BAD SIDEWALKS

Sir,—Why are the street sidewalks allowed to remain in such a disgraceful condition? There have been several nearly fatal accidents owing to the deplorable condition of the sidewalks. While everything is done for the benefit of the motors on the streets, by machinery and manual labour, most of the sidewalks are neglected and left in a very dangerous condition. Surely the City Council will take up this important matter with the Chief of Police and see that this is attended to without any more delay. I am, Sir, etc., COMMON SENSE

AUSTRALIA WANTS THE STAGE BACK

WELLINGTON, N. Z. Jan. 9.—(By the Canadian Press)—Australia is "fed up" with the talking pictures and is going back to the "flesh and blood" shows, according to John Fuller, Sydney amusement magnate, who arrived here recently on a business trip.

"Talking pictures," he said, "have lost their novelty and that was their chief attraction in Australia. They are now a generally accepted form of entertainment and as such only the best will draw public patronage. Those who predicted that talking pictures would sound the death knell of the legitimate play were mistaken from the start. Normal conditions will soon be restored and screen and stage will develop side by side, with neither one dominant."

Mr. Fuller thought that so long as the depression in business continued in Australia, it would be folly to stage extravagant stage shows. However, he was confident that as soon as better business conditions returned the theatres now engaged exclusively in the showing of talks would at least in part revert to the legitimate drama and musical comedy.

In the opinion of Mr. Fuller there was small hope of Britain quelling the position of the United States in the production of films so long as such a large quota of its talent went to Hollywood.

"The best actors in Hollywood today are English," said Mr. Fuller. "Hollywood has been playing a premium on English artists ever since it became necessary for screen players to become audible, and it is out of the question for most producers to meet the figures set in Hollywood contracts."

THE BAPTIST CHURCH—The Rev. C. N. Brown of Trinity United Church will preach tomorrow morning in the Baptist Church, his subject being "Salvation by Grace." The Minister, Dr. A. C. Vincent, will preach at the evening service, taking as his theme "What to do with the sermon." Mr. Spencer will give a short organ prelude from 6.45 to 7 o'clock. Among the music of the day will be Dudley Buck's anthem, "So Be Joyful," W. E. Fletcher's "Dear Lord and Father of Mankind" a gospel hymn, "Garden of Prayer." Mr. V. L. Dingwell will take the solo in the last mentioned. Mr. Quigley takes the solo in this morning anthem and Mrs. H. S. Henderson, in the evening.

BROOKFIELD SCHOOL CONCERT

The semi-annual examination of Brookfield School was held in the schoolroom on Friday afternoon, Dec. 12 with a large number of rate payers and visitors in attendance.

The school was artistically decorated for the occasion by the teacher and pupils.

After the pupils were examined in their various subjects by their teacher Miss Annie MacEachern assisted by a former teacher, Mr. Chas. MacDuff. The following program was carried out.

Speech by the chairman, Mr. Chas. MacDuff.

Christmas chorus by pupils and audience.

Welcome exercise by seven pupils Solo by Hope MacLeod Dialogue, The Day After Christmas.

Solo by Mildred Gallant Santa Claus Playette by Four Pupils. Recitation by Hope MacLeod (encored).

Valedictory by Mildred Gallant. At the close of the program appropriate speeches were made by Messrs Chas. MacDuff, Gordon MacLeod, Kaymond Cruwys and then Santa appeared in his usual jolly manner and distributed gifts from a well laden Christmas tree to both teacher and pupils.

RUSSIAN TRAINS HOLD UP PLAN

BY RUNNING SEVEN MILES HOURLY

MOSCOW, Jan. 9.—The highly important transportation conference, specially summoned by the Central Committee of the Communist Party, began today to study ways to improve what is admitted to be the weakest factor in the five year plan.

A leading editorial in Economic Life calls the conditions of transport thoroughly unsatisfactory, and gives many figures in proof. During the past three months, the average daily freight car loadings, originally set for 70,000 and then reduced to 50,000, actually averaged 46,000 and dropped in December to 42,000. On Jan. 1 the freight car loading shortage amounted to 50,000 cars, compared with 3,000 at the beginning of last year. The daily run of a freight locomotive was set at 120 miles, but the actual average was 35 miles. The average speed of a freight train was set at 9 miles per hour, but the actual average was 7 miles. The supply of locomotives and passenger and freight cars fell far below the estimates, and their condition is much worse. Railway accidents increased to an alarming extent.

On Monday night, Dec. 29th, Miss Marie Paquet, of Georgetown, gave a musical recital in St. Alexis parish hall, which was greatly enjoyed by those present.

Mr. Earl Grant, Montague, was a recent visitor to Rollo Bay East.

FISH THAT SING AND HOOT

The Island of Ceylon produces an anomaly in a shellfish of the mussel type which sings. While it does not warble like a bird or an opera singer, it produces a long, low, fluty sound, which has a musical quality. Seeing that these bivalves do not possess a throat in any accepted sense of the word, and certainly no vocal cords, this singing sound must be produced by some manipulation of their double shell. It is possible that increasing dryness does the trick, for the sound only occurs after the tide has been down for a considerable time, leaving the bivalves high and dry on the rocky beach.

There is a fish which hoots, too. The Scots fisherman calls this fish the buttermilk and, when caught by line or net, it makes a noise from the back of its throat when landed. Eels also make a noise when the hook is being removed from their gills. The common and very ugly guard of our coast grunts loudly when hauled to the surface, a strange croaking noise more like the caw of a crow than the sound a fish seems likely to produce.

BRITISH BOYS ARE VERY UNFIT

LONDON, Jan. 9.—A grave warning affecting the future of the British race has been issued by Sir George Newman, chief medical officer for the Government Board of Education. Although Britain is annually saving 40,000 young lives

which would not have been saved a generation ago, this preservation of less physically fit children, combined with the fact that the birth rate is declining more rapidly among the better physical stocks of the population than among the less fit classes, explains why the present generation of school children may be relatively lacking in physical stamina and powers of resistance. Theoretically, he says, Britain could get a strong physical race by allowing the feeble specimens to die out, but asks who is to select the best stock.

The law of survival of the fittest, he argues, may prevail in nature, but for man the fittest is not necessarily the best. Sir George questions the advisability of direct class instruction on sex problems, and urges their wholesome view on sex should be induced indirectly by teaching hygiene from a biological standpoint. Children to be fit in later life should be taught methods of health in addition to mere book information. That children be fit, alert, sound in mind and limb, and disciplined in sense and body, is better than at fifteen having some real nans of school book learning.
