large and appreciative audience, where each one took their part so naturally and capably it would be unfair to particularize, but we heard more than one express the wish that "when they come again, they have Jerry along." The specialties were up to Kensington's high standard and were indeed worth going to hear. We thank this talented troupe for their unselfishness in giving of their time and we take this opportunity of thanking Mr. and Mrs. M. J. McIver for giving us the opportunity of entertaining them to supper, after the play, at their palatial home. It is only another time, that they have helped to make our entertainments successful socially and financially. Entertainment Committee, C. W. League, Kinkora.

FINE INTEREST IN HORSE BREEDING

One of the best breeders of horses in the DeSable District is Mr. Neil Shaw, who is also a grower of certified potatoes, a splendid farmer and a one hundred per cent Scotchman. Mr. Shaw's Clydesdale mare recently dropped a beautiful foal which is claimed to be an almost perfect specimen, and the best that this fine animals has yet had. This mare has to her credit a number of prize winning colts, and the latest addition may well be expected to excel those of the past as a show horse. It is pleasing to know when so many western horses are being imported that Mr. Shaw has faith in the local industry and is breeding and developing high class mares and geldings on his farm at DeSable. The above foal is sired by the Registered Clydesdale Stallion Banded Baron, owned by J. W. McDonald, Bonshaw.

Irish Coast Threatened

Damage by the sea along the east coast of Southern Ireland recently has caused apprehension for the safety of other points. On the day when Greystones was brought into public attention by the newly-published set of census tables as "the most Protestant town in the Free State," large chunks of it were swallowed by waves. A protective wall which had been built in front of a terrace of cottages was broken down, and the inhabitants rendered homeless. Further south, at Wicklow, a low bank of considerable extent is feared to be in danger of being washed out, and at many points between Bray Head and Wicklow the railway line is threatened. In parts of County Cork erosion is proceeding at a rapid rate. Hitherto property of great value had not been damaged, but the Greystones development is attracting attention to the menace.

LIVING COSTS DROPPING

OTTAWA, May 18.—The cost of living is dropping, for wholesale prices during April declined two points. On the basis of 1926 prices using 100 as par, the index price for April was 94.1 as compared with 96.1 in March. Of the general food commodities 109 quotations were lowered, 46 higher and 347 unchanged. Of the eight main groups, six were lower and two slightly advanced. Vegetables and vegetable products declined from 89.9 to 86.9, there being lower prices for grain, flour and other milled products, bananas, lemons, vegetable oils, rubber, cocoa, beans and potatoes. These more than offset the higher prices of tea, coffee, oranges, dried fruit and hay. Fibres, textiles and textile products declined from 92.8 to 92.4. Wood, wood products and paper fell from 94.8 to 94.6.

Keep Things Where They Belong

Having been asked frequently as to the removal of wax from the ears, we are prompted to write that there is considerable truth in the old saying—"Never put anything into your ear smaller than your elbow." It is a mistake which many mothers make, that of trying to remove wax from deep in the ear. If wax does collect there, and it not infrequently does to the extent of interfering with hearing, it should be removed by a doctor. Improper means of removal may do considerable permanent harm.

It is into the mouth, however, rather than into the ear, that so many things go which certainly do not belong there. Food, drink and tooth-brush are the only objects which should go into the mouth, although fingers, ear-tickets and money are often placed there. The simple reason why the latter should not happen is that it is through the mouth most disease germs enter the body. Anything which may be soiled with human secretions should be kept out of the mouth, because such secretions may carry disease germs. The car-ticket given out by the conductor, frequently with fingers moistened with saliva, and then handled by our hands or gloves which have touched many things that might be soiled by saliva or other secretions, should not go into the mouth.

In most cases, there is no actual danger because disease germs, in general, die quickly outside of the human body by drying. However, to avoid the very real danger that does lie in this habit, it is necessary to develop the opposite habit of never placing in the mouth things which are out of place there.

It is through the consistent practice of such habits that each one of us can do much to ensure protection from disease. It may seem to be a small thing, but it is one of the small things which have an effect beyond what one who did not see their importance would expect.

Keep things where they belong, and so, keep disease germs out of the mouth.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by correspondence.

Very frequently we have mentioned that the health of each of us depends, in large measure, upon ourselves. We must make use of the information given to us concerning the prevention of disease and the maintenance of health if it is to be of any practical value. In the same way, it is true that whether or not the home is a healthy one depends upon the people who live in it. But that being true, it is also true that some homes are so built that it is very difficult, if not impossible, to make of any one of them a healthy home.

When a house is to be built or rented, the question as to whether or not it is so constructed and so situated that it can be made a healthy home, should receive attention. Some of the points which are of the greatest importance are brought to the attention of our readers.

Every room in the house should have a good-sized window which opens and looks out upon a street, yard or a large court. This allows for the free entrance of air into the room. Air is an absolute necessity and therefore, rooms without windows opening into the outer air are unfit to live in. Alcove rooms with-

PATONS LIMITED

Mr. Coolidge is well known as a man of few words. A story now going the rounds suggests that he also possesses a dry sense of humor. A certain distinguished Englishman was on a visit to Washington with his daughter, and, as is usual in such cases, the two of them received cards of invitation to the Friday reception at the White House. Before setting out the girl told her father that she was certain she could make Mr. Coolidge talk. "If he says three words to you I'll give you a fur coat," said her father. On being introduced to the President the girl frankly explained the situation to him and confidently awaited the outcome. But having eyed her for a minute, Mr. Coolidge remarked quietly, "Dad wins."

Officious Friend—"Uncle Jim, I'd get rid of that mare if I were you. She interferes pretty bad." Uncle Jim—"Yeh, she interferes, could make Mr. Coolidge talk. "If he says three words to you I'll give you nobody but herself."

CANADA'S MINISTER TO FRANCE PLANS TOUR OF DOMINION

OTTAWA, May 18.—Canada's minister to France, Hon. Philippe Roy, called upon Dr. O. D. Skelton, under-secretary of state for external affairs, today. Mr. Roy expects to remain in Canada for about three months, and intends starting in a couple of weeks on a trip which will take him to the Pacific coast. He said today that this is his first trip to Canada in more than three years, and he has noted many changes, and also signs indicative of prosperity in the dominion. A trip to Toronto is planned by Mr. Roy prior to starting on his western visit. He will probably go to Toronto some day next week.

UPTON SCHOOL

snap! crackle! pop!

That's the way Rice Krispies sound when you pour on milk or cream. The crispiest cereal ever made!

Rice Krispies are toasted rice grains. Golden-brown. Delicious for breakfast, lunch or supper. Add fruits or honey for an extra treat. Your grocer has Rice Krispies. Oven-fresh in the red-and-green package. Made by Kellogg in London, Ontario.

"I've come to the conclusion that women are puzzles."
"So have I; in fact, I've had to give several of them up."
"That rich uncle of John's is worrying about what our married future will be," said the bride-to-be.
"Yeah?" said her chum, "and what are you worrying about."
"What his wedding present will be," she replied.
"I read in the magazines that a motion picture actress ran an automobile over a 60-foot cliff into the sea. They don't do that really, do they?"
"Oh, dear no. That scene was faked. They simply raised the ocean to the top of the cliff, ran the auto into it and let it settle gently down again."

Kellogg's RICE KRISPIES
