August 9 1f & w.

Miss Maggie McEachern head milliner for James Paton & Co., left yesterday morning for St. John, where she will be united in marriage to Mr. A. S. Mclean, chief clerk of the Hotel Dufferin.

AN attempt at a joke startled a good many citizens yesterday when a report circulated around town that a young man had been killed in one of our mills. Fortunately the rumor was soon satisfactorily contradicted. There is perhaps one lesson which might be learned from the circumstance and one which would be of benefit to a great many and that is not to rely on all that is told. A similiar report was in circulation on Saturday night to the effect that a drowning accident had happened in our harbor.

Mr. R. LaTouch Tupper, Manitoba, who came to the city on Saturday evening leaves this morning by the Princess en route to Cape Breton. Since his arrival Mr. Tupper has met with a number of persons who propose taking advantage of the cheap rates—the first excursion taking place on the 10th. In conversation with a GUARDIAN representative yesterday Mr. Tupper said that Canadians are wanted in Manitoba and the Territories. The Doukhobors and similar emigrants are not wanted at all. At the present time the American speculator is beginning to realize the value of lands in the west, especally near Winnipeg and the lands purchased will probably be resold to American emigrants at increased prices. Skilled labor is not particularly needed but of course the man who is capable of taking charge of a binder is worth more than the ordinary man. The Government of Manitoba wants those who will assist with the harvest to take up their residence and make Manitoba their home. Some 40,000 men are wanted and that number will not appear to be too many when it is considered that some 2,600,000 acres are devoted to grains. Mr. Tupper has resided in Manitoba for 22 years and has had an excellent opportunity to become acquainted with the country, its climate and resources. He contends that in 1500 miles there is no change of climate. The air is dry and fevers and agues do not exist. The land is level and the plow can be run for miles without interruption. He desires especially to invite the young and old men of the Maritime provinces to embrace the opportunity afforded by the cheap rate and he has no doubt that when they visit the country they will permanently reside there, taking up large tracts of land at a nominal cost as there are 65,000,000 acres yet unoccupied.
