

NEWS OF THE WEEK IN PICTURES FOR GUARDIAN READERS

THESE BOYS CAN TAKE ON ANY JOB

Hey, red cap! Just look after these for a while, eh? Messenger boys in England apparently have a larger scope of duties than on this side of the water.

STRANGE COSTUMES AND HAIRY FACES MARK CELEBRATION

No, this isn't a circus. This rollicking group of youths and maidens is out to have a good time. The ABOVE picture was taken during the Nuncaton carnival which is celebrated with great enthusiasm every year in England.

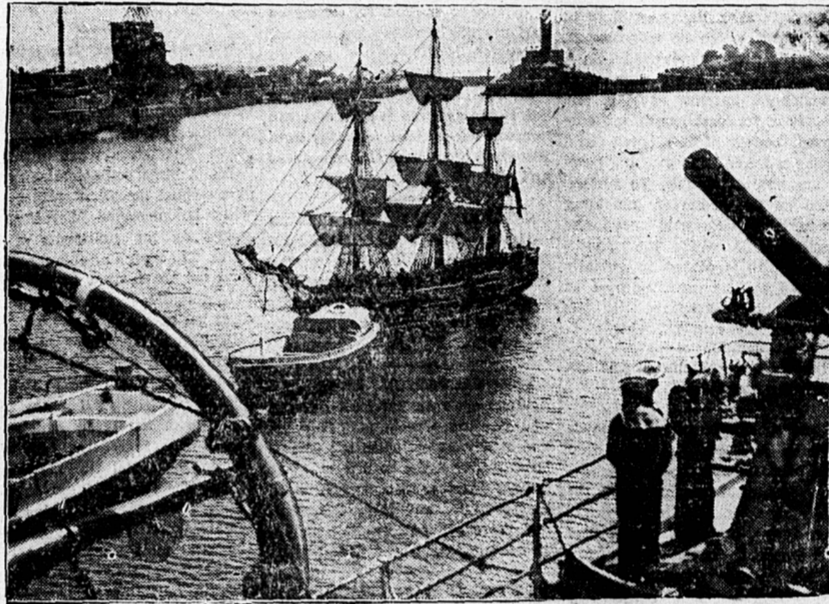

PICTURE STORY OF GANDHI'S TRIP TO LONDON

Seemingly oblivious of the great task before him, Mahatma Gandhi, spiritual leader of 360,000,000 people of India, is perhaps the world's most unassuming leader. He is now in London conferring with British statesmen regarding the destiny of his country. Here is a picture taken on his trip to England showing Mahatma working at his tiny spinning wheel aboard ship, while Mrs. N. du and Gaudit Malaviya, two of his disciples, watch.

DEER AND RABBIT BECOME PALS

Inseparable chums for two years this rabbit and deer have travelled together in Grand Canyon National Park in Arizona. Naturalists are responsible for the story that on cold nights the rabbit keeps warm by keeping on the deer's back.

COLORFUL SCENES OF BYE-GONE DAYS IN NAVY CEREMONY

This picturesque naval scene took place during recent Catham, England, naval week and shows H. M. S. Kent and an old-time ship replica passing N.M. S. York. Much of the color of by-gone days of the sea was introduced into the pageantry and ceremony of the event.

IN RICHMOND SHOW

Mrs. Osborn of London, England, enters her Irish wolfhound in the Richmond championship dog show.

THE LATEST THING FOR THE BRIDESMAID

Huh! Huh! And for weddings too. These two girls are dressed in the very latest as bridesmaids. Note the trousered tunic and a slight air of the mid-Victorian. Very slight.

MAKES FIRST APPEARANCE SINCE WILD KIDNAP

Seemingly completely recovered from the effects of his wild and mysterious dash from the United States to Canada in which he was seriously injured when his motor car crashed, Mr. Perkins Bull, famous barrister, entertained at a garden party on which occasion an all-Canadian library was presented to his son, Mr. Michael Bull, and his recent bride by Premier Henry of Ontario. The ABOVE picture shows Mr. and Mrs. W. Perkins Bull.

YOUNG DEER BEFRIENDS COLLIE DOG

Here is a pet fawn at Mr. and Mrs. John C. Cochran's farm, near Angus, Ont., with its young mistress, Dorothy Cochran, aged 13, bringing her collie and fawn, Chevette, together and stroking them both. She has made them friends with each other.

FIANCE SAFE

Frances Bresson, fiancée of Don Moyle, who, with Ceil Allen, was forced down on a uninhabited island off the coast of Kamchatka while on flight to Seattle from Tokyo, reads telegram sent to her by Moyle after his rescue.

IN LADIES' HANDICAP

Mrs. E. C. Forgie, winner of ladies' handicap against par, at the annual token polo golf tournament at Jasper Park, Alberta.

SHIPWRECK A PLEASURE TO HER

Stephanie Baron is just 2 1/2 years old, but she loves bananas, and when she was one of those picked up from the wreckage of the Colombia which went aground recently on the Pacific Coast, by the fruit steamer La Perla, the ship proved more than a paradise for her. She ate practically nothing but bananas. The picture shows Miss Stephanie in action.

Butter Milk Made From Skim Milk

Buttermilk of the finest quality is probably that produced by churning clean-flavored cream which has been properly ripened with the aid of a pure culture of lactic acid. Surplus skimmed-milk may, however, in many cases, be profitably converted into an artificial buttermilk of practically the same composition and quality as the natural buttermilk. In making artificial buttermilk the skimmed-milk may or may not

be pasteurized. In either case about 10 per cent. of clean flavored lactic acid culture should be added to the skimmed-milk which is maintained at a temperature of 70 degrees F. until coagulation takes place. If the time required to produce coagulation is too long the process should be hastened by increasing the percentage of culture used, rather than by raising the temperature above 70 degrees F. will usually result in a product of inferior flavor. As soon as coagulation has taken place the curdled milk is transferred to the churn which is revolved for 30 to 40 minutes as in churning cream. If the skimmed-milk is allowed to stand long after coagulation takes place before being

churned, the whey and curdy matter of the finished product will show a greater tendency to separate. The churning breaks the curd into fine particles producing a smooth velvety buttermilk which is difficult to distinguish from a good natural product. As soon as the artificial buttermilk is drawn from the churn it should be strained to remove any particles of curd which may not have been broken up in the churning process. The temperature of the product should at once be reduced to at least 50 degrees F. to retard the development of acidity and of undesirable flavors. Artificial buttermilk may also be satisfactorily produced in a small way in the home. A clean fruit jar of suitable size may be partially

filled with clean fresh skimmed-milk which is allowed to sour naturally at a temperature of 70 degrees Fahrenheit to 75 degrees Fahrenheit. When coagulated, the milk should be vigorously shaken for a few minutes in the closed jar. It may now be strained to remove any lumps of curd not finely broken up by the agitation after which it should be kept in a cool place. If a clean pleasant flavor is obtained by such natural souring and the artificial buttermilk is to be made frequently, it is advisable to add a few ounces of the first artificial buttermilk to the next quantity of skimmed-milk to be soured. Thus the desirable flavor may be reproduced from time to time in the same manner as yeast

is propagated. The composition of such artificial buttermilk is practically the same as that of natural buttermilk, the only difference being that the latter usually contains slightly more milk fat. The percentage of milk fat in the artificial buttermilk may be increased to approximately that of natural buttermilk by adding to each one hundred pounds of skimmed milk before souring, two quarts of whole milk. Issued by the Department of Agriculture Dairy Commissioner.

Pepper and Cabbage Salad.

Wash and soak in slightly salted water 1 small cabbage cut in quarters. Seed 2 sweet green peppers

and cut in fine shreds. Chop cabbage after draining. Mix with mayonnaise, to which has been added a cup of chopped peanuts. (Boiled dressing may be used instead of mayonnaise.)

TRACK COACH TO TRAIN PENN FOOTBALL PLAYERS

PHILADELPHIA, Sept 25 (U. P.)—Lawson Robertson, track coach of the University of Pennsylvania, has been assigned to supervise the physical condition of the football team.

Robertson who will be head coach of the American Olympic team at Los Angeles next summer, is recognized as an authority on physical condition. He has been associated with the United States

Olympic teams since 1920 acting as head coach in 1924 and again in 1928. The veteran track coach's duties will be to keep a careful watch to regulate the proper amount of practice conducive to their physical well being.

Tomorrow Morning! Shave with

Cuticura

SHAVING CREAM

Note how it softens, soothes and refreshes.

A New Cuticura Product

At your dealers or sent post-paid on receipt of 50c. Address: J. T. Wells Company, Ltd., Montreal.
