

Not a drop of Alcohol Doctors prescribe very little, if any, alcohol these days. They prefer strong tonics and alteratives. This is all in keeping with modern medical science. It explains why Ayer's Sarsaparilla is now made entirely free from alcohol. Ask your doctor. We have no equal. We publish J. C. Ayer Co., Lowell, Mass., the formula of our preparation.

Swift's Animal Fertilizers Produce the Best Crops WHY?

They are made from re-rendering house materials. They are nature's products—restoring fertility. They produce humus which stores moisture and nitrogen. They are the best substitutes for barnyard manure. They contain Potash in the best forms adapted to crops. They are swift, superior, sure. The animal materials from which they are made are by their very nature the most powerful crop producers known.

The Swift's Fertilizer Co. began about seven years ago in a modest way to manufacture fertilizers from the animal products of re-rendering houses. It believed that fertilizers based wholly on such materials would prove more effective, last longer, and yield more plant food in valuable forms than the usual fertilizers based on sale made chiefly from minerals. Experience has confirmed this view, and the question is often asked and answered by the asking—"Why do Swift's Fertilizers of moderate cost, produce better results than many high priced and so-called high grade fertilizers?"

All consumers must pay as much, or more, for mineral or chemical fertilizers as for those derived from animal matter, while the comparative commercial value as we have repeatedly pointed out, in a fertilizer like our Animal Brand, is more than eight dollars per ton in favor of our goods. That the agricultural value is greater is shown by the results obtained by thousands of our intelligent patrons who appreciate good fertilizers and know them by their fruits. The source of supply of the SWIFT'S ANIMAL FERTILIZERS is the immense Swift slaughtering establishments, where over 6,000,000 animals are slaughtered annually, the supply being almost inexhaustible, to which are added the highest grade chemicals of our own direct importation. We use no injurious salts or inferior grades of animal origin, and the potash is in a form free from common salt and other impurities.
