Combined Standing Fields and Threshed Grain Competition, 1932

Cash Prizes for Field of Oats, Wheat, Barley and Certified Seed Potatoes.

There will be competitions in the three counties where there are five or more entries each for Wheat, Barley, Oats and for Potatoes grown from Certified Seed.

RULES AND REGULATIONS

1. A field of Oats shall consist of at least five acres, of Wheat and Barley three acres, of Certified Seed Potatoes two acres.
2. An entry fee of \$1.00 shall be charged for the first, and fifty cents for each additional entry of Grain, and \$1.00 for each entry of Potatoes.
3. The entry fee shall accompany the application.
4. Entries should be made to the Department of Agriculture not later than August 15th, 1932.
5. REGISTERED SEED ONLY. The field of Oats entered for inspection must be seeded with Registered Oats. Owing to the change in the regulations made by the Seed Branch, Ottawa, fields seeded with unregistered Oats will not be eligible for the competition.

"Payroll!" Sir George looked at him in astonishment. "Do you mean the payroll for your employees in the city?" Robert MacBeth shook his head. "Not the office. A much bigger thing. The money for the men on the construction job. You will like to laugh at the idea that this has anything to do with it, but though I've tried to, somehow I can't succeed in laughing very hard. I have a feeling these letters have some connection with a gang of men who mean to have a try for that payroll again, if they can't get at me and my money this way." He shook the letter.

"But surely you've taken precautions? Why not pay the men by check?" Robert MacBeth made a wholly contemptuous gesture with his hand which still held the letter. "Use your head. I can't pay laborers by check. Lots of the foreigners don't know what to do with checks. No, we've got to make and keep things safe ourselves."

He looked at Sir George, and, leaning toward him in a low tone, "It's all right in New York. I can get protection, armored cars if need be, but I've a hunch there's trouble brewing for me and I've got a great many thousands of dollars to pay out on the big piece of construction work being done up the river. It's how to get the money there safely that is puzzling me now."

He paused a moment and said quietly: "I don't mind telling you that I have the sum deposited in the nearest local bank. I'm going to send some one down to collect it from the bank later and that some one may be you." He looked at Sir George questioningly. "Yes, of course, but when and how?"

"That's what I want you to tell me. I'd like you to go down with Roberta today and look over the lay of the land."

"Can't your man take me?" Sir George asked. "Might find out more that way."

"I don't want the servants to know or suspect anything about it, nor the people in the village. In fact, I don't want anybody to know anything about it, except possibly Roberta."

"Must she know? Why drag a girl into this?"

"Roberta won't be dragged in," her father promised him. "But I want her to take you down the river to the bank and up the river to show you where the money is to be taken."

"By motor?"

"Yes."

"But you surely wouldn't let the girl ride if there was likelihood of danger."

"No, but you could drive yourself, once you knew the way."

"Oh, yes."

"Well, go with her to the village and to the bank, where she will cash a check and introduce you to the cashier. Then tomorrow she'll take you up the river."

"Have you told her this?"

"Not yet. Why?"

"It's barely possible she may have made arrangements of her own."

"She'll change that if I ask her," her father said easily.

"Ah—"

Sir George was not aware himself of how much he put in that "Ah." It was sufficient to make Robert MacBeth turn his head quickly and survey the young man. Having turned it he saw that the young man's eyes were fixed on a spot of blue. MacBeth was presently able to observe that this was a car on the high road over on the mainland and that opposite that car was a dim blur that had a bronze color. He remembered the color of the dress his daughter had been wearing that morning and turned his head so that the younger man might not see his face. Sir George continued to watch the bronze blur until it took shape and outline and began to look like Roberta MacBeth. Then he started, aware that the silence had been long.

"You were saying?"

"That I'll tell Roberta what I want as soon as she crosses the river. Or will you meet her and tell her I want to see her? And take yourself off for a time."

Dr. Jack's

For headaches, neuralgia, muscular pains, flu, etc., nothing gives such lasting relief as Dr. Jack's. Women find them marvelous. Not like ordinary tablets. Safe. Don't affect heart or stomach. 12 tablets in tin, 25c. At all druggists and stores.

Farm Notes

SEE GOOD PEAR CROP

Prospects are exceptionally good for a large pear crop in the Province of Ontario, according to latest estimates of the Department of Agriculture at Ottawa. The trees came through the winter with very little injury and weather conditions have been excellent for the development of the fruit. Niagara district looks for a yield double that of last year and Burlington also expects to top last year's figures. Taken as a whole, the production for the Province should be far in excess of 1931.

In Nova Scotia, however, conditions have not been so favourable. Cool weather has reduced the set of the fruit and the crop will probably be about two thirds of that of last year.

British Columbia should have a crop about equal to last year's. Kelowna, Penticton and Summerland, the leading pear growing areas, expect slightly reduced yields and other districts vary considerably.

Taken generally, Canada's pear crop for 1932 should be considerably greater than in 1931.

feel ashamed of herself.

"Oh, I say," she said, "That was unfair and I didn't really mean it."

Sir George did not stop. "It doesn't matter," he said stiffly. "Your father is waiting to see you."

The girl angrily kicked a rock off the towpath into the canal "Well, if you want to be hateful, be hateful," he said. "If you would only get it into your extraordinarily pretty little head," he told her not unkindly, "that I'm here because I have to earn my living and your father has been good enough to give me a post—that's that. As for you and your friends, at the risk of being thought rude, I tell you that I don't give a tanker's d-n whom you meet or where you meet him, and that's all of that."

There had been a quickly drawn breath and then silence and he had walked on over the canal bridge to the highway, feeling completely ashamed of himself. Why had he lost his temper? His remorse turning on him he was about to gain once more when the sound of flying footsteps came to him. He turned to confront an angry and flame-cheeked girl, who told him vehemently: "You've just got to know this. You don't hate me one degree less or more than I hate you."

"Well, since we know it's mutual," said Sir George evenly, "suppose we go on hating each other as much as we like in private, and keep a friendly smile to face the world." He smiled at her now.

"Oh, you're hateful!" the girl cried. "Just when I meant to be decent to you for father's sake, you make it impossible. I promise you I'll do anything I can to speed your return to Bonnie Scotland."

"Ah," returned the homesick Sir George, his heart in his voice, "if you only could."

The girl looked at him speechless a moment and yet she did not go. He wondered why, but almost before he had done wondering he suddenly saw the answer to his question. The blue car was some little way ahead of him, on the tree-shaded cross road to the highway, and its owner was struggling frantically to start it.

U. M. W. Conference To Be Postponed

GLACE BAY, N. S. Aug. 11.—(By the Canadian Press)—Scheduled for August 16, the annual election of district 26, United Mine Workers of America, will be postponed if the International Board grants its approval.

This was decided today at a meeting of the district executive. A conference to have been held with officials of the International Board was delayed on account of the death of Secretary W. P. Delaney, while he was en route to New York. It is probable the conference will be held at Glace Bay.

Vice-President P. G. Muise today was appointed acting secretary.

Warm weather interspersed with scattered showers has brought grain along very rapidly in Western Canada and early this month the whirl of binder and put-put of tractor-drawn combines will resound over the whole of the grain growing areas, according to the weekly crop report of the Agricultural Department of the Canadian National Railways. In the more northerly districts rank heavy growth will delay ripening and an early frost would cause havoc, although at present damage from devastating hail, wind, drought, soil blowing and insects and rust has affected a very small percentage of the western acreage.

Railway history in the Maritimes was recalled recently when original construction plans of the European and North American Railway, which operated between Saint John on the Bay of Fundy, and Point du Chene on the Strait of Northumberland, in New Brunswick, and now forms part of the Atlantic Region of the Canadian National Railways, were sent to the Provincial Museum in Saint John for filing there. Although the construction of the road was commenced in 1833 and was completed in 1860, the plans for some of the buildings, including roundhouse and other structures in Saint John, bore the date of 1838, showing that plans for the railway had been laid even at that early date. The plans, which are on heavy drawing paper, are water colored and show the old "U" type of rails in use at that time. The idea of railways was in the public mind in New Brunswick earlier even than this as at a meeting of merchants and other inhabitants of St. Andrews, held in the News Room in that town on October 5, 1835, steps were taken to organize a joint company "to undertake the construction of a railroad from St. Andrews to the City of Quebec in Lower Canada." However, they had to wait until 1876

when the St. Andrews and Quebec Railway for points in the Maritimes. The

was completed through to Levis before this was accomplished.

Not the least important factor in the gratifying results already flowing from the Canada-New Zealand trade treaty, ratified last April, are the ships of the Canadian National Steamship fleet. Trade figures released by the Department of Trade and Commerce of Canada show that exports to New Zealand doubled in June reaching a value of \$327,578. According to this report this value is made up of agricultural and vegetable products \$128,651; wood and paper, \$65,383; textiles, \$39,253; mineral products, \$57,119; animals and animal products, \$21,968. Ships of the Canadian National fleet maintain regular services with this part of the Empire in the Antipodes as well as Australia, the "Canadian Highlander" reaching the latter dominion on Monday last with a good cargo of Canadian products, thus emphasizing the importance of this trade which is hoped the Imperial Economic Conference now sitting in Ottawa will cause to be greatly expanded to the material advantage of Canada as well as Australia and New Zealand.

To New Brunswick falls the honor of staging the first North American Cover Dog Trials international championship, according to local officials of the Canadian National Railways. These trials will be held during the week of September 26th and will be in charge of Ozark Ripley of Chattanooga, Tenn., internationally-known naturalist and writer. Mr. Ripley, who attended the meeting at which the decision was announced, stated several years ago he had gone over the New Brunswick territory which will likely be selected as the scene of the trials and became convinced that this province had natural location for such events far superior to any other part of the North American continent, as well as a greater abundance of native ruffed grouse and woodcock. Rev. A. P. Allen, of Petersburg, N. B., was elected President of the newly formed North American Cover Dog Association here.

The first congress of Acadians ever held on Prince Edward Island took place recently at Egmont Bay, the oldest Acadian settlement in the province. At the time of the exile of the Acadians in 1755 several escaped to Prince Edward Island and after their return some took lands in the island province. Mr. Justice A. E. Arsenault of Charlottetown, P. E. I., who last year was President of the Canadian Association of Tourist and Publicity Bureaux and is President of the Prince Edward Island Tourist Association, is an Acadian descended from the early Acadian settlers of the province. There were no sanguinary battles fought here, the history of Prince Edward Island having none of those stirring tales associated with the sister Maritime Provinces, but its history is interesting nevertheless. The province will always take first rank in the story relating to Confederation as it was in the Legislative Chamber in the parliament buildings of the province that the first meeting between delegates from Canada, which constituted the provinces of Quebec and Ontario, and the Maritimes took place and out of this meeting grew the accomplishment of the pact. The Canadian National Railways hotel, The Canadian National, is located on the site of the home of one of the early governors of the island.

For the first time since the 17th century the ancient flag of the province of Nova Scotia was flown from the mast of a ship in Saint John harbor when the S. S. "Saint John" of the Eastern Steamship Lines sailed for Boston recently. The flag, which is older than the Union Jack, was presented by the Mayor of the city on the maiden trip of the "Saint John". A similar flag flies at the mast head of the S. S. "Acadia," sister ship of the "Saint John," plying between New York and Yarmouth, N. S. These boats are in passenger service between Boston and Saint John and New Brunswick and Yarmouth respectively, and make direct connections with the lines of the Canadian National Railways

for points in the Maritimes. The

C. N. R. QUIDNUNC

From the archives of ancient China comes a treatise on monetary matters which would go to bear on the biblical assertion "There is nothing new under the sun." A bulletin of the Natural Resources Department of the Canadian National Bank of Canada which gives a translation of a treatise by a 13th century scholar-statesman Ma-Tuan-lin and taken by him from original Chinese sources. The original was written twenty-five hundred years ago during the Chou Dynasty and was translated in the Gest Chinese Research Library at McGill University, Montreal. When reading it the sense will be clear if modern terms and usages are substituted. The increase in the value of gold between 1929 and the present date may be likened to the substitution of the heavier coin. Purchasing power is no longer increased or decreased by changing the weight of coin but is done more effectively by the action of a central bank. It is claimed the failure to prevent a fall in world prices by appropriate banking policy has, in effect, created "heavier money" with all the disastrous results foreseen by Shan Mu-Kung.

The treatise reads "In the year 524 B. C., Emperor Ching of the Chou Dynasty thought that the coins in circulation were much too light, and issued an order to mint heavier coins and banish the light ones entirely from circulation. Regarding this drastic change, Shan Mu-Kung, a minister of the government, comments as follows: From time immemorial the monetary system of the country has always been so regulated as to relieve the people in time of distress, (i. e. economic depression). When the inconvenience of the people is not great, more heavy coins are put into circulation for the reason that when the coins are light prices of commodities go up. In this case the heavy coins are standard value, while the light ones are auxiliaries—but they are both in circulation. On the other hand, if the inconvenience of the people is great they cannot bear the burden of heavy money. The light money automatically becomes the standard value and the heavy auxiliary. Now, the Emperor has ordered the abolition of light coins completely. The immediate result of this change will be an enormous decrease in the income of the people and consequent hoarding will be inevitable. All this causes a bad effect on the national treasury and directly raises the rate of taxation. When the rate of taxation is raised, financial disaster and political discontent follow. Preparation should be made in advance to meet the coming of a financial crisis. If remedy is to be applied only after the crisis has arrived it may be impossible to meet the exact condition and consequently will cause great anxiety."

Well, since we know it's mutual," said Sir George evenly, "suppose we go on hating each other as much as we like in private, and keep a friendly smile to face the world." He smiled at her now.

"Oh, you're hateful!" the girl cried. "Just when I meant to be decent to you for father's sake, you make it impossible. I promise you I'll do anything I can to speed your return to Bonnie Scotland."

"Ah," returned the homesick Sir George, his heart in his voice, "if you only could."

The girl looked at him speechless a moment and yet she did not go. He wondered why, but almost before he had done wondering he suddenly saw the answer to his question. MR. ARCHIBALD CAMPBELL

Mr. Campbell, only survivor of a family of four of Mr. Henry and Mrs. Campbell, Milltown, Caledonia, P. E. I. unexpectedly departed this life at his home on Monday a. m. July 11th, 1932 aged 40 years. His death came as a shock to this entire community and as an unmeasured sorrow to his frail and aged parents. His trouble which largely took the form of severe pains in the head began in a cold contracted while ploughing a few months ago, hurried him to the end faster than anybody realized. He took his pains with remarkable Christian resignation. In fact the testimony of his parents and those who saw him in his illness is, that if his body sank fast down to the grave, faster still did his soul mount up as on wings ripening for the heavenly land. He was thoroughly eager to go despite the pathetic fact that he was leaving behind him a grief stricken and heart-broken father and mother respectively 79 and 78 years old. Fraternal helplessness, lonely though they were he was confident that his and that Heavenly Father, would take care of them and carry them safely home where there would be a reunion of them all to part no more.

On his death-bed, especially towards the end Mr. Campbell appeared to have had remarkably vivid experiences or impressions, as if his loved ones gone before, especially his sister, were near and beckoning him to the Home Eternal, "Beautiful and Bright."

The testimony of the neighbors of him is that of a most obliging, inoffensive and kindly man, of his parents that of a most dutiful, worthy and loving son, from his youth up good faithful, most devoted to his father and mother and home.

Mr. and Mrs. Henry Campbell, the former originally from near Fredericton, N. B., 70 years ago the latter a Miss Matheson from Lyndale, P. E. I., members of the Church of Scotland, in their time were called on to pass through the deep waters of affliction and bereavement. On July 12th last the grave closed over the fourth and last of their family, William, Cyrus and Maggie Bell, passing on before. By grace and strength from God, the frail aged couple are patiently waiting and silently weeping, but reconciled, kissing the rod and Him who ordered it until their change comes, looking forward to the glorious day of the reunion in the Father's House for ever more.

The funeral service at the home and grave in Brooklyn cemetery, largely attended, were conducted by the Rev. Allister Murray of the Presbyterian Church, Caledonia. The bereaved parents may rest assured that they have the sincerest and deepest sympathy of all the neighbors around as they showed during the period of their son's illness, six of their number acting as pallbearers.

A TEMPERANCE TREASURE

A notable temperance record had been brought to notice by the death of John Carthy, of Ballinamore, in Ireland. He took the pledge in 1842, and kept it for ninety years.

The temperance movement is proud of its pioneers, of whom Carthy may be reckoned one. The Walton-le-Dale cottage of Joseph Livesey, the leader of the "Sever Men of Preston," who were the first to sign a total abstinence pledge, is being preserved and turned into a temperance museum.

Even Joseph Livesey's tea cup is carefully preserved, and was on view at the recent Total Abstinence Centenary Congress in London. There is an inscription on the bottom of the cup: "Put no rum in me," and it is the only remaining relic of the first Christmas temperance teaparty, held at Preston in 1832, at which forty "reformed drunkards" acted as waiters.

This historic cup was nearly lost during the London congress. It was discovered one evening that it was missing, and it only turned up again next afternoon, when it was found among the ordinary washings, which had been washed and locked away after tea was served to the delegates.

Blinks—"So your wife entertained her club yesterday afternoon, eh?"

Jinks—"That
