 As instancing the hold hockey has on even the very small youths of the town, the following story is told. In Sunday School recently the teacher was telling a class of small boys the life story of a noted missionary. "He was born on Prince Edward Island," she said, when one of the class interjected "That's where all the good hockey players come from. Do all the good missionaries come from there too?" Then he proceeded to enumerate the hockey phenoms, native to P. E. Island, just as the teacher had previously named the missionaries who had left the Garden of the Gulf to make history among the blacks of a foreign land. Needless to say, the amazed teacher blew the whistle and promptly declared the boy "off side." The same bright boy rather astonished his mother on the way home from church a Sunday or two ago with "Say, mother, wasn't that a nice piece the man played on the pipe organ at half time?"—New Glasgow Chronicle.

Alabastine
For Permanency
 When you decorate with Alabastine you do so for permanency as well as superior artistic effect. Unlike kalsomine, Alabastine does not rub off or crack. Unlike wall paper, it does not peel off or decay. Alabastine, you see, is a hygienic cement, made from gypsum rock. It gradually hardens and becomes part of the wall itself. If, at any time, you wish to re-decorate with a different style, simply apply Alabastine over the Alabastine coating upon several years before. Call and let us show you tint cards. Get a copy of "Homes, Healthful and Beautiful," the handsome book of stylish wall decorations. Price of Alabastine is 50c. for 5 lb. pkg.
